ENGLISH LANGUAGE:

IN WHICH,

Not only the Meaning of every Word is clearly explained, and the Sound of every Syllable diſtinctly ſhown, but, where Words are ſubject to different Pronunciations, the Authorities of our beſt Pronouncing Dictionaries are fully exhibited, the reaſons for each are at large diſplayed, and the preferable Pronunciation is pointed out.

TO WHICH ARE PREFIXED,

PRINCIPLES OF ENGLISH PRONUNCIATION:

IN WHICH

The Sounds of Letters, Syllables, and Words, are critically inveſtigated, and ſyſtematically arranged; the Influence of the Greek and Latin Accent and Quantity, on the Accent and Quantity of the Engliſh, is thoroughly examined, and clearly defined; and the Analogies of the Language are ſo fully ſhown, as to lay the Foundation of a conſiſtent and rational Pronunciation.

PREFACE.

FEW ſubjects have of late years more employed the pens of every claſs of critics, than the improvement of the Engliſh language. The greateſt abilities in the nation have been exerted in cultivating and reforming it; nor have a thouſand minor critics been wanting to add their mite of amendment to their native tongue. Johnſon, whoſe large mind and juſt taſte made him capable of enriching and adorning the Language with original compoſition, has condeſcended to the drudgery of diſentangling, explaining, and arranging it, and left a laſting monument of his ability, labour, and patience: and Dr. Lowth, the politeſt ſcholar of the age, has veiled his ſuperiority in his ſhort Introduction to Engliſh Grammar. The ponderous folio has gravely vindicated the rights of analogy; and the light ephemeral ſheet of news has corrected errors in Grammar, as well as in Politics, by ſlyly marking them in italics.

Nor has the improvement ſtopped here. While Johnſon and Lowth have been inſenſibly operating on the orthography and conſtruction of our Language, its pronunciation has not been neglected. The importance of a conſiſtent and regular pronunciation was too obvious to be overlooked; and the want of this conſiſtency and regularity has induced ſeveral ingenious men to endeavour at a reformation; who, by exhibiting the irregularities of pronunciation, and pointing out its analogies, have reclaimed ſome words that were not irrecoverably fixed in a wrong ſound, and prevented others from being perverted by ignorance or caprice.

Among thoſe writers who deſerve the firſt praiſe on this ſubject, is Mr. Elphinſton; who, in his Principles of the Engliſh Language, has reduced the chaos to a ſyſtem; and, by a deep inveſtigation of the analogies of our tongue, has laid the foundation of a juſt and regular pronunciation.

After him, Dr. Kenrick contributed a portion of improvement by his Rhetorical Dictionary; in which the words are divided into ſyllables as they are pronounced, and figures placed over the vowels, to indicate their different ſounds. But this gentleman has rendered his Dictionary extremely imperfect, by entirely omitting a great number of words of doubtful and difficult pronunciation—thoſe very words for which a Dictionary of this kind would be moſt conſulted.

To him ſucceeded Mr. Sheridan, who not only divided the words into ſyllables, and placed figures over the vowels as Dr. Kenrick had done, but, by ſpelling theſe ſyllables as they are pronounced, ſeemed to complete the idea of a Pronouncing Dictionary, and to leave but little expectation of future improvement. It muſt, indeed, be confeſſed, that Mr. Sheridan's Dictionary is greatly

greatly ſuperior to every other that preceded it; and his method of conveying the ſound of words, by ſpelling them as they are pronounced, is highly rational and uſeful.—But here ſincerity obliges me to ſtop. The numerous inſtances I have given of impropriety, inconſiſtency, and want of acquaintance with the analogies of the Language, ſufficiently ſhew how imperfect * I think his Dictionary is upon the whole, and what ample room was left for attempting another that might better anſwer the purpoſe of a Guide to Pronunciation.

The laſt writer on this ſubject is Mr. Nares, who, in his Elements of Orthöepy, has ſhewn a clearneſs of method and an extent of obſervation which deſerve the higheſt encomiums. His Preface alone proves him an elegant writer, as well as a philoſophical obſerver of Language: and his Alphabetical Index, referring near five thouſand words to the rules for pronouncing them, is a new and uſeful method of treating the ſubject: but he ſeems, on many occaſions, to have miſtaken the beſt uſage, and to have paid too little attention to the firſt principles of pronunciation.

Thus I have ventured to give my opinion of my rivals and competitors, and I hope without envy or ſelf-conceit. Perhaps it would have been policy in me to have been ſilent on this head, for fear of putting the publick in mind that others have written on the ſubject as well as myſelf: but this is a narrow policy, which, under the colour of tenderneſs to others, is calculated to raiſe ourſelves at their expenſe. A writer, who is conſcious he deſerves the attention of the Publick, (and unleſs he is thus conſcious he ought not to write,) muſt not only wiſh to be compared with thoſe who have gone before him, but will promote the compariſon, by informing his readers what others have done, and on what he founds his pretenſions to a preference; and if this be done with fairneſs and without acrimony, it can be no more inconſiſtent with modeſty, than it is with honeſty and plain dealing.

The work I have to offer on the ſubject has, I hope, added ſomething to the publick ſtock: it not only exhibits the principles of pronunciation on a more extenſive plan than others have done, divides the words into ſyllables, and marks the ſounds of the vowels like Dr. Kenrick, ſpells the words as they are pronounced like Mr. Sheridan, and directs the inſpector to the rule by the word like Mr. Nares; but, where words are ſubject to different pronunciations, it ſhows the reaſons from analogy for each, produces authorities for one ſide and the other, and points out the pronunciation which is preferable. In ſhort, I have endeavoured to unite the ſcience of Mr. Elphinſton, the method of Mr. Nares, and the general utility of Mr. Sheridan; and, to add to theſe advantages, have given critical obſervations on ſuch words as are ſubject to a diverſity of pronunciation, and have invited the inſpector to decide according to analogy and the beſt uſage.

But to all works of this kind there lies a formidable objection; which is, that the pronunciation of a Language is neceſſarily indefinite and fugitive, and that all endeavours to delineate or ſettle it are in vain. Dr. Johnſon, in his Grammar, prefixed to his Dictionary, ſays: "Moſt of the writers of Engliſh "Grammar have given long tables of words pronounced otherwiſe than "they are written; and ſeem not ſufficiently to have conſidered, that, of "Engliſh, as of all living tongues, there is a double pronunciation; one, "curſory and colloquial; the other, regular and ſolemn. The curſory pro-

" nunciation is always vague and uncertain, being made different, in different " mouths, by negligence, unskilfulneſs, or affectation. The ſolemn pronun- " ciation, though by no means immutable and permanent, is yet always leſs " remote from the orthography, and leſs liable to capricious innovation. " They have, however, generally formed their tables according to the curſory " ſpeech of thoſe with whom they happened to converſe, and, concluding that " the whole nation combines to vitiate language in one manner, have often " eſtabliſhed the jargon of the loweſt of the people as the model of ſpeech. " For pronunciation, the beſt general rule is, to conſider thoſe as the moſt " elegant ſpeakers who deviate leaſt from the written words."

Without any derogation from the character of Dr. Johnſon, it may be aſſerted, that in theſe obſervations we do not perceive that juſtneſs and accuracy of thinking for which he is ſo remarkable. It would be doing great injuſtice to him, to ſuppoſe that he meant to exclude all poſſibility of conveying the actual pronunciation of many words that depart manifeſtly from their orthography, or of thoſe that are written alike, and pronounced differently, and inverſely. He has marked theſe differences with great propriety himſelf, in many places of his Dictionary; and it is to be regretted that he did not extend theſe remarks farther. It is impoſſible, therefore, he could ſuppoſe, that, becauſe the almoſt imperceptible glances of colloquial pronunciation were not to be caught and deſcribed by the pen, that the very perceptible difference between the initial accented ſyllables of *money* and *monitor*, or the final unaccented ſyllables of *finite* and *infinite*, could not be ſufficiently marked upon paper. Cannot we ſhow that *cellar* a vault, and *ſeller* one who ſells, have exactly the ſame ſound; or that the monoſyllable *full*, and the firſt ſyllable of *fulminate*, are ſounded differently, becauſe there are ſome words in which ſolemnity will authorize a different ſhade of pronunciation from familiarity? Beſides, that colloquial pronunciation which is perfect, is ſo much the language of ſolemn ſpeaking, that, perhaps, there is no more difference than between the ſame picture painted to be viewed near and at a diſtance. The ſymmetry in both is exactly the ſame; and the diſtinction lies only in the colouring. The Engliſh Language, in this reſpect, ſeems to have a great ſuperiority over the French, which pronounces many letters in the poetic and ſolemn ſtyle, that are wholly ſilent in the proſaic and familiar. But if a ſolemn and familiar pronunciation really exiſts in our language, is it not the buſineſs of a grammarian to mark both? And if he cannot point out the preciſe ſound of *unaccented* ſyllables, (for theſe only are liable to obſcurity,) he may, at leaſt, give thoſe ſounds which approach the neareſt, and by this means become a little more uſeful than thoſe who ſo liberally leave every thing to the ear and taſte of the ſpeaker.

The truth is, Dr. Johnſon ſeems to have had a confuſed idea of the diſtinctneſs and indiſtinctneſs with which, on ſolemn or familiar occaſions, we ſometimes pronounce the *unaccented* vowels; and with reſpect to theſe, it muſt be owned, that his remarks are not entirely without foundation. The Engliſh Language, with reſpect to its pronunciation, is evidently diviſible into accented and unaccented ſounds. The accented ſyllables, by being pronounced with greater force than the unaccented, have their vowels as clearly and diſtinctly ſounded as any given note in muſic; while the unaccented vowels, for want of the ſtreſs, are apt to ſlide into an obſcurity of ſound, which, though ſufficiently diſtinguiſhable to the ear, cannot be ſo definitely marked out to the eye by other ſounds as thoſe vowels that are under the accent. Thus ſome of the vowels, when neither under the accent, nor cloſed by a conſonant, have a longer or a ſhorter, an opener or a cloſer ſound, according to the ſolemnity or familiarity, the deliberation or rapidity of our delivery. This will be perceived in the

ſound

Digitized from Best Copy Available

ſound of the *e* in *emotion**, of the *o* in *obedience*, and of the *u* in *monument*. In the haſty pronunciation of common ſpeaking, the *e* in *emotion* is often ſhortened, as if ſpelt *im-mo-tion*; the *o* in *obedience* ſhortened and obſcured, as if written *ub-be-di-ence*; and the *u* in *monument*, changed into *e*, as if written *mon-ne-ment*; while the deliberate and elegant ſound of theſe vowels is the long open ſound they have, when the accent is on them in *equal*, *over*, and *unit*: but *a*, when unaccented, ſeems to have no ſuch diverſity; it has generally a ſhort obſcure ſound, whether ending a ſyllable, or cloſed by a conſonant. Thus the *a* in *able* has its definite and diſtinct ſound; but the ſame letter in *tolerable*† goes into an obſcure indefinite ſound approaching the ſhort *u*; nor can any ſolemnity or deliberation give it the long open ſound it has in the firſt word. Thus, by diſtinguiſhing vowels into their accented and unaccented ſounds, we are enabled to ſee clearly what Dr. Johnſon ſaw but obſcurely; and by this diſtinction entirely to obviate the objection.

Equally indefinite and uncertain is his general rule, that thoſe are to be conſidered as the moſt elegant ſpeakers who deviate leaſt from the written words. It is certain, where cuſtom is equal, this ought to take place; and if the whole body of reſpectable Engliſh ſpeakers were equally divided in their pronunciation of the word *buſy*, one half pronouncing it *bew-ze*‡, and the other half *biz-ze*, that the former ought to be accounted the moſt elegant ſpeakers; but till this is the caſe, the latter pronunciation, though a groſs deviation from orthography, will ſtill be eſteemed the moſt elegant. Dr. Johnſon's general rule, therefore, can only take place where cuſtom has not plainly decided; but, unfortunately for the Engliſh Language, its orthography and pronunciation are ſo widely different, that Dr. Watts and Dr. Jones lay it down as a maxim in their Treatiſes on Spelling, that all words which can be ſounded different ways, muſt be written according to that ſound which is moſt diſtant from the true pronunciation; and conſequently, in ſuch a Language, a Pronouncing Dictionary muſt be of eſſential uſe.

But ſtill it may be objected to ſuch an undertaking, that the fluctuation of pronunciation is ſo great as to render all attempts to ſettle it uſeleſs. What will it avail us, it may be ſaid, to know the pronunciation of the preſent day, if, in a few years, it will be altered? And how are we to know even what the preſent pronunciation is, when the ſame words are often differently pronounced by different ſpeakers, and thoſe, perhaps, of equal numbers and reputation? To this it may be anſwered, that the fluctuation of our language, with reſpect to its pronunciation, ſeems to have been greatly exaggerated§. Except a very few ſingle words

§ The old and new Ἀτθὶς, with all the various dialects, muſt have occaſioned infinite irregularity in the pronunciation of the Greek tongue; and if we may judge of the Latin pronunciation by the ancient inſcriptions, it was little leſs various and irregular than the Greek. Aulus Gellius tells us, that Nigidius, a grammarian who lived a little more than a century before him, acuted the firſt ſyllable of *Valeri*; but, ſays he, "ſi quis nunc *Valerium* appellans "in caſu vocandi ſecundum id præceptum Nigidii acuerit primam, non aberit quin rideatur." —Whoever now ſhould place the accent on the firſt ſyllable of *Valerius*, when a vocative caſe, according to the precept of Nigidius, would ſet every body a-laughing. Even that highly poliſhed language the French, if we may believe a writer in the Encyclopédie, is little leſs irregular in this reſpect than our own.

"Il eſt arrivé," ſays he, "par les altérations qui ſe ſuccedent rapidement dans la manière de prononcer, & les corrections qui s'introduiſent lentement dans la manière d'écrire, que la prononciation & l'écriture ne marchent point enſemble, & que quoiqu'il y ait chez les peuples les plus policés de l'Europe, des ſociétés d'hommes de lettres chargés de les modérer, de les accorder, & de les rapprocher de la même ligne, elles ſe trouvent enfin

words which are generally noticed in the following Dictionary, and the words where *e* comes before *r*, followed by another conſonant, as *merchant*, *ſervice*, &c. the pronunciation of the Language is probably in the ſame ſtate in which it was a century ago; and had the ſame attention been then paid to it as now, it is not likely even that change would have happened. The ſame may be obſerved of thoſe words which are differently pronounced by different ſpeakers: if the analogies of the Language had been better underſtood, it is ſcarcely conceivable that ſo many words in polite uſage would have a diverſity of pronunciation, which is at once ſo ridiculous and embarraſſing; nay, perhaps it may be with confidence aſſerted, that if the analogies of the Language were ſufficiently known, and ſo near at hand as to be applicable on inſpection to every word, that not only many words which are wavering between contrary uſages would be ſettled in their true ſound, but that many words, which are fixed by cuſtom to an improper pronunciation, would by degrees grow regular and analogical; and thoſe which are ſo already would be ſecured in their purity, by a knowledge of their regularity and analogy.

But the utility of a work of this kind is not confined to thoſe parts of language where the impropriety is groſs and palpable; beſides ſuch imperfections in pronunciation as diſguſt every ear not accuſtomed to them, there are a thouſand inſenſible deviations, in the more minute parts of language, as the unaccented ſyllables may be called, which do not ſtrike the ear ſo forcibly as to mark any direct impropriety in particular words, but occaſion only ſuch a general imperfection as gives a bad impreſſion upon the whole. Speakers with theſe imperfections paſs very well in common converſation; but when they are required to pronounce with emphaſis, and for that purpoſe to be more diſtinct and definite in their utterance, here their ear fails them; they have been accuſtomed only to looſe curſory ſpeaking, and, for want of firmneſs of pronunciation, are like thoſe painters who draw the muſcular exertions of the human body without any knowledge of anatomy. This is one reaſon, perhaps, why we find the elocution of ſo few people agreeable when they read or ſpeak to an aſſembly, while ſo few offend us by their utterance in common converſation. A thouſand faults lie concealed in a miniature, which a microſcope brings to view; and it is only by pronouncing on a larger ſcale, as publick ſpeaking may be called, that we prove the propriety of our elocution. As, therefore, there are

enfin à une diſtance inconcevable; enſorte que de deux choſes dont l'une n'a été, imaginée dans ſon origine, que pour répréſenter fidellement l'autre, celle-ci ne differe guère moins de celle-là, que la portrait de la même perſonne peinte dans deux ages très éloignés. Enfin l'inconvénient s'eſt accru à un tel excès qu'on n'oſe plus y remédier. On prononce une langue, on écrit une autre; & l'on s'accoutume tellement pendant le reſte de la vie à cette biſarrerie qui a fait verſer tant de larmes dans l'enfance, que ſi l'on renonçoît à ſa mauvaiſe orthographe pour une plus voiſine de la prononciation, on ne reconnoîtroit plus la langue parlée ſous cette nouvelle combinaiſon de caractères. S'il y en a qui ne pourroient ſe ſuccéder ſans une grande fatigue pour l'organe, ou ils ne ſe rencontrent point, ou ils ne durent pas. Ils ſont échappés de la langue par l'euphonie, cette loi puiſſante, qui agit continuellement & univerſellement ſans égard pour l'étymologie & ſes défenſeurs, et qui tend ſans intermiſſion à amener des êtres qui ont les mêmes organes, le même idiôme, les mêmes mouvemens preſcrits, à-peu-près à la même prononciation. Les cauſes dont l'action n'eſt point interrompue, deviennent toujours les plus fortes avec les tems, quelque foibles qu'elles ſoient en elles-mêmes, & il n'y a preſque pas une ſeule voyelle, une ſeule diphthongue, une ſeule conſonne dont la valeur ſoit tellement conſtante, que l'euphonie n'en puiſſe diſpoſer, ſoit en altérant le ſon, ſoit en le ſupprimant."

I ſhall not decide upon the juſtneſs of theſe complaints, but muſt obſerve, that a worſe picture could ſcarcely be drawn of the Engliſh, or the moſt barbarous language of Europe. Indeed a degree of verſatility ſeems involved in the very nature of language, and is one of thoſe evils left by Providence for man to correct: a love of order, and the utility of regularity, will always incline him to confine this verſatility within as narrow bounds as poſſible.

are certain deviations from analogy which are not at any rate tolerable, there are others which only, as it were, tarnish the pronunciation, and make it less brilliant and agreeable. There are few who have turned their thoughts on this subject, without observing that they sometimes pronounce the same word or syllable in a different manner; and as neither of these manners offends the ear, they are at a loss to which they shall give the preference; but as one must necessarily be more agreeable to the analogy of the language than the other, a display of these analogies, in a Dictionary of this kind, will immediately remove this uncertainty; and in this view of the variety we shall discover a fitness in one mode of speaking, which will give a firmness and security to our pronunciation, from a confidence that it is founded on reason, and the general tendency of the language. See Principles, No. 530, 547, 551, &c.

But, alas! reasoning on language, however well founded, may be all overturned by a single quotation from Horace:

"——————————usus,
"Quem penès arbitrium est, & jus & norma loquendi."

This, it must be owned, is a succinct way of ending the controversy; and, by virtue of this argument, we may become critics in language, without the trouble of studying it: not that I would be thought, in the most distant manner, to deny that Custom is the sovereign arbiter of language; far from it. I acknowledge its authority, and know there is no appeal from it. I wish only to dispute, where this arbiter has not decided; for, if once Custom speak out, however absurdly, I sincerely acquiesce in its sentence.

But what is this custom to which we must so implicitly submit? Is it the usage of the multitude of speakers, whether good or bad? This has never been asserted by the most sanguine abettors of its authority. Is it the usage of the studious in schools and colleges, with those of the learned professions, or that of those who, from their elevated birth or station, give laws to the refinements and elegancies of a court? To confine propriety to the latter, which is too often the case, seems an injury to the former; who, from their very profession, appear to have a natural right to a share, at least, in the legislation of language, if not to an absolute sovereignty. The polished attendants on a throne are as apt to depart from simplicity in language as in dress and manners; and novelty, instead of custom, is too often the *jus & norma loquendi* of a court.

Perhaps an attentive observation will lead us to conclude, that the usage, which ought to direct us, is neither of these we have been enumerating, taken singly, but a sort of compound ratio of all three. Neither a finical pronunciation of the court, nor a pedantic Græcism of the schools, will be denominated respectable usage, till a certain number of the general mass of speakers have acknowledged them; nor will a multitude of common speakers authorise any pronunciation which is reprobated by the learned and polite.

As those sounds, therefore, which are the most generally received among the learned and polite, as well as the bulk of speakers, are the most legitimate, we may conclude that a majority of two of these states ought always to concur, in order to constitute what is called good usage.

But though custom, when general, is commonly well understood, there are several states and degrees of it which are exceedingly obscure and equivocal; and the only method of knowing the extent of custom in these cases, seems to be an inspection of those Dictionaries which professedly treat of pronunciation. We have now so many works of this kind, that the general current of custom, with

with reſpect to the ſound of words, may be collected from them with almoſt as much certainty as the general ſenſe of words from Johnſon. An exhibition of the opinions of orthöepiſts about the ſound of words always appeared to me a very rational method of determining what is called cuſtom. This method I have adopted in the following work; and if I have ſometimes diſſented from the majority, it has been, either from a perſuaſion of being better informed of what was the actual cuſtom of ſpeaking, or from a partiality to the evident analogies of the language.

And here I muſt intreat the candid reader to make every reaſonable allowance for the freedom with which I have criticiſed other writers on this ſubject, and particularly Mr. Sheridan. As a man, a gentleman, and a ſcholar, I knew Mr. Sheridan, and reſpected him; and think every lover of elocution owes him a tribute of thanks for his unwearied addreſſes to the Public, to rouſe them to the ſtudy of the delivery of their native tongue. But this tribute, however juſt, does not exempt him from examination. His credit with the world neceſſarily ſubjects him to animadverſion, becauſe the errors of ſuch a writer are dangerous in proportion to his reputation: this has made me zealous to remark his inaccuracies, but not without giving my reaſons; nor have I ever taken advantage of ſuch faults as may be called inadvertencies.* On the ſame principles I have ventured to criticiſe Dr. Johnſon†, whoſe friendſhip and advice I was honoured with, whoſe memory I love, and whoſe intellectual powers impreſs me with ſomething like religious veneration and awe. I do not pretend to be exempt from faults myſelf; in a work like the preſent, it would be a miracle to eſcape them; nor have I the leaſt idea of deciding as a judge, in a caſe of ſo much delicacy and importance as the pronunciation of a whole people; I have only aſſumed the part of an advocate to plead the cauſe of conſiſtency and analogy, and, where cuſtom is either ſilent or dubious, to tempt the lovers of their language to incline to the ſide of propriety; ſo that my deſign is principally to give a kind of hiſtory of pronunciation, and a regiſter of its preſent ſtate; and, where the authorities of Dictionaries or Speakers are found to differ, to give ſuch a diſplay of the analogies of the language as may enable every inſpector to decide for himſelf.

With reſpect to the explanation of words, except in very few inſtances, I have ſcrupulouſly followed Dr. Johnſon. His Dictionary has been deemed lawful plunder by every ſubſequent Lexicographer; and ſo ſervilely has it been copied, that ſuch words as he muſt have omitted merely by miſtake, as *Predilection*, *Reſpectable*, *Deſcriptive*, *Sulky*, *Inimical*, *Interference*, and many others, are neither in Mr. Sheridan's, Dr. Kenrick's, nor ſeveral other Dictionaries.

* The inſpector will be pleaſed to take notice, that my obſervations on Mr. Sheridan's Dictionary relate to the firſt edition, publiſhed in his life-time, and the ſecond, ſome time after his death; whatever alterations may have been made by his ſubſequent editors, I am totally unacquainted with.

TO THE THIRD ENGLISH EDITION.

THE rapid ſale of the Second Edition of this Dictionary called upon me for a Third, at a time of life, and in a ſtate of health, little compatible with the drudgery and attention neceſſary for the execution of it: but as I expected ſuch a call, I was not unmindful of whatever might tend to render it ſtill more worthy of the acceptance of the Public, and therefore collected many words, which, though not found in Dictionaries, were conſtantly to be met with in polite and literary converſation, and which were well deſerving of a place in the language, as ſoon as written authorities could be produced for them. Some of theſe authorities I have produced, and have left others to the attention of thoſe who have more leiſure and better health. In the midſt of the impreſſion of the preſent work, I met with Maſon's Supplement to Johnſon, and found ſeveral words worthy of inſertion, but have carefully acknowledged the obligation; and take this opportunity of thanking that gentleman for the benefit I have derived from his Supplement, which I think, if continued, admirably calculated for the improvement and ſtability of the language.

But as the great object of the preſent Dictionary was pronunciation, I was very ſolicitous to be as accurate as poſſible on this point, and therefore neglected no opportunity of informing myſelf where I was in the leaſt doubtful, and of correcting myſelf where there was the leaſt ſhadow of an error. Theſe occaſions, however, were not very numerous. To a man born, as I was, within a few miles of the Capital, living in the Capital almoſt my whole life, and exerciſing myſelf there in public ſpeaking for many years; to ſuch a perſon, if to any one, the true pronunciation of the language muſt be very familiar: and to this familiarity I am indebted for the ſecurity I have felt in deciding upon the ſounds of ſeveral ſyllables, which nothing but an infantine pronunciation could determine. If I may borrow an alluſion from muſic, I might obſerve, that there is a certain tune in every language to which the ear of a native is ſet, and which often decides on the preferable pronunciation, though entirely ignorant of the reaſons for it.

But this vernacular inſtinct, as it may be called, has been ſeconded by a careful inveſtigation of the analogies of the language. Accent and Quantity, the great efficients of pronunciation, are ſeldom miſtaken by people of education in the Capital; but the great bulk of the Nation, and thoſe who form the moſt important part of it, are without theſe advantages, and therefore want ſuch a guide to direct them as is here offered. Even polite and literary people, who ſpeak only from the ear, will find that this organ will, in a thouſand inſtances, prove but a very uncertain guide, without a knowledge of thoſe principles by which the ear itſelf is inſenſibly directed, and which, having their origin in the nature of language, operate with ſteadineſs and regularity in the midſt of the fickleſt affectation and caprice. It can ſcarcely be ſuppoſed that the moſt experienced ſpeaker has heard every word in the language, and the whole circle of ſciences pronounced exactly as it ought to be; and if this be the caſe, he muſt ſometimes have recourſe to the principles of pronunciation when his ear is either uninformed or unfaithful. Theſe principles are thoſe general laws of articulation which determine

determine the character, and fix the boundaries of every language; as in every ſyſtem of ſpeaking, however irregular, the organs muſt neceſſarily fall into ſome common mode of enunciation, or the purpoſe of Providence in the gift of ſpeech would be abſolutely defeated. Theſe laws, like every other object of philoſophical inquiry, are only to be traced by an attentive obſervation and enumeration of particulars; and when theſe particulars are ſufficiently numerous to form a general rule, an axiom in pronunciation is acquired. By an accumulation of theſe axioms, and an analogical compariſon of them with each other, we diſcover the deviations of language where cuſtom has varied, and the only clew to guide us where cuſtom is either indeterminate or obſcure.

Thus, by a view of the words ending in *ity* or *ety*, I find the accent invariably placed on the preceding ſyllable, as in *diver'ſity*, *congru'ity*, &c. On a cloſer inſpection, I find every vowel in this antepenultimate ſyllable, when no conſonant intervenes, pronounced long, as *de'ity*, *pi'ety*, &c.; a nearer obſervation ſhows me, that if a conſonant intervene, every vowel in this ſyllable but *u* contracts itſelf, and is pronounced ſhort, as *ſever'ity*, *curioſ'ity*, *impu'nity*, &c. and therefore that *chaſtity* and *obſcenity* ought to be pronounced with the penultimate vowel ſhort, and not as in *chaſte* and *obſcene*, as we frequently hear them. I find too, that even *u* contracts itſelf before two conſonants, as *cur'vity*, *tacitur'nity*, &c. and that *ſcarcity* and *rarity* (for whoſe irregularity good reaſons may be given) are the only exceptions to this rule throughout the language. And thus we have a ſeries of near ſeven hundred words, the accentuation of which, as well as the quantity of the accented vowel, are reduced to two or three ſimple rules.

The ſame uniformity of accentuation and quantity may be obſerved in the firſt ſyllable of thoſe words which have the accent on the third, as *dem-on-ſtra'tion*, *dim-i-nu'tion*, *lu-cu-bra'tion*,* &c. where we evidently perceive a ſtreſs on the firſt ſyllable ſhortening every vowel but *u*, and this in every word throughout the language, except where two conſonants follow the *u*, as in *cur-vi-lin'e-ar*; or where two vowels follow the conſonant that ſucceeds any other vowel in the firſt ſyllable, as *de-vi-a'tion*; or, laſtly, where the word is not evidently of our own compoſition, as *re-con-vey'*: but as *u* in the firſt ſyllable of a word, having the accent on the third, has the ſame tendency to length and openneſs as was obſervable when it preceded the termination *ity*, I find it neceſſary to ſeparate it from the conſonant in *bu-ty-ra'ceous*, which I have never heard pronounced, as well as in *lu-cu-bra'tion*, which I have, and this from no pretended agreement with the quantity of the Latin words theſe are derived from; for, in the former word, the *u* is doubtful: but, from the general ſyſtem of quantity I ſee adopted in Engliſh pronunciation, this only will direct an Engliſh ear with certainty; for, though we may ſometimes place the accent on words we borrow from the Greek or Latin on the ſame ſyllable as in thoſe languages, as *acu'men*, *elegi'ac*, &c.; nay, though we ſometimes adopt the accent of the original with every word of the ſame termination we derive from it, as *aſſidu'ity*, *vi-du'ity*, &c. yet the *quantity* of the accented vowel is ſo often contrary to that of the Latin and Greek, that not a ſhadow of a rule can be drawn, in this point, from theſe languages to ours†. Thus, in the letter in queſtion, in the Latin *accumulo*, *dubius*, *tumor*, &c. the firſt *u* is every where ſhort; but in the Engliſh words *accumulate*, *dubious*, *tumour*, every where long. *Nuptialis*, *murmur*, *turbulentus*, &c. where the *u* in the firſt ſyllable in Latin is long, we as conſtantly pronounce it ſhort in *nuptial*, *murmur*, *turbulent*, &c. Nor indeed can we wonder that a different œconomy of quantity is obſervable in the ancient and modern languages, as in the former,

former, two conſonants almoſt always lengthen the preceding vowel, and in the latter as conſtantly ſhorten it. Thus, without arguing in a vicious circle, we find, that as a diviſion of the generality of words, as they are actually pronounced, gives us the general laws of ſyllabication, ſo theſe laws, once underſtood, direct us in the diviſion of ſuch words as we have never heard actually pronounced, and conſequently to the true pronunciation of them. For theſe operations, like cauſe and effect, reflect mutually a light on each other, and prove, that by nicely obſerving the path which cuſtom in language has once taken, we can more than gueſs at the line ſhe muſt keep in a ſimilar caſe, where her footſteps are not quite ſo diſcernible. Rules to be obſerved by the Natives of IRELAND *in order to obtain a juſt Pronunciation of Engliſh.*

AS Mr. Sheridan was a native of Ireland, and had the beſt opportunities of underſtanding thoſe peculiarities of pronunciation which obtain there, I ſhall extract his obſervations on that ſubject as the beſt general direction, and add a few of my own, by way of ſupplement, which I hope will render this article of inſtruction ſtill more complete.

The reader will be pleaſed to take notice, that as I have made a different arrangement of the vowels, and have adopted a notation different from Mr. Sheridan, I am obliged to make uſe of different figures to mark the vowels, but ſtill ſuch as perfectly correſpond to his.

" The chief miſtakes made by the Iriſh in pronouncing Engliſh, lie for the " moſt part in the ſounds of the two firſt vowels, *a* and *e*; the former being " generally ſounded å by the Iriſh, as in the word bår, in moſt words where it " is pronounced à, as in *day*, by the Engliſh. Thus the Iriſh ſay, påtron, " måtron, the vowel å having the ſame ſound as in the word fåther; whilſt the " Engliſh pronounce them as if written *paytron*, *maytron*. The following rule, " ſtrictly attended to, will rectify this miſtake through the whole language.

" When the vowel *a* finiſhes a ſyllable, and has the accent on it, it is inva- " riably pronounced å [day] by the Engliſh. To this rule there are but three " exceptions in the whole language to be found in the words fåther, papå, " mamå. The Iriſh may think alſo the word *rather* an exception, as well as " *father;* and ſo it would appear to be in their manner of pronouncing it rå- " ther, laying the accent on the vowel *a;* but in the Engliſh pronunciation " the conſonant *th* is taken into the firſt ſyllable, as thus, *rath'er*, which makes " the difference.

" Whenever a conſonant follows the vowel *a* in the ſame ſyllable, and the " accent is on the conſonant, the vowel *a* has always its fourth ſound, as hât, " mân; as alſo the ſame ſound lengthened when it precedes the letter *r*, as " får, bår, though the accent be on the vowel; as likewiſe when it precedes " *lm*, as bålm, pſålm. The Iriſh, ignorant of this latter exception, pronounce " all words of that ſtructure, as if they were written *hawm*, *pſawm*, *quawm*, " *cawm*, &c. In the third ſound of *a*, marked by different combinations of " vowels, or conſonants, ſuch as *au*, in Paul; *aw*, in law; *all*, in call; *ald*, in " bald; *alk*, in talk, &c. the Iriſh make no miſtake, except in that of *lm*, as be- " fore mentioned.

" The ſecond vowel, *e*, is for the moſt part ſounded *ee* by the Engliſh, when " the accent is upon it; whilſt the Iriſh in moſt words give it the ſound of " ſlender å, as in *hate*. This ſound of é [ee] is marked by different combi- " nations of vowels, ſuch as *ea*, *ei*, *e* final mūte, *ee*, and *ie*. In the two laſt " combinations of *ee* and *ie*, the Iriſh never miſtake; ſuch as in *meet*, *ſeem*, *field*, " *believe*, &c.; but in all the others, they almoſt univerſally change the ſound " of é into à. Thus in the combination *ea*, they pronounce the words *tea*, " *ſea*, *pleaſe*, as if they were ſpelt *tay*, *ſay*, *plays;* inſtead of *tee*, *ſee*, *pleeſe*. The " Engliſh conſtantly give this ſound to *ea* whenever the accent is on the vowel " *e*, except in the following words, *great*, a *pear*, a *bear*, to *bear*, to *forbear*, to " *ſwear*, to *tear*, to *wear*. In all which the *e* has the ſound of å in hâte. For " want of knowing theſe exceptions, the gentlemen of Ireland, after ſome " time of reſidence in London, are apt to fall into the general rule, and " pronounce theſe words as if ſpelt *greet*, *beer*, *ſweer*, &c.

" *E*

Digitized from Best Copy Available

" *Ei* is alſo ſounded *ee* by the Engliſh, and as *á* by the Iriſh; thus the word " de*ceit*, re*ceive*, are pronounced by them as if written de*ſate*, re*ſave*. *Ei* is " always ſounded *ee*, except when a *g* follows it, as in the words *reign*, *feign*, " *deign*, &c.; as alſo in the words *rein* (of a bridle), *rein*-deer, *vein*, *drein*, *veil*, " *heir*, which are pronounced like *rain*, *vain*, *drain*, *vail*, *air*.

" The final mute *e* makes the preceding *e* in the ſame ſyllable, when accented, " have the ſound of *ee*, as in the words ſuprême, ſincère, replête. This rule is " almoſt univerſally broken through by the Iriſh, who pronounce all ſuch " words as if written ſupráme, ſinsáre, replâte, &c. There are but two excep- " tions to this rule in the Engliſh pronunciation, which are the words *there*, " *where*.

" In the way of marking this ſound, by a double *e*, as thus *ee*, as the Iriſh " never make any miſtakes, the beſt method for all who want to acquire the " right pronunciation of theſe ſeveral combinations is, to ſuppoſe that *ea*, *ei*, " and *e*, attended by a final mute *e*, are all ſpelt with a double *e*, or *ee*.

" *Ey* is always ſounded like *á* by the Engliſh, when the accent is upon it; " as in the words *prey*, *convey*, pronounced *pray*, *convay*. To this there are " but two exceptions, in the words key and ley, ſounded *kee*, *lee*. The Iriſh, " in attempting to pronounce like the Engliſh, often give the ſame ſound to *ey*, " as uſually belongs to *ei*; thus for *prey*, *convey*, they ſay *pree*, *convee*.

" A ſtrict obſervation of theſe few rules, with a due attention to the very few " exceptions enumerated above, will enable the well-educated natives of Ire- " land to pronounce their words exactly in the ſame way as the more poliſhed " part of the inhabitants of England do, ſo far as the vowels are concerned. " The diphthongs they commit no fault in, except in the ſound of *i*, which " has been already taken notice of in the Grammar* : where, likewiſe, the " only difference in pronouncing any of the conſonants has been pointed out; " which is, the thickening the ſounds of *d* and *t*, in certain ſituations; and an " eaſy method propoſed of correcting this habit.†

" In order to complete the whole, I ſhall now give a liſt of ſuch detached " words, that do not come under any of the above rules, as are pronounced " differently in Ireland from what they are in England:

Iriſh

* " Vide p. 11, where the true manner of pronouncing the diphthong *i* is pointed out; " the Iriſh pronouncing it much in the ſame manner as the French.

† " The letter *d* has always the ſame ſound by thoſe who pronounce Engliſh well; but the " Provincials, particularly the Iriſh, Scotch, and Welſh, in many words thicken the ſound " by a mixture of breath. Thus, though they ſound the *d* right in the poſitive *loud* and " *broad*, in the comparative degree they thicken it by an aſpiration, and ſound it as if it were " written *loudher*, *broadher*. This vicious pronunciation is produced by puſhing the tongue for- " ward ſo as to touch the teeth in forming that ſound: and the way to cure it is eaſy; for as " they can pronounce the *d* properly in the word loud, let them reſt a little upon that ſylla- " ble, keeping the tongue in the poſition of forming *d*, and then let them ſeparate it from the " upper gum without puſhing it forward, and the ſound *der* will be produced of courſe: for " the organ being left in the poſition of ſounding *d* at the end of the ſyllable *loud*, is neceſſa- " rily in the poſition of forming the ſame *d* in uttering the laſt ſyllable, unleſs it makes a new " movement, as in the caſe of protruding it ſo as to touch the teeth. This letter is ſometimes, " though not often, quieſcent, as in the words *handkerchief*, *handſome*, *handſel*.

" In pronouncing the letter *t* the Iriſh and other Provincials thicken the ſound, as was be- " fore mentioned with regard to the *d*; for *better*, they ſay *betther*; for *utter*, *utther*; and ſo on " in all words of that ſtructure. This faulty manner ariſes from the ſame cauſe that was " mentioned as affecting the ſound of the *d*; I mean the protruding of the tongue ſo as to " touch the teeth, and is curable only in the ſame way."

"These, after the cloſeſt attention, are all the words, not included in the rules before laid down, that I have been able to collect, in which the well-educated natives of Ireland differ from thoſe of England."

I ſhall make no obſervations on the accuracy of this liſt, but deſire my reader to obſerve, that the ſtrongeſt characteriſtics of the pronunciation of Ireland is the rough jarring pronunciation of the letter *R*, and the aſpiration or rough breathing before all the accented vowels. (For the true ſound of *R*, ſee that letter in the Principles, No. 419.) And for the rough breathing or aſpiration of the vowels, the pupil ſhould be told not to bring the voice ſuddenly from the breaſt, but to ſpeak, as it were, from the mouth only.

It may be obſerved too, that the natives of Ireland pronounce *rm* at the end of a word ſo diſtinctly as to form two ſeparate ſyllables. Thus *ſtorm*, and *farm* ſeem ſounded by them as if written *ſtaw-rum*, *fa-rum*; while the Engliſh ſound the *r* ſo ſoft and ſo cloſe to the *m*, that it ſeems pronounced nearly as if written *ſtawm*, *faam*.

Nearly the ſame obſervations are applicable to *lm*. When theſe letters end a word, they are, in Ireland, pronounced at ſuch a diſtance, that *helm* and *realm* ſound as if written *hel-um* and *real-um*; but in England the *l* and *m* are pronounced as cloſe as poſſible, and ſo as to form but one ſyllable. To remedy this, it will be neceſſary for the pupil to make a collection of words terminating with theſe conſonants, and to practiſe them over till a true pronunciation is acquired.

Rules to be obſerved by the Natives of SCOTLAND *for attaining a juſt Pronunciation of Engliſh.*

THAT pronunciation which diſtinguiſhes the inhabitants of Scotland is of a very different kind from that of Ireland, and may be divided into the quantity, quality, and accentuation of the vowels. With reſpect to quantity, it may be obſerved, that the Scotch pronounce almoſt all their accented vowels long. Thus, if I am not miſtaken, they would pronounce *habit, hay-bit; tepid, tee-pid; ſinner, ſee-ner; conſcious, cone-ſhus;* and *ſubject, ſoob-ject:** it is not pretended, however, that every accented vowel is ſo pronounced, but that ſuch a pronunciation is very general, and particularly of the *i*. This vowel is ſhort in Engliſh pronunciation, where the other vowels are long; thus, *evaſion, adheſion, emotion, confuſion,* have the *a, e, o,* and *u,* long; and in theſe inſtances the Scotch would pronounce them like the Engliſh; but in *viſion, deciſion,* &c. where the Engliſh pronounce the *i* ſhort, the Scotch lengthen this letter by pronouncing it like *ee,* as if the words were written *vee-ſion, decee-ſion,* &c. and this peculiarity is univerſal. The beſt way, therefore, to correct this, will be to make a collection of the moſt uſual words which have the vowels ſhort, and to pronounce them daily till a habit is formed. See Principles, No. 507.

With reſpect to the quality of the vowels, it may be obſerved, that the inhabitants of Scotland are apt to pronounce the *a* like *aw,* where the Engliſh give it the ſlender ſound: thus *Satan,* is pronounced *Sawtan,* and *fatal, fawtal.* It may be remarked too, that the Scotch give this ſound to the *a* preceded by *w,* according to the general rule, without attending to the exceptions, Principles, No. 88; and thus, inſtead of making *wax, waſt,* and *twang,* rhyme with *tax, ſhaft,* and *hang,* they pronounce them ſo as to rhyme with *box, ſoft,* and *ſong.* The ſhort *e* in *bed, fed, red,* &c. borders too much upon the Engliſh ſound of *a,* in *bad, lad, mad,* &c. and the ſhort *i* in *bid, lid, rid,* too much on the Engliſh ſound of *e* in *bed, led, red.* To correct this error, it would be uſeful to collect the long and ſhort ſounds of theſe vowels, and to pronounce the long ones firſt, and to ſhorten them by degrees till they are perfectly ſhort; at the ſame time preſerving the radical ſound of the vowel in both. Thus the correſpondent long ſounds to the *e* in *bed, fed, red,* are *bade, fade, rade;* and that of the ſhort *i* in *bid, lid, rid,* are *bead, lead, reed;* and the former of theſe claſſes will naturally lead the ear to the true ſound of the latter, the only difference

* That this is the general mode of pronouncing theſe words in Scotland, is indiſputable: and it is highly probable that the Scotch have preſerved the old Engliſh pronunciation, from which the Engliſh themſelves have inſenſibly departed. Dr. Hicks obſerved long ago, that the Scotch *ſaxoniſed* in their language much more than the Engliſh; and it is ſcarcely to be doubted that a ſituation nearer to the Continent, and a greater commercial intercourſe with other nations, made the Engliſh admit of numberleſs changes which never extended to Scotland. About the reign of Queen Elizabeth, when the Greek and Latin languages were cultivated, and the pedantry of ſhewing an acquaintance with them became faſhionable, it is not improbable that an alteration in the quantity of many words took place; for as in Latin almoſt every vowel before a ſingle conſonant is ſhort, ſo in Engliſh almoſt every vowel in the ſame ſituation was ſuppoſed to be long, or our anceſtors would not have doubled the conſonant in the participles of verbs to prevent the preceding vowel from lengthening. But when once this affectation of Latinity was adopted, it is no wonder it ſhould extend beyond its principles, and ſhorten ſeveral vowels in Engliſh, becauſe they were ſhort in the original Latin; and in this manner, perhaps, might the diverſity between the quantity of the Engliſh and the Scotch pronunciation ariſe, (542) (543). See DRAMA.

difference lying in the quantity. The ſhort *o* in *not*, *lodge*, *got*, &c. is apt to ſlide into the ſhort *u*, as if the words were written *nut*, *ludge*, *gut*, &c. To rectify this, it ſhould be remembered, that this *o* is the ſhort ſound of *aw*, and ought to have the radical ſound of the deep *a* in *ball*. Thus the radical ſound correſponding to the *o* in *not*, *cot*, *ſot*, is found in *naught*, *caught*, *ſought*, &c.; and theſe long ſounds, like the former, ſhould be abbreviated into the ſhort ones. But what will tend greatly to clear the difficulty will be, to remember that only thoſe words which are collected in the Principles, No. 165, have the *o* ſounded like ſhort *u* when the accent is upon it: and with reſpect to *u* in *bull*, *full*, *pull*, &c. it may be obſerved, that the pronunciation peculiar to the Engliſh is only found in the words enumerated, Principles, No. 174.

In addition to what has been ſaid, it may be obſerved, that *oo* in *food*, *mood*, *moon*, *ſoon*, &c. which ought always to have a long ſound, is generally ſhortened in Scotland to that middle ſound of the *u* in *bull*: and it muſt be remembered, that *wool*, *wood*, *good*, *hood*, *ſtood*, *foot*, are the only words where this ſound of *oo* ought to take place.

The accentuation, both in Scotland and Ireland, (if by accentuation we mean the ſtreſs, and not the kind of ſtreſs) is ſo much the ſame as that of England, that I cannot recollect many words in which they differ. Indeed, if it were not ſo, the verſification of each country would be different: for as Engliſh verſe is formed by accent or ſtreſs, if this accent or ſtreſs were upon different ſyllables in different countries, what is verſe in England would not be verſe in Scotland or Ireland; and this ſufficiently ſhows how very indefinitely the word accent is generally uſed.

Mr. Elphinſton, who muſt be allowed to be a competent judge in this caſe, tells us, that in Scotland they pronounce *ſilénce*, *biás*, *canvás*, *ſenténce*, *triúmph*, *comfórt*, *ſoláce*, *conſtrúe*, *reſcúe*, *reſpíte*, *govérn*, *haráſs*, *ranſáck*, *cancél*, with the accent on the laſt ſyllable inſtead of the firſt. To this liſt may be added the word *menace*, which they pronounce as if written *menáſs*; and though they place the accent on the laſt ſyllable of *canal*, like the Engliſh, they broaden the *a* in the laſt ſyllable, as if the word were ſpelt *canawl*. It may be farther obſerved, that they place an accent on the comparative adverb *as*, in the phraſes *as much*, *as little*, *as many*, *as great*, &c. while the Engliſh, except in ſome very particular emphatical caſes, lay no ſtreſs on this word, but pronounce theſe phraſes like words of two or three ſyllables without any accent on the firſt.

But beſides the miſpronunciation of ſingle words, there is a tone of voice with which theſe words are accompanied, that diſtinguiſhes a native of Ireland or Scotland as much as an improper ſound of the letters. This is vulgarly, and, if it does not mean ſtreſs only, but the kind of ſtreſs, I think, not improperly called the accent*. For though there is an aſperity in the Iriſh dialect, and a drawl in the Scotch, independent of the ſlides or inflections they make uſe of, yet it may with confidence be affirmed, that much of the peculiarity which diſtinguiſhes theſe dialects may be reduced to a predominant uſe of one of theſe ſlides. Let any one who has ſufficiently ſtudied the ſpeaking voice to diſtinguiſh the ſlides, obſerve the pronunciation of an Iriſhman and a Scotchman, who have much of the dialect of their country, and he will find that the former abounds with the falling, and the latter with the riſing inflection†; and if this

 is

is the caſe, a teacher, if he underſtands theſe ſlides, ought to direct his inſtruction ſo as to remedy the imperfection. But as avoiding the wrong, and ſeizing the right at the ſame inſtant, is, perhaps, too great a taſk for human powers, I would adviſe a native of Ireland, who has much of the accent, to pronounce almoſt all his words, and end all his ſentences, with the riſing ſlide; and a Scotchman in the ſame manner, to uſe the falling inflection; this will, in ſome meaſure, counteract the natural propenſity, and bids fairer for bringing the pupil to that nearly equal mixture of both ſlides which diſtinguiſhes the Engliſh ſpeaker, than endeavouring at firſt to catch the agreeable variety. For this purpoſe the teacher ought to pronounce all the ſingle words in the leſſon with the falling inflection to a Scotchman, and with the riſing to an Iriſhman; and ſhould frequently give the pauſes in a ſentence the ſame inflections to each of theſe pupils, where he would vary them to a native of England. But while the human voice remains unſtudied, there is little expectation that this diſtinction of the ſlides ſhould be applied to theſe uſeful purpoſes.

Beſides a peculiarity of inflection, which I take to be a falling circumflex, directly oppoſite to that of the Scotch, the Welch pronounce the ſharp conſonants and aſpirations inſtead of the flat. (See Principles, No. 29, 41.) Thus for *big* they ſay *pick*; for *blood*, *ploot*; and for *good*, *coot*. Inſtead of *virtue* and *vice*, they ſay *firtue and fice*; inſtead of *zeal* and *praiſe*, they ſay *ſeal* and *prace*; inſtead of *theſe* and *thoſe*, they ſay *thece* and *thoce*; and inſtead of *azure* and *oſier*, they ſay *ayſher* and *oſher*; and for *jail*, *chail*. Thus there are nine diſtinct conſonant ſounds which, to the Welch, are entirely uſeleſs. To ſpeak with propriety, therefore, the Welch ought for ſome time to pronounce the flat conſonants and aſpirations only; that is, they ought not only to pronounce them where the letters require the flat ſound, but even where they require the ſharp ſound; this will be the beſt way to acquire a habit; and when this is once done, a diſtinction will be eaſily made, and a juſt pronunciation more readily acquired.

There is ſcarcely any part of England remote from the capital where a different ſyſtem of pronunciation does not prevail. As in Wales they pronounce the ſharp conſonants for the flat, ſo in Somerſetſhire they pronounce many of the flat inſtead of the ſharp: thus for *Somerſetſhire*, they ſay *Zomerſetſhire*; for *father*, *vather*; for *th*ink, ᴛhink; and for *ſure*, *zhure**.

There are dialects peculiar to Cornwall, Lancaſhire, Yorkſhire, and every diſtant county in England; but as a conſideration of theſe would lead to a detail too minute for the preſent occaſion, I ſhall conclude theſe remarks with a few obſervations on the peculiarities of my countrymen, the Cockneys; who, as they are the models of pronunciation to the diſtant provinces, ought to be the more ſcrupulouſly correct.

First Fault of the Londoners.—*Pronouncing* s *indiſtinctly after* ſt.

The letter *s* after *ſt*, from the very difficulty of its pronunciation, is often ſounded inarticulately. The inhabitants of London, of the lower order, cut the knot, and pronounce it in a diſtinct ſyllable, as if *e* were before it; but this is to be avoided as the greateſt blemiſh in ſpeaking: the three laſt letters in *poſts*, *fiſts*, *miſts*, &c. muſt all be diſtinctly heard in one ſyllable, and without permitting the letters to coaleſce. For the acquiring of this ſound, it will be proper to ſelect nouns that end in *ſt* or *ſte*; to form them into plurals, and pronounce them forcibly and diſtinctly every day. The ſame may be obſerved of the third perſon of verbs ending in *ſts* or *ſtes*, as *perſiſts*, *waſtes*, *haſtes*, &c.

Second

SECOND FAULT.—*Pronouncing* w *for* v, *and inverſely.*

The pronunciation of *v* for *w*, and more frequently of *w* for *v*, among the inhabitants of London, and thoſe not always of the lower order, is a blemiſh of the firſt magnitude. The difficulty of remedying this defect is the greater, as the cure of one of theſe miſtakes has a tendency to promote the other.

Thus, if you are very careful to make a pupil pronounce *veal* and *vinegar*, not as if written *weal* and *winegar*, you will find him very apt to pronounce *wine* and *wind*, as if written *vine* and *vind*. The only method of rectifying this habit ſeems to be this: Let the pupil ſelect from a Dictionary, not only all the words that begin with *v*, but as many as he can of thoſe that have this letter in any other part. Let him be told to bite his under lip while he is ſounding the *v* in thoſe words, and to practiſe this every day till he pronounces the *v* properly at firſt ſight: then, and not till then, let him purſue the ſame method with the *w*; which he muſt be directed to pronounce by a pouting out of the lips without ſuffering them to touch the teeth. Thus by giving all the attention to only one of theſe letters at a time, and fixing by habit the true ſound of that, we ſhall at laſt find both of them reduced to their proper pronunciation, in a ſhorter time than by endeavouring to rectify them both at once.

THIRD FAULT.—*Not ſounding* h *after* w.

The aſpirate *h* is often ſunk, particularly in the capital, where we do not find the leaſt diſtinction of ſound between *while* and *wile*, *whet* and *wet*, *where* and *were*, &c. The beſt method to rectify this, is to collect all the words of this deſcription from a Dictionary, and write them down; and, inſtead of the *wh*, to begin them with *hoo* in a diſtinct ſyllable, and ſo to pronounce them. Thus, let *while* be written and ſounded *hoo-ile*; *whet*, *hoo-et*; *where*, *hoo-are*; *whip*, *hoo-ip*, &c. This is no more, as Dr. Lowth obſerves, than placing the aſpirate in its true poſition before the *w*, as it is in the Saxon, which the words come from; where we may obſerve, that though we have altered the orthography of our anceſtors, we have ſtill preſerved their pronunciation.

FOURTH FAULT.—*Not ſounding* h *where it ought to be ſounded, and inverſely.*

A ſtill worſe habit than the laſt prevails, chiefly among the people of London, that of ſinking the *h* at the beginning of words where it ought to be ſounded, and of ſounding it, either where it is not ſeen, or where it ought to be ſunk. This we not unfrequently hear, eſpecially among children, *heart* pronounced *art*, and *arm*, *harm*. This is a vice perfectly ſimilar to that of pronouncing the *v* for the *w*, and the *w* for the *v*, and requires a ſimilar method to correct it.

As there are ſo very few words in the language where the initial *h* is ſunk, we may ſelect theſe from the reſt, and, without ſetting the pupil right when he miſpronounces theſe, or when he prefixes *h* improperly to other words, we may make him pronounce all the words where *h* is ſounded, till he has almoſt forgot there are any words pronounced otherwiſe: then he may go over thoſe words to which he improperly prefixes the *h*, and thoſe where the *h* is ſeen but not ſounded, without any danger of an interchange. As theſe latter words are but few, I ſhall ſubjoin a catalogue of them for the uſe of the learner: *heir*, *heireſs*, *herb*, *herbage*, *honeſt*, *honeſty*, *honeſtly*, *honour*, *honourable*, *honourably*, *hoſpital*, *hoſtler*, *hour*, *hourly*, *humble*, *humbly*, *humbles*, *humour*, *humoriſt*, *humorous*, *humorouſly*, *humorſome*.

Digitized from Best Copy Available

humorſome: where we may obſerve, that *humour* and its compounds not only ſink the *h*, but ſound the *u* like the pronoun *you*, or the noun *yew*, as if written *yewmour*, *yewmorous*, &c.

Thus I have endeavoured to correct ſome of the more glaring errors of my countrymen, who, with all their faults, are ſtill upon the whole the beſt pronouncers of the Engliſh language: for though the pronunciation of London is certainly erroneous in many words, yet, upon being compared with that of any other place, it is undoubtedly the beſt; that is, not only the beſt by courteſy, and becauſe it happens to be the pronunciation of the capital, but the beſt by a better title, that of being more generally received; or, in other words, though the people of London are erroneous in the pronunciation of many words, the inhabitants of every other place are erroneous in many more. Nay, harſh as the ſentence may ſeem, thoſe at a conſiderable diſtance from the capital do not only mispronounce many words taken ſeparately, but they ſcarcely pronounce with purity a ſingle word, ſyllable, or letter. Thus, if the ſhort ſound of the letter *u* in *trunk*, *ſunk*, &c. differ from the ſound of that letter in the northern parts of England, where they ſound it like the *u* in *bull*, and nearly as if the words were written *troonk*, *ſoonk*, &c. it neceſſarily follows that every word where the ſecond ſound of that letter occurs muſt by thoſe provincials be miſpronounced.

But though the inhabitants of London have this manifeſt advantage over all the other inhabitants of the iſland, they have the diſadvantage of being more diſgraced by their peculiarities than any other people. The grand difference between the metropolis and the provinces is, that people of education in London are generally free from the vices of the vulgar; but the beſt educated people in the provinces, if conſtantly reſident there, are ſure to be ſtrongly tinctured with the dialect of the country in which they live. Hence it is, that the vulgar pronunciation of London, though not half ſo erroneous as that of Scotland, Ireland, or any of the provinces, is, to a perſon of correct taſte, a thouſand times more offenſive and diſguſting.

DIRECTIONS to FOREIGNERS,

In order to attain a Knowledge of the Marks in this Dictionary, and to acquire a right Pronunciation of every Word in the Engliſh Language.

AS the ſounds of the vowels are different in different languages, it would be endleſs to bring parallel ſounds from the various languages of Europe; but, as the French is ſo generally underſtood upon the Continent, if we can reduce the ſounds of the Engliſh letters to thoſe of the French, we ſhall render the pronunciation of our language very generally attainable: and this, it is preſumed, will be pretty accurately accompliſhed by obſerving the following directions:

A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R
ei	*bi*	*ci*	*di*	*i*	*ef*	*dgi*	*etch*	*aï*	*djé*	*qué*	*ell*	*em*	*en*	*o*	*pi*	*kiou*	*arr*

S	T	U	V	W	X	Y	Z
eſs	*ti*	*iou*	*vi dobliou*	*ex*	*ouai*	*zedd*	

The French have all our vowel ſounds, and will therefore find the pronunciation of them very eaſy. The only difficulty they will meet with ſeems to be *i*, which, though demonſtrably compoſed of two ſucceſſive ſounds, has paſſed for a ſimple vowel with a very competent judge of Engliſh pronunciation*. The reaſon is, theſe two ſounds are pronounced ſo cloſely together as to require ſome attention to diſcover their component parts: this attention Mr. Sheridan† never gave, or he would not have told us that this diphthong is a compound of our fulleſt and ſlendereſt ſounds à and è; the firſt made by the largeſt, and the laſt by the ſmalleſt aperture of the mouth. Now nothing is more certain than the inaccuracy of this definition. The third ſound of *a*, which is perfectly equivalent to the third ſound of *o*, when combined with the firſt ſound of *e*, muſt inevitably form the diphthong in *boy*, *joy*, &c. and not the diphthongal ſound of the vowel *i* in *idle*, and the perſonal pronoun *I*; this double ſound will, upon a cloſe examination, be found to be compoſed of the Italian *a* in the laſt ſyllable of *papa*, and the firſt ſound of *e*, pronounced as cloſely together as poſſible‡; and for the exactneſs of this definition, I appeal to every juſt Engliſh ear in the kingdom.

The other diphthongal vowel *u* is compoſed of the French *i*, pronounced as cloſely as poſſible to their diphthong *ou*, or the Engliſh ée and ó, perfectly equivalent to the ſound the French would give to the letters *you*, and which is exactly the ſound the Engliſh give to the plural of the ſecond perſonal pronoun.

The diphthong *oi* or *oy* is compoſed of the French *á* and *i*; thus *toy* and *boy* would be exactly expreſſed to a Frenchman by writing them *tâi* and *bâi*.

The diphthongs *ou* and *ow*, when ſounded like *ou*, are compoſed of the French

* Nares, Elements of Orthöepy, page 2.

† See Section III. of his Proſodial Grammar prefixed to his Dictionary.

‡ Holder, the moſt philoſophical and accurate inveſtigator of the formation and powers of the letters, ſays: "Our vulgar *i*, as in *ſtile*, ſeems to be ſuch a diphthong (or rather ſyllable, or part of a ſyllable) compoſed of *a*, *i*, or *e*, *i*, and not a ſimple original vowel." Elements of Speech, page 95.

Dr. Wallis, ſpeaking of the long Engliſh *i*, ſays it is founded "eodem ferè modo quo Gallorum *ai* in vocibus *main*, manus; *pain*, panis, &c. Nempe ſonum habet compoſitum ex Gallorum è fœminino & *i* vel *y*." Grammatica Linguæ Anglicanæ, pag. 48.

French *â* and the diphthong *ou*; and the Engliſh ſounds of *thou* and *now* may be expreſſed to a Frenchman by ſpelling them *thâou* and *nâou*.

W is no more than the French diphthong *ou*; thus *Weſt* is equivalent to *Oueſt*, and *wall* to *ouâll*.

Y is perfectly equivalent to the French letter of that name, and may be ſupplied by *i*; thus *yoke*, *you*, &c. is expreſſed by *ioke*, *iou*, &c.

J, or *I* conſonant, muſt be pronounced by prefixing *d* to the French *j*: thus *jay*, *joy*, &c. ſound to a Frenchman as if ſpelled *djé*, *djâi*, &c. If any difficulty be found in forming this combination of ſounds, it will be removed by pronouncing the *d*, *ed*, and ſpelling theſe words *edjé*, *edjâi*, &c.

Ch, in Engliſh words not derived from the Greek, Latin, or French, is pronounced as if *t* were prefixed; thus the ſound of *chair*, *cheeſe*, *chain*, &c. would be underſtood by a Frenchman if the words were written *tchére*, *tchize*, *tchéne*.

Sh in Engliſh is expreſſed by *ch* in French; thus *ſhame*, *ſhare*, &c. would be ſpelled by a Frenchman *chéme*, *chére*, &c.

The ringing ſound *ng* in *long*, *ſong*, &c. may be perfectly conceived by a pupil who can pronounce the French word *Encore*, as the firſt ſyllable of this word is exactly correſpondent to the ſound in thoſe Engliſh words; and for the formation of it, ſee Principles, No. 57; alſo the word ENCORE.

But the greateſt difficulty every foreigner finds in pronouncing Engliſh, is the liſping conſonant *th*. This, it may be obſerved, has, like the other conſonants, a ſharp and flat ſound; ſharp as in *thin*, *bath*; flat as in *that*, *with*. To acquire a true pronunciation of this difficult combination, it may be proper to begin with thoſe words where it is initial: and firſt, let the pupil protrude his tongue a little way beyond the teeth, and preſs it between them as if going to bite the tip of it; while this is doing, if he wiſhes to pronounce *thin*, let him hiſs as if to ſound the letter *s*; and after the hiſs, let him draw back his tongue within his teeth, and pronounce the prepoſition *in*, and thus will the word *thin* be perfectly pronounced. If he would pronounce *that*, let him place the tongue between the teeth as before; and while he is hiſſing as to ſound the letter *z*, let him withdraw his tongue into his mouth, and immediately pronounce the prepoſition *at*. To pronounce this combination when final in *bath*, let him pronounce *ba*, and protrude the tongue beyond the teeth, preſſing the tongue with them, and hiſſing as if to ſound *s*; if he would pronounce *with*, let him firſt form *wi*, put the tongue in the ſame poſition as before, and hiſs as if to ſound *z*. It will be proper to make the pupil dwell ſome time with the tongue beyond the teeth in order to form a habit, and to pronounce daily ſome words out of a Dictionary beginning and ending with theſe letters.

Theſe directions, it is preſumed, if properly attended to, will be ſufficient to give ſuch Foreigners as underſtand French, and have not acceſs to a maſter, a competent knowledge of Engliſh pronunciation; but to render the ſounds of the vowels marked by figures in this Dictionary ſtill more eaſily to be comprehended—with thoſe Engliſh words which exemplify the ſounds of the vowels, I have aſſociated ſuch French words as have vowels exactly correſponding to them, and which immediately convey the true Engliſh pronunciation. Theſe ſhould be committed to memory, or written down and held in his hand while the pupil is inſpecting the Dictionary.

Perhaps the greateſt advantage to foreigners and provincials will be derived from the claſſification of words of a ſimilar ſound, and drawing the line between the general rule and the exception. This has been an arduous taſk; but it is hoped the benefit ariſing from it will amply repay it. When the numerous varieties of ſounds annexed to vowels, diphthongs, and conſonants, lie

Digitized from Best Copy Available

lie ſcattered without bounds, a learner is bewildered and diſcouraged from attempting to diſtinguiſh them; but when they are all claſſed, arranged, and enumerated, the variety ſeems leſs, the number ſmaller, and the diſtinction eaſier. What an inextricable labyrinth do the diphthongs *ea* and *ou* form as they lie looſe in the language! but claſſed and arranged as we find them, No. 226, &c. and 313, &c. the confuſion vaniſhes, they become much leſs formidable, and a learner has it in his power, by repeating them daily, to become maſter of them all in a very little time.

The Engliſh accent is often an unſurmountable obſtacle to foreigners, as the rules for it are ſo various, and the exceptions ſo numerous; but let the inſpector conſult the article Accent in the Principles, particularly No. 492, 505, 506, &c. and he will ſoon perceive how much of our language is regularly accented, and how much that which is irregular is facilitated by an enumeration of the greater number of exceptions.

But ſcarcely any method will be ſo uſeful for gaining the Engliſh accent as the reading of verſe. This will naturally lead the ear to the right accentuation; and though a different poſition of the accent is frequently to be met with in the beginning of a verſe, there is a ſufficient regularity to render the pronouncing of verſe a powerful means of obtaining ſuch a diſtinction of force and feebleneſs as is commonly called the accent: for it may be obſerved, that a foreigner is no leſs diſtinguiſhable by placing an accent upon certain words to which the Engliſh give no ſtreſs, than by placing the ſtreſs upon a wrong ſyllable. Thus if a foreigner, when he calls for bread at table, by ſaying, *give me ſome bread*, lays an equal ſtreſs upon every word, though every word ſhould be pronounced with its exact ſound, we immediately perceive he is not a native. An Engliſhman would pronounce theſe four words like two, with the accent on the firſt ſyllable of the firſt, and on the laſt ſyllable of the laſt, as if written *giveme somebréd*; or rather *givme sumbréd*; or more commonly, though vulgarly, *gimme somebréd*. Verſe may ſometimes induce a foreigner, as it does ſometimes injudicious natives, to lay the accent on a ſyllable in long words which ought to have none, as in a couplet of Pope's Eſſay on Criticiſm:

> "Falſe eloquence, like the priſmatic glaſs,
> "Its gaudy colours ſpreads on every place."

Here a foreigner would be apt to place an accent on the laſt ſyllable of *eloquence* as well as the firſt, which would be certainly wrong; but this fault is ſo trifling, when compared with that of laying the accent on the ſecond ſyllable, that it almoſt vaniſhes from obſervation; and this miſaccentuation, verſe will generally guard him from. The reading of verſe, therefore, will, if I am not miſtaken, be found a powerful regulator, both of accent and emphaſis.

PRINCIPLES OF ENGLISH PRONUNCIATION.

1. THE First Principles or Elements of Pronunciation are Letters.

The letters of the Engliſh language are:

Roman.	Italick.	Name.
A a	*A a*	*a*
B b	*B b*	*bee*
C c	*C c*	*ſee*
D d	*D d*	*dee*
E e	*E e*	*e*
F f	*F f*	*eff*
G g	*G g*	*jee*
H h	*H h*	*aitch*
I i	*I i*	*i* or *eye*
J j	*J j*	*j* conſonant, or *jay*
K k	*K k*	*kay*
L l	*L l*	*el*
M m	*M m*	*em*
N n	*N n*	*en*
O o	*O o*	*o*
P p	*P p*	*pee*
Q q	*Q q*	*cue*
R r	*R r*	*ar*
S ſ s	*S ſ s*	*eſs*
T t	*T t*	*tee*
U u	*U u*	*u* or *you*
V v	*V v*	*v* conſonant, or *vee*
W w	*W w*	double *u*
X x	*X x*	*eks*
Y y	*Y y*	*wy*
Z z	*Z z*	*zed*, or *izzard*, (483)

2. To theſe may be added certain combinations of letters ſometimes uſed in printing; as ct, ſt, fl, ſl, ſb, ſh, ſk, ff, ff, fi, ffi, fi, ffi, ffl, and &, or *and per ſe and*, or rather *et per ſe and*; *ct, ſt, fl, ſl, ſb, ſh, ſk, ff, ff, fi, ffi, fi, ffi, &.*

3. Our letters, ſays Dr. Johnſon, are commonly reckoned twenty-four, becauſe anciently *i* and *j*, as well as *u* and *v*, were expreſſed by the ſame character; but as theſe letters, which had always different powers, have now different forms, our alphabet may be properly ſaid to conſiſt of twenty-ſix letters.

4. In conſidering the ſounds of theſe firſt principles of language, we find that ſome are ſo ſimple and unmixed, that there is nothing required but the opening of the mouth to make them underſtood, and to form different ſounds. Whence they have the names of *vowels*, or *voices* or *vocal ſounds*. On the contrary,

trary, we find that there are others, whose pronunciation depends on the particular application and use of every part of the mouth, as the teeth, the lips, the tongue, the palate, &c. which yet cannot make any one perfect sound but by their union with those vocal sounds; and these are called *consonants*, or letters sounding with other letters.

Definition of Vowels and Consonants.

5. Vowels are generally reckoned to be five in number; namely, *a*, *e*, *i*, *o*, *u*; *y* and *w* are called vowels when they end a syllable or word, and consonants when they begin one.

6. The definition of a vowel, as little liable to exception as any, seems to be the following: A vowel is a simple sound formed by a continued effusion of the breath, and a certain conformation of the mouth, without any alteration in the position, or any motion in the organ of speech, from the moment the vocal sound commences till it ends.

7. A consonant may be defined to be, an interruption of the effusion of vocal sound, arising from the application of the organs of speech to each other.

8. Agreeably to this definition, vowels may be divided into two kinds, the simple and compound. The simple *a*, *e*, *o*, are those which are formed by one conformation of the organs only; that is, the organs remain exactly in the same position at the end as at the beginning of the letter; whereas in the compound vowels *i* and *u*, the organs alter their position before the letter is completely sounded; nay, these letters, when commencing a syllable, do not only require a different position of the organs in order to form them perfectly, but demand such an application of the tongue to the roof of the mouth, as is inconsistent with the nature of a pure vowel; for the first of these letters, *i*, when sounded alone, or ending a syllable with the accent upon it, is a real diphthong, composed of the sounds of *a* in *father*, and of *e* in *the*, exactly correspondent to the sound of the noun *eye*; and when this letter commences a syllable, as in *mia-ion*, *pin-ion*, &c. the sound of *e* with which it terminates is squeezed into a consonant sound, like the double *e* heard in *queen*, different from the simple sound of that letter in *quean*, and this squeezed sound in the commencing *i* makes it exactly similar to *y* in the same situation; which, by all grammarians, is acknowledged to be a consonant*. The latter of these compound vowels, *u*, when initial, and not shortened by a consonant, commences with this squeezed sound of *e* equivalent to the *y*, and ends with a sound given to *oo* in *woo* and *coo*, which makes its name in the alphabet exactly similar to the

* How so accurate a grammarian as Dr. Lowth could pronounce so definitively on the nature of *y*, and insist on its being always a vowel, can only be accounted for by considering the small attention which is generally paid to this part of grammar. His words are these:

"The same sound which we express by the initial *y*, our Saxon ancestors in many instances expressed by the vowel *e*; as *eowver*, *your*; and by the vowel *i*; as *iw*, *yew*; *iong*, *young*. In the word *yew* the initial *y* has precisely the same sound with *i* in the words *view*, *lieu*, *adieu*: the *i* is acknowledged to be a vowel in these latter; how then can the *y*, which has the very same sound, possibly be a consonant in the former? Its initial sound is generally like that of *i* in *shire*, or *ee* nearly; it is formed by the opening of the mouth without any motion or contact of the parts: in a word, it has every property of a vowel, and not one of a consonant." Introd. to Eng. Gram. page 3.

Thus far the learned bishop; who has too fixed a fame to suffer any diminution by a mistake in so trifling a part of literature as this: but it may be asked, if *y* has every property of a vowel and not one of a consonant, why, when it begins a word, does it not admit of the euphonic article *an* before it?

Digitized from Best Copy Available

the pronoun *you*†. If, therefore, the common definition of a vowel be juſt, theſe two letters are ſo far from being ſimple vowels, that they may more properly be called ſemi-conſonant diphthongs.

9. That *y* and *w* are conſonants when they begin a word, and vowels when they end one, is generally acknowledged by the beſt grammarians; and yet Dr. Lowth has told us, that *w* is equivalent to *oo*; but if this were the caſe, it would always admit of the particle *an* before it: for though we have no word in the language which commences with theſe letters, we plainly perceive, that if we had ſuch a word, it would readily admit of *an* before it, and conſequently that theſe letters are not equivalent to *w*. Thus we find, that the common opinion, with reſpect to the double capacity of theſe letters, is perfectly juſt.

10. Beſides the vowels already mentioned, there is another ſimple vowel ſound found under the *oo* in the words *woo* and *coo*; theſe letters have, in theſe two words, every property of a pure vowel, but when found in *food*, *mood*, &c. and in the word *too*, pronounced like the adjective *two*: here the *oo* has a ſqueezed ſound, occaſioned by contracting the mouth, ſo as to make the lips nearly touch each other; and this makes it, like the *i* and *u*, not ſo much a double vowel, as a ſound between a vowel and a conſonant.

Claſſification of Vowels and Conſonants.

11. Vowels and conſonants being thus defined, it will be neceſſary, in the next place, to arrange them into ſuch claſſes as their ſimilitudes and ſpecific differences ſeem to require.

12. Letters, therefore, are naturally diviſible into vowels and conſonants.

13. The vowels are, *a*, *e*, *i*, *o*, *u*, and *y* and *w* when ending a ſyllable.

14. The conſonants are, *b*, *c*, *d*, *f*, *g*, *h*, *j*, *k*, *l*, *m*, *n*, *p*, *q*, *r*, *s*, *t*, *v*, *x*, *z*, and *y* and *w* when beginning a ſyllable.

15. The vowels may be ſubdivided into ſuch as are ſimple and pure, and into ſuch as are compound and impure. The ſimple or pure vowels are ſuch as require only one conformation of the organs to form them, and no motion in the organs while forming.

16. The compound or impure vowels are ſuch as require more than one conformation of the organs to form them, and a motion in the organs while forming. Theſe obſervations premiſed, we may call the following ſcheme

An

† An ignorance of the real compoſition of *u*, and a want of knowing that it partook of the nature of a conſonant, has occaſioned a great diverſity and uncertainty in prefixing the indefinite article *an* before it. Our anceſtors, judging of its nature from its name, never ſuſpected that it was not a pure vowel, and conſtantly prefixed the article *an* before nouns beginning with this letter; as *an union*, *an uſeful book*. They were confirmed in this opinion by finding the *an* always adapted to the ſhort *u*, as *an umpire*, *an umbrella*, without ever dreaming that the ſhort *u* is a pure vowel, and eſſentially different from the long one. But the moderns, not reſting in the name of a letter, and conſulting their ears rather than their eyes, have frequently placed the *a* inſtead of *an* before the long *u*, and we have ſeen *a union*, *a univerſity*, *a uſeful book*; from ſome of the moſt reſpectable pens of the preſent age. Nor can we doubt a moment of the propriety of this orthography, when we reflect that theſe words actually begin to the ear with *y*, and might be ſpelled *younion*, *youniverſity*, *youſeful*, and can therefore no more admit of *an* before them than *year* and *youth*. See Remarks on the word AN in this Dictionary.

Diphthongs and Triphthongs enumerated.

17. Two vowels forming but one ſyllable are generally called a diphthong, and three a triphthong: theſe are the following:

ae Cæſar	*ei* ceiling	*oa* coat	*ui* languid
ai aim	*eo* people	*oe* œconomy	*uy* buy
ao gaol	*eu* feud	*oi* voice	*aye* (for ever)
au taught	*ew* jewel	*oo* moon	*eau* beauty
aw law	*ey* they	*ou* found	*eou* plenteous

ea clean	*ie* friend	*oy* boy	*iew* view
ee reed	*io* paſſion	*ue* manſuetude	*oeu* manœuvre.

Conſonants enumerated and diſtinguiſhed into Claſſes.

18. The conſonants are diviſible into mutes, ſemi-vowels, and liquids.

19. The mutes are ſuch as emit no ſound without a vowel, as *b*, *p*, *t*, *d*, *k*, and *c* and *g* hard.

20. The ſemi-vowels are ſuch as emit a ſound without the concurrence of a vowel, as *f*, *v*, *ſ*, *z*, *x*, *g* ſoft or *j*.

21. The liquids are ſuch as flow into, or unite eaſily with the mutes, as *l*, *m*, *n*, *r*.

22. But, beſides theſe, there is another claſſification of the conſonants, of great importance to a juſt idea of the nature of the letters, and that is, into ſuch as are ſharp or flat, and ſimple or aſpirated.

23. The ſharp conſonants are, *p*, *f*, *t*, *ſ*, *k*, *c* hard.

24. The flat conſonants are, *b*, *v*, *d*, *z*, *g* hard.

25. The ſimple conſonants are thoſe which have always the ſound of one letter unmixed with others, as, *b*, *p*, *f*, *v*, *k*, *g* hard, and *g* ſoft, or *j*.

26. The mixed or aſpirated conſonants are thoſe which have ſometimes a hiſs or aſpiration joined with them, which mingles with the letter, and alters its ſound, as *t* in *motion*, *d* in *ſoldier*, *ſ* in *miſſion*, and *z* in *azure*.

27. There is another diſtinction of conſonants ariſing either from the ſeat of their formation, or from thoſe organs which are chiefly employed in forming them. The beſt diſtinction of this kind ſeems to be that which divides them into labials, dentals, gutturals, and naſals.

28.

28. The labials are, *b*, *p*, *f*, *v*. The dentals are, *t*, *d*, *s*, *z*, and ſoft *g* or *j*. The gutturals are, *k*, *q*, *c* hard, and *g* hard. The naſals are, *m*, *n*, and *ng*.

29. Theſe ſeveral properties of the conſonants may be exhibited at one view in the following table, which may be called

Mute labials	Sharp, *p*, *pomp*				labio-naſal
	Flat, *b*, *bomb*				liquid *m*
Hiſſing labials	Sharp, *f*, *if*

Hiſſing dentals	Sharp, *s*	*say*		*eſh paſſion*	dental
	Flat, *z*	*as*		*ezhe viſion*	liquid *l*
Liſping dentals	Sharp, *eth*, *death*				
	Flat, *the*, *ſcythe*				
Gutturals	Sharp, *k*, *kick*				guttural
	Flat, *g* hard, *gag*				liquid *r*

30. Vowels and conſonants being thus defined and arranged, we are the better enabled to enter upon an enquiry into their different powers, as they are differently combined with each other. But previous to this, that nothing may be wanting to form a juſt idea of the firſt principles of pronunciation, it may not be improper to ſhow the organic formation of each letter.

Organic Formation of the Letters.

31. Though I think every mechanical account of the organic formation of the letters rather curious than uſeful, yet, that nothing which can be preſented to the eye may be wanting to inform the ear, I ſhall in this follow thoſe who have been at the pains to trace every letter to its ſeat, and make us, as it were, touch the ſounds we articulate.

Organic Formation of the Vowels.

32. It will be neceſſary to obſerve, that there are three long ſounds of the letter *a*, which are formed by a greater or leſs expanſion of the internal parts of the mouth.

33. The German *a*, heard in *ball*, *wall*, &c. is formed by a ſtrong and grave expreſſion of the breath through the mouth, which is open nearly in a circular form, while the tongue, contracting itſelf to the root, as to make way for the ſound, almoſt reſts upon the under jaw.

34. The Italian *a*, heard in *father*, cloſes the mouth a little more than the German *a*; and by raiſing the lower jaw, widening the tongue, and advancing it a little nearer to the lips, renders its ſound leſs hollow and deep.

35. The ſlender *a*, or that heard in *lane*, is formed in the mouth ſtill higher than the laſt; and in pronouncing it, the lips, as if to give it a ſlender ſound, dilate their aperture horizontally; while the tongue, to aſſiſt this narrow emiſ-

ſion

ſion of breath, widens itſelf to the cheeks, raiſes itſelf nearer the palate, and by theſe means a leſs hollow ſound than either of the former is produced.

36. The *e* in *e-qual* is formed by dilating the tongue a little more, and advancing it nearer to the palate and the lips, which produces the ſlendereſt vowel in the language; for the tongue is, in the formation of this letter, as cloſe to the palate as poſſible, without touching it; as the moment the tongue touches the palate, the ſqueezed ſound of *ee* in *thee* and *meet* is formed, which, by its deſcription, muſt partake of the ſound of the conſonant *y*.

37. The *i* in *i-dol* is formed by uniting the ſound of the Italian *a* in *father* and the *e* in *e-qual*, and pronouncing them as cloſely together as poſſible. See Directions to foreigners at the beginning of this book, page xxi.

38. The *o* in *o-pen* is formed by nearly the ſame poſition of the organs as the *a* in *wa-ter*; but the tongue is advanced a little more into the middle of the mouth, the lips are protruded, and form a round aperture like the form of the letter, and the voice is not ſo deep in the mouth as when *a* is formed, but advances to the middle or hollow of the mouth.

39. The *u* in *u-nit* is formed by uniting the ſqueezed ſound *ee* to a ſimple vowel ſound, heard in *woo* and *coo*; the *oo* in theſe words is formed by protruding the lips a little more than in *o*, forming a ſmaller aperture with them, and, inſtead of ſwelling the voice in the middle of the mouth, bringing it as forward as poſſible to the lips.

40. *Y* final in *try* is formed like *i*: and *w* final in *now*, like the *oo*, which has juſt been deſcribed.

In this view of the organic formation of the vowels we find that *a*, *e*, and *o*, are the only ſimple or pure vowels: that *i* is a diphthong, and that *u* is a ſemi-conſonant. If we were inclined to contrive a ſcale for meaſuring the breadth or narrowneſs, or, as others term it, the openneſs or cloſeneſs of the vowels, we might begin with *e* open, as Mr. Elphinſton calls it, and which he announces to be the cloſeſt of all the vocal powers. In the pronunciation of this letter we find the aperture of the mouth extended on each ſide; the lips almoſt cloſed, and the ſound iſſuing horizontally. The ſlender *a* in *waſte* opens the mouth a little wider. The *a* in *father* opens the mouth ſtill more without contracting the corners. The German *a* heard in *wall*, not only opens the mouth wider than the former *a*, but contracts the corners of the mouth ſo as to make the aperture approach nearer to a circle, while the *o* opens the mouth ſtill more, and contracts the corners ſo as to make it the *os rotundum*, a picture of the letter it ſounds. If, therefore, the other vowels were, like *o*, to take their forms from the aperture of the mouth in pronouncing them, the German *a* ought neceſſarily to have a figure as nearly approaching the *o* in form as it does in ſound; that is, it ought to have that elliptical form which approaches neareſt to the circle; as the *a* of the Italians, and that of the Engliſh in *father*, ought to form ovals, in exact proportion to the breadth of their ſounds; the Engliſh *a* in *waſte* ought to have a narrower oval; the *e* in *the* ought to have the curve of a parabola, and the ſqueezed ſound of *ee* in *ſeen* a right line; or to reduce theſe lines to ſolids, the *o* would be a perfect globe, the German *a* an oblate ſpheriod like the figure of the earth, the Italian *a* like an egg, the Engliſh ſlender *a* a Dutch ſkittle, the *e* a rolling-pin, and the double *e* a cylinder.

Organic Formation of the Conſonants.

41. The beſt method of ſhewing the organic formation of the conſonants will be to claſs them into ſuch pairs as they naturally fall into, and then, by deſcribing

ing one, we ſhall nearly deſcribe its fellow; by which means the labour will be leſſened, and the nature of the conſonants better perceived. The conſonants that fall into pairs are the following:

p	*f*	*t*	*s*	*ſh*	*th*	*k*	*ch*	*chair*
b	*v*	*d*	*z*	*zh*	*dh*	*g*	*j*	*jail.*

42. Holder, who wrote the moſt elaborately and philoſophically upon this ſubject, tells us, in his *Elements of Speech*, that when we only whiſper we cannot diſtinguiſh the firſt rank of theſe letters from the ſecond. It is certain the difference between them is very nice; the upper letters ſeeming to have only a ſmarter, briſker appulſe of the organs than the lower; which may not improperly be diſtinguiſhed by ſharp and flat. The moſt marking diſtinction between them will be found to be a ſort of guttural murmur, which precedes the latter letters when we wiſh to pronounce them forcibly, but not the former. Thus if we cloſe the lips, and put the fingers on them to keep them ſhut, and ſtrive to pronounce the *p*, no ſound at all will be heard; but in ſtriving to pronounce the *b* we ſhall find a murmuring ſound from the throat, which ſeems the commencement of the letter; and if we do but ſtop the breath by the appulſe of the organs, in order to pronounce with greater force, the ſame may be obſerved of the reſt of the letters.

43. This difference in the formation of theſe conſonants may be more diſtinctly perceived in the *s* and *z* than in any other of the letters; the former is ſounded by the ſimple iſſue of the breath between the teeth, without any vibration of it in the throat, and may be called a hiſſing ſound; while the latter cannot be formed without generating a ſound in the throat, which may be called a vocal ſound. The upper rank of letters, therefore, may be called breathing conſonants; and the lower, vocal ones.

44. Theſe obſervations premiſed, we may proceed to deſcribe the organic formation of each letter.

45. *P* and *B* are formed by cloſing the lips till the breath is collected, and then letting it iſſue by forming the vowel *e*.

46. *F* and *V* are formed by preſſing the upper teeth upon the under lip, and ſounding the vowel *e* before the former and after the latter of theſe letters.

47. *T* and *D* are formed by preſſing the tip of the tongue to the gums of the upper teeth, and then ſeparating them, by pronouncing the vowel *e*.

48. *S* and *Z* are formed by placing the tongue in the ſame poſition as in *T* and *D*, but not ſo cloſe to the gums, as to ſtop the breath: a ſpace is left between the tongue and the palate for the breath to iſſue, which forms the hiſſing and buzzing ſound of theſe letters.

49. *SH* heard in *miſſion*, and *zh* in *evaſion*, are formed in the ſame ſeat of ſound as *s* and *z*; but in the former, the tongue is drawn a little inwards, and at a ſomewhat greater diſtance from the palate, which occaſions a fuller effuſion of breath from the hollow of the mouth, than in the latter, which are formed nearer to the teeth.

50. *TH* in *think*, and the ſame letters in *that*, are formed by protruding the tongue between the fore teeth, preſſing it againſt the upper teeth, and at the ſame time endeavouring to ſound the *s* or *z*; the former letter to ſound *th* in *think*, and the latter to ſound *th* in *that*.

51. *K* and *G* hard are formed by preſſing the middle of the tongue to the roof of the mouth near the throat, and ſeparating them a little ſmartly to form the firſt, and more gently to form the laſt of theſe letters.

52. *CH*

Digitized from Best Copy Available

52. *CH* in *chair*, and *J* in *jail*, are formed by preſſing *t* to *ſh*, and *d* to *zh*.

53. *M* is formed by cloſing the lips, as in *P* and *B*, and letting the voice iſſue by the noſe.

54. *N* is formed by reſting the tongue in the ſame poſition as in *T* or *D*, and breathing through the noſe, with the mouth open.

55. *L* is formed by nearly the ſame poſition of the organs as *t* and *d*, but more with the tip of the tongue, which is brought a little forwarder to the teeth, while the breath iſſues from the mouth.

56. *R* is formed by placing the tongue nearly in the poſition of *t*, but at ſuch a diſtance from the palate as ſuffers it to jar againſt it, when the breath is propelled from the throat to the mouth.

57. *NG* in *ring*, *ſing*, &c. is formed in the ſame ſeat of ſound as hard *g*; but while the middle of the tongue preſſes the roof of the mouth, as in *G*, the voice paſſes principally through the noſe, as in *N*.

58. *Y* conſonant is formed by placing the organs in the poſition of *e*, and ſqueezing the tongue againſt the roof of the mouth, which produces *ee*, which is equivalent to initial *y*. (36).

59. *W* conſonant is formed by placing the organs in the poſition of *oo*, deſcribed under *u*, and cloſing the lips a little more, in order to propel the breath upon the ſucceeding vowel which it articulates.

60. In this ſketch of the formation and diſtribution of the conſonants, it is curious to obſerve on how few radical principles, the almoſt infinite variety of combination in language depends. It is with ſome degree of wonder we perceive that the ſlighteſt aſpiration, the almoſt inſenſible inflection of nearly ſimilar ſounds, often generate the moſt different and oppoſite meanings. In this view of nature, as in every other, we find uniformity and variety very conſpicuous. The ſingle *fiat*, at firſt impreſſed on the chaos, ſeems to operate on languages; which, from the ſimplicity and paucity of their principles, and the extent and power of their combinations, prove the goodneſs, wiſdom, and omnipotence of their origin.

61. This analogical aſſociation of ſounds is not only curious, but uſeful: it gives us a comprehenſive view of the powers of the letters; and, from the ſmall number that are radically different, enables us to ſee the rules on which their varieties depend: it diſcovers to us the genius and propenſities of ſeveral languages and dialects, and, when authority is ſilent, enables us to decide agreeably to analogy.

62. The vowels, diphthongs, and conſonants, thus enumerated and defined, before we proceed to aſcertain their different powers, as they are differently aſſociated with each other, it may be neceſſary to give ſome account of thoſe diſtinctions of ſound in the ſame vowels which expreſs their quantity as long or ſhort, or their quality as open or cloſe, or ſlender and broad. This will appear the more neceſſary, as theſe diſtinctions ſo frequently occur in deſcribing the ſounds of the vowels, and as they are not unfrequently uſed with too little preciſion by moſt writers on the ſubject.

Of the Quantity and Quality of the Vowels.

63. The firſt diſtinction of ſound that ſeems to obtrude itſelf upon us when we utter the vowels, is a long and a ſhort ſound according to the greater or leſs duration of time taken up in pronouncing them. This diſtinction is ſo obvious as to have been adopted in all languages, and is that to which we annex clearer ideas than to any other; and though the ſhort ſounds of ſome vowels have not

Digitized from Best Copy Available

in our language been claſſed with ſufficient accuracy with their parent long ones, yet this has bred but little confuſion, as vowels long and ſhort are always ſufficiently diſtinguiſhable; and the nice appropriation of ſhort ſounds to their ſpecific long ones is not neceſſary to our conveying what ſound we mean, when the letter to which we apply theſe ſounds is known, and its power agreed upon.

64. The next diſtinction of vowels into their ſpecific ſounds, which ſeems to be the moſt generally adopted, is that which ariſes from the different apertures of the mouth in forming them. It is certainly very natural, when we have ſo many more ſimple ſounds than we have characters by which to expreſs them, to diſtinguiſh them by that which ſeems their organic definition; and we accordingly find vowels denominated by the French, *ouvert* and *fermé*; by the Italians, *aperto* and *chiuſo*; and by the Engliſh, *open* and *ſhut*.

65. But whatever propriety there may be in the uſe of theſe terms in other languages, it is certain they muſt be uſed with caution in Engliſh for fear of confounding them with long and ſhort. Dr. Johnſon and other grammarians call the *a* in *father* the open *a*: which may, indeed, diſtinguiſh it from the ſlender *a* in *paper*; but not from the broad *a* in *water*, which is ſtill more open. Each of theſe letters has a ſhort ſound, which may be called a ſhut ſound; but the long ſounds cannot be ſo properly denominated open as more or leſs broad; that is, the *a* in *paper*, the ſlender ſound; the *a* in *father*, the broadiſh or middle ſound; and the *a* in *water*, the broad ſound. The ſame may be obſerved of the *o*. This letter has three long ſounds, heard in *move*, *note*, *nor*; which graduate from ſlender to broadiſh, and broad like the *a*. The *i* alſo in *mine* may be called the broad *i*, and that in *machine* the ſlender *i*; though each of them is equally long; and though theſe vowels that are long may be ſaid to be more or leſs open according to the different apertures of the mouth in forming them, yet the ſhort vowels cannot be ſaid to be more or leſs ſhut; for as ſhort always implies ſhut (except in verſe), though long does not always imply open, we muſt be careful not to confound long and open, and cloſe and ſhut, when we ſpeak of the quantity and quality of the vowels. The truth of it is, all vowels either terminate a ſyllable or are united with a conſonant. In the firſt caſe, if the accent be on the ſyllable, the vowel is long, though it may not be open: in the ſecond caſe, where a ſyllable is terminated by a conſonant, except that conſonant be *r*, whether the accent be on the ſyllable or not, the vowel has its ſhort ſound, which, compared with its long one, may be called ſhut: but as no vowel can be ſaid to be ſhut that is not joined to a conſonant, all vowels that end ſyllables may be ſaid to be open, whether the accent be on them or not. (550) (551).

66. But though the terms long and ſhort, as applied to vowels, are pretty generally underſtood, an accurate ear will eaſily perceive that theſe terms do not always mean the long and ſhort ſounds of the reſpective vowels to which they are applied; for if we chooſe to be directed by the ear in denominating vowels, long or ſhort, we muſt certainly give theſe appellations to thoſe ſounds only which have exactly the ſame radical tone, and differ only in the long or ſhort emiſſion of that tone. Thus meaſuring the ſounds of the vowels by this ſcale, we ſhall find that the long *I* and *y* have properly no ſhort ſounds but ſuch as ſeem eſſentially diſtinct from their long ones; and that the ſhort ſound of theſe vowels is no other than the ſhort ſound of *e*, which is the latter letter in the compoſition of theſe diphthongs. (37).

67. The ſame want of correſpondence in claſſing the long and ſhort vowels we find in *a*, *e*, *o*, and *u*; for as the *e* in *theme* does not find its ſhort ſound in the ſame letter in *them*, but in the *i* in *him*; ſo the *e* in *them* muſt deſcend a ſtep lower

Digitized from Best Copy Available

lower into the province of *a* for its long ſound in *tame*. The *a* in *carry* is not the ſhort ſound of the *a* in *care*, but of that in *car*, *father*, &c. as the ſhort broad ſound of the *a* in *want* is the true abbreviation of that in *wall*. The ſound of *o* in *don*, *gone*, &c. is exactly correſpondent to the *a* in *ſwan*, and finds its long ſound in the *a* in *wall*, or the diphthong *aw* in *dawn*, *lawn*, &c.; while the ſhort ſound of the *o* in *tone* is nearly that of the ſame letter in *ton*, (a weight), and correſponding with what is generally called the ſhort ſound of *u* in *tun*, *gun*, &c. as the long ſound of *u* in *pule* muſt find its ſhort ſound in the *u* in *pull*, *bull*, &c.; for this vowel, like the *i* and *y*, being a diphthong, its ſhort ſound is formed from the latter part of the letter equivalent to double *o*; as the word *pule*, if ſpelled according to the ſound, might be written *þeoole*.

68. Another obſervation preparatory to a conſideration of the various ſounds of the vowels and conſonants ſeems to be the influence of the accent; as the accent or ſtreſs which is laid upon certain ſyllables has ſo obvious an effect upon the ſounds of the letters, that unleſs we take accent into the account, it will be impoſſible to reaſon rightly upon the proper pronunciation of the Elements of Speech.

Of the Influence of Accent on the Sounds of the Letters.

69. It may be firſt obſerved, that the exertion of the organs of ſpeech neceſſary to produce the accent or ſtreſs, has an obvious tendency to preſerve the letters in their pure and uniform ſound, while the relaxation or feebleneſs which ſucceeds the accent as naturally ſuffers the letters to ſlide into a ſomewhat different ſound a little eaſier to the organs of pronunciation. Thus the firſt *a* in *cabbage* is pronounced diſtinctly with the true ſound of that letter, while the ſecond *a* goes into an obſcure ſound bordering on the *i* ſhort, the ſlendereſt of all ſounds; ſo that *cabbage* and *village* have the *a* in the laſt ſyllable ſcarcely diſtinguiſhable from the *e* and *i* in the laſt ſyllables of *college* and *veſtige*.

70. In the ſame manner the *a*, *e*, *i*, *o*, and *y*, coming before *r* in a final unaccented ſyllable, go into an obſcure ſound ſo nearly approaching to the ſhort *u*, that if the accent were carefully kept upon the firſt ſyllables of *liar*, *lier*, *elixir*, *mayor*, *martyr*, &c. theſe words, without any perceptible change in the ſound of their laſt ſyllables, might all be written and pronounced, *liur*, *liur*, *elixur*, *mayur*, *martur*, &c.

71. The conſonants alſo are no leſs altered in their ſound by the poſition of the accent than the vowels. The *k* and *ſ* in the compoſition of *x*, when the accent is on them, in *exerciſe*, *execute*, &c. preſerve their ſtrong pure ſound; but when the accent is on the ſecond ſyllable, in *exact*, *exonerate*, &c. theſe letters ſlide into the duller and weaker ſounds of *g* and *z*, which are eaſier to the organs of pronunciation. Hence not only the ſoft *c* and the *ſ* go into *ſh*, but even the *t* before a diphthong ſlides into the ſame letters when the ſtreſs is on the preceding ſyllable. Thus in *ſociety* and *ſatiety* the *c* and *t* preſerve their pure ſound, becauſe the ſyllables *ci* and *ti* have the accent on them; but in *ſocial* and *ſatiate* theſe ſyllables come after the ſtreſs, and from the feebleneſs of their ſituation naturally fall into the ſhorter and eaſier ſound, as if written *ſoſhial* and *ſaſhiate*. See the word SATIETY.

A.

72. A has three long ſounds and two ſhort ones.

73. The firſt ſound of the firſt letter in our alphabet is that which among the Engliſh is its name. (See the letter *A* at the beginning of the Dictionary.)

This

Digitized from Best Copy Available

This is what is called by moſt grammarians its ſlender ſound (35) (65); we find it in the words *lade, ſpade, trade*, &c. In the diphthong *ai* we have exactly the ſame ſound of this letter, as in *pain, gain, ſtain*, &c. and ſometimes in the diphthong *ea*, as *bear, ſwear, pear*, &c.; nay, twice we find it, contrary to every rule of pronunciation, in the words *where* and *there*, and once in the anomalous diphthong *ao* in *gaol*. It exactly correſponds to the ſound of the French *e* in the beginning of the words *être*, and *tête*.

74. The long ſlender *a* is generally produced by a ſilent *e* at the end of the ſyllable; which *e* not only keeps one ſingle intervening conſonant from ſhortening the preceding vowel, but ſometimes two: thus we find the mute *e* makes of *rag, rage*, and very improperly keeps the *a* open even in *range, change*, &c. (See CHANGE); *hat*, with the mute *e*, becomes *hate*, and the *a* continues open, and, perhaps, ſomewhat longer in *haſte, waſte, paſte*, &c. though it muſt be confeſſed this ſeems the privilege only of *a*; for the other vowels contract before the conſonants *ng* in *revenge, cringe, plunge*; and the *ſte* in our language is preceded by no other vowel but this. Every conſonant but *n* ſhortens every vowel but *a*, when ſoft *g* and *e* ſilent ſucceed; as *bilge, badge, hinge, ſpunge*, &c.

75. Hence we may eſtabliſh this general rule: *A* has the long, open, ſlender ſound, when followed by a ſingle conſonant, and *e* mute, as *lade, made, fade*, &c. The only exceptions ſeem to be, *have, are, gape*, and *bade*, the paſt time of to *bid*.

76. *A* has the ſame ſound, when ending an accented ſyllable, as *pa-per, ta-per, ſpec-ta-tor*. The only exceptions are, *fa-ther, maſ-ter, wa-ter*.

77. As the ſhort ſound of the long ſlender *a* is not found under the ſame character, but in the ſhort *e* (as may be perceived by comparing *mate* and *met*) (67), we proceed to delineate the ſecond ſound of this vowel, which is that heard in *father*, and is called by ſome the open ſound (34); but this can never diſtinguiſh it from the deeper ſound of the *a* in *all, ball*, &c. which is ſtill more open: by ſome it is ſtyled the middle ſound of *a*, as between the *a* in *pale*, and that in *wall*: it anſwers nearly to the Italian *a* in *Toſcano, Romana*, &c. or to the final *a* in the naturalized Greek words, *papa* and *mamma*; and in *baa*; the word adopted in almoſt all languages to expreſs the cry of ſheep. We ſeldom find the long ſound of this letter in our language, except in monoſyllables ending with *r*, as *far, tar, mar*, &c. and in the word *father*. There are certain words from the Latin, Italian, and Spaniſh languages, ſuch as *lumbago, bravado, tornado, camiſado, farrago*, &c. which are ſometimes heard with this ſound of *a*; but except in *bravo*, heard chiefly at the Theatres, the Engliſh ſound of *a* is preferable in all theſe words.

78. The long ſound of the middle or Italian *a* is always found before *r* in monoſyllables, as *car, far, mar*, &c. before the liquids *lm*; whether the latter only be pronounced, as in *pſalm*, or both, as in *pſalmiſt*; ſometimes before *lf*, and *lve*, as *calf, half, calve, halve, ſalve*, &c.; and, laſtly, before the ſharp aſpirated dental *th* in *bath, path, lath*, &c. and in the word *father*: this ſound of the *a* was formerly more than at preſent found before the naſal liquid *n*, eſpecially when ſucceeded by *c, t*, or *d*, as *dance, glance, lance, France, chance, prance, grant, plant, ſlant, ſlander*, &c.

79. The hiſſing conſonant *s* was likewiſe a ſign of this ſound of the *a*, whether doubled, as in *glaſs, graſs, laſs*, &c. or accompanied by *t* as in *laſt, faſt, vaſt*, &c.; but this pronunciation of *a* ſeems to have been for ſome years advancing to the ſhort ſound of this letter, as heard in *hand, land, grand*, &c. and pronouncing the *a* in *after, anſwer, baſket, plant, maſt*, &c. as long as in *half, calf*, &c. borders very cloſely on vulgarity: it muſt be obſerved, however, that the *a* before *n* in monoſyllables, and at the end of words, was anciently written with

with *u* after it, and ſo probably pronounced as broad as the German *a*; for Dr. Johnſon obſerves, "many words pronounced with *a* broad were anciently written with *au*, as *fault*, *mault*; and we ſtill write *fault*, *vault*. This was probably the Saxon ſound, for it is yet retained in the northern dialects, and in the ruſtic pronunciation, as *maun* for *man*, *haund* for *hand*." But ſince the *u* has vaniſhed, the *a* has been gradually pronounced ſlenderer and ſhorter, till now almoſt every veſtige of the ancient orthography ſeems loſt; though the termination *mand* in *command*, *demand*, &c. formerly written *commaund*, *demaund*, ſtill retains the long ſound inviolably.*

80. As the mute *l* in *calm*, *pſalm*, *calf*, *half*, &c. ſeems to lengthen the ſound of this letter, ſo the abbreviation of ſome words by apoſtrophe ſeems to have the ſame effect. Thus when, by impatience, that grand corrupter of manners, as well as language, the *no* is cut out of the word *cannot*, and the two ſyllables reduced to one, we find the *a* lengthened to the Italian or middle *a*, as *cannot*, *can't*; *have not*, *han't*; *ſhall not*, *ſha'n't*, &c. This is no more than what the Latin language is ſubject to; it being a known rule in that tongue, that when, by compoſition or otherwiſe, two ſhort ſyllables become one, that ſyllable is almoſt always long, as *alius* has the penultimate long becauſe it comes from *aliius*, and the two ſhort vowels in *coago* become one long vowel in *cogo*, &c.

81. The ſhort ſound of the middle or Italian *a*, which is generally confounded with the ſhort ſound of the ſlender *a*, is the ſound of this vowel in *man*, *pan*, *tan*, *mat*, *hat*, &c. we generally find this ſound before any two ſucceſſive conſonants (thoſe excepted in the foregoing remarks), and even when it comes before an *r*, if a vowel follow, or the *r* be doubled; for if this conſonant be doubled, in order to produce another ſyllable, the long ſound becomes ſhort, as *mar*, *marry*, *car*, *carry*, &c. where we find the monoſyllable has the long, and the diſſyllable the ſhort ſound; but if *a* come before *r*, followed by another conſonant, it has its long ſound, as in *part*, *partial*, &c.

82. The only exception to this rule is in adjectives derived from ſubſtantives ending in *r*; for in this caſe the *a* continues long, as in the primitive. Thus the *a* in *ſtarry*, or full of ſtars, is as long as in *ſtar*; and the *a* in the adjective *tarry*, or beſmeared with tar, is as long as in the ſubſtantive *tar*, though ſhort in the word *tarry*, (to ſtay).

83. The third long ſound of *a* is that which we more immediately derive from our maternal language the Saxon, but which at preſent we uſe leſs than any other: this is the *a* in *fall*, *ball*, *gall* (33): we find a correſpondent ſound to this *a* in the diphthongs *au* and *aw*, as *laud*, *law*, *ſaw*, &c.; though it muſt here be noted, that we have improved upon our German parent, by giving a broader ſound to this letter in theſe words than the Germans themſelves would do, were they to pronounce them.

84. The

* Since the firſt publication of this Dictionary the Public have been favoured with ſome very elaborate and judicious obſervations on Engliſh pronunciation by Mr. Smith, in a Scheme of a French and Engliſh Dictionary. In this work he departs frequently from my judgment, and particularly in the pronunciation of the letter *a*, when ſucceeded by *ſſ*, *ſt*, or *n*, and another conſonant, as *paſs*, *laſt*, *chance*, &c. to which he annexes the long ſound of *a* in *father*. That this was the ſound formerly, is highly probable from its being ſtill the ſound given it by the vulgar, who are generally the laſt to alter the common pronunciation; but that the ſhort *a* in theſe words is now the general pronunciation of the polite and learned world, ſeems to be candidly acknowledged by Mr. Smith himſelf: and as every correct ear would be diſguſted at giving the *a* in theſe words the full long ſound of the *a* in *father*, any middle ſound ought to be diſcountenanced, as tending to render the pronunciation of a language obſcure and indefinite, (163).

Ben Jonſon in his Grammar claſſes *ſalt*, *malt*, *balm*, and *calm*, as having the ſame ſound of *a*; and *aunt*, as having the ſame dipthongal ſound as *audience*, *author*, *law*, *ſaw*, *draw*, &c.

84. The long ſound of the deep broad German *a* is produced by *ll* after it, as in *all*, *wall*, *call*; or, indeed, by one *l*, and any other conſonant, except the mute labials *p*, *b*, *f*, and *v*, as *ſalt*, *bald*, *falſe*, *falchion*, *falcon*, &c. The exceptions to this rule are generally words from the Arabic and Latin languages, as *Alps*, *Albion*, *aſphaltic*, *falcated*, *ſalve*, *calculate*, *amalgamate*, *Alcoran*, and *Alfred*, &c.; the two laſt of which may be conſidered as ancient proper names which have been frequently latinized, and by this means have acquired a ſlenderer ſound of *a*. This rule, however, muſt be underſtood of ſuch ſyllables only as have the accent on them; for when *al*, followed by a conſonant, is in the firſt ſyllable of a word, having the accent on the ſecond, it is then pronounced as in the firſt ſyllables of *al ley*, *val-ley*, &c. as *alternate*, *balſamic*, *falcade*, *falcation*, &c. Our modern orthography, which has done its utmoſt to perplex pronunciation, has made it neceſſary to obſerve, that every word compounded of a monoſyllable with *ll*, as *albeit*, *alſo*, *almoſt*, *downfal*, &c. muſt be pronounced as if the two liquids were ſtill remaining, notwithſtanding our word-menders have wiſely taken one away, to the deſtruction both of ſound and etymology; for, as Mr. Elphinſton ſhrewdly obſerves, "Every reader, young and old, muſt "now be ſo ſagacious an analyſt as to diſcern at once not only what are com- "pounds and what their ſimples, but that *al* in compoſition is equal to *all* out "of it; or in other words, that it is both what it is, and what it is not." *Prin. Eng. Language*, vol. I. page 60. See No. 404.

85. The *w* has a peculiar quality of broadening this letter, even when prepoſitive: this is always the effect, except when the vowel is cloſed by the ſharp, or flat guttural *k* or *g*, *x*, *ng*, *nk*, or the ſharp labial *f*, as *wax*, *waſt*, *thwack*, *twang*, *twank*: thus we pronounce the *a* broad, though ſhort in *wad*, *wan*, *want*, *was*, *what*, &c.; and though other letters ſuffer the *a* to alter its ſound before *ll*, when one of theſe letters goes to the formation of the latter ſyllable, as *tall*, *tal-low*; *hall*, *hal-low*; *call*, *cal-low*, &c.; yet we ſee *w* preſerve the ſound of this vowel before a ſingle conſonant, as *wal-low*, *ſwal-low*, &c.

86. The *q* including the ſound of the *w*, and being no more than this letter preceded by *k*, ought, according to analogy, to broaden every *a* it goes before like the *w*; thus *quantity* ought to be pronounced as if written *kwontity*, and *quality* ſhould rhyme with *jollity*; inſtead of which we frequently hear the *w* robbed of its rights in its proxy; and *quality* ſo pronounced as to rhyme with *legality*; while to rhyme quantity, according to this affected mode of pronouncing it, we muſt coin ſuch words as *plantity* and *conſonantity*. The *a* in *Quaver* and *Equator* is an exception to this rule, from the preponderancy of another which requires *a*, ending a ſyllable under the accent, to have the ſlender ſound of that letter; to which rule, *father*, *maſter*, and *water*, and, perhaps, *quadrant*, are the only exceptions.

87. The ſhort ſound of this broad *a* is heard when it is preceded by *w*, and ſucceeded by a ſingle conſonant in the ſame ſyllable, as *wal-low*, *ſwal-low*, &c. or by two conſonants in the ſame ſyllable, as *want*, *waſt*, *waſp*, &c.; but when *l* or *r* is one of the conſonants, the *a* becomes long, as *walk*, *ſwarm*, &c.

Irregular and unaccented Sounds.

88. But beſides the long and ſhort ſounds common to all the vowels, there is a certain tranſient indiſtinct pronunciation of ſome of them, when they are not accented, that cannot be ſo eaſily ſettled: when the accent is not upon it, no vowel is more apt to run into this imperfect ſound than the *a*; thus the particle *a* before participles, in the phraſes *a*-going, *a*-walking, *a*-ſhooting, &c. ſeems

ſeems, ſays Dr. Lowth, to be the true and genuine prepoſition *on*, a little diſguiſed by familiar uſe and quick pronunciation: the ſame indiſtinctneſs, from rapidity and coincidence of ſound, has confounded the pronunciation of this mutilated prepoſition to the ear, in the different queſtions *what's o'clock*, when we would know the hour, and *what's a clock*, when we would have the deſcription of that horary machine; and if the accent be kept ſtrongly on the firſt ſyllable of the word *tolerable*, as it always ought to be, we find ſcarcely any diſtinguiſhable difference to the ear, if we ſubſtitute *u* or *o* inſtead of *a* in the penultimate ſyllable. Thus *tolerable*, *toleroble*, and *toleruble*, are exactly the ſame word to the ear, if pronounced without premeditation or tranſpoſing the accent, for the real purpoſe of diſtinction; and *inwards*, *outwards*, &c. might, with reſpect to ſound, be ſpelt *inwurds*, *outwurds*, &c. Thus the word *man*, when not under the accent, might be written *mun* in *nobleman*, *huſbandman*, *woman*; and *tertian* and *quartan*, *tertiun* and *quartun*, &c. The ſame obſervation will hold good in almoſt every final ſyllable where *a* is not accented, as *medal*, *dial*, *giant*, *bias*, &c. *defiance*, *temperance*, &c.; but when the final ſyllable ends in *age*, *ate*, or *ace*, the *a* goes into a ſomewhat different ſound. See 90 and 91.

89. There is a corrupt, but a received pronunciation of this letter in the words *any*, *many*, *Thames*, where the *a* ſounds like ſhort *e*, as if written *enny*, *menny*, *Tems*. *Catch*, among Londoners, ſeems to have degenerated into *Ketch*; and *ſays*, the third perſon of the verb to *ſay*, has, among all ranks of people, and in every part of the united kingdoms, degenerated into *ſez*, rhyming with *Fez*.

90. The *a* goes into a ſound approaching the ſhort *i*, in the numerous termination in *age*, when the accent is not on it, as *cabbage*, *village*, *courage*, &c. and are pronounced nearly as if written *cabbige*, *villige*, *courige*, &c. The exceptions to this rule are chiefly among words of three ſyllables, with the accent on the firſt; theſe ſeem to be the following: *Adage*, *preſage*, *ſcutage*, *hemorhage*, *vaſſalage*, *carcilage*, *guidage*, *pucilage*, *mucilage*, *cartilage*, *pupilage*, *orphanage*, *villanage*, *appanage*, *concubinage*, *baronage*, *patronage*, *parsonage*, *personage*, *equipige*, *oſſifrage*, *saxifrage*, *umpirage*, *embaſſage*, *hermitage*, *heritage*, *parentage*, *meſſuage*.

91. The *a* in the numerous termination *ate*, when the accent is not on it, is pronounced ſomewhat differently in different words. If the word be a ſubſtantive, or an adjective, the *a* ſeems to be ſhorter than when it is a verb: thus a good ear will diſcover a difference in the quantity of this letter, in *delicate* and *dedicate*; in *climate*, *primate*, and *ultimate*; and the vowels to *calculate*, to *regulate*, and to *ſpeculate*, where we find the nouns and adjectives have the *a* conſiderably ſhorter than the verbs. *Innate*, however, preſerves the *a* as long as if the accent were on it: but the unaccented terminations in *ace*, whether nouns or verbs, have the *a* ſo ſhort and obſcure as to be nearly ſimilar to the *u* in *us*; thus *palace*, *ſolace*, *menace*, *pinnace*, *populace*, might, without any great departure from their common ſound, be written *pallus*, *ſollus*, &c. while *furnace* almoſt changes the *a* into *i*, and might be written *furniss*.

92. When the *a* is preceded by the gutturals, hard *g* or *c*, it is, in polite pronunciation, ſoftened by the intervention of a ſound like *e*, ſo that *card*, *cart*, *guard*, *regard*, are pronounced like *ke-ard*, *ghe-ard*, *re-ghe-ard*. When the *a* is pronounced ſhort, as in the firſt ſyllables of *candle*, *gander*, &c. the interpoſition of the *e* is very perceptible, and indeed unavoidable: for though we can pronounce *guard* and *cart* without interpoſing the *e*, it is impoſſible to pronounce *garriſon* and *carriage* in the ſame manner. This ſound of the *a* is taken notice of in Steele's Grammar, page 49, which proves it is not the offspring of the preſent day (160); and I have the ſatisfaction to find Mr. Smith, a very accurate inquirer into the ſubject, entirely of my opinion. But the ſound of the *a*, which

which I have found the moſt difficult to appreciate, is that where it ends the ſyllable, either immediately before or after the accent. We cannot give it any of its three open ſounds without hurting the ear: thus in pronouncing the words *abound* and *diadem*, *ay-bound*, *ah-bound*, and *aw-bound*; *di-ay-dem*, *di-ah-dem* and *di-aw-dem*, are all improper; but giving the *a* the ſecond or Italian ſound, as *ah-bound* and *di-ah-dem*, ſeems the leaſt ſo. For which reaſon I have, like Mr. Sheridan, adopted the ſhort ſound of this letter to mark this unaccented *a:* but if the unaccented *a* be final, which is not the caſe in any word purely Engliſh, it then ſeems to approach ſtill nearer to the Italian *a* in the laſt ſyllable of *papa*, and to the *a* in *father;* as may be heard in the deliberate pronunciation of the words *idea*, *Africa*, *Delta*, &c. (88). Se the letter *A* at the beginning of the Dictionary.

E.

93. The firſt ſound of *e* is that which it has when lengthened by the mute *e* final, as in *glebe*, *theme*, &c. or when it ends a ſyllable with the accent upon it, as *ſe-cre-tion*, *ad-he-ſion*, &c. (36).

94. The exceptions to this rule are, the words *where* and *there;* in which the firſt *e* is pronounced like *a*, as if written *whare*, *thare*; and the auxiliary verb *were*, where the *e* has its ſhort ſound, as if written *wer*, rhyming with the laſt ſyllable of *pre-fer* and *ere* (before), which ſounds like *air*. When *there* is in compoſition in the word *therefore*, the *e* is generally ſhortened, as in *were*, but, in my opinion improperly.

95. The ſhort ſound of *e* is that heard in *bed*, *fed*, *red*, *wed*, &c.; this ſound before *r* is apt to ſlide into ſhort *u*; and we ſometimes hear *mercy* ſounded as if written *murcy:* but this, though very near, is not the exact ſound.

Irregular and unaccented Sounds.

96. The *e* at the end of the monoſyllables *be*, *he*, *me*, *we*, is pronounced *ee*, as if written *bee*, *hee*, &c. It is ſilent at the end of words purely Engliſh, but is pronounced diſtinctly at the end of ſome words from the learned languages, as *epitome*, *ſimile*, *cataſtrophe*, *apoſtrophe*, &c.

97. The firſt *e* in the poetic contractions, *e'er* and *ne'er*, is pronounced like *a*, as if written *air* and *nair*.

98. The *e* in *her* is pronounced nearly like ſhort *u*; and as we hear it in the unaccented terminations of *writer*, *reader*, &c. pronounced as if written *writur*, *readur*, where we may obſerve that the *r* being only a jar, and not a definite and diſtinct articulation like the other conſonants, inſtead of ſtopping the vocal efflux of voice, lets it imperfectly paſs, and ſo corrupts and alters the true ſound of the vowel. The ſame may be obſerved of the final *e* after *r* in words ending in *cre*, *gre*, *tre*, where the *e* is ſounded as if it were placed before the *r*, as in *lucre*, *maugre*, *theatre*, &c. pronounced *lukur*, *maugur*, *theatur*, &c. See No. 418. It may be remarked, that though we ought cautiouſly to avoid pronouncing the *e* like *u* when under the accent, it would be *nimis Atticé*, and border too much on affectation of accuracy to preſerve this ſound of *e* in unaccented ſyllables before *r*; and though *terrible*, where *e* has the accent, ſhould never be pronounced as if written *turrible*, it is impoſſible without pedantry to make any difference in the ſound of the laſt ſyllable of *ſplendour* and *tender*, *ſulphur* and *ſuffer*, or *martyr* and *garter*. But there is a ſmall deviation from rule when this letter begins a word, and is followed by a double conſonant with the accent

Digitized from Best Copy Available

accent on the ſecond ſyllable: in this caſe we find the vowel lengthen as if the conſonant were ſingle. See EFFACE, DESPATCH, EMBALM.

99. This vowel, in a final unaccented ſyllable, is apt to ſlide into the ſhort *i*: thus *faces*, *ranges*, *praiſes*, are pronounced as if written *faciz*, *rangiz*, *praiziz*; *poet*, *covet*, *linen*, *duel*, &c. as if written, *poit*, *covit*, *linen*, *duil*, &c. Where we may obſerve, that though the *e* goes into the ſhort ſound of *i*, it is exactly that ſound which correſponds to the long ſound of *e*. See *Port Royal Grammaire*, *Latin*, page 142.

100. There is a remarkable exception to the common ſound of this letter in the words *clerk*, *ſerjeant*, and a few others, where we find the *e* pronounced like the *a* in *dark* and *margin*. But this exception, I imagine, was, till within theſe few years, the general rule of ſounding this letter before *r*, followed by another conſonant. See MERCHANT. Thirty years ago every one pronounced the firſt ſyllable of *merchant* like the monoſyllable *march*, and as it was anciently written *marchant*. *Service* and *ſervant* are ſtill heard among the lower order of ſpeakers, as if written *ſarvice* and *ſarvant*; and even among the better ſort, we ſometimes hear the ſalutation, *Sir, your ſervant!* though this pronunciation of the word ſingly would be looked upon as a mark of the loweſt vulgarity. The proper names, *Derby* and *Berkeley*, ſtill retain the old ſound, as if written *Darby* and *Barkeley*: but even theſe, in polite uſage, are getting into the common ſound, nearly as if written *Durby* and *Burkley*. As this modern pronunciation of the *e* has a tendency to ſimplify the language by leſſening the number of exceptions, it ought certainly to be indulged.

101. This letter falls into an irregular ſound, but ſtill a ſound which is its neareſt relation, in the words, *England*, *yes*, and *pretty*, where the *e* is heard like ſhort *i*. Vulgar ſpeakers are guilty of the ſame irregularity in *engine*, as if written *ingine*; but this cannot be too carefully avoided.

102. The vowel *e* before *l* and *n* in the final unaccented ſyllable, by its being ſometimes ſuppreſſed and ſometimes not, forms one of the moſt puzzling difficulties in pronunciation. When any of the liquids precede theſe letters, the *e* is heard diſtinctly, as *woollen*, *flannel*, *women*, *ſyren*; but when any of the other conſonants come before theſe letters, the *e* is ſometimes heard, as in *novel*, *ſudden*; and ſometimes not, as in *ſcrivel*, *raven*, &c. As no other rule can be given for this variety of pronunciation, perhaps the beſt way will be to draw the line between thoſe words where *e* is pronounced, and thoſe where it is not; and this, by the help of the Rhyming Dictionary, I am luckily enabled to do. In the firſt place, then, it may be obſerved, the *e* before *l*, in a final unaccented ſyllable, muſt always be pronounced diſtinctly, except in the following words: *Shekel*, *weaſel*, *ouſel*, *nouſel*, (better written *nuzzle*,) *navel*, *ravel*, *ſnivel*, *rivel*, *drivel*, *ſhrivel*, *ſkevel*, *grovel*, *hazel*, *drazel*, *nozel*. Theſe words are pronounced as if the *e* were omitted by an apoſtrophe, as *ſhek'l*, *weas'l*, *ous'l*, &c. or rather as if written *ſheckle*, *weazle*, *ouzle*, &c.; but as theſe are the only words of this termination that are ſo pronounced, great care muſt be taken that we do not pronounce *travel*, *gravel*, *rebel* (the ſubſtantive), *parcel*, *chapel*, and *veſſel*, in the ſame manner; a fault to which many are very prone.

103. *E* before *n* in a final unaccented ſyllable, and not preceded by a liquid, muſt always be ſuppreſſed in the verbal terminations in *en*, as to *looſen*, to *hearken*, and in other words, except the following: *Sudden*, *mynchen*, *kitchen*, *hyphen*, *chicken*, *ticken* (better written *ticking*), *jerken*, *aſpen*, *platen*, *paten*, *marten*, *latten*, *patten*, *leaven* or *leven*, *ſloven*, *mittens*. In theſe words the *e* is heard diſtinctly, contrary to the general rule which ſuppreſſes the *e* in theſe ſyllables, when preceded by a mute, as *harden*, *heathen*, *heaven*, as if written *hard'n*, *heath'n*, *heav'n*,

Digitized from Best Copy Available

&c.; nay, even when preceded by a liquid in the words *fallen* and *ſtolen*, where the *e* is ſuppreſſed, as if they were written *fall'n* and *ſtoll'n*: *garden* and *burden*, therefore, are very analogically pronounced *gard'n* and *burd'n*; and this pronunciation ought the rather to be indulged, as we always hear the *e* ſuppreſſed in *gardener* and *burdenſome*, as if written *gard'ner* and *burd'nſome*. See No. 472.

104. This diverſity in the pronunciation of theſe terminations ought the more carefully to be attended to, as nothing is ſo vulgar and childiſh as to hear *ſwivel* and *heaven* pronounced with the *e* diſtinctly, or *novel* and *chicken* with the *e* ſuppreſſed. But the moſt general ſuppreſſion of this letter is in the preterits of verbs and in participles ending in *ed*: here, when the *e* is not preceded by *d* or *t*, the *e* is almoſt univerſally ſunk (362), and the two final conſonants are pronounced in one ſyllable: thus *loved*, *lived*, *barred*, *marred*, are pronounced as if written, *lovd*, *livd*, *bard*, *mard*. The ſame may be obſerved of this letter when ſilent in the ſingulars of nouns, or the firſt perſons of verbs, as *theme*, *make*, &c. which form *themes* in the plural, and *makes* in the third perſon, &c. where the laſt *e* is ſilent, and the words are pronounced in one ſyllable. When the noun or firſt perſon of the verb ends in *y*, with the accent on it, the *e* is likewiſe ſuppreſſed, as *a reply*, *two replies*, *he replies*, &c. When words of this form have the accent on the preceding ſyllables, the *e* is ſuppreſſed, and the *y* pronounced like ſhort *i*, as *cherries*, *marries*, *carries*, &c. pronounced *cherriz*, *marriz*, *carriz*, &c. In the ſame manner, *carried*, *married*, *embodied*, &c. are pronounced as if written *carrid*, *marrid*, *embodid*, &c. (282). But it muſt be carefully noted, that there is a remarkable exception to many of theſe contractions when we are pronouncing the language of Scripture: here every participial *ed* ought to make a diſtinct ſyllable, where it is not preceded by a vowel: thus, "Who hath *believed* our "report, and to whom is the arm of the Lord *revealed*?" Here the participles are both pronounced in three ſyllables; but in the following paſſage, "Whom he did predeſtinate, them he alſo *called*; and whom he called, them "he alſo *juſtified*; and whom he *juſtified*, them he alſo *glorified*." *Called* preſerves the *e*, and is pronounced in two ſyllables; and *juſtified* and *glorified* ſuppreſs the *e*, and are pronounced in three.

105. This letter is a perfect diphthong, compoſed of the ſounds of *a* in *father*, and *e* in *he*, pronounced as cloſely together as poſſible (37). When theſe ſounds are openly pronounced, they produce the familiar aſſent *ay*; which, by the old Engliſh dramatic writers, was often expreſſed by *I*: hence we may obſerve, that unleſs our anceſtors pronounced the vowel *I* like the *o* in *oil*, the preſent pronunciation of the word *ay* in the Houſe of Commons, in the phraſe *the Ayes have it*, is contrary to ancient as well as to preſent uſage: ſuch a pronunciation of this word is now coarſe and ruſtic. This ſound is heard when the letter is lengthened by final *e*, as *time*, *thine*, or ending a ſyllable with the accent upon it, as *ti-tle*, *di-al*; in monoſyllables ending with *nd*, as *bind*, *find*, *mind*, &c.; in three words ending with *ld*, as *child*, *mild*, *wild*; and in one very irregularly ending with *nt*, as *pint* (37).

106. There is one inſtance where this letter, though ſucceeded by final *e*, does not go into the broad Engliſh ſound like the noun *eye*, but into the ſlender foreign ſound like *e*. This is in the word *ſhire*, pronounced as if written *ſheer*, both when ſingle, as a *knight of the ſhire*; or in compoſition, as in *Nottinghamſhire*, *Leiceſterſhire*, &c. This is the ſound Dr. Lowth gives it in his

Digitized from Best Copy Available

his Grammar, page 4: and it is highly probable that the ſimple *ſhire* acquired this ſlender ſound from its tendency to become ſlender in the compounds, where it is at a diſtance from the accent, and where all the vowels have a natural tendency to become ſhort and obſcure. See SHIRE.

107. The ſhort ſound of this letter is heard in *him*, *thin*, &c. and when ending an unaccented ſyllable, as *van-i-ty*, *qual-i-ty*, &c. where, though it cannot be properly ſaid to be ſhort, as it is not cloſed by a conſonant, yet it has but half its diphthongal ſound. This ſound is the ſound of *e*, the laſt letter of the diphthong that forms the long *I*; and it is not a little ſurpriſing that Dr. Johnſon ſhould ſay that the ſhort *i* was a ſound wholly different from the long one (551).

108. When this letter is ſucceeded by *r*, and another conſonant not in a final ſyllable, it has exactly the ſound of *e* in *vermin*, *vernal*, &c. as *virtue*, *virgin*, &c. which approaches to the ſound of ſhort *u*; but when it comes before *r*, followed by another conſonant in a final ſyllable, it acquires the ſound of *u* exactly, as *bird*, *dirt*, *ſhirt*, *ſquirt*, &c. *Mirth*, *birth*, *gird*, *girt*, *ſkirt*, *girl*, *whirl*, and *firm*, are the only exceptions to this rule, where *i* is pronounced like *e*, and as if the words were written, *merth*, *berth*, and *ferm*.

109. The letter *r*, in this caſe, ſeems to have the ſame influence on this vowel, as it evidently has on *a* and *o*. When theſe vowels come before double *r*, or ſingle *r*, followed by a vowel, as in *arable*, *carry*, *marry*, *orator*, *horrid*, *forage*, &c. they are conſiderably ſhorter than when the *r* is the final letter of the word, or when it is ſucceeded by another conſonant, as in *arbour*, *car*, *mar*, *or*, *nor*, *for*. In the ſame manner, the *i*, coming before either double *r*, or ſingle *r*, followed by a vowel, preſerves its pure, ſhort ſound, as in *irritate*, *ſpirit*, *conſpiracy*, &c.; but when *r* is followed by another conſonant, or is the final letter of a word with the accent upon it, the *i* goes into a deeper and broader ſound, equivalent to ſhort *e*, as heard in *virgin*, *virtue*, &c. So *fir*, a tree, is perfectly ſimilar to the firſt ſyllable of *ferment*, though often corruptly pronounced like *fur*, a ſkin. *Sir* and *ſtir* are exactly pronounced as if written *Sur* and *ſtur*. It ſeems, ſays Mr. Nares, that our anceſtors diſtinguiſhed theſe ſounds more correctly. Biſhop Gardiner, in his firſt letter to Cheke, mentions a witticiſm of Nicholas Rowley, a fellow Cantab with him, to this effect: "Let handſome girls be called *virgins*, plain ones *vurgins*."

"Si pulchra eſt, *virgo*, ſin turpis, *vurgo* vocetur."

Which, ſays Mr. Elphinſton, may be modernized by the aid of a far more celebrated line:

"Sweet *virgin* can alone the fair expreſs,
"*Fine by degrees, and beautifully leſs:*
"But let the hoyden, homely, rough-hewn *vurgin*,
"Engroſs the homage of a *Major Sturgeon*."

110. The ſound of *i*, in this ſituation, ought to be the more carefully attended to, as letting it fall into the ſound of *u*, where it ſhould have the ſound of *e*, has a groſſneſs in it approaching to vulgarity. Perhaps the only exception to this rule is, when the ſucceeding vowel is *u*; for this letter being a ſemi-conſonant, has ſome influence on the preceding *i*, though not ſo much as a perfect conſonant would have. This makes Mr. Sheridan's pronunciation of the *i* in *virulent*, and its compounds, like that in *virgin*, leſs exceptionable than I at firſt thought it; but ſince we cannot give a ſemi-ſound of ſhort *i* to correſpond to the ſemi-conſonant ſound of *u*, I have preferred the pure ſound which

which I think the moſt agreeable to polite uſage. See Mr. Garrick's Epigram upon the ſound of this letter, under the word VIRTUE.

Irregular and unaccented Sounds.

111. There is an irregular pronunciation of this letter which has greatly multiplied within theſe few years, and that is, the ſlender ſound heard in *e*. This ſound is chiefly found in words derived from the French and Italian languages; and we think we ſhow our breeding by a knowledge of thoſe tongues, and an ignorance of our own:

" Report of faſhions in proud Italy,
" Whoſe manners ſtill our tardy apiſh nation
" Limps after, in baſe awkward imitation."
Shakeſpeare, Richard II.

When Lord Cheſterfield wrote his letters to his ſon, the word *oblige* was, by many polite ſpeakers, pronounced as if written *obleege*, to give a hint of their knowledge of the French language; nay, Pope has rhymed it to this ſound:

" Dreading ev'n fools, by flatterers *beſieg'd*,
" And ſo *obliging*, that he ne'er *oblig'd*."

But it was ſo far from having generally obtained, that Lord Cheſterfield ſtrictly enjoins his ſon to avoid this pronunciation as affected. In a few years, however, it became ſo general, that none but the loweſt vulgar ever pronounced it in the Engliſh manner; but upon the publication of this nobleman's letters, which was about twenty years after he wrote them, his authority has had ſo much influence with the polite world as to bid fair for reſtoring the *i*, in this word, to its original rights; and we not unfrequently hear it now pronounced with the broad Engliſh *i*, in thoſe circles where, a few years ago, it would have been an infallible mark of vulgarity. Mr. Sheridan, W. Johnſton, and Mr. Barclay, give both ſounds, but place the ſound of *oblīge* firſt. Mr. Scott gives both, but places *obleege* firſt. Dr. Kenrick and Buchanan give only *oblīge;* and Mr. Elphinſton, Mr. Perry, and Fenning, give only *obleege;* but though this ſound has loſt ground ſo much, yet Mr. Nares, who wrote about eighteen years ago, ſays, " *oblige* ſtill, I think, retains the " ſound of long *e*, notwithſtanding the proſcription of that pronunciation by " the late Lord Cheſterfield."

112. The words that have preſerved the foreign ſound of *i*, like *ee*, are the following: *Ambergris, verdegris, antique, becaſico, bombaſin, braſil, capivi, capuchin, colbertine, chioppine,* or *chopin, caprice, chagrin, chevaux-de-friſe, critique* (for criticiſm), *feſtucine, frize, gabardine, haberdine, ſordine, rugine, trephine, quarantine, routine, faſcine, fatigue, intrigue, glacis, invalid, machine, magazine, marine, palanquin, pique, police, profile, recitative, man-da-rine, tabourine, tambourine, tontine, tranſmarine, ultramarine.* In all theſe words, if for the laſt *i* we ſubſtitute *ee*, we ſhall have the true pronunciation. In *ſignior*, the firſt *i* is thus pronounced. Mr. Sheridan pronounces *vertigo* and *ſerpigo* with the accent on the ſecond ſyllable, and the *i* long, as in *tie* and *pie*. Dr. Kenrick gives theſe words the ſame accent, but ſounds the *i* as *e* in *tea* and *pea*. The latter is, in my opinion, the general pronunciation; though Mr. Sheridan's is ſupported by a very general rule, which is, that all words adopted whole from the Latin preſerve the Latin accent, (503, *b*.) But if the Engliſh ear were unbiaſſed by the long *i* in Latin, which fixes the accent on the ſecond ſyllable, and could free itſelf from the

ſlaviſh

ſlaviſh imitation of the French and Italians, there is little doubt but theſe words would have the accent on the firſt ſyllable, and that the *i* would be pronounced regularly like the ſhort *e*, as in *Indigo* and *Portico*. SEE VERTIGO.

113. There is a remarkable alteration in the ſound of this vowel, in certain ſituations, where it changes to a ſound equivalent to initial *y*. The ſituation that occaſions this change is, when the *i* precedes another vowel in an unaccented ſyllable, and is not preceded by any of the dentals: thus we hear *iary* in *miliary*, *bil-iary*, &c. pronounced as if written *mil-yary*, *bil-yary*, &c. *Min-ion* and *pinion* as if written *min-yon* and *pin-yon*. In theſe words the *i* is ſo totally altered to *y*, that pronouncing the *ia* and *io* in ſeparate ſyllables would be an error the moſt palpable; but where the other liquids or mutes precede the *i* in this ſituation, the coalition is not ſo neceſſary: for though the two latter ſyllables of *convivial*, *participial*, &c. are extremely prone to unite into one, they may, however, be ſeparated, provided the ſeparation be not too diſtant. The ſame obſervations hold good of *e*, as *malleable*, pronounced *mal-ya-ble*.

114. But the ſound of the *i*, the moſt difficult to reduce to rule is when it ends a ſyllable immediately before the accent. When either the primary or ſecondary accent is on this letter, it is invariably pronounced either as the long *i* in *title*, the ſhort *i* in *tittle*, or the French *i* in *magazine*; and when it ends a ſyllable after the accent, it is always ſounded like *e*, as *ſen-ſi-ble*, *ra-ti-fy*, &c. But when it ends a ſyllable, immediately before the accent, it is ſometimes pronounced long, as in *vi-ta-li-ty*, where the firſt ſyllable is exactly like the firſt of *vi-al*; and ſometimes ſhort, as in *di-geſt*, where the *i* is pronounced as if the word were written *dĕ-geſt*. The ſound of the *i*, in this ſituation, is ſo little reducible to rule, that none of our writers on the ſubject have attempted it; and the only method to give ſome idea of it, ſeems to be the very laborious one of claſſing ſuch words together as have the *i* pronounced in the ſame manner, and obſerving the different combinations of other letters that may poſſibly be the cauſe of the different ſounds of this.

115. In the firſt place, where the *i* is the only letter in the firſt ſyllable, and the accent is on the ſecond, beginning with a conſonant, the vowel has its long diphthongal ſound, as in *idea*, *identity*, *idolatry*, *idoneous*, *iraſcible*, *ironical*, *iſoſceles*, *itinerant*, *itinerary*. *Imagine* and its compounds ſeem the only exceptions. But to give the inſpector ſome idea of general uſage, I have ſubjoined examples of theſe words as they ſtand in our different Pronouncing Dictionaries:

īdea. Sheridan, Scott, Buchanan, W. Johnſton, Kenrick.
ĭdea. Perry.
īdentity. Sheridan, Scott, Buchanan, W. Johnſton, Kenrick.
ĭdentity. Perry.
īdolatry. Sheridan, Scott, Buchanan, W. Johnſton, Kenrick.
ĭdolatry. Perry.
īdoneous. Sheridan, Kenrick.
īraſcible. Sheridan, Scott, W. Johnſton, Kenrick.
ĭraſcible. Perry.
īſoſceles. Sheridan, Scott, Perry.
ītinerary. Sheridan, Scott, W. Johnſton, Kenrick.
ĭtinerary. Perry.
ĭtinerant. Sheridan, Scott, W. Johnſton, Nares.
ĭtinerant. Buchanan, Perry.

116. When *i* ends the firſt ſyllable, and the accent is on the ſecond, commencing with a vowel, it generally preſerves its long open diphthongal ſound. Thus in *di-ameter*, *di-urnal*, &c. the firſt ſyllable is equivalent to the verb to *die*.

Digitized from Best Copy Available

die. A corrupt, foreign manner of pronouncing theſe words, may ſometimes mince the *i* into *e*, as if the words were written *de-ametur*, *de-urnal*, &c.; but this is diſguſting to every juſt Engliſh ear, and contrary to the whole current of analogy. Beſides, the vowel that ends and the vowel that begins a ſyllable are, by pronouncing the *i* long, kept more diſtinct, and not ſuffered to coaleſce, as they are apt to do if *i* has its ſlender ſound. This proneneſs of the *e*, which is exactly the ſlender ſound of *i*, to coaleſce with the ſucceeding vowel, has produced ſuch monſters in pronunciation as *joggraphy* and *jommetry* for *geography* and *geometry*, and *jorgics* for *georgics*. The latter of theſe words is fixed in this abſurd pronunciation without remedy; but the two former ſeem recovering their right to four ſyllables; though Mr. Sheridan has endeavoured to deprive them of it, by ſpelling them with three. Hence we may obſerve, that thoſe who wiſh to pronounce correctly, and according to analogy, ought to pronounce the firſt ſyllable of *bi-ography*, as the verb to *buy*, and not as if written *be-ography*.

117. When *i* ends an initial ſyllable without the accent, and the ſucceeding ſyllable begins with a conſonant, the *i* is generally ſlender, as if written *e*. But the exceptions to this rule are ſo numerous, that nothing but a catalogue will give a tolerable idea of the ſtate of pronunciation in this point.

118. When the prepoſitive *bi*, derived from *bis* (twice), ends a ſyllable immediately before the accent, the *i* is long and broad, in order to convey more preciſely the ſpecific meaning of the ſyllable. Thus *bi-capſular*, *bi-cipital*, *bi-cipitous*, *bi cornous*, *bi-corporal*, *bi-dental*, *bi-farious*, *bi-furcated*, *bi-linguous*, *bi-nocular*, *bi-pennated*, *bi-petalous*, *bi-quadrate*, have the *i* long. But the firſt ſyllable of the words *Bitumen* and *Bitumenous* having no ſuch ſignification, ought to be pronounced with the *i* ſhort. This is the ſound Buchanan has given it; but Sheridan, Kenrick, and W. Johnſton, make the *i* long, as in *Bible*.

119. The ſame may be obſerved of words beginning with *tri*, having the accent on the ſecond ſyllable. Thus *tri-bunal*, *tri-corporal*, *tri-chotomy*, *tri-gentals*, have the *i* ending the firſt ſyllable long, as in *tri-al*. To this claſs ought to be added, *di-petalous* and *di-lemma*, though the *i* in the firſt ſyllable of the laſt word is pronounced like *e*, and as if written *de-lemma*, by Mr. Scott and Mr. Perry, but long by Mr. Sheridan, Dr. Kenrick, and Buchanan; and both ways by W. Johnſton, but placing the ſhort firſt. And hence we may conclude, that the verb to *bi-ſect*, and the noun *bi-ſection*, ought to have the *i* at the end of the firſt ſyllable pronounced like *buy*, as Mr. Scott and Dr. Kenrick have marked it, though otherwiſe marked by Mr. Sheridan, Mr. Perry, and Buchanan.

120. When the firſt ſyllable is *chi*, with the accent on the ſecond, the *i* is generally long, as *chi-ragrical*, *chi-rurgic*, *chi-rugeon*, *chi rographiſt*, *chi rographer*, *chi-rography*. *Chi-mera* and *chi-merical* have the *i* moſt frequently ſhort, as pronounced by Buchanan and Perry, though otherwiſe marked by Sheridan, Scott, W. Johnſton, and Kenrick; and, indeed, the ſhort ſound ſeems now eſtabliſhed. *Chicane* and *chicanery*, from the French, have the *i* always ſhort; or more properly ſlender.

121. *Ci* before the accent has the *i* generally ſhort, as *ci-vilian*, *ci-vility*, and, I think, *ci-licious* and *ci-nerulent*, though otherwiſe marked by Mr. Sheridan. *Ci-barious* and *ci tation* have the *i* long.

122. *Cli* before the accent has the *i* long, as *cli-macter*; but when the accent is on the third ſyllable, as in *climacteric*, the *i* is ſhortened by the ſecondary accent. See 530.

123. *Cri* before the accent has the *i* generally long, as *cri-nigerous*, *cri-terion*; though we ſometimes hear the latter as if written *cre-terion*, but I think improperly.

124. *Di*

Digitized from Best Copy Available

124. *Di* before the accented syllable, beginning with a conſonant, has the *i* almoſt always ſhort; as *digeſt*, *digeſtion*, *digreſs*, *digreſſion*, *dilute*, *dilution*, *diluvian*, *dimenſion*, *dimenſive*, *dimidiation*, *diminiſh*, *diminutive*, *diploma*, *direct*, *direction*, *diverſify*, *diverſification*, *diverſion*, *diverſity*, *divert*, *divertiſement*, *divertive*, *diveſt*, *diveſture*, *divide*, *dividable*, *dividant*, *divine*, *divinity*, *diviſible*, *diviſibility*, *divorce*, *divulge*. To theſe, I think, may be added, *dicacity*, *didactic*, *dilacerate*, *dilaceration*, *dilaniate*, *dilapidation*, *dilate*, *dilatable*, *dilatability*, *dilection*, *dilucid*, *dilucidate*, *dilucidation*, *dinetical*, *dinumeration*, *diverge*, *divergent*, *divan*; though Mr. Sheridan has marked the firſt *i* in all theſe words long; ſome of them may undoubtedly be pronounced either way; but why he ſhould make the *i* in *diploma* long, and W. Johnſton ſhould give it both ways, is unaccountable; as Mr. Scott, Buchanan, Dr. Kenrick, Mr. Perry, and the general uſage, is againſt them. *Diæreſis* and *dioptrics* have the *i* long, according to the general rule (116), though the laſt is abſurdly made ſhort by Dr. Kenrick, and the diphthong is made long in the firſt by Mr. Sheridan, contrary to one of the moſt prevailing idioms in pronunciation; which is, the ſhortening power of the antepenultimate accent (503). Let it not be ſaid that the diphthong muſt be always long, ſince *Cæsarea* and *Dædalus* have the *æ* always ſhort.

125. The long *i* in words of this form, ſeems confined to the following; *Digladiation*, *dijudication*, *dinumeration*, *divaricate*, *direption*, *diruption*. Both Johnſon and Sheridan, in my opinion, place the accent of the word *didaſcalic* improperly upon the ſecond ſyllable; it ſhould ſeem more agreeable to analogy to claſs it with the numerous terminations in *ic*, and place the accent on the penultimate ſyllable (509); and, in this caſe, the *i* in the firſt will be ſhortened by the ſecondary accent, and the ſyllable pronounced like *did* (527). The firſt *i* in *dimiſſory*, marked long by Mr. Sheridan, and with the accent on the ſecond ſyllable, contrary to Dr. Johnſon, are equally erroneous. The accent ought to be on the firſt ſyllable, and the *i* ſhort, as on the adjective *dim*. See POSSESSORY.

126. *Fi* before the accent ought always to be ſhort: this is the ſound we generally give to the *i* in the firſt ſyllable of *fi-delity*; and why we ſhould give the long ſound to the *i* in *fiducial* and *fiduciary*, as marked by Mr. Sheridan, I know not: he is certainly erroneous in marking the firſt *i* in *frigidity* long, and equally ſo in placing the accent upon the laſt ſyllable of *finite*. *Finance* has the *i* ſhort univerſally.

127. *Gigantic* has the *i* in the firſt ſyllable always long.

128. *Li* has the *i* generally long, as *li-bation*, *li-brarian*, *li-bration*, *li-centious*, *li-pothymy*, *li-quescent*, *li-thography*, *li-thotomy*. *Litigious* has the *i* in the firſt ſyllable always ſhort. The ſame may be obſerved of *libidinous*, though otherwiſe marked by Mr. Sheridan.

129. *Mi* has the *i* generally ſhort, as in *minority*, *militia*, *mimographer*, *minacious*, *minacity*, *miraculous*; though the four laſt are marked with the long *i* by Mr. Sheridan; and what is ſtill more ſtrange, he marks the *i* which has the accent on it long in *minatory*: though the ſame word, in the compound *comminatory*, where the *i* is always ſhort, might have ſhewn him his error. The word *mimetic*, which, though in very good uſe, is neither in Johnſon nor Sheridan, ought to be pronounced with the firſt *i* ſhort as if written *mim et-ic*. The *i* is generally long in *micrometer*, *micrography*, and *migration*.

130. *Ni* has the *i* long in *nigrescent*. The firſt *i* in *nigrification*, though marked long by Mr. Sheridan, is ſhortened by the ſecondary accent (527), and ought to be pronounced as if divided into *nig-ri fi-cation*.

131. *Phi* has the *i* generally ſhort, as in *philanthropy*, *philippic*, *philoſopher*, *philoſophy*,

Digitized from Best Copy Available

philosophy, philosophize; to which we may certainly add, *philologer, philologiſt, philology, philological*, notwithſtanding Mr. Sheridan has marked the *i* in theſe laſt words long.

132. *Pi* and *pli* have the *i* generally ſhort as *pilaſter, pituitous, piloſity, plication. Piaſter*, and *piazza*, being Italian words, have the *i* ſhort before the vowel, contrary to the analogy of words of this form (116), where the *i* is long, as in *pi-acular, pri-ority*, &c. *Piratical* has the *i* marked long by Mr. Sheridan, and ſhort by Dr. Kenrick. The former is, in my opinion, more agreeable both to cuſtom and analogy, as the ſound of the *i* before the accent is often determined by the ſound of that letter in the primitive word.

133. *Pri* has the *i* generally long, as in *primeval, primevous, primitial, primero, primordial, privado, privation, privative*, but always ſhort in *primitive*, and *primer*.

134. *Ri* has the *i* ſhort, as in *ridiculous*. *Rigidity* is marked with the *i* long by Mr. Sheridan, and ſhort by Dr. Kenrick: the latter is undoubtedly right. *Rivality* has the *i* long in the firſt ſyllable, in compliment to *rival*, as *piratical* has the *i* long, becauſe derived from *pirate*. *Rhinoceros* has the *i* long in Sheridan, Scott, Kenrick, W. Johnſton, and Buchanan; and ſhort in Perry.

135. *Si* has the *i* generally ſhort, as *ſimilitude, ſiriaſis*, and ought certainly to be ſhort in *ſilicious*, (better written *cilicious*,) though marked long by Mr. Sheridan. *Simultaneous* having the ſecondary accent on the firſt ſyllable, does not come under this head, but retains the *i* long, notwithſtanding the ſhortening power of the accent it is under (527).

136. *Ti* has the *i* ſhort, as in *timidity*.

137. *Tri* has the *i* long, for the ſame reaſon as *bi*, which ſee (118) (119).

138. *Vi* has the *i* ſo unſettled as to puzzle the correcteſt ſpeakers. The *i* is generally long in *vicarious*, notwithſtanding the ſhort *i* in *vicar*. It is long in *vibration*, from its relation to *vibrate*. *Vitality* has the *i* long, like *vital*. In *vivifick, vivificate*, and *viviparous*, the firſt *i* is long, to avoid too great a ſameneſs with the ſecond. *Vivacious* and *vivacity* have the *i* almoſt as often long as ſhort; Mr. Sheridan, Mr. Scott, and Dr. Kenrick, make the *i* in *vivacious* long, and Mr. Perry and Buchanan ſhort; Mr. Sheridan, Mr. Scott, and W. Johnſton, make the *i* in the firſt of *vivacity* long, and Perry and Buchanan ſhort: but the ſhort ſound ſeems leſs formal and moſt agreeable to polite uſage. *Vicinity, vicinal, viciſſitude, vituperate, vimineous*, and *virago*, ſeem to prefer the ſhort *i*, though Mr. Sheridan has marked the three laſt words with the firſt vowel long. But the diverſity will be beſt ſeen by giving the authorities for all theſe words:

Vicinity. Dr. Kenrick.
Vĭcinity. Mr. Sheridan, Mr. Scott, Buchanan, W. Johnſton, and Perry.
Vicinal. Mr. Sheridan.
Vĭciſſitude. Mr. Sheridan, Dr. Kenrick, W. Johnſton, Buchanan and Perry.
Vituperate. Mr. Sheridan, Dr. Kenrick, W. Johnſton.
Vĭtuperate. Mr. Perry.
Vimineous. Mr. Sheridan.
Virago. Mr. Sheridan, and W. Johnſton.
Vĭrago. Dr. Kenrick Mr. Scott, Buchanan, and Perry.

I have claſſed *vicinal* here as a word with the accent on the ſecond ſyllable as it ſtands in Sheridan's Dictionary, but think it ought to have the accent on the firſt. See MEDICINAL.

139. The ſame diverſity and uncertainty in the ſound of this letter ſeem to reign in thoſe final unaccented ſyllables which are terminated with the mute *e*. Perhaps the beſt way to give ſome tolerable idea of the analogy of the language

in

Digitized from Best Copy Available

in this point, will be, to ſhow the general rule, and mark the exceptions; though theſe are ſometimes ſo numerous as to make us doubt of the rule itſelf; therefore the beſt way will be to give a catalogue of both.

140. There is one rule of very great extent, in words of this termination, which have the accent on the penultimate ſyllable, and that is, that the *i* in the final ſyllable of theſe words is ſhort: thus *ſervile*, *hoſtile*, *virile*, *reſpite*, *depoſite*, *adamantine*, *amethyſtine*, &c. are pronounced as if written *ſervil*, *hoſtil*, *reſpit*, *depoſit*, &c. The only exceptions in this numerous claſs of words ſeem to be the following: *Exile*, *ſenile*, *edile*, *empire*, *umpire*, *rampire*, *finite*, *feline*, *ferine*, *archives*; the ſubſtantives, *cònfine* and *ſùpine*: while the adjectives *ſoline* and *contrite* have ſometimes the accent on the firſt, and ſometimes on the laſt ſyllable; but in either caſe the *i* is long. *Quagmire* and *piſmire* have the *i* long alſo; *likewiſe* has the *i* long, but *otherwiſe* has it more frequently, though very improperly, ſhort. *Myrrhine*, *vulpine*, and *gentile*, though marked with the *i* long by Mr. Sheridan, ought, in my opinion, to conform to the general rule, and be pronounced with the *i* ſhort. *Vulpine*, with the *i* long, is adopted by Mr. Scott; and W. Johnſton, Mr. Scott, and Buchanan, agree with Mr. Sheridan in the laſt ſyllable of *gentile*; and this ſeems agreeable to general uſage, though not to analogy. See the word.

141. But when the accent is on the laſt ſyllable but two in words of this termination, the length of the vowel is not ſo eaſily aſcertained.

142. Thoſe ending in *ive* have the *i* ſhort, except *ſacrifice* and *cockatrice*.

143. Thoſe ending in *ide* have the *i* long, notwithſtanding we ſometimes hear *ſuicide* abſurdly pronounced, as if written *ſuicid*.

144. Thoſe ending in *ife* have the *i* long, except *houſe-wife*, pronounced *huzzwiff*, according to the general rule, notwithſtanding the *i* in *wife* is always long. *Midwife* is ſometimes ſhortened in the ſame manner by the vulgar; and *ſe'nnight* for *ſevennight* is gone irrevocably into the ſame analogy; though *fortnight* for *fourteenthnight* is more frequently pronounced with the *i* long.

145. Thoſe ending in *ile* have the *i* ſhort, except *reconcile*, *chamomile*, *eſtipile*. *Juvenile*, *mercantile*, and *puerile*, have the *i* long in Sheridan's Dictionary, and ſhort in Kenrick's. In my opinion the latter is the much more prevalent and polite pronunciation; but *infantile*, though pronounceable both ways, ſeems inclinable to lengthen the *i* in the laſt ſyllable. See JUVENILE.

146. In the termination *ime*, *pantomime* has the *i* long, rhyming with *time*; and *maritime* has the *i* ſhort, as if written *maritim*.

147. Words in *ine*, that have the accent higher than the penultimate, have the quantity of *i* ſo uncertain, that the only method to give an idea of it will be to exhibit a catalogue of words where it is pronounced differently.

148. But firſt it may not be improper to ſee the different ſounds given to this letter in ſome of the ſame words by different orthöepiſts:

Columbīne. Sheridan, Nares, W. Johnſton.
Columbĭne. Kenrick, Perry.
Saccharīne. Sheridan, Nares.
Saccharĭne. Kenrick, Perry.
Saturnīne. Sheridan, Nares, Buchanan.

149. In theſe words I do not heſitate to pronounce, that the general rule inclines evidently to the long *i*, which, in doubtful caſes, ought always to be followed; and for which reaſon I ſhall enumerate thoſe words firſt where I judge the *i* ought to be pronounced long: *Cannabine, carabine, columbine, bizantine, gelatine, legatine, oxyrrhodine, concubine, muſcadine, incarnadine, celandine, almandine, ſecundine, amygdaline, cryſtalline, vituline, calamine, aſinine, ſaturnine, ſaccharine, adulterine, viperine, uterine, lamentine, armentine, ſerpentine, turpentine, veſpertine, belluine, porcupine, countermine, leonine, ſapphirine,* and *metalline.*

150. The words of this termination, where the *i* is ſhort, are the following: *Jacobine, medicine, diſcipline, maſculine, jeſſamine, feminine, heroine, nectarine, libertine, genuine, hyaline, palatine.* To theſe, I think, ought to be added, *alkaline, aquiline, coralline, brigantine, eglantine:* and to this pronunciation of the *i*, the proper names, *Valentine* and *Conſtantine*, ſeem ſtrongly to incline; and on the ſtage, *Cymbeline* has entirely adopted it. Thus we ſee how little influence the Latin language has on the quantity of the *i* in the final ſyllable of theſe words. It is a rule in that language, that adjectives ending in *ilis* or *inus*, derived from animated beings or proper names, to the exception of very few, have this *i* pronounced long. It were to be wiſhed this diſtinction could be adopted in Engliſh words from the Latin, as in that caſe we might be able in time to regularize this very irregular part of our tongue; but this alteration would be almoſt impoſſible in adjectives ending in *ive*, as *relative, vocative, fugitive*, &c. have the *i* uniformly ſhort in Engliſh, and long in the Latin *relativus, vocativus, fugitivus*, &c.

151. The only word ending in *ire*, with the accent on the antepenultimate ſyllable, is *acroſpire*, with the *i* long, the laſt ſyllable ſounding like the *ſpire* of a church.

152. Words ending in *iſe* have the *i* ſhort, when the accent is on the laſt ſyllable but one, as *franchiſe*, except the compounds ending in *wiſe*, as *likewiſe, lengthwiſe*, &c. as marked by Mr. Scott, Mr. Perry, and Buchanan: but even among theſe words we ſometimes hear *otherwiſe* pronounced *otherwiz*, as marked by Mr. Sheridan and W. Johnſton; but, I think, improperly.

153. When the accent is on the laſt ſyllable but two in theſe words, they are invariably pronounced with the *i* long, as *criticiſe, equaliſe.*

154. In the termination *ite*, when the accent is on it, the *i* is always long, as *requite.* When the accent is on the laſt ſyllable but one, it is always ſhort, as *reſpite* (140), pronounced as if written *reſpit*, except *contrite;* but when the accent is on the laſt ſyllable but two, the *i* is generally long: the exceptions, however, are ſo many, that a catalogue of both will be the beſt rule.

155. The *i* is long in *expedite, recondite, incondite, hermaphrodite, Carmelite, theodolite, coſmopolite, chryſolite, eremite, aconite, margarite, marcaſite, paraſite, appetite, bipartite, tripartite, quadripartite, convertite, anchorite, pituite, ſatellite.* As the word ſtands in Kenrick's Dictionary *ſa-tell-it*, having the *i* ſhort, and the accent on the ſecond ſyllable, it is doubly wrong. The *i* in the laſt ſyllable is ſhortened alſo by W. Johnſton and Perry, but made long, as it ought to be, by Mr. Sheridan, Mr. Scott, and Mr. Nares. See RECONDITE.

156. The *i* is ſhort in *cucurbite, ingenite, definite, indefinite, infinite, hypocrite, favourite, requiſite, pre-requiſite, perquiſite, exquiſite, appoſite,* and *oppoſite. Heteroclite* has the *i* long in Sheridan, but ſhort in Kenrick. The former is, in my opinion, the beſt pronunciation, (ſee the word in the Dictionary;) but *ite*, in what may be called a Gentile termination, has the *i* always long, as in *Hivite, Samnite, coſmopolite, bedlamite*, &c.

157. The termination *ive*, when the accent is on it, is always long, as in *hive,*

bive, except in the two verbs, *give*, *live*, and their compounds, *giving*, *living*, &c.; for the adjective *live*, as a *live animal*, has the *i* long, and rhymes with *ſtrive*; ſo have the adjective and adverb, *lively* and *livelily*: the noun *livelihood* follows the ſame analogy; but the adjective *live-long*, as the *live-long day*, has the *i* ſhort, as in the verb. When the accent is not on the *i* in this termination it is always ſhort, as *ſportive*, *plaintive*, &c. rhyming with *give* (150), except the word be a gentile, as *Argīve*.

158. All the other adjectives and ſubſtantives of this termination, when the accent is not on it, have the *i* invariably ſhort, as *offenſive*, *defenſive*, &c. The *i* in *ſalique* is ſhort, as if written *ſallick*, but long in *oblique*, rhyming with *pike*, *ſtrike*, &c.; while *antique* has the *i* long and ſlender, and rhymes with *ſpeak*. Dr. Kenrick, Mr. Elphinſton, Mr. Perry, Buchanan, and Barclay, have *obleek* for *oblique*; Mr. Scott has it both ways, but gives the ſlender ſound firſt; and Mr. Sheridan, Mr. Nares, and W. Johnſton, *oblīke*. The latter is, in my opinion, more agreeable to polite uſage, but the former more analogical; for as it comes from the French *oblique*, we cannot write it *oblike*, as Mr. Nares wiſhes, any more than *antique*, *antike*, for fear of departing too far from the Latin *antiquus* and *obliquus*. *Opaque*, Mr. Nares obſerves, has become *opake*; but then it muſt be remembered, that the Latin is *opacus*, and not *opaquus*.

159. All the terminations in *ize* have the *i* long, except to *endenize*; which, having the accent on the ſecond ſyllable, follows the general rule, and has the *i* ſhort, pronounced as in the verb *is*, (140.) To theſe obſervations we may add, that though *evil* and *devil* ſuppreſs the *i*, as if written *ev'l* and *dev'l*, yet that *cavil* and *pencil* preſerve its ſound diſtinctly; and that *Latin* ought never to be pronounced as it is generally at ſchools, as if written *Latt'n*. *Couſin* and *cozen* both drop the laſt vowels, as if ſpelled *cozn*, and are only diſtinguiſhable to the eye.

Thus we ſee how little regularity there is in the ſound of this letter when it is not under the accent, and, when cuſtom will permit, how careful we ought to be to preſerve the leaſt trace of analogy, that "confuſion may not be worſe confounded." The ſketch that has been juſt given may, perhaps, afford ſomething like a clew to direct us in this labyrinth, and it is hoped it will enable the judicious ſpeaker to pronounce with more certainty and decision.

160. It was remarked under the vowel *A*, that when a hard *g* or *c* preceded that vowel, a ſound like *e* interpoſed, the better to unite the letters, and ſoften the ſound of the conſonant. The ſame may be obſerved of the letter *I*. When this vowel is preceded by hard *g* or *k*, which is but another form for hard *c*, it is pronounced as if an *e* were inſerted between the conſonant and the vowel: thus *ſky*, *kind*, *guide*, *guiſe*, *diſguiſe*, *cate hiſe*, *guile*, *beguile*, *mankind*, are pronounced as if written *ſke-y*, *ke-ind*, *gue-iſe*, *diſ-gue iſe*, *cate-che-iſe*, *gue-ile*, *begue-ile*, *manke-ind*. At firſt ſight we are ſurpriſed that two ſuch different letters as *a* and *i* ſhould be affected in the ſame manner by the hard gutturals, *g*, *c*, and *k*; but when we reflect that *i* is really compoſed of *a* and *e*, (37,) our ſurpriſe ceaſes; and we are pleaſed to find the ear perfectly uniform in its procedure, and entirely unbiaſſed by the eye. From this view of the analogy we may ſee how greatly miſtaken is a very ſolid and ingenious writer on this ſubject, who ſays, that "*ky-ind* for *kind* is a monſter of pronunciation, heard only on our ſtage." Nares' Engliſh Orthöepy, page 28. See No. 92.

It may not, perhaps, ſeem unworthy of notice, that when this letter is unaccented in the numerous terminations *ity*, *ible*, &c. it is frequently pronounced like ſhort *u*, as if the words *ſenſible*, *viſible*, &c. were written *ſenſubble*, *viſubble*, &c.; and *charity*, *chaſtity*, &c. like *charutty*, *chaſtutty*, &c.: but it may be obſerved,

ſerved, that the pure ſound of *i* like *e* in theſe words is as much the mark of an elegant ſpeaker as that of the *u* in *ſingular*, *educate*, &c. See No. 179.

O.

161. Grammarians have generally allowed this letter but three ſounds. Mr. Sheridan inſtances them in *not*, *note*, *prove*. For a fourth, I have added the *o* in *love*, *dove*, &c.; for the fifth, that in *or*, *nor*, *for*; and a ſixth, that in *woman*, *wolf*, &c.

162. The firſt and only peculiar ſound of this letter is that by which it is named in the alphabet: it requires the mouth to be formed, in ſome degree, like the letter, in order to pronounce it. This may be called its long open ſound, as the *o* in *prove* may be called its long ſlender ſound, (65.) This ſound we find in words ending with ſilent *e*, as *tone*, *bone*, *alone*; or when ending a ſyllable with the accent upon it, as *mo-tion*, *po tent*, &c.; likewiſe in the monoſyllables, *go*, *ſo*, *no*. This ſound is found under ſeveral combinations of other vowels with this letter, as in *moan*, *groan*, *bow* (to ſhoot with), *low* (not high), and before *ſt* in the words *hoſt*, *ghoſt*, *poſt*, *moſt*, and before *ſſ* in *groſs*.

163. The ſecond ſound of this letter is called its ſhort ſound, and is found in *not*, *got*, *lot*, &c.; though this, as in the other ſhort vowels, is by no means the ſhort ſound of the former long one, but correſponds exactly to that of *a* in *what*, with which the words *not*, *got*, *lot*, are perfect rhymes. The long ſound, to which the *o* in *not* and *ſot* are ſhort ones, is found under the diphthong *au* in *naught*, and the *ou* in *fought*; correſponding exactly to the *a* in *hall*, *ball*, &c. The ſhort ſound of this letter, like the ſhort ſound of *a* in *father* (78) (79), is frequently, by inaccurate ſpeakers, and chiefly thoſe among the vulgar, lengthened to a middle ſound approaching to its long ſound, the *o* in *or*. This ſound is generally heard, as in the caſe of *a*, when it is ſucceeded by two conſonants: thus Mr. Smith pronounces *broth*, *froth*, and *moth*, as if written *brawth*, *frawth*, and *mawth*. Of the propriety or impropriety of this, a well-educated ear is the beſt judge; but as was obſerved under the article A (79), if this be not the ſound heard among the beſt ſpeakers, no middle ſound ought to be admitted, as good orators will ever incline to definite and abſolute ſounds, rather than ſuch as may be called *non-deſcripts* in language.

164. The third ſound of this letter, as was marked in the firſt obſervation, may be called its long ſlender ſound, correſponding to the double *o*. The words where this ſound of *o* occurs are ſo few, that it will be eaſy to give a catalogue of them: *Prove*, *move*, *behove*, and their compounds, *loſe*, *do*, *ado*, *Rome*, *poltron*, *ponton*, *ſponton*, *who*, *whom*, *womb*, *tomb*. *Sponton* is not in Johnſon; and this and the two preceding words ought rather to be written with *oo* in the laſt ſyllable. *Gold* is pronounced like *goold* in familiar converſation; but in verſe and ſolemn language, eſpecially that of the Scripture, ought always to rhyme with *old*, *fold*, &c. See ENCORE, GOLD, and WIND.

165. The fourth ſound of this vowel is that which is found in *love*, *dove*, &c.; and the long ſound, which ſeems the neareſt relation to it, is the firſt ſound of *o* in *note*, *tone*, *rove*, &c. This ſound of *o* is generally heard when it is ſhortened by the ſucceeding liquids *n*, *m*, *r*, and the ſemi-vowels *v*, *z*, *th*: and as Mr. Nares has given a catalogue of thoſe words, I ſhall avail myſelf of his labour. *Above*, *affront*, *allonge*, *among*, *amongſt*, *attorney*, *bomb*, *bom-bard*, *borage*, *borough*, *brother*, *cochineal*, *colour*, *come*, *comely*, *comfit*, *comfort*, *company*, *compaſs*, *comrade*, *combat*, *conduit*, *coney*, *conjure*, *conſtable*, *covenant*, *cover*, *covert*, *covet*, *covey*, *cozen*, *diſcomfit*, *done*, *dost*, *doth*, *dove*, *dozen*, *dromedary*, *front*, *glove*, *govern*, *honey*, *hover*, *love*, *Monday*,

Monday, money, mongrel, monk, monkey, month, mother, none, nothing, one, onion, other, oven, plover, pomegranate, pommel, pother, romage, ſhove, ſhovel, ſloven, ſmother, ſome, Somerſet, ſon, ſovereign, ſponge, ſtomach, thorough, ton, tongue, word, work, wonder, world, worry, worſe, worſhip, wort, worth: to which we may add, *rhomb, once, comfrey,* and *colander.*

166. In theſe words the accent is on the *o* in every word, except *pomegranate:* but with very few exceptions, this letter has the ſame ſound in the unaccented terminations, *oc, ock, od, ol, om, on, op, or, ot,* and *ſome,* as *mammock, caſſock, method, carol, kingdom, union, amazon, gallop, tutor, turbot, troubleſome,* &c.; all which are pronounced as if written *mammuck, caſſuck, methud,* &c. The *o* in the adjunct *monger,* as *cheeſemonger,* &c. has always this ſound. The exceptions to this rule are technical terms from the Greek or Latin, as *Achor,* a ſpecies of the herpes; and proper names, as *Calor,* a river in Italy.

167. The fifth ſound of *o* is the long ſound produced by *r* final, or followed by another conſonant, as *for, former.* This ſound is perfectly equivalent to the diphthong *au;* and *for* and *former* might, on account of ſound only, be written *faur* and *faurmer.* There are many exceptions to this rule, as *borne, corps, corſe, force, forge, form* (a ſeat), *fort, horde, porch, port, ſport,* &c. which have the firſt ſound of this letter.

168. *O,* like *A* is lengthened before *r,* when terminating a monoſyllable, or followed by another conſonant; and, like *a* too, is ſhortened by a duplication of the liquid, as we may hear by comparing the conjunction *or* with the ſame letters in *torrid, florid,* &c.; for though the *r* is not doubled to the eye in *florid,* yet as the accent is on it, it is as effectually doubled to the ear as if written *florrid;* ſo if a conſonant of another kind ſucceed the *r* in this ſituation, we find the *o* as long as in a monoſyllable: thus the *o* in *orchard* is as long as in the conjunction *or,* and that in *formal,* as in the word *for:* but the *o* in *orifice* and *forage,* where the *r* is followed by a vowel, the *o* is as ſhort as if the *r* were double, and the words written *orrifice* and *forrage.* See No. 81.

169. There is a ſixth ſound of *o* exactly correſponding to the *u* in *bull, full, pull,* &c. which, from its exiſting only in the following words, may be called its irregular ſound. Theſe words are *woman, boſom, worſted, wolf,* and the proper names, *Wolſey, Worceſter,* and *Wolverhampton.*

Irregular and unaccented Sounds.

170. What was obſerved of the *a,* when followed by a liquid and a mute, may be obſerved of the *o* with equal juſtneſs. This letter, like *a,* has a tendency to lengthen, when followed by a liquid and another conſonant, or by *ſ, ſſ,* or *ſ* and a mute. But this length of *a,* in this ſituation, ſeems every day growing more and more vulgar: and, as it would be groſs to a degree to ſound the *a* in *caſtle, maſk,* and *plant,* like the *a* in *palm, pſalm,* &c. ſo it would be equally exceptionable to pronounce the *o* in *moſs, droſs,* and *froſt,* as if written *mauwſe, drawſe* and *frawſt,* (78) (79.) The *o* in the compounds of *ſolve,* as *diſſolve, abſolve, reſolve,* ſeem the only words where a ſomewhat longer ſound of the *o* is agreeable to polite pronunciation: on the contrary, when the *o* ends a ſyllable, immediately before or after the accent, as in *po lite, im-po-tent,* &c. there is an elegance in giving it the open ſound nearly as long as in *po-lar* and *po-tent,* &c. See Domeſtic, Collect and Command. It may likewiſe be obſerved, that the *o* like the *e* (102) is ſuppreſſed in a final unaccented ſyllable when preceded by *c* or *k,* and followed by *n,* as *bacon, beacon, deacon, beckon, reckon,* pronounced *bak'n, leak'n, deak'n, beck'n, reck'n;* and when *c* is preceded by another conſonant,

nant, as *falcon*, pronounced *fawk'n*. The *o* is likewiſe mute in the ſame ſituation when preceded by *d* in *pardon*, pronounced *pard'n*, but not in *Guerdon:* it is mute when preceded by *p* in *weapon*, *capon*, &c. pronounced *weap'n*, *cap'n*, &c.; and when preceded by *s* in *reason*, *ſeason*, *treaſon*, *oraiſon*, *benifon*, *denifon*, *uniſon*, *foiſon*, *poiſon*, *priſon*, *damſon*, *crimſon*, *advowſon*, pronounced *reaz'n*, *treaz'n*, &c.; and *maſon*, *baſon*, *garriſon*, *leſſon*, *caparifon*, *comparifon*, *diſinheriſon*, *parſon*, and *perſon*, pronounced *mas'n*, *bas'n*, &c. *Uniſon*, *diapaſon*, and *cargaſon*, ſeem, particularly in ſolemn ſpeaking, to preſerve the ſound of *o* like *u*, as if written *uniſun*, *diapaſun*, &c. The ſame letter is ſuppreſſed in a final unaccented ſyllable beginning with *t*, as *Seton*, *cotton*, *button*, *mutton*, *glutton*, pronounced as if written *Set'n*, *cott'n*, &c. When *x* precedes the *t*, the *o* is pronounced diſtinctly, as in *Sexton*. When *l* is the preceding letter, the *o* is generally ſuppreſſed, as in the proper names *Stilton cheeſe*, *Wilton carpets*, and *Melton Mowbray*, &c. Accurate ſpeakers ſometimes ſtruggle to preſerve it in the name of our great epic poet *Milton;* but the former examples ſufficiently ſhew the tendency of the language; and this tendency cannot be eaſily counteracted. This letter is likewiſe ſuppreſſed in the laſt ſyllable of *blazon*, pronounced *blaz'n;* but is always to be preſerved in the ſame ſyllable of *horizon*. This ſuppreſſion of the *o* muſt not be ranked among thoſe careleſs abbreviations found only among the vulgar, but muſt be conſidered as one of thoſe devious tendencies to brevity, which has worn itſelf a currency in the language, and has at laſt become a part of it. To pronounce the *o* in thoſe caſes where it is ſuppreſſed, would give a ſingularity to the ſpeaker bordering nearly on the pedantic; and the attention given to this ſingularity by the hearer would neceſſarily diminiſh his attention to the ſubject, and conſequently deprive the ſpeaker of ſomething much more deſirable.

U.

171. The firſt ſound of *u*, heard in *tube*, or ending an unaccented ſyllable, as in *cu·bic*, is a diphthongal ſound, as if *e* were prefixed, and theſe words were ſpelt *tewbe* and *kewbic*. The letter *u* is exactly the pronoun *you*.

172. The ſecond ſound of *u* is the ſhort ſound, which tallies exactly with the *o* in *done*, *ſon*, &c. which every ear perceives might, as well for the ſound's ſake, be ſpelt *dun*, *ſun*, &c. See all the words where the *o* has this ſound, No. 165.

173. The third ſound of this letter, and that in which the Engliſh more particularly depart from analogy, is the *u* in *bull*, *full*, *pull*, &c. The firſt, or diphthongal *u* in *tube*, ſeems almoſt as peculiar to the Engliſh as the long ſound of the *i* in *thine*, *mine*, &c.; but here, as if they choſe to imitate the Latin, Italian, and French *u*, they leave out the *e* before the *u*, which is heard in *tube*, *mule*, &c. and do not pronounce the latter part of *u* quite ſo long as the *oo* in *pool*, nor ſo ſhort as the *u* in *dull*, but with a middle ſound between both, which is the true ſhort ſound of the *oo* in *coo* and *woo*, as may be heard by comparing *woo* and *wool;* the latter of which is a perfect rhyme to *bull*.

174. This middle ſound of *u*, ſo unlike the general ſound of that letter, exiſts only in the following words: *bull*, *full*, *pull;* words compounded of *full*, as *wonderful*, *dreadful*, &c. *bullock*, *bully*, *bullet*, *bulwark*, *fuller*, *fulling-mill*, *pulley*, *pullet*, *puſh*, *buſh*, *buſhel*, *pulpit*, *puſs*, *bullion*, *butcher*, *cuſhion*, *cuckoo*, *pudding*, *ſugar*, *buſſar*, *buzza*, and *put* when a verb: but few as they are, except *full*, which is a very copious termination, they are ſufficient to puzzle Engliſhmen who reſide at any diſtance from the capital, and to make the inhabitants of Scotland and Ireland,

Digitized from Best Copy Available

Ireland, (who, it is highly probable, received a much more regular pronunciation from our anceſtors,) not unfrequently the jeſt of fools.

175. But vague and deſultory as this ſound of the *u* may at firſt ſeem, on a cloſer view we find it chiefly confined to words which begin with the mute labials, *b*, *p*, *f*, and end with the liquid labial *l*, or the dentals *ſ*, *t*, and *d*, as in *bull*, *full*, *pull*, *buſh*, *puſh*, *pudding*, *puſs*, *put*, &c. Whatever, therefore, was the cauſe of this whimſical deviation, we ſee its primitives are confined to a very narrow compaſs: *put* has this ſound only when it is a verb; for *putty*, a paſte for glaſs, has the common ſound of *u*, and rhymes exactly with *nutty*, (having the qualities of a nut;) ſo *put*, the game at cards, and the vulgar appellation of *country put*, follow the ſame analogy. All *Bull*'s compounds regularly follow their primitive. But though *fuller*, a whitener of cloth, and *Fulham*, a proper name, are not compounded of *full*, they are ſounded as if they were; while *Putney* follows the general rule, and has its firſt ſyllable pronounced like the noun *put*. *Pulpit* and *pullet* comply with the peculiarity on account of their reſemblance to *pull*, though nothing related to it; and *butcher* and *puss* adopt this ſound of *u* for no reaſon but the nearneſs of their form to the other words: and when to theſe we have added *cuſhion*, *ſugar*, *cuckoo*, *huſſar*, and the interjection *huzza*, we have every word in the whole language where the *u* is thus pronounced.

176. Some ſpeakers indeed, have attempted to give *bulk* and *puniſh*, this obtuſe ſound of *u*, but luckily have not been followed. The words which have already adopted it are ſufficiently numerous; and we cannot be too careful to check the growth of ſo unmeaning an irregularity. When this vowel is preceded by *r* in the ſame ſyllable, it has a ſound ſomewhat longer than this middle ſound, and exactly as if written *oo*: thus *rue*, *true*, &c. are pronounced nearly as if written *roo*, *troo*, &c. (339.)

177. It muſt be remarked, that this ſound of *u*, except in the word *fuller*, never extends to words from the learned languages; for *fulminant*, *fulmination*, *ebullition*, *repulſion*, *ſepulchre*, &c. ſound the *u* as in *dull*, *gull*, &c. and the *u* in *pus* and *puſtule* is exactly like the ſame letter in *thus*. So the pure Engliſh words, *fulſome*, *buſs*, *bulge*, *buſtle*, *buſtard*, *buzzard*, preſerve the *u* in its ſecond ſound, as in *us*, *hull*, and *cuſtard*. It may likewiſe not be unworthy of remark, that the letter *u* is never ſubject to the ſhortening power of either the primary or ſecondary accent; but when accented, is always long, unleſs ſhortened by a double conſonant. See the words DRAMA and MUCULENT, and No. 503, 534.

Irregular and Unaccented Sounds.

178. But the ſtrangeſt deviation of this letter from its regular ſound is in the words *buſy*, *buſineſs*, *and bury*. We laugh at the Scotch for pronouncing theſe words, as if written *bewſy*, *bewſineſs*, and *bewry*; but we ought rather to bluſh for ourſelves in departing ſo wantonly from the general rule as to pronounce them *bizzy*, *bizneſs*, and *berry*.

179. There is an incorrect pronunciation of this letter when it ends a ſyllable not under the accent, which prevails, not only among the vulgar, but is ſometimes found in better company; and that is, giving the *u* an obſcure ſound, which confounds it with vowels of a very different kind: thus we not unfrequently hear *ſingular*, *regular*, and *particular*, pronounced as if written *ſing-e-lar*, *reg-e-lar*, and *par-tick-e-lar*; but nothing tends more to tarniſh and vulgarize the pronunciation than this ſhort and obſcure ſound of the unaccented *u*.

It

It may, indeed, be obſerved, that there is ſcarcely any thing more diſtinguiſhes a perſon of mean and good education than the pronunciation of the unaccented vowels, (547) (558.) When vowels are under the accent, the prince, and the loweſt of the people in the metropolis, with very few exceptions, pronounce them in the ſame manner; but the unaccented vowels in the mouth of the former have a diſtinct, open, and ſpecific ſound, while the latter often totally ſink them, or change them into ſome other ſound. Thoſe, therefore, who wiſh to pronounce elegantly, muſt be particularly attentive to the unaccented vowels; as a neat pronunciation of theſe, forms one of the greateſt beauties of ſpeaking.

Y final.

180. *Y* final, either in a word or ſyllable, is a pure vowel, and has exactly the ſame ſound as *i* would have in the ſame ſituation. For this reaſon, printers, who have been the great correctors of our orthography, have ſubſtituted the *i* in its ſtead, on account of the too great frequency of this letter in the Engliſh language. That *y* final is a vowel, is univerſally acknowledged; nor need we any other proof of it than its long ſound, when followed by *e* mute, as in *thyme*, *rhyme*, &c. or ending a ſyllable with the accent upon it, as *buying*, *cyder*, &c. this may be called its firſt vowel ſound.

181. The ſecond ſound of the vowel *y* is its ſhort ſound, heard in *ſyſtem*, *ſyntax*, &c.

Irregular and Unaccented Sounds.

182. The unaccented ſound of this letter at the end of a ſyllable, like that of *i* in the ſame ſituation, is always like the firſt ſound of *e*: thus *vanity*, *pleuriſy*, &c. and if ſound alone were conſulted, might be written *vanitee*, *pleuriſee*, &c.

183. The exception to this rule is, when *ſ* precedes the *y* in a final ſyllable, the *y* is then pronounced as long and open as if the accent were on it: thus *juſtify*, *qualify*, &c. have the laſt ſyllable ſounded like that in *defy*. This long ſound continues when the *y* is changed into *i*, in *juſtifiable*, *qualifiable*, &c. The ſame may be obſerved of *multiply* and *multipliable*, &c; *occupy* and *occupiable*, &c. (512.)

184. There is an irregular ſound of this letter when the accent is on it in *panegyric*, when it is frequently pronounced like the ſecond ſound of *e*; which would be more correct if its true ſound were preſerved, and it were to rhyme with *Pyrrhic*; or as Swift does with *Satiric*:

> " On me when dunces are ſatirick,
> " I take it for a *panegyrick*,"

Thus we ſee the ſame irregularity attends this letter before double *r*, or before ſingle *r*, followed by a vowel, as we find attends the vowel *i* in the ſame ſituation. So the word *Syrinx* ought to preſerve the *y* like *i* pure, and the word *ſyrtis* ſhould ſound the *y* like *e* ſhort, though the firſt is often heard improperly, like the laſt.

185. But the moſt uncertain ſound of this letter is, when it ends a ſyllable immediately preceding the accent. In this caſe it is ſubject to the ſame variety as

Digitized from Best Copy Available

as the letter *i* in the ſame ſituation, and nothing but a catalogue will give us any idea of the analogy of the language in this point.

186. The *y* is long in *chylaceous*, but ſhortened by the ſecondary accent in *chyliſaction* and *chylifactive*, (530:) though, without the leaſt reaſon from analogy, Mr. Sheridan has marked them both long.

187. Words compoſed of *hydro*, from the Greek ὑδωρ, *water*, have the *y* before the accent generally long, as *hydrography*, *hydrographer*, *hydrometry*, *hydropic*; all which have the *y* long in Mr. Sheridan but *hydrography*, which muſt be a miſtake of the preſs; and this long ſound of *y* continues in *hydroſtatic*, in ſpite of the ſhortening power of the ſecondary accent, (530.) The ſame ſound of *y* prevails in *hydraulics* and *hydatides*. *Hygrometer* and *hygrometry* ſeem to follow the ſame analogy, as well as *hyperbola* and *hyperbole*; which are generally heard with the *y* long; though Kenrick has marked the latter ſhort. *Hypoſtaſis* and *hypoſtenuſe* ought to have the *y* long likewiſe. In *hypotheſis* the *y* is more frequently ſhort than long; and in *hypothetical* it is more frequently long than ſhort; but *hypocriſy* has the firſt *y* always ſhort. *Myrabolan* and *myropoliſt* may have the *y* either long or ſhort. *Mythology* has the firſt *y* generally ſhort, and *mythological*, from the ſhortening power of the ſecondary accent, (530,) almoſt always. *Phytivorous*, *phytography*, *phytology*, have the firſt *y* always long. In *phylactery* the firſt *y* is generally ſhort, and in *phyſician* always. *Pylorus* has the *y* long in Mr. Sheridan, but, I think, improperly. In *pyramidal* he marks the *y* long, though, in my opinion, it is generally heard ſhort, as in *pyramid*. In *pyrites*, with the accent on the ſecond ſyllable, he marks the *y* ſhort, much more correctly than Kenrick, who places the accent on the firſt ſyllable, and marks the *y* long, (ſee the word.) *Synodic*, *ſynodical*, *ſynonima*, and *ſynopſis*, have the *y* always ſhort: *ſynechdoche* ought likewiſe to have the ſame letter ſhort, as we find it in Perry's and Kenrick's Dictionaries; though in Sheridan's we find it long. *Typography* and *typographer* ought to have the firſt *y* long, as we find it in Sheridan, Scott, Buchanan, W. Johnſton, Kenrick, and Perry, though frequently heard ſhort; and though *tyrannical* has the *y* marked ſhort by Mr. Perry, it ought rather to have the long ſound, as we ſee it marked by Mr. Sheridan, Mr. Scott, Buchanan, W. Johnſton, and Kenrick.

188. From the view that has been taken of the ſound of the *i* and *y* immediately before the accent, it may juſtly be called the moſt uncertain part of pronunciation. Scarcely any reaſon can be given why cuſtom prefers one ſound to the other in ſome words; and why, in others, we may uſe either one or the other indiſcriminately. It is ſtrongly to be preſumed that the *i* and *y*, in this ſituation, particularly the laſt, was generally pronounced long by our anceſtors, but that cuſtom has gradually inclined to the ſhorter ſound as more readily pronounced, and as more like the ſound of theſe letters when they end a ſyllable after the accent; and, perhaps, we ſhould contribute to the regularity of the language, if, when we are in doubt, we ſhould rather incline to the ſhort than the long ſound of theſe letters.

W final.

189. That *w* final is a vowel, is not diſputed (9); when it is in this ſituation, it is equivalent to *oo*; as may be perceived in the ſound of *vow*, *tow-el*, &c. where it forms a real diphthong, compoſed of the *a* in *wa-ter*, and the *oo* in *woo* and *coo* It is often joined to *o* at the end of a ſyllable, without affecting the ſound of that vowel; and in this ſituation it may be called ſervile, as in *bow*, to ſhoot with; *crow*, *low* (not high), &c.

DIPHTHONGS.

190. A diphthong is a double vowel, or the union or mixture of two vowels pronounced together, ſo as only to make one ſyllable; as the Latin *a e* or *æ*, *o e* or *œ*, the Greek *ει*, the Engliſh *ai*, *au*, &c.

191. This is the general definition of a diphthong: but if we examine it cloſely, we ſhall find in it a want of preciſion and accuracy.* If a diphthong be two vowel ſounds in ſucceſſion, they muſt neceſſarily form two ſyllables, and therefore, by its very definition, cannot be a diphthong; if it be ſuch a mixture of two vowels as to form but one ſimple ſound, it is very improperly called a diphthong; nor can any ſuch ſimple mixture exiſt.

192. The only way to reconcile this ſeeming contradiction, is to ſuppoſe that two vocal ſounds in ſucceſſion were ſometimes pronounced ſo cloſely together as to form only the time of one ſyllable in Greek and Latin verſe. Some of theſe diphthongal ſyllables we have in our own language, which only paſs for monoſyllables in poetry: thus *hire* (wages) is no more than one ſyllable in verſe, though perfectly equivalent to *higher* (more high), which generally paſſes for a diſſyllable: the ſame may be obſerved of *dire* or *dyer*, *hour* and *power*, &c. This is not uniting two vocal ſounds into one ſimple ſound, which is impoſſible, but pronouncing two vocal ſounds in ſucceſſion ſo rapidly and ſo cloſely as to go for only one ſyllable in poetry.

193. Thus the beſt definition I have found of a diphthong is that given us by Mr. Smith. in his Scheme for a French and Engliſh Dictionary. "A diphthong (ſays this gentleman) I would define to be two ſimple vocal ſounds "uttered by one and the ſame emiſſion of breath, and joined in ſuch a manner that each loſes a portion of its natural length; but from the junction "produceth a compound ſound, equal in the time of pronouncing to either of "them taken ſeparately, and ſo making ſtill but one ſyllable."

194. "Now if we apply this definition (ſays Mr. Smith) to the ſeveral "combinations that may have been laid down and denominated diphthongs "by former orthöepiſts, I believe we ſhall find only a ſmall number of them "meriting this name." As a proof of the truth of this obſervation, we find, that moſt of thoſe vocal aſſemblages that go under the name of diphthongs emit but a ſimple ſound, and that not compounded of the two vowels, but one of them only, ſounded long: thus *pain* and *pane*, *pail* and *pale*, *bear* and *here*, are perfectly the ſame ſounds.

195. Theſe obſervations naturally lead us to a diſtinction of diphthongs into proper and improper: the proper are ſuch as have two diſtinct vocal ſounds, and the improper ſuch as have but one.

196 The proper diphthongs are,

ea ocean	*io* queſtion	*oy* boy
eu feud	*oi* voice	*ua* aſſuage
ew jewel	*ou* pound	*ue* manſuetude
ia poniard	*ow* now	*ui* languid.
ie ſpaniel		

In this aſſemblage it is impoſſible not to ſee a manifeſt diſtinction between thoſe which begin with *e* or *i*, and the reſt. In thoſe beginning with either of theſe vowels

* We ſee how many diſputes the ſimple and ambiguous nature of vowels created among grammarians, and how it has begot the miſtake concerning diphthongs: all that are properly ſo are ſyllables, and not diphthongs, as intended to be ſignified by that word. *Holder.*

vowels we find a ſqueezed ſound like the commencing or conſonant *y* interpoſe, as it were, to articulate the latter vowel, and that the words where theſe diphthongs are found, might, agreeably to the ſound, be ſpelt *oſhe-yar, f-yude, j-yewel, pon-yard, ſpan-yel, paſh-yon*, &c.; and as theſe diphthongs (which, from their commencing with the ſound of *y* conſonant, may not improperly be called *ſemi-conſonant diphthongs*,) begin in that part of the mouth where *s*, *c* ſoft, and *t* are formed, we find that coaleſcence enſue which forms the aſpirated hiss in the numerous terminations *ſion, tion, tial*, &c. and by direct conſequence in thoſe ending in *ure, une*, as *future, fortune*, &c. for the letter *u*, when long, is exactly one of theſe ſemi-conſonant diphthongs (8); and when immediately after the accent it coaleſces with the preceding *s*, *c*, or *t*, and draws them into the aſpirated hiſs of *ſh* or *tſh* (459). Thoſe found in the termination *ious* may be called ſemi-conſonant diphthongs alſo, as the *o* and *u* have but the ſound of one vowel. It may be obſerved too, in paſſing, that the reaſon why in *manſuetude* the *s* does not go into *ſh*, is, becauſe when *u* is followed by another vowel in the ſame ſyllable, it drops its conſonant ſound at the beginning, and becomes merely double *o*.

197. The improper diphthongs are,

ae Cæſar	*ea* clean	*ie* friend
ai aim	*ee* reed	*oa* coat
ao gaol	*ei* ceiling	*oe* œconomy
au taught	*eo* people	*oo* moon
aw law	*ey* they	*ow* crow.

198. The triphthongs having but two ſounds are merely ocular, and muſt therefore be claſſed with the proper diphthongs:

aye (for ever)	*eou* plenteous	*iew* view
eau beauty	*ieu* adieu	*oeu* manœuvre.

Of all theſe combinations of vowels we ſhall treat in their alphabetical order.

AE.

199. *Ae* or *æ* is a diphthong, ſays Dr. Johnſon, of very frequent uſe in the Latin language, which ſeems not properly to have any place in the Engliſh; ſince the *æ* of the Saxons has been long out of uſe, being changed to *e* ſimple; to which, in words frequently occurring, the *æ* of the Romans is, in the ſame manner, altered, as in *equator, equinoctial*, and even in *Eneas*.

200. But though the diphthong *æ* is perfectly uſeleſs in our language, and the ſubſtitution of *e* in its ſtead, in *Ceſar* and *Eneas*, is recommended by Dr. Johnſon, we do not find his authority has totally annihilated it, eſpecially in proper names and technical terms derived from the learned languages. *Cæſar, Æneas, Æſop, pæan, æther, æthiops* mineral, *amphiſbæna, anacephalæoſis, aphæreſis, ægilops, ozæna*, &c. ſeem to preſerve the diphthong, as well as certain words which are either plurals or genitives, in Latin words not naturaliſed, as *cornucopiæ, exuviæ, aqua vitæ, minutiæ, ſtriæ*, &c.

201. This diphthong, when not under the accent, in *Michaelmas*, and when accented in *Dædalus*, is pronounced like ſhort *e*; it is, like *e*, ſubject to the ſhort ſound when under the ſecondary accent, as in *Ænobarbus*, where *æn*, in the firſt ſyllable, is pronounced exactly like the letter *n*, (530.)

AI.

202. The ſound of this diphthong is exactly like the long ſlender ſound of *a*; thus *pail*, a veſſel, and *pale*, a colour, are perfectly the ſame ſound. The exceptions are but few.

203. When *ſaid* is the third perſon pretcrimperfect tenſe of the verb to *ſay*, *ai* has the ſound of ſhort *e*, and *ſaid* rhymes with *bed*; the ſame ſound of *ai* may be obſerved in the third perſon of the preſent tenſe *ſaith* and the participle *ſaid*; but when this word is an adjective, as the *ſaid* man, it is regular, and rhymes with *trade*.

204. *Plaid*, a ſtriped garment, rhymes with *mad*.

205. *Raillery* is a perfect rhyme to *ſalary*; and *raiſin*, a fruit, is pronounced exactly like *reaſon*, the diſtinctive faculty of man. See both theſe words in the Dictionary.

206. *Again* and *Againſt* ſound as if written *agen* and *agenſt*.

207. The *aiſle* of a church is pronounced exactly like *iſle*, an iſland; and is ſometimes written *ile*.

208. When this diphthong is in a final unaccented ſyllable, the *a* is ſunk, and the *i* pronounced ſhort: thus *mountain*, *fountain*, *captain*, *curtain*, *villain*, are all pronounced as if written *mountin*, *fountin*, *captin*, *curtin*, *villin*; but when the laſt word takes an additional ſyllable, the *i* is dropped, and the *a* has its ſhort ſound, as *villanous*, *villany*. See the words in the Dictionary.

209. The *ai* in *Britain* has the ſhort ſound approaching to *u*, ſo common with all the vowels in final unaccented ſyllables, and is pronounced exactly like *Briton*.

210. *Plait*, a fold of cloth, is regular, and ought to be pronounced like *plate*, a diſh; pronouncing it ſo as to rhyme with *meat* is a vulgariſm, and ought to be avoided.

211. *Plaiſter* belongs no longer to this claſs of words, being now more properly written *plaſter*, rhyming with *caſter*.

AO.

212. This combination of vowels in a diphthong is only to be met with in the word *gaol*, now more properly written, as it is pronounced, *jail*.

AU.

213. The general ſound of this diphthong is that of the noun *awe*, as *taught*, *caught*, &c. or of the *a* in *hall*, *ball*, &c.

214. When theſe letters are followed by *n* and another conſonant, they change to the ſecond ſound of *a*, heard in *far*, *farther*, &c.: thus *aunt*, *haunt*, *daunt*, *aſkaunce*, *aſkaunt*, *flaunt*, *haunt*, *gauntlet*, *jaunt*, *haunch*, *launch*, *craunch* *jaundice*, *laundry*, have the Italian ſound of the *a* in the laſt ſyllable of *papa* and *mamma*. To theſe I think ought to be added, *daunt*, *paunch*, *gaunt*, and *ſaunter*, as Dr. Kenrick has marked them with the Italian *a*, and not as if written *dawnt*, *pawnch*, &c. as Mr. Sheridan ſounds them. *Maund*, a baſket, is always pronounced with the Italian *a*, and nearly as if written *marnd*; for which reaſon *Maundy* Thurſday, which is derived from it, ought, with Mr. Nares, to be pronounced in the ſame manner, though generally heard with the ſound of *aw*. To *maunder*, to grumble, though generally heard as if written *mawnder*, ought certainly to be pronounced as Mr. Nares has claſſed it, with the Italian

Italian *a*. The ſame may be obſerved of *taunt*, which ought to rhyme with *aunt*, though ſounded *tawnt* by Mr. Sheridan; and being left out of the above liſt, ſuppoſed to be ſo pronounced by Mr. Nares. But Mr. Elphinſton has placed the analogy of theſe words in ſo ſtrong and curious a light, that I cannot help preſenting them to the reader in his own words, though a different orthography: "*U* meritoriouſly diſtinguiſhes *aunt*, the parent's ſiſter, from *ant* the emmet, "and gives *a* ſlender ſhut, the ſervile of *a* broad open, yet without pretence "of ſo dangerous or any coincidence; in defiance of both ſiſters, his *aunt* had "power to retain the company of *jaunt*, *haunt*, *vaunt*, *taunt*, *daunt*, *gaunt*, *gaunt-* "*let*; in all of which the *u* does preciſely the ſame duty it formerly did in "*chaunt*, *graunt*, *maund*, and *commaund*; in *saunter* and *saunder*; as well as in "*braunch*, *haunch*, *paunch*, *launch*, *staunch*; all now juſtly as genealogically, "*chant*, *grant*, *mand* (the old baſket), *command*, *santer*, *sander*; *branch*, *hanch*, "*panch*, *lanch*, *stanch*. *Jaundice* alone pleaded *u* radical; and yet was found "mere *jandice*. So with *aunt*, muſt return to truth and etymology (who do "not always join iſſue), *jant*, *hant*, *vant*, *tant*, *dant*, *gant*, *gantlet*; and even the "venerable *Mandy Thurſday*, with her *mand* or baſket in her hand. She had, "indeed, almoſt left the language, though Aſtrea had not left the land, when "analogy (or harmony) enacted: *a* broad *(au)* ſhall not in Engliſh precede *n*, "followed either by a dry dental, or by a ſibilation; that is, *au* ſhall not be fol- "lowed by *nt*, *nd*, *nce*, *nch*, or *nge*. No ſuch ſounds being ſufferable in the "Engliſh ſyſtem, as *aunt*, *aund*, *aunch*, *aunce*, or *aunge*; there ſhall be no ſuch "ſemblances. Alike are therefore indiſpenſable, *chant* and *jant*; *hand* and "*mand*, *chance* and *lance*, *branch* and *lanch*, *banter*, and *santer*; *Sande* and his full "ſelf *Alexander*. In all ſuch, *a* far from broad or open, is ſlender and ſhut; "yet hardly ſhorter than if the ſilent aſpiration interpoſed in *ahnt*, *sahnter*, "*lahnce*, *lahnch*, and the reſt. Before *nge*, indeed, *a* is alſo ſlender, but open; "not *ah*, but *a*; guarded therefore by its own *(i)* ſervile (as we ſaw in "its place) againſt every danger of *change*. *Faun* and *fawn* remain doubtleſs "in *fauns* and *fawns*, unaltered by the adſcititious depreſſive ſibilant." *Propriety Aſcertained in her Picture*, vol. i. page 171.

215. *Laugh* and *draught*, which are very properly claſſed by Mr. Nares among theſe words which have the long Italian *a* in *father*, are marked by Mr. Sheridan with his firſt ſound of *a* in *hat*, lengthened into the ſound of *a* in *father*, by placing the accent on it. *Staunch* is ſpelled without the *u* by Johnſon, and therefore improperly claſſed by Mr. Nares in the above liſt.

216. *Vaunt* and *avaunt* ſeem to be the only real exceptions to this ſound of *a* in the whole liſt; and as theſe words are chiefly confined to tragedy, they may be allowed to "fret and ſtrut their hour upon the ſtage" in the old traditionary ſound of *awe*.

217. This diphthong is pronounced like long *o* in *hautboy*, as if written *ho-boy*; and like *o* ſhort in *cauliflower*, *laurel*, and *laudanum*; as if written *colliflower*, *lorrel*, and *loddanum*. In *gauge*, *au* has the ſound of ſlender *a*, and rhymes with *page*.

218. There is a corrupt pronunciation of this diphthong among the vulgar, which is, giving the *au* in *daughter*, *ſauce*, *ſaucer*, and *ſaucy*, the ſound of the Italian *a*, and nearly as if written *darter*, *ſarce*, *ſarcer*, and *ſarcy*; but this pronunciation cannot be too carefully avoided. *Au* in *ſauſage* alſo, is ſounded by the vulgar with ſhort *a*, as if written *ſaſſage*; but in this, as in the other words, *au* ought to ſound *awe*. See the words in the Dictionary.

AW.

219. Has the long broad ſound of *a* in *ball*, with which the word *bawl* is perfectly identical. It is always regular.

AY.

220. This diphthong, like its near relation *ai*, has the ſound of ſlender *a* in *pay*, *day*, &c. and is pronounced like long *e* in the word *quay*, which is now ſometimes ſeen written *key*; for if we cannot bring the pronunciation to the ſpelling, it is looked upon as ſome improvement to bring the ſpelling to the pronunciation: a moſt pernicious practice in language. See Bowl.

221. To *flay*, to ſtrip off the ſkin, alſo, is corruptly pronounced *flea*; but the diphthong in this word ſeems to be recovering its rights.

222. There is a wanton departure from analogy in orthography, by changing the *y* in this diphthong to *i* in the words *paid*, *said*, *laid*, for *payed*, *sayed*, and *layed*. Why theſe words ſhould be written with *i* and thus contracted, and *played*, *prayed*, and *delayed*, remain at large, let our wiſe correctors of orthography determine. *Stayed* alſo, a participial adjective, ſignifying *steady*, is almoſt always written *staid*.

223. When *ay* comes immediately after the accent in a final ſyllable, like *ai*, it drops the former vowel, in the colloquial pronunciation of the days of the week. Thus as we pronounce *captain*, *curtain*, &c. as if written *captin*, *curtin*, &c. ſo we hear *Sunday*, *Monday*, &c. as if written *Sundy*, *Mundy*, &c. A more diſtinct pronunciation of *day*, in theſe words, is a mark of the northern dialect (208).

224. The familiar aſſent *ay* for *yes*, is a combination of the long Italian *a* in the laſt ſyllable of *papa*, and the firſt ſound of *e*. If we give the *a* the ſound of that letter in *ball*, the word degenerates into a coarſe ruſtic pronunciation. Though in the Houſe of Commons, where this word is made a noun, we frequently, but not correctly, hear it ſo pronounced, in the phraſe *the Ayes have it*.

AYE.

225. This triphthong is a combination of the ſlender ſound of *a*, heard in *pa-per*, and the *e* in *me-tre*. The word which it compoſes, ſignifying *ever*, is almoſt obſolete.

EA.

226. The regular ſound of this diphthong is that of the firſt ſound of *e* in *here*; but its irregular ſound of ſhort *e* is ſo frequent, as to make a catalogue of both neceſſary; eſpecially for thoſe who are unſettled in the pronunciation of the capital, and wiſh to practiſe in order to form a habit.

227. The firſt ſound of *ea* is like open *e*, and is heard in the following words: *Afeard*, *affear*, *anneal*, *appeal*, *appear*, *appease*, *aread*, *arrear*, *beacon*, *beadle*, *beadroll*, *beads*, *beadsman*, *beagle*, *beak*, *beaker*. *beam*, *bean*, *beard*, *bearded*, *beast*, *beat*, *beaten*, *beaver*, *beleaguer*, *beneath*, *bequeath*, *bereave*, *besmear*, *bespeak*, *bleach*, *bleak*, *blear*, *bleat*, *bohea*, *breach*, *bream*, to *breathe*, *ceaſe*, *cheap*, *cheat*, *clean*, *cleanly* (adverb), *clear*, *clearance*, *cleave*, *cochineal*, *colleague*, *conceal*, *congeal*, *cream*, *creak*, *crease*, *creature*, *deacon*, *deal*, *dean*, *deanery*, *dear*, *decease*, *defeasance*, *defeasible*, *defeat*, *demean*, *demeanor*, *decrease*, *dream*, *drear*, *dreary*, *each*, *eager*, *eagle*, *eagre*, *ear*, *east*, *easter*, *easy*, to *eat*, *eaten*, *eaves*,

228. In this catalogue we find *beard* and *bearded* ſometimes pronounced as if written *berd* and *berded:* but this corruption of the diphthong, which Mr. Sheridan has adopted, ſeems confined to the Stage. See the word.

229. The preterimperfect tenſe of *eat* is ſometimes written *ate*, particularly by Lord Bolingbroke, and frequently, and, perhaps, more correctly, pronounced *et*, eſpecially in Ireland; but *eaten* always preſerves the *ea* long.

230. *Ea* in *fearful* is long when it ſignifies *timorous*, and ſhort when it ſignifies *terrible*, as if written *ferful*. See the word.

231. To *read* is long in the preſent tenſe, and ſhort in the paſt and participle, which are ſometimes written *red*.

232. *Teat*, a dug, is marked by Dr. Kenrick, Mr. Elphinſton, and Mr. Nares, with ſhort *e* like *tit;* but more properly by Mr. Sheridan, Mr. Scott, W. Johnſton, Mr. Perry, and Mr Smith, with the long *e*, rhyming with *meat*.

233. *Beat*, the preterimperfect tenſe, and participle of to *beat*, is frequently pronounced in Ireland like *bet* (a wager): and if utility were the only object of language, this would certainly be the preferable pronunciation, as nothing tends more to obſcurity than verbs which have no different form for their preſent and paſt times; but faſhion in this, as in many other caſes, triumphs over uſe and propriety; and *bet*, for the paſt time and participle of *beat* muſt be religiouſly avoided.

234. *Ea* is pronounced like the ſhort *e* in the following words: *Abreast, ahead, already, bedstead, behead, bespread, bestead, bread, breadth, breakfast, breast, breath, cleanse, cleanly* (adjective), *cleanlily, dead, deadly, deaf, deafen, dearth, death, earl, earldom, early, earn, earnest, earth, earthen, earthly, endeavour, feather, head, heady, health, heard, hearse, heaven, heavy, jealous, impearl, instead, lead, leaden, leant,* (the paſt time and participle of to *lean*), *learn, learning, leather, leaven, meadow, meant, measure, pearl, peasant, pheasant, pleasant, pleasantry, pleasure, read* (paſt time and participle), *readily, readiness, ready, realm, rehearsal, rehearse, research, seamstress, scarce, search, spread, stead, steadfast, steady, stealth, stealthy, sweat, sweaty, thread, threaden, threat, threaten, treachery, tread, treadle, treasure, uncleanly, wreath, wealthy, weapon, weather, yearn, zealot, zealous, zealously.*

235. I have given the laſt three words, compounded of *zeal*, as inſtances of the ſhort ſound of the diphthong, becauſe it is certainly the more uſual ſound; but ſome attempts have lately been made in the Houſe of Commons to pronounce them long, as in the noun. It is a commendable zeal to endeavour to reform the language as well as the conſtitution; but whether, if theſe words were altered, it would be a real reformation, may admit of ſome diſpute. See *Enclitical Termination*, No. 515, and the word ZEALOT.

236. *Heard*, the paſt time and participle of *hear*, is ſometimes corruptly pronounced with the diphthong long, ſo as to rhyme with *rear'd*; but this is ſuppoſing the verb to be regular; which, from the ſpelling, is evidently not the caſe.

237. It is, perhaps, worth obſervation, that when this diphthong comes before *r*, it is apt to ſlide into the ſhort *u*, which is undoubtedly very near the true ſound, but not exactly: thus pronouncing *earl*, *earth*, *dearth*, as if written *url*, *urth*, *durth*, is a ſlight deviation from the true ſound, which is exactly that of *i* before *r*, followed by another conſonant, in *virtue*, *virgin*; and that is the true ſound of ſhort *e* in *vermin*, *vernal*, &c. (108).

238. *Leant*, the paſt time and participle of to *lean*, is grown vulgar: the *regular* form *leaned* is preferable.

239. The paſt time and participle of the verb to *leap*, ſeems to prefer the irregular form; therefore, though we almoſt always hear to *leap* rhyming with *reap*, we generally hear *leaped* written and pronounced *leapt*, rhyming with *wept*.

240. *Ea* is pronounced like long ſlender *a* in *bare*, in the following words: *Bear*, *bearer*, *break*, *forbear*, *forſwear*, *great*, *pear*, *ſteak*, *ſwear*, to *tear*, *wear*.

241. The word *great* is ſometimes pronounced as if written *greet*, generally by people of education, and almoſt univerſally in Ireland; but this is contrary to the fixed and ſettled practice in England. That this is an affected pronunciation, will be perceived in a moment by pronouncing this word in the phraſe, *Alexander the Great*; for thoſe who pronounce the word *greet*, in other caſes, will generally in this rhyme it with *fate*. It is true the *ee* is the regular ſound of this diphthong; but this ſlender ſound of *e* has, in all probability, given way to that of *a* as deeper and more expreſſive of the epithet *great*.

242. The ſame obſervations are applicable to the word *break*; which is much more expreſſive of the action when pronounced *brake* than *breek*, as it is ſometimes affectedly pronounced.

243. *Ea* is pronounced like the long Italian *a* in *father*, in the following words: *Heart*, *hearty*, *hearten*, *hearth*, *hearken*.

244. *Eo*, unaccented, has an obſcure ſound, approaching to ſhort *u*, in *vengeance*, *ſerjeant*, *pageant*, and *pageantry*.

EAU.

245. This is a French rather than an Engliſh triphthong, being found only in words derived from that language. Its ſound is that of long open *o*, as *beau*, *bureau*, *flambeau*, *portmanteau*. In *beauty* and its compounds it has the firſt ſound of *u*, as if written *bewty*.

EE.

246. This diphthong, in all words except thoſe that end in *r*, has a ſqueezed ſound of long open *e* formed by a cloſer application of the tongue to the roof of the mouth, than in that vowel ſingly, which is diſtinguiſhable to a nice ear, in the different ſounds of the verbs to *flee* and to *meet*, and the nouns *flea* and *meat*. This has always been my opinion; but, upon conſulting ſome good ſpeakers on the occaſion, and in particular Mr. Garrick, who could find no difference in the ſound of theſe words, I am leſs confident in giving it to the Public.

lic. At any rate the difference is but very trifling, and I ſhall therefore conſider *ee* as equivalent to the long open *e*.

247. This diphthong is irregular only in the word *breeches*, pronounced as if written *britches*. *Cheeſecake*, ſometimes pronounced *chizcake*, and *breech*, *britch*, I look upon as vulgariſms. *Beelzebub*, indeed, in proſe, has generally the ſhort ſound of *e*, as in *bell*: and when theſe two letters form but one ſyllable, in the poetical contraction of *e'er* and *ne'er*, for *ever* and *never*, they are pronounced as if written *air* and *nair*.

EI.

248. The general ſound of this diphthong ſeems to be the ſame as *ey*, when under the accent, which is like long ſlender *a*; but the other ſounds are ſo numerous as to require a catalogue of them all.

249. *Ei* has the ſound of long ſlender *a* in *deign*, *vein*, *rein*, *reign*, *feign*, *feint*, *veil*, *heinous*, *heir*, *heireſs*, *inveigh*, *weigh*, *neigh*, *ſkein*, *reins*, *their*, *theirs*, *eight*, *freight*, *weight*, *neighbour*, and their compounds. When *gh* comes after this diphthong, though there is not the leaſt remnant of the Saxon guttural ſound, yet it has not exactly the ſame ſimple vowel ſound as when followed by other conſonants; *ei*, followed by *gh*, ſounds both vowels like *a e*; or if we could interpoſe the *y* conſonant between the *a* and *t* in *eight*, *weight*, &c. it might, perhaps, convey the ſound better. The difference, however, is ſo delicate as to render this diſtinction of no great importance. The ſame obſervations are applicable to the words *ſtraight*, *ſtraighten*, &c. See the word EIGHT.

250. *Ei* has the ſound of long open *e* in *here*, in the following words and their compounds: To *cail*, *ceiling*, *conceit*, *deceit*, *receipt*, *conceive*, *perceive*, *deceive*, *receive*, *inveigle*, *ſeize*, *ſeiſin*, *ſeignior*, *ſeigniory*, *ſeine*, *plebeian*. *Obeiſance* ought to be in the preceding claſs. See the word.

251. *Leiſure* is ſometimes pronounced as rhyming with *pleaſure*; but, in my opinion, very improperly: for if it be allowed that cuſtom is equally divided, we ought, in this caſe, to pronounce the diphthong long, as more expreſſive of the idea annexed to it, (241).

252. *Either* and *neither* are ſo often pronounced *eye-ther* and *nigh-ther*, that it is hard to ſay to which claſs they belong. Analogy, however, without heſitation, gives the diphthong the ſound of long open *e*, rather than that of *i*, and rhymes them with *breather*, one who breathes. This is the pronunciation Mr. Garrick always gave to theſe words; but the true analogical ſound of the diphthong in theſe words is that of the ſlender *a*, as if written *ay-ther* and *nay-ther*. This pronunciation is adopted in Ireland, but is not favoured by one of our orthöepiſts; for Mr. Sheridan, Mr. Scott, Mr. Elphinſton, Mr. Perry, Mr. Smith, Steele's Grammar, and Dr. Jones, all pronounce theſe words with the diphthong like long *e*. W. Johnſton alone adopts the ſound of long *i* excluſively; Dr. Kenrick gives both *ēther* and *īther*, but prefers the firſt, but gives *neither* the ſound of long *e* excluſively; Mr. Coote ſays theſe words are generally pronounced with the *ei* like the *i* in *mine*. Mr. Barclay gives no deſcription of the ſound of *ei* in *either*, but ſays *neither* is ſometimes pronounced *nīther*, and by others *nēth-r*; and Mr. Nares ſays, "*either* and *neither* are ſpoken by "ſome with the ſound of long *i*; I have heard even that of long *a* given to "them; but as the regular way is alſo in uſe, I think it is preferable. Theſe "differences ſeem to have ariſen from ignorance of the regular ſound of *ei*." If by the regular way and the regular ſound of this diphthong Mr. Nares means the long ſound of *e*, we need only inſpect No. 249 and 250 to ſee that

the ſound of *a* is the more general ſound, and therefore ought to be called the regular; but where there are ſo many inſtances of words where this diphthong has the long ſound of *e*, and cuſtom is ſo uniform in theſe words, there can be no doubt which is the true ſound.

253. *Ei* has the ſound of long open *i*, in *height* and *ſleight*, rhyming with *white* and *right*. *Height* is, indeed, often heard rhyming with *eight* and *weight*, and that among very reſpectable ſpeakers; but cuſtom ſeems to decide in favour of the other pronunciation, that it may better tally with the adjective *high*, of which it is the abſtract.

254. *Ei* has the ſound of ſhort *e*, in the two words *heifer* and *nonpareil*, pronounced *heffer* and *nonparell*.

255. This diphthong, when unaccented, like *ai* (208), drops the former vowel, and is pronounced like ſhort *i*, in *foreign*, *foreigner*, *forfeit*, *forfeiture*, *ſovereign*, *ſovereignty*, *ſurfeit*, *counterfeit*.

EO.

256. This diphthong is pronounced like *e* long in *people*, as if written *peeple*; and like *e* ſhort in *leopard* and *jeopardy*, as if written *leppard* and *jeppardy*; and in the law terms *feoffee*, *feoffer*, and *feoffment*, as if written *feffee*, *feffer*, and *feffment*.

257. We frequently hear theſe vowels contracted into ſhort *o* in *geography*, and *geometry*, as if written *joggraphy* and *jommetry*; but this groſs pronunciation ſeems daily wearing away, and giving place to that which ſeparates the vowels into two diſtinct ſyllables, as it is always heard in *geographical*, *geometer*, *geometrical*, and *geometrician*. *Georgic* is always heard as if written *jorgic*, and muſt be given up as incorrigible (116).

258. *Eo* is heard like long *u* in *feod*, *feodal*, *feodatory*, which are ſometimes written as they are pronounced, *feud*, *feúdal*, *feudatory*.

259. *Eo*, when unaccented, has the ſound of *u* ſhort in *ſurgeon*, *ſturgeon*, *dudgeon*, *gudgeon*, *bludgeon*, *curmudgeon*, *dungeon*, *luncheon*, *puncheon*, *truncheon*, *burgeon*, *habergeon*, but in *ſcutcheon*, *eſcutcheon*, *pigeon*, and *widgeon*, the *eo* ſounds like ſhort *i*.

260. *Eo* ſounds like long *o* in *yeoman* and *yeomanry*; the firſt ſyllable of which words rhyme with *go*, *no*, *ſo*. See the words.

261. *Eo* in *galleon*, a Spaniſh ſhip, ſounds as if written *galloon*, rhyming with *moon*.

EOU.

262. This aſſemblage of vowels, for they cannot be properly called a triphthong, is often contracted into one ſyllable in proſe, and poets never make it go for two. In *cutaneous* and *vitreous*, two ſyllables are palpable; but in *gorgeous* and *outrageous* the ſoft *g* coaleſcing with *e* ſeems to drop a ſyllable, though polite pronunciation will always preſerve it.

263. This aſſemblage is never found but in an unaccented ſyllable, and generally a final one; and when it is immediately preceded by the dentals *d* or *t*, it melts them into the ſounds of *j* and *ch*: thus *hideous* and *piteous* are pronounced as if written *hidjous* and *pitchous*. The ſame may be obſerved of *righteous*, *plenteous*, *bounteous*, *courteous*, *beauteous*, and *duteous*, (293) (294).

EU.

264. This diphthong is always ſounded like long *u* or *ew*, and is ſcarcely ever irregular: thus *feud*, *deuce*, &c. are pronounced as if written *fewd*, *dewce*, &c.

EW.

EW.

265. This diphthong is pronounced like long *u*, and is almoſt always regular. There is a corrupt pronunciation of it like *oo* chiefly in London, where we ſometimes hear *dew*, and *new* pronounced as if written *doo* and *noo*; but when *r* precedes this diphthong, as in *brew*, *crew*, *drew*, &c. pronouncing it like *oo*, is ſcarcely improper. See 176, 339.

266. *Shew* and *ſtrew* have almoſt left this claſs, and by Johnſon's recommendation are become *ſhow* and *ſtrow*, as they are pronounced. The proper name *Shrewsbury*, however, ſtill retains the *e*, though always pronounced *Shrowsbury*. *Sew*, with a needle, always rhymes with *no*; and *ſewer*, ſignifying a drain, is generally pronounced *ſhore*: but *ſewer*, an officer, rhymes with *ſewer*. See SEWER.

267. *Ew* is ſometimes pronounced like *aw* in the verb to *chew*; but this is groſs and vulgar. To *chew* ought always to rhyme with *new*, *view*, &c.

EWE.

268. This triphthong exiſts only in the word *ewe*, a female ſheep; which is pronounced exactly like *yew*, a tree, or the plural perſonal pronoun *you*. There is a vulgar pronunciation of this word as if written *yoe*, rhyming with *doe*, which muſt be carefully avoided. See the word.

EY.

269. When the accent is on this diphthong, it is always pronounced like *ay*, or like its kindred diphthong, *ei*, in *vein*, *reign*, &c.: thus *bey*, *dey*, *grey*, *prey*, *they*, *trey*, *whey*, *obey*, *convey*, *purvey*, *ſurvey*, *hey*, *eyre*, and *eyrey*, are always heard as if written *bay*, *day*, &c. *Key* and *ley* are the only exceptions, which always rhyme with *ſea* (220).

270. *Ey*, when unaccented, is pronounced like *ee*: thus *galley*, *valley*, *alley*, *barley*, &c. are pronounced as if written *gallee*, *vallee*, &c. The noun *ſurvey*, therefore, if we place the accent on the firſt ſyllable, is anomalous. See the word.

EYE.

271. This triphthong is only found in the word *eye*, which is always pronounced like the letter *I*.

IA.

272. This diphthong, in the terminations *ian*, *ial*, *iard*, and *iate*, forms but one ſyllable, though the *i* in this ſituation, having the ſqueezed ſound of *ee* perfectly ſimilar to *y*, gives the ſyllable a double ſound, very diſtinguiſhable in its nature from a ſyllable formed without the *i*: thus *Chriſtian*, *filial*, *poniard*, *conciliate*, ſound as if written *Chriſt-yan*, *fil-yal*, *pon-yard*, *concil-yate*, and have in the laſt ſyllable an evident mixture of the ſound of *y* conſonant (113).

273. In *diamond*, theſe vowels are properly no diphthong; and in proſe, the word ought to have three diſtinct ſyllables; but we frequently hear it ſo pronounced as to drop the *a* entirely, and as if written *dimond*. This, however, is a corruption that ought to be avoided.

274. In

274. In *carriage*, *marriage*, *parliament*, and *miniature*, the *a* is dropped, and the *i* has its ſhort ſound, as if written *carridge*, *marridge*, *parliment*, *miniture* (90).

IE.

275. The regular ſound of this diphthong is that of *ee*, as in *grieve*, *thieve*, *fiend*, *lief*, *liege*, *chief*, *kerchief*, *handkerchief*, *auctionier*, *grenadier*, &c. as if written *greeve*, *theeve*, *feend*, &c.

276. It has the ſound of long *i* in *die*, *hie*, *lie*, *pie*, *tie*, *vie*, as if written *dy*, *hy*, &c.

277. The ſhort ſound of *e* is heard in *friend*, *tierce*, and the long ſound of the ſame letter in *tier*, *frieze*.

278. In *variegate* the beſt pronunciation is to ſound both vowels diſtinctly like *e*, as if written *vary-e-gate*.

279. In the numeral terminations in *ieth*, as *twentieth*, *thirtieth*, &c. the vowels ought alſo to be kept diſtinct; the firſt like open *e*, as heard in the *y* in *twenty*, *thirty*, &c. and the ſecond like ſhort *e*, heard in *breath*, *death*, &c.

280. In *fiery* too, the vowels are heard diſtinctly.

281. In *orient* and *ſpaniel*, where theſe letters come after a liquid, they are pronounced diſtinctly; and great care ſhould be taken not to let the laſt word degenerate into *ſpannel* (113).

282. When theſe letters meet, in conſequence of forming the plurals of nouns, they retain either the long or ſhort ſound they had in the ſingular, without increaſing the number of ſyllables: thus a *fly* makes *flies*, a *lie* makes *lies*, *company* makes *companies*, and *dignity*, *dignities*. The ſame may be obſerved of the third perſons and paſt participles of verbs, as *I fly*, *he flies*, *I deny*, *he denies*, *he denied*, *I ſully*, *he ſullied*, &c. which may be pronounced as if written *denize*, *denide*, *ſullid*, &c. (104)

283. When *ie* is in a termination without the accent, it is pronounced like *e* only, in the ſame ſituation: thus *braſier*, *glazier*, and *grazier*, have the laſt ſyllable ſounded as if written *brazhur*, *glazhur*, and *grazhur*, or rather as *braze-yur*, *glaze-yur*, &c. (98) (418)

IEU.

284. Theſe vowels occur in *adieu*, *lieu*, *purlieu*, where they have the ſound of long *u*, as if written *adeu*, *leu*, *purleu*.

285. In one word, *lieutenant*, theſe letters are pronounced like ſhort *e*, as if written *lev-tenant*. See the word.

IEW.

286. Theſe letters occur only in the word *view*, where they ſound like *ee*, rhyming with *few*, *new*.

IO.

287. When the accent is upon the firſt of theſe vowels they form two diſtinct ſyllables, as *violent*, *violet*; the laſt of which is ſometimes corruptly pronounced *vi-let*.

288. In *marchioneſs* the *i* is entirely ſunk, and the unaccented *o* pronounced,

nounced, as it uſually is in this ſituation, like ſhort *u*, as if written *marshun-ess* (352).

289. In *cushion* the *o* is ſunk, and the word pronounced *cushin*. See the word.

290. In the very numerous termination *ion*, theſe vowels are pronounced in one ſyllable like ſhort *u*; but when they are preceded by a liquid, as in *million*, *minion*, *clarion*, &c. (113), the two vowels, though they make but one ſyllable, are heard diſtinctly: the ſame may be obſerved when they are preceded by any of the other conſonants, except *s* and *t*, as *champion*, *scorpion*, &c. where the vowels are heard ſeparately: but the terminations *tion* and *sion* are pronounced in one ſyllable, like the verb *shun*.

291. The only exception to this rule is, when the *t* is preceded by *s*: in this caſe the *t* goes into *tch*, and the *i* is in a ſmall degree audible like ſhort *e*. This may be heard in *queſtion*, *mixtion*, *digeſtion*, *combuſtion*, and what is an inſtance of the ſame kind in *Chriſtian*, as if written *ques-chun*, *mix-chun*, &c. *queſt-yun*, *mixt-yun*, &c. (464) (272).

IOU.

292. This triphthong, when preceded by a liquid, or any mute but a dental, is heard diſtinctly in two ſyllables, as in *bilious*, *various*, *glorious*, *abſtemious*, *ingenious*, *copious*; but when preceded by the dentals *t*, ſoft *c* and *s*, theſe vowels coaleſce into one ſyllable, pronounced like *shus*: thus *precious*, *fuctious*, *noxious*, *anxious*, are ſounded as if written *presh-us*, *fac-shus*, *nock-shus*, *ang-shus* (459).

293. The ſame tendency of theſe vowels to coaleſce after a dental, and draw it to aſpiration, makes us hear *tedious* *odious*, and *inſidious*, pronounced as if written *te-je-us*, *o-jee-us*, and *in-sid-je-us*; for as *d* is but flat *t*, it is no wonder it ſhould be ſubject to the ſame aſpiration, when the ſame vowels follow: nay, it may be affirmed, that ſo agreeable is this ſound of the *d* to the analogy of Engliſh pronunciation, that, unleſs we are upon our guard, the organs naturally ſlide into it. It is not, however, pretended that this is the politeſt pronunciation; for the ſake of analogy it were to be wiſhed it were: but an ignorance of the real powers of the letters, joined with a laudable deſire of keeping as near as poſſible to the orthography, is apt to prevent the *d* from going into *j*, and to make us hear *o-de-us*, *te de-us*, &c. On the other hand, the vulgar, who in this caſe are right by inſtinct, not only indulge the aſpiration of the *d*, which the language is ſo prone to, but are apt to unite the ſucceeding ſyllables too cloſely, and to ſay *o-jus* and *te-jus*, inſtead of *o-je-us* and *te-je-us*, or rather *ode-yus* and *tede-yus*.

294. If the *y* be diſtinctly pronounced, it ſufficiently expreſſes the aſpiration of the *d*, and is, in my opinion, the preferable mode of delineating the ſound, as it keeps the two laſt ſyllables from uniting too cloſely. Where analogy, therefore, is ſo clear, and cuſtom ſo dubious, we ought not to heſitate a moment at pronouncing *odious*, *tedious*, *perfidious*, *faſtidious*, *inſidious*, *invidious*, *compendious*, *melodious*, *commodious*, *preludious*, and *ſtudious*, as if written *o-je-ous*, *te je-ous*, &c. or rather *ode-yus*, *tede-yus*, &c.; nor ſhould we forget that *Indian* comes under the ſame analogy, and ought, though contrary to reſpectable uſage, to be pronounced as if written *Indyan*, and nearly as *In-je-an* (376).

OA.

295. This diphthong is regularly pronounced as the long open ſound of *o*, as in *boat*, *coat*, *oat*, *coal*, *loaf*, &c. The only exceptions are, *broad*, *abroad*, *groat*, which

which ſound as if written *brawd, abrawd, grawt. Oatmeal* is ſometimes pronounced *ot-meal*, but ſeems to be recovering the long ſound of *o*, as in *oat*.

OE.

296. Whether it be proper to retain the *o* in this diphthong, or to baniſh it from our orthography, as Dr. Johnſon adviſes, certain it is, that in words from the learned languages it is always pronounced like ſingle *e*, and comes entirely under the ſame laws as that vowel: thus, when it ends a ſyllable, with the accent upon it, it is long, as in *An-toe-ci, Peri-oe-ci:* when under the ſecondary accent, in *oec-umenical, oec-onomics*, it is like *e* ſhort: it is long *e* in *foe-tus*, and ſhort *e* in *foe-tid* and *aſſafoet-ida:* in *doe, foe, ſloe, toe, throe, hoe* (to dig), and *bilboes*, it is ſounded exactly like long open *o:* in *canoe* and *ſhoe*, like *oo*, as if written *canoo* and *ſhoo;* and in the verb *does*, like ſhort *u*, as if written *duz*.

OEI.

297. There is but one word where this triphthong occurs, and that is in Shakeſpeare's King Lear, in the word *oeiliads* (glances), and, in my opinion, it ought to be ſounded as if written *e il yads*.

OEU.

298. This diphthong is from the French, in the word *manoeuvre;* a word, within theſe few years, of very general uſe in our language. It is not in Johnſon, and the *oeu* is generally pronounced by thoſe who can pronounce French, in the French manner; but this is ſuch a ſound of the *u* as does not exiſt in Engliſh, and therefore it cannot be deſcribed. The neareſt ſound is *oo:* with which, if this word is pronounced by an Engliſh ſpeaker, as if written *manoovre*, it may, except with very nice French ears, eſcape criticiſm.

OI.

299. The general, and almoſt univerſal ſound of this diphthong, is that of *a* in *water*, and the firſt *e* in *me-tre*. This double ſound is very diſtinguiſhable in *boil, toil, ſpoil, joint, point, anoint*, &c. which ſound ought to be carefully preſerved, as there is a very prevalent practice among the vulgar of dropping the *o*, and pronouncing theſe words as if written *bile, tile, ſpile*, &c.

300. The only inſtance which admits of a doubt in the ſound of this diphthong, when under the accent, is in the word *choir;* but this word is now ſo much more frequently written *quire*, that uniformity ſtrongly inclines us to pronounce the *oi* in *choir* like long *i*, and which, by the common orthography, ſeems fixed beyond recovery. But it may be obſerved, that either the ſpelling or the pronunciation of *Chorister*, commonly pronounced *Quiriſter*, ought to be altered. See the words.

301. When this diphthong is not under the accent, it is variouſly pronounced. Dr. Kenrick places the accent on the firſt ſyllable of *turcois*, and, for I know not what reaſon, pronounces it as if written *turkiz;* and *turkois* with the *oi* broad, as in *boys*. Mr. Sheridan places the accent on the ſecond ſyllable, and gives the diphthong the French ſound as if the word was written *turkaze*. In my opinion the beſt orthography is *turquoiſe*, and the beſt pronunciation with the accent on the laſt ſyllable, and the *oi* ſounded like long *e*, as if written *turkees;*

kees; as we pronounce *tortoise*, with the accent on the firſt ſyllable, and the *oi* like ſhort *i*, as if written *tortiz*.

302. In *avoirdupois*, the firſt diphthong is pronounced like ſhort *e*, as if written *averdupoise*.

303. In *connoisseur* the ſame ſound of *e* is ſubſtituted, as if written *connesseur*.

304. In *shamois*, or *chamois*, a ſpecies of leather, the *oi* is pronounced like long *e*, as if written *shammee*.

305. *Adroit* and *devoir*, two ſcarcely naturalized French words, have the *oi* regular, though the latter word, in polite pronunciation, retains its French ſound, as if written *devwor*.

OO.

306. The ſound of this diphthong is regular, except in a few words: it is pronounced long in *moon, soon, fool, rood, food, mood*, &c. This is its regular ſound.

307. It has a ſhorter ſound correſponding to the *u* in *bull*, in the words *wool, wood, good, hood, foot, stood, understood, withstood;* and theſe are the only words where this diphthong has this middle ſound.

308. It has the ſound of ſhort *u* in the two words *blood* and *flood*, rhyming with *mud*.

309. *Soot* is vulgarly pronounced ſo as to rhyme with *but, hut*, &c. but ought to have its long, regular, ſound, rhyming with *boot*, as we always hear it in the compound *sooty*. See the word.

310. *Door* and *floor* are univerſally pronounced by the Engliſh, as if written *dore* and *flore;* but in Ireland they preſerve the regular ſound of *oo*.

311. *Moor*, a black man, is regular in polite pronunciation, and like *more* in vulgar. *Moor*, a marſh, is ſometimes heard rhyming with *store;* but more correct ſpeakers pronounce it regularly, rhyming with *poor*.

OU.

312. This is the moſt irregular aſſemblage of vowels in our language: its moſt common ſound is that heard in *bound, found, ground*, &c. and this may be called its proper ſound; but its deviations are ſo many and ſo various, that the beſt idea of it will be conveyed by giving the ſimples of all its different ſounds.

313. The firſt or proper ſound of this diphthong is compoſed of the *a* in *ball*, and the *oo* in *woo*, or rather the *u* in *bull*, and is equivalent to the *ow* in *down, frown*, &c. This ſound is heard in *abound, about, account, acoustics, aground, aloud, amount, around, arouse, astound, avouch, bough, bounce, bound, bounty, bounteous, bout, carouse, chouse, cloud, clough, clout, clouterly, compound, couch, couchant, crouch, grouse, deflour, devour, devout, doubt, doubtful, drought, doughty, douse, encounter, espouse, expound, flout, foul, flounder, found, foundling, fountain, frousy, glout, gout* (a diſeaſe), *ground, grout, hound, hour, house, impound, loud, lounge, louse, lout, mound, mountain, mountebank, mouse, mouth, noun, ounce, our, oust, out, outer, outermost, paramount, plough, pouch, pounce, pound, pout, profound, pronoun, pronounce, propound, proud, rebound, recount, redoubt, redoubted, redound, rencounter, round, roundelay, rouse, rout, scoundrel, scour, scout, shout, shroud, slouch, spouse, spout, sprout, stout, surround, south, thou, thousand, touse, trounce, trousers, trout, wound* (did wind), *slough* (a miry place), *vouch, vouchsafe, without, scaramouch*.

314. The ſecond ſound is that of ſhort *u* in *bud*, and is heard in the follow-

ing

ing words and their compounds: *Adjourn, journey, journal, bourgeon, country, cousin, couple, accouple, double, trouble, courteous, courtesy, courage, encourage, joust, gournet, housewife, flourish, mounch, nourish, enough, chough, rough, tough, slough* (a caſt ſkin), *scourge, southerly, southern, southernwood, southward, touch, touchy, young, younker*, and *youngster;* but *southerly, southern*, and *southward* are ſometimes pronounced regularly like *south:* this, however, is far from the prevailing pronunciation. This is the ſound this diphthong always has when the accent is not on it, unleſs in very few inſtances, where the compound retains the ſound of the ſimple, as in *pronoun;* but in *sojourn* and *sojourner*, with the accent on the firſt ſyllable, and in every unaccented termination in *our* and *ous*, this diphthong has exactly the ſound of ſhort *u:* thus *favour, honour, odour*, and *famous*, are pronounced as if written *favur, honur, odur*, and *famus*.

315. The third ſound given to theſe vowels is that of *oo* in *coo* and *woo* (39), and is found in the following words: *Bouge, croup, group, aggroup, amour, paramour, bouse, bousy, boutefeu, capouch, cartouch, fourbe, gout* (taſte), and *ragout* (pronounced *goo* and *ragoo) rendezvous, rouge, soup, sous* (pronounced *soo), surtout, through, throughly, toupee* or *toupet, you, your, youth, tour, contour, tournay, tournament, pour*, and *route* (a road), *accoutre, billet-doux, agouti, uncouth, wound* (a hurt), and *routine* (a beaten road). See TOURNEY.

316. The verb to *pour* is ſometimes pronounced to *pore*, and ſometimes to *poor;* in each caſe it interferes with a word of a different ſignification, and the beſt pronunciation, which is that ſimilar to *power*, is as little liable to that exception as either of the others. See the word.

317. To *wound* is ſometimes pronounced ſo as to rhyme with *found;* but this is directly contrary to the beſt uſage: but *route* (a road, as to take a different *route)*, is often pronounced ſo as to rhyme with *doubt*, by reſpectable ſpeakers.

318. The fourth ſound of this diphthong is that of long open *o*, and is heard in the following words: *Though, although, coulter, court, account, gourd, courtier, course, discourse, source, recourse, resource, bourn, dough, doughy, four, mould, mouldy, moult, mourn, shoulder, smoulder, soul, poultice, poult, poulterer, poultry, troul* (to roll ſmoothly, marked by Mr. Sheridan as rhyming with *doll*, but more properly by Dr. Kenrick with *roll*), and *borough, thorough, furlough, fourteen, concourse*, and *intercourse*, preſerve the diphthong in the ſound of long *o*, though not under the accent.

319. The fifth ſound of *ou* is like the noun *awe*, and is heard only in *ought, bought, brought, sought, besought, fought, nought, thought, methought, wrought*.

320. The ſixth ſound is that of ſhort *oo*, or the *u* in *bull*, and is heard only in the auxiliary verbs *would, could, should*, rhyming with *good, hood, stood*, &c.

321. The ſeventh ſound is that of ſhort *o*, and heard only in *cough* and *trough*, rhyming with *off* and *scoff:* and in *lough*, and *shough*, pronounced *lock* and *shock*.

OW.

322. The elementary ſound of this diphthong is the ſame as the firſt ſound of *ou*, and is heard in *bow, now*, &c. but the ſound of long *o* obtains in ſo many inſtances, that it will be neceſſary to give a catalogue of both.

323. The general ſound, as the elementary ſound may be called, is heard in *now, bow, bow* (a mark of reſpect), *mow* (a heap of barley, &c.), *cow, brow, brown, browse, plow, sow, vow, avow, allow, disallow, endow, down, clown, frown, town, crown, drown, gown, renown, dowager, dowdy, dower, dowre, dowry, dowery, dowlas, drowse, drowsy, flower, lower, lower* (to look gloomy), *power, powder*,

powder, prowess, prow, prowl, vowel, towel, bower, rowel, cowl, scowl, crowd, shower, tower, sow (a ſwine), *sowins, sowl, thowl, low* (to bellow as a cow). This word is generally pronounced as *low*, not *high*; but if cuſtom, in this caſe, has not abſolutely decided, it ought, in my opinion, to have the firſt ſound of this diphthong, rhyming with *how*, as much more expreſſive of the noiſe it ſignifies; which, where ſounds are the ideas to be expreſſed, ought to have great weight in pronunciation (241) (251). See the word.

324. The ſecond ſound of this diphthong is heard in *blow, slow, crow, grow, flow, glow, bow* (to ſhoot with), *know, low* (not high), *mow* (to cut graſs), *row, show, sow* (to ſcatter grain), *strow, slow, snow, trow, below, slow, bestow, owe, own, ower, flown, grown, growth, know, known, sown, lower* (to bring low), *throw, thrown*; in all theſe words the *ow* ſounds like long *o* in *go, no, so*, &c.

325. The noun *prow*, ſignifying the forepart of a ſhip, rhymes with *go* in Mr. Sheridan, and with *now* in Dr. Kenrick. The latter is, in my opinion, the preferable ſound: while the verb to *prowl* (to ſeek for prey) rhymes with *owl* according to Mr. Sheridan, and with *scul* according to Dr. Kenrick: the latter has the old ſpelling *prole* to plead, but the former has, in my opinion, both analogy and the beſt uſage on its ſide. Both theſe writers unite in giving the firſt ſound of this diphthong to *prowess*; which is unqueſtionably the true pronunciation. See to PROWL.

326. The proper names *How, Howel, Howard,* and *Powel*, generally are heard with the firſt ſound of this diphthong, as in *how, now*, &c. but *Howes* and *Stow* (the hiſtorian) commonly rhyme with *knows* and *know*. *Howard*, among people of rank, is generally pronounced with the ſecond ſound, rhyming with *froward*; and *Grosvenor*, as if written *Gravenor*. *Snowden* is frequently pronounced with the firſt ſound of *ow*; but the ſecond ſound ſeems preferable; as it is not improbable that theſe mountains had their name, like the Alps, from the ſnow on their tops.

327. When this diphthong is in a final unaccented ſyllable, it has always the ſecond ſound, like long *o*, in *borrow, sorrow, fellow, willow*, &c. The vulgar ſhorten this ſound, and pronounce the *o* obſcurely, and ſometimes as if followed by *r*, as *winder* and *feller*, for *window* and *fellow*; but this is almoſt too deſpicable for notice. Good ſpeakers preſerve the diphthong in this ſituation, and give it the full ſound of open *o*, rhyming with *no, so*, &c.

328. This diphthong, in the word *knowledge*, has of late years undergone a conſiderable revolution. Some ſpeakers, who had the regularity of their language at heart, were grieved to ſee the compound depart ſo far from the ſound of the ſimple, and with heroic fortitude have oppoſed the multitude by pronouncing the firſt ſyllable of this word as it is heard in the verb to *know*. The Pulpit and the Bar have for ſome years given a ſanction to this pronunciation; but the Senate and the Stage hold out inflexibly againſt it; and the Nation at large ſeem inſenſible of the improvement. They ſtill continue to pronounce, as in the old ludicrous rhymes——

> "Among the mighty men of *knowledge*
> "That are profeſſors at Greſham College."

But if ever this word ſhould have the good fortune to be reſtored to its rights, it would be but charity to endeavour the reſtoration of a great number of words in a ſimilar ſituation, ſuch as *breakfast, vineyard, bewilder, meadow, hearken, pleasure, whitster, shepherd, windward*, and a long catalogue of fellow ſufferers (515). But, before we endeavour this reſtoration, we ſhould conſider, that contracting the ſound of the ſimple, when it acquires an additional ſyllable, is an idiom of pronunciation to which our language is extremely prone; nor is

it certain that croſſing this tendency would produce any real advantage; at leaſt, not ſufficient to counterbalance the diverſity of pronunciation which muſt for a long time prevail, and which muſt neceſſarily call off our attention from things to words. See Enclitical Termination (No. 514).

oy.

329. This diphthong is but another form for *oi*, and is pronounced exactly like it. When *alloy* is written with this diphthong, it ought never to be pronounced *allay*. Cuſtom ſeems to have appropriated the former word to the noun, and the latter to the verb; for the ſake of conſiſtency, it were to be wiſhed it were always written *allay*: but it is not to be expected that poets will give up ſo good a rhyme to *joy*, *cloy*, and *deſtroy*.

330. The only word in which this diphthong is not under the accent, is the proper name *Savoy*; for *savoy*, a plant, has the accent on the ſecond ſyllable; but the diphthong in both is pronounced in the ſame manner.

UA.

331. When the *a* in this diphthong is pronounced, the *u* has the power of *w*, which unites both into one ſyllable: thus *antiquate*, *antiquary*, *aſſuage*, *perſuade*, *equal*, *language*, &c. are pronounced *antikwate*, *antikwary*, *aſswage*, &c.

332. The *u* in this diphthong is ſilent, in *guard*, *guardian*, *guarantee*, and *piquant*; pronounced *gard*, *gardian*, *garantee*, and *pickant* (92).

333. In *Mantua*, the town of Italy, both vowels are heard diſtinctly. The ſame may be obſerved of the habit ſo called: but in *mantuamaker* vulgarity has ſunk the *a*, and made it *mantumaker*. The ſame vulgarity at firſt, but now ſanctioned by univerſal cuſtom, has ſunk both letters in *victuals*, and its compounds *victualling* and *victualler*, pronounced, *vittles*, *vittling*, and *vittler*. See MANTUA.

UE.

334. This diphthong, like *ua*, when it forms only one ſyllable, and both letters are pronounced, has the *u* ſounded like *w*; as *conſuetude*, *deſuetude*, and *manſuetude*, which are pronounced *conſwetude*, *deſwetude*, and *manſwetude*. Thus *conquest* is pronounced according to the general rule, as if written *conkwest*; but the verb to *conquer* has unaccountably deviated into *conker*, particularly upon the ſtage. This error, however, ſeems not to be ſo rooted in the general ear as to be above correction; and analogy undoubtedly demands *conkwer*.

335. This diphthong, when in a final ſyllable, ſinks the *e*, as *clue*, *cue*, *due*, *blue*, *glue*, *hue*, *flue*, *rue*, *ſue*, *true*, *mue*, *accrue*, *enſue*, *eſtue*, *imbue*, *imbrue*, *purſue*, *ſubdue*, *perdue*, *argue*, *reſidue*, *avenue*, *revenue*, *continue*, *retinue*, *conſtrue*, *ſtatue*, *tiſſue*, *iſſue*, *virtue*, *value*, *ague*; in all theſe words, whether the accent be on the diphthong *ue* or not, it is pronounced like long open *u*, except in words where the *r* comes before *u*; in this caſe it is ſounded like *oo*. When the accent is not on this diphthong as in the latter portion of theſe words from *argue*, it is apt to be feebly and indiſtinctly pronounced, and therefore care ought to be taken to ſound it as if theſe words were written *argeew*, *reſideew*, &c. In *Tueſday*, *ue*, the diphthong is pronounced in the ſame manner.

336. In ſome words the *u* is ſilent, and the *e* pronounced ſhort, as in *gueſs*, *gueſt*, *guerkin*, *guerdon*, where the *u* acts as a ſervile to preſerve the *g* hard. See APPENDIX.

337. In ſome words both the vowels are ſunk, as in *antique*, *oblique*, *league*, *feague*, *teague*, *colleague*, *plague*, *vague*, *intrigue*, *fatigue*, *harangue*, *tongue*, *disembogue*, *collogue*, *rogue*, *prorogue*, *brogue*, *fugue*; in all which the *ue* is ſilent, and the *g* pronounced hard. The *q* in *antique* and *oblique* is pronounced like *k*, as if the words were written *anteek* and *oblike* (158).

338. The terminations in *ogue*, from the Greek, are pronounced in the ſame manner. Thus *pedagogue*, *demagogue*, *ptysmagogue*, *menagogue*, *emmenagogue*, *synagogue*, *mystagogue*, *decalogue*, *dialogue*, *trialogue*, *catalogue*, *theologue*, *eclogue*, *monologue*, *prologue* and *epilogue*, are all pronounced as if written *pedagog*, *demagog*, &c. with the *o* ſhort.

339. This diphthong after *r* becomes *oo*: thus *true* is pronounced *troo* (176).

UI.

340. The *u* in this diphthong, as in *ua* and *ue*, when both vowels are pronounced without forming two ſyllables, is pronounced like *w*: thus *languid*, *anguish*, *languish*, *extinguish*, *diſtinguiſh*, *relinquiſh*, *vanquiſh*, *linguiſt*, *penguin*, *purſuivant*, *guiacum*, are pronounced as if written *langwid*, *angwish*, &c. and *cuiss* and *cuisses*, as if written *kwiss* and *kwisses*, and *cuirass*, as if written *kwirass*.

341. The *u* is ſilent, and the *i* pronounced long, in *guide*, *diſguiſe*, *guile*, and *beguile*; but the *u* is ſilent, and the *i* ſhort, in *guild*, *build*, *guilt*, *guinea*, *guitar*. *Guild*, in *Guildhall*, is, by the lower people of London, pronounced ſo as to rhyme with *child*; but this is directly oppoſite to the beſt uſage, and contrary to its etymology, as it is a compound of *guild* (a corporation, always pronounced like the verb to *gild*), and *hall*. Dr. Jones, who wrote in Queen Anne's time, tells us it was then pronounced as if written *Gildhall*. In *circuit* and *biscuit* the *u* is merely ſervile; in both the *c* is hard, and the *i* ſhort, as if written *surkit* and *biskit*. *Conduit* is pronounced *cundit*.

342. In *juice*, *sluice*, *suit*, and *purſuit*, the *i* is ſilent, and the *u* has its diphthongal ſound, as if preceded by *e*, and the words were written *slewce*, *jewce*, *sewt*, *purſewt*.

343. When this diphthong is preceded by *r*, it is pronounced like *oo*; thus *bruiſe*, *cruiſe*, *fruit*, *bruit*, *recruit*, are pronounced as if written *broose*, *croose*, *broot*, *recroot* (339).

UO.

344. The *u* in this diphthong is pronounced like *w* in *quote*, *quota*, *quotation*, *quotient*, *quotidian*, *quorum*, *quondam*, *ſiliquoſe*, *quoth*, as if written *kwote*, *kwota*, *kwotation*, &c. *Coif*, and *coit*, commonly pronounced *kwoif* and *kwoit*, do not come under this claſs. See the words.

UY.

345. This diphthong, with the accent on it, ſinks the *u*, and pronounces the *y* like long *i*: thus *buy*, the only word where *uy* has the accent, rhymes with *dry*, *fly*, &c. when the accent is not on this diphthong it is ſounded like long *e*, as *plaguy*, *roguy*, *gluy*, pronounced *pla gee*, *ro-gee*, (with the *g* hard, as in *get*,) *glu-ee*. The ſame may be obſerved of *obloquy*, *ambiloquy*, *pauciloquy*, *ſoliloquy*, *ventriloquy*, *alloquy*, *colloquy*, pronounced *oblo-quee*, *ambilo-quee*, &c.

346. This diphthong is found only in the word *buoy*, pronounced as if written *bwoy*, but too often exactly like *boy*. But this ought to be avoided by correct speakers.

OF THE CONSONANTS.

B.

347. When *b* follows *m* in the same syllable it is generally silent, as in *lamb, kemb, limb, comb, dumb*, &c. except *accumb* and *succumb:* it is silent also before *t* in the same syllable, as in *debt, doubt, redoubt, redoubted*, and their compounds: it is silent before *t*, when not in the same syllable, in the word *subtle* (cunning), often inaccurately used for *subtile* (fine), where the *b* is always pronounced. In the mathematical term *rhomb* the *b* is always heard, and the word pronounced as if written *rhumb*. *Ambs-ace* is pronounced *Aims ace*. See *Appendix*.

C.

348. *C* is always heard like *k* before *a, o* and *u;* as *card, cord, curd;* and soft, like *s* before *e, i* and *y;* as *cement, city, cynic*.

349. When *c* ends a word, or syllable, it is always hard, as in *music, flaccid, siccity*, pronounced *musik, flak-sid, sik-sity*. See EXAGGERATE.

350. In the word *sceptic*, where the first *c*, according to analogy, ought to be pronounced like *s*, Dr. Johnson has not only given his approbation to the sound of *k*, but has, contrary to general practice, spelt the word *skeptic*. It may be observed, perhaps, in this, as on other occasions, of that truly great man, that he is but seldom wrong; but when he is so, that he is generally wrong to absurdity. What a monster does this word *skeptic* appear to an eye the least classical or correct! And if this alteration be right, why should we hesitate to write and pronounce *scene, scepter*, and *Lacedæmon, skene, skepter*, and *Lakedæmon*, as there is the same reason for *k* in all? It is not, however, my intention to cross the general current of polite and classical pronunciation, which I know is that of sounding the *c* like *k*; my objection is only to writing it with the *k*: and in this I think I am supported by the best authorities since the publication of Johnson's Dictionary.

351. *C* is mute in *Czar, Czarina, victuals, indict, arbuscle, corpuscle*, and *muscle;* it sounds like *tch* in the Italian words *vermicelli* and *violincello;* and like *z* in *suffice, sacrifice, sice*, (the number six at dice,) and *discern*.

352. This letter, when connected with *h*, has two sounds; the one like *tch* in *child, chair, rich, which*, &c. pronounced as if written *tchild, tchair, ritch, whitch*, &c.; the other like *sh*, after *l* or *n*, as in *belch, bench, filch*, &c. pronounced *belsh, bensh, filsh*, &c. This latter sound is generally given to words from the French, as *chaise, chagrin, chamade, champagne, champignon, chandelier, chaperon, charlatan, chevalier, chevron, chicane, capuchin, cartouch, machine, machinist, chancre, marchioness*.

353. *Ch* in words from the learned languages, are generally pronounced like *k*, as *chalcography, chalybeate, chamæleon, chamomile, chaos, character, chart, chasm, chely,*

Digitized from Best Copy Available

chely, *chemist*, (if derived from the Arabic, and *chymist* if from the Greek,) *chersonese*, *chimera*, *chirography*, *chiromancy*, *chlorosis*, *choler*, *chorus*, *chord*, *chorography*, *chyle* and its compounds; *anchor*, *anchoret*, *cachexy*, *catechism*, *catechise*, *catechetical*, *catechumen*, *echo*, *echinus*, *epoch*, *epoche*, *ichor*, *machination*, *machinal*, *mechanic*, *mechanical*, *orchestra*, *orchestre*, *technical*, *anarch*, *anarchy*, *conch*, *cochlear*, *distich*, *hemistich*, *monostich*, *eunuch*, *monarch*, *monarchial*, *hierarch*, *heresiarch*, *pentateuch*, *stomach*, *stomachic*, *scheme*, *school*, *scholar*, *schesis*, *mastich*, *seneschal*, and in all words where it is followed by *r*, as *Christ*, *Christian*, *chronology*, *chronicle*, &c. To these may be added the *Celtic* word *loch* (a lake). The exceptions are *charity*, *archer*, and *archery*.

354. When *arch*, signifying chief, begins a word from the Greek language, and is followed by a vowel, it is always pronounced *ark*, as in *archangel*, *archipelago*, *architect*, *archives*, *archetype*, *archaism*, *archiepiscopal*, *archidiaconal*, *architrave*, *archaiology*. But when we prefix *arch* to a word of our own, and this word begins with a consonant, we pronounce it so as to rhyme with *march*, as *archduke*, *archdeacon*, *archbishop*; and sometimes, when the following word begins with a vowel, if it is a composition of our own and the word does not come to us compounded from the Greek or Latin, as *arch-enemy*.

355. The word *ache*, (a pain,) pronounced *ake*, comes from the Greek, and was by Shakespeare extended to two syllables, *aches* with *ch*, as in *watches*; but this is obsolete. It is now almost universally written *ake* and *akes*, except where it is compounded with another word, as *head-ach*, *heart-ach*, &c. and by thus absurdly retaining the *ch* in the compound, we are puzzled how to form the plural, without pronouncing *aches* in two syllables.

356. In *choir* and *chorister* the *ch* is almost universally pronounced like *qu* (300): in *ostrich*, like *dge*, as if spelled *ostridge*. It is silent in *schedule*, *schism*, and *yacht*; pronounced *sedule*, *sizm*, and *yot*. It is sunk in *drachm*, but heard in *drachma*; pronounced *dram* and *drackma*.

357. When *c* comes after the accent, either primary or secondary, and is followed by *ea*, *ia*, *ie*, *io*, or *eous*, it takes the sound of *sh*: thus *ocean*, *social*, *Phocion*, *saponaceous*, *fascination*, *negociation*, are pronounced as if written *oshean*, *soshial*, *Phoshion*, *saponasheous*, &c. (196). *Financier* has the accent after the *c*, which on that account does not go into *sh*.

D.

358. In order to have a just idea of the alterations of sound this letter undergoes, it will be necessary to consider its near relation to *T* (41). These consonants, like *p*, and *b*, *f*, and *v*, *k*, and hard *g*, and *s*, and *z*, are letters of the same organ; they differ by the nicest shades of sound, and are easily convertible into each other; *t*, *p*, *f*, *k*, and *s*, may, for the sake of distinction, be called sharp, and *d*, *b*, *v*, *g*, and *z*, may be called flat. For this reason, when a singular ends in a sharp consonant, the *s*, which forms the plural, preserves its sharp sound, as in *cuffs*, *packs*, *lips*, *hats*, *deaths*; and when the singular ends with a flat consonant, the plural *s* has the sound of *z*, as *drabs*, *bags*, *beads*, *lives*, &c. pronounced *drabz*, *bagz*, &c.

359. In the same manner, when a verb ends with a sharp consonant, the *d*, in the termination *ed*, assumed by the preterit and participle, becomes sharp, and is sounded like *t*: thus *stuffed*, *tripped*, *cracked*, *passed*, *vouched*, *faced*, (where the *e* is suppressed, as it always ought to be, except when we are pronouncing the language of Scripture) (104) change the *d* into *t*, as if written *stuft*, *tript*, *crackt*, *past*, *vouchi*, *faste*. So when the verb ends in a flat consonant, the *d* preserves its true flat sound, as *drubbed*, *pegged*, *lived*, *buzzed*, where the *e* is suppressed, and the words pronounced in one syllable, as if written *drubb'd*, *pegg'd*, *liv'd*, *buzz'd*.

Digitized from Best Copy Available

It may be obſerved too, that when the verb ends in a liquid, or a liquid and mute *e*, the participle *d* always preſerves its pure ſound; as *blamed, joined, filled, barred*, pronounced *blam'd, join'd, fill'd, barr'd*. This contraction of the participial *ed*, and the verbal *en* (103), is ſo fixed an idiom of our pronunciation, that to alter it, would be to alter the ſound of the whole language. It muſt, however, be regretted, that it ſubjects our tongue to ſome of the moſt hiſſing, ſnapping, claſhing, grinding, ſounds that ever grated the ears of a Vandal: thus *raſped, ſcratched, wrenched, bridled, fangled, birchen, hardened, ſtrengthened, quickened*, &c. almoſt frighten us when written as they are actually pronounced, as *raſpt, ſcratcht, wrencht, bridl'd, fangl'd, birch'n, strength'n'd, quick'n'd*, &c.: they become ſtill more formidable when uſed contractedly in the ſolemn ſtyle, which never ought to be the caſe; for here, inſtead of *thou strength'n'st* or *ſtrength'n'd'st, thou quick'n'st*, or *quick'n'd'st*, we ought to pronounce, *thou strength'nest* or *strength'nedst, thou quick'neſt* or *quick'nedst*, which are ſufficiently harſh of all conſcience. (See No. 405.) But to compenſate for theſe Gothick ſounds, which, however, are not without their uſe, our language is full of the ſmootheſt and moſt ſonorous terminations of the Greeks and Romans.

360. By the foregoing rule of contraction, ariſing from the very nature of the letters, we ſee the abſurdity of ſubſtituting the *t* for *ed*, when the verb ends in a ſharp conſonant; for, when the pronunciation cannot be miſtaken, it is folly to alter the orthography: thus the *Diſtreſſed Mother*, the title of a tragedy, needs not to be written *Diſtreſt Mother*, as we generally find it, becauſe, though we write it in the former manner, it muſt neceſſarily be pronounced in the latter.

361. By this rule, too, we may ſee the impropriety of writing *bleſt* for *bleſſed*, when a participle.

"Bleſt in thy genius, in thy love too bleſt."—*Pope.*

But when the word *bleſſed* is an adjective, it ought always to be pronounced, even in the moſt familiar converſation, in two ſyllables, as this is a *bleſſed* day, the *bleſſed* thiſtle, &c.

362. This word, with *learned, curſed*, and *winged*, are the only participial adjectives which are conſtantly pronounced in two ſyllables, where the participles are pronounced in one: thus *a learned man, a curſed thing, a winged horſe*, preſerve the *ed* in a diſtinct ſyllable; while the ſame words, when verbs, as *he learned to write, he curſed the day, they winged their flight*, are heard in one ſyllable, as if written *learn'd, curſt*, and *wing'd*; the *d* in *curſed* changing to *t*, from its following the ſharp conſonant *s* (358).

363. Poetry, however, (which has been one great cauſe of improper orthography), aſſumes the privilege of uſing theſe words, when adjectives, either as monoſyllables or diſſyllables; but correct proſe rigidly exacts the pronunciation of *ed* in theſe words, when adjectives, as a diſtinct ſyllable. The *ed* in *aged* and *winged*, always make a diſtinct ſyllable, as *an aged man*; the *winged courſer*: but when this word is compounded with another, the *ed* does not form a ſyllable, as *a full-ag'd horſe, a ſheath-wing'd fowl*.

364. It is, perhaps, worthy of notice, that when adjectives are changed into adverbs by the addition of the termination *ly*, we often find the participial termination *ed* preſerved long and diſtinct, even in thoſe very words where it was contracted when uſed adjectively: thus though we always hear *confeſs'd, profeſs'd, deſign'd*, &c. we as conſtantly hear *con-feſs-ed-ly, pro-feſs-ed-ly, de-ſign-ed-ly*, &c. The ſame may be obſerved of the following liſt of words, which

Digitized from Best Copy Available

which, by the assistance of the Rhyming Dictionary, I am enabled to give, as, perhaps, the only words in the language in which the *ed* is pronounced as a distinct syllable in the adverb, where it is contracted in the participial adjective: *Forcedly, enforcedly, unveiledly, deformedly, feignedly, unfeignedly, discernedly, resignedly, refinedly, restrainedly, concernedly, unconcernedly, discernedly, undiscernedly, preparedly, assuredly, advisedly, dispersedly, diffusedly, confusedly, unperceivedly, resolvedly, deservedly, undeservedly, reservedly, unreservedly, avowedly, perplexedly, fixedly, amazedly.*

365. To this catalogue may be added several abstract substantives formed from participles in *ed:* which *ed* makes a distinct syllable in the former, though not in the latter: thus *numbedness, bleariedness, preparedness, assuredness, diseasedness, advisedness, reposedness, composedness, indisposedness, diffusedness, confusedness, distressedness, resolvedness, reservedness, perplexedness, fixedness, amazedness,* have *ed* pronounced distinctly.

366. The adjectives *naked, wicked, picked* (pointed), *hooked, crooked, forked, tusked, tressed,* and *wretched,* are not derived from verbs, and are therefore pronounced in two syllables. The same may be observed of *scabbed, crabbed, chubbed, stubbed, shagged, snagged, ragged, crabbed, scrubbed, dogged, rugged, scragged, hawked, jagged;* to which we may add, the solemn pronunciation of *stiffnecked;* and these, when formed into nouns by the addition of *ness,* preserve the *ed* in a distinct syllable, as *wickedness, scabbedness, raggedness,* &c.

367. *Passed,* in the sense of beyond, becomes a preposition, and may allowably be written *past,* as *past twelve o'clock;* but when an adjective, though it is pronounced in one syllable, it ought to be written with two, as *passed pleasures are present pain:* this I know is contrary to usage; but usage is, in this case, contrary to good sense, and the settled analogy of the language.

368. It needs scarcely be observed, that when the verb ends in *t* or *d,* the *ed* in the past time and participle has the *d* pronounced with its own sound, and always forms an additional syllable, as *landed, matted,* &c. otherwise the final *d* could not be pronounced at all.

369. And here, perhaps, it may not be useless to take notice of the very imperfect and confused idea that is given in our best grammar, of what are called contracted verbs, such as *snatcht, checkt, snapt, mixt, dwelt,* and *past,* for *snatched, checked, snapped, mixed, dwelled,* and *passed.* To these are added, those that end in *l, m,* and *n,* or *p,* after a diphthong; which either shorten the diphthong, or change it into a single vowel; and instead of *ed,* take *t* only for the preterit, as *dealt, dreamt, meant, felt, slept, crept;* and these are said to be considered not as irregular, but contracted only. Now nothing can be clearer than that verbs of a very different kind are here huddled together as of the same. *Snatched, checked, snapped, mixed,* and *passed,* are not irregular at all; if they are ever written *snatcht, checkt, snapt, mixt,* and *past,* it is from pure ignorance of analogy, and not considering that if they were written with *ed,* unless we were to pronounce it as a distinct syllable, contrary to the most settled usage of the language, the pronunciation, from the very nature of the letters, must be the same. It is very different with *dwelled;* here, as a liquid, and not a sharp mute, ends the verb, *d* might be pronounced without going into *t* just as well as in *fell'd,* the participle of to *fell* (to cut down trees). Here then we find custom has determined an irregularity, which cannot be altered, without violence to the language; *dwell* may be truly called an irregular verb, and *dwelt* the preterit and participle.

370. The same may be observed of *deal, dream, mean, feel, weep, sleep,* and *creep.* It is certain we can pronounce *d* after the four first of these words, as well as in *sealed,*

Digitized from Best Copy Available

sealed, screamed, cleaned, and *reeled;* but cuſtom has not only annexed *t* to the preterit of theſe verbs, but has changed the long diphthongal ſound into a ſhort one; they are therefore doubly irregular. *Weep, sleep,* and *creep,* would not have required *t* to form their preterits, any more than *peeped,* and *steeped;* but cuſtom, which has ſhortened the diphthong in the former words, very naturally annexed *t* as the ſimpleſt method of conveying the ſound.

371. The only two words which occaſion ſome doubt about claſſing them are, to *learn* and to *spell.* The vulgar (who are no contemptible guides on this occaſion) pronounce them in the preterit *learnt* and *spelt;* but as *n* and *l* will readily admit of *d* after them, it ſeems more correct to favour a tendency to regularity, both in writing and ſpeaking, which the literary world has given into, by ſpelling them *learned* and *spelled,* and pronouncing them *learn'd* and *spell'd:* thus *earned,* the preterit of to *earn,* has been recovered from the vulgar *earnt,* and made a perfect rhyme to *discerned.*

372. To theſe obſervations may be added, that, in ſuch irregular verbs as have the preſent, the preterit and participle the ſame, as, *cast, cost, cut,* &c. the ſecond perſon ſingular of the preterit of theſe verbs take *ed* before the *est,* as *I cast, or did cast; Thou castedst, or didst cast,* &c. for if this were not the caſe, the ſecond perſon of the preterit might be miſtaken for the ſecond perſon of the preſent tenſe.

373. I have been led inſenſibly to theſe obſervations by their connexion with pronunciation; and if the reader ſhould think them too remote from the ſubject, I muſt beg his pardon, and reſume my remarks on the ſound of the letter *d.*

374. The vulgar drop this letter in *ordinary,* and *extraordinary,* and make them *or'nary* and *extr'or'nary;* but this is a groſs abbreviation; the beſt pronunciation is ſufficiently ſhort, which is *ord'nary* and *extrord'nary:* the firſt in three, and the laſt in four ſyllables: but ſolemn ſpeaking preſerves the *i,* and makes the latter word conſiſt of five ſyllables, as if written *extr'ordinary.*

375. Our anceſtors, feeling the neceſſity of ſhowing the quantity of a vowel followed by *ge,* when it was to be ſhort, inſerted *d,* as *wedge, ridge, badge,* &c. The ſame reaſon induced them to write *colledge* and *alledge,* with the *d;* but modern reformers, to the great injury of the language, have expelled the *d,* and left the vowel to ſhift for itſelf; becauſe there is no *d* in the Latin words from which theſe are derived.

376. *D* like *t,* to which it is ſo nearly related, when it comes after the accent, and is followed by the diphthong *ie, io, ia,* or *eou,* ſlides into *gzh,* or the conſonant *j;* thus *soldier* is univerſally and juſtly pronounced as if written *soljer; grandeur, gran-jeur;* and *verdure* (where it muſt be remembered that *u* is a diphthong), *ver-jure;* and, for the ſame reaſon, *education* is elegantly pronounced *ed-jucation.* But *duke* and *reduce,* pronounced *juke* and *re-juce,* where the accent is after the *d,* cannot be too much reprobated.

F.

377. *F* has its pure ſound in *often, off,* &c. but, in the prepoſition *of,* ſlides into its near relation *v,* as if written *ov.* But when this prepoſition is in compoſition at the end of a word, the *f* becomes pure; thus, though we ſound *of* ſingly *ov,* we pronounce it as if the *f* were double in *whereof.*

378. There is a ſtrong tendency to change the *f* into *v* in ſome words, which confounds the plural number and the genitive caſe: thus we often hear of a *wive's jointure,* a *calve's head,* and *houze rent,* for *wife's jointure, a calf's head,* and *house rent.*

G.

G.

379. *G*, like *C*, has two ſounds, a hard and a ſoft one: it is hard before *a*, *o*, *u*, *l*, and *r*, as *game*, *gone*, *gull*, *glory*, *grandeur*. *Gaol* is the only exception; now more commonly written *jail* (212).

380. *G* before *e* and *i* is ſometimes hard and ſometimes ſoft: it is generally ſoft before words of Greek, Latin, or French original, and hard before words from the Saxon. Theſe latter, forming by far the ſmaller number, may be conſidered as exceptions.

381. *G* is hard before *e*, in *gear*, *geck*, *geese*, *geld*, *gelt*, *gelding*, *get*, *gew-gaw*, *shagged*, *snagged*, *ragged*, *cragged*, *scragged*, *dogged*, *rugged*, *dagger*, *swagger*, *stagger*, *trigger*, *dogger*, *pettyfogger*, *tiger*, *auger*, *eager*, *meager*, *anger*, *finger*, *linger*, *conger*, *longer*, *stronger*, *younger*, *longest*, *strongest*, *youngest*. The laſt ſix of theſe words are generally pronounced in Ireland, ſo as to let the *g* remain in its naſal ſound, without articulating the ſucceeding vowel: thus *longer* (more long) is ſo pronounced as to ſound exactly like the noun a *long-er* (one who longs or wiſhes for a thing); the ſame may be obſerved of the reſt. That the pronunciation of Ireland is analogical, appears from the ſame pronunciation of *g* in *ſtring-y*, *ſpring-y*, full of ſtrings and ſprings; and *wronger* and *wrongeſt*, for more and moſt wrong. But though reſting the *g* in the naſal ſound, without articulating the ſucceeding vowel, is abſolutely neceſſary in verbal nouns derived from verbs ending in *ing*, as *ſinger*, *bringer*, *ſlinger*, &c. pronounced *ſing-er*, *bring-er*, *ſling-er*, &c. and not *ſing-ger*, *bring-ger*, *ſling-ger*, &c.; yet in *longer*, *ſtronger*, and *younger; longeſt*, *ſtrongeſt*, and *youngeſt*, the *g* ought always to articulate the *e*: thus *younger* ought always to rhyme with the termination *monger*, which has always the *g* hard, and articulating the vowel; and this pronunciation is approved by Mr. Nares. *Forget*, *target*, and *together*, fall into this claſs. See No. 409.

382. *G* is hard before *i* in *gibbe*, *gibcat*, *gibber*, *gibberiſh*, *gibbous*, *giddy*, *gift*, *gig*, *giggle*, *giglet* (properly *gigglet*), *gild*, *gill* (of a fiſh), *gimlet*, *gimp*, *gird*, *girdle*, *girl*, *girth*, *gizzard*, *begin*, *give*, *forgive*, *biggin*, *piggin*, *noggin*: alſo derivatives from nouns or verbs ending in hard *g*, as *druggiſt*, *waggiſh*, *riggiſh*, *hoggiſh*, *doggiſh*, *ſluggiſh*, *rigging*, *digging*, &c.

383. *G* before *y* is generally ſoft, as in *elegy*, *apology*, &c. and almoſt in all words from the learned languages; but hard in words from the Saxon, which are formed from nouns or verbs ending in *g* hard, as *ſhaggy*, *jaggy*, *knaggy*, *ſnaggy*, *craggy*, *ſcraggy*, *quaggy*, *ſwaggy*, *dreggy*, *ſpriggy*, *twiggy*, *boggy*, *ſoggy*, *cloggy*, *buggy*, *muggy*. *Gyve*, from its Celtic original, ought to have the *g* hard, but has decidedly adopted the ſoft *g*.

GN in the same Syllable at the Beginning of a Word.

384. The *g* in this ſituation is always ſilent, as *gnaw*, *gnaſh*, *gnat*, *gnarl*, *gnomon*, *gnomonics*; pronounced *naw*, *naſh*, *nat*, *narl*, *nomon*, *nomonics*.

GN in the same Syllable at the End of a Word.

385. No combination of letters has more puzzled the critics than this. Two actreſſes of diſtinguiſhed merit in *Portia* in the *Merchant of Venice*, pronounced the word *impugn* differently, and each found her advocate in the newſpapers. One critic affirmed, that Miſs Young, by preſerving the ſound of *g*, pronounced the word properly; and the other contended, that Mrs. Yates was more judi-

cious in leaving it out. The former was charged with harſhneſs; the latter, with mutilating the word, and weakening its ſound; but if analogy may decide, it is clearly in favour of the latter; for there is no axiom in our pronunciation more indiſputable than that which makes *g* ſilent before *n* in the ſame ſyllable. This is conſtantly the caſe in *ſign*, and all its compounds, as *reſign*, *deſign*, *conſign*, *aſſign*; and in *indign*, *condign*, *malign*, *benign*; all pronounced as if written *ſine*, *rezine*, &c. In which words we find the vowel *i* long and open, to compenſate, as it were, for the ſuppreſſion of *g*, as every other word ending in *gn*, when the accent is on the ſyllable, has a diphthong pronounced like a long open vowel, as *arraign*, *campaign*, *feign*, *reign*, *deign*; and conſequently, unleſs the vowel *u* can produce ſome ſpecial privilege which the other vowels have not, we muſt, if we pronounce according to analogy, make the *u* in this ſituation long, and ſound *impugn* as if written *impune*.

386. The ſame analogy will oblige us to pronounce *impregn*, *oppugn*, *expugn*, *propugn*, as if written *imprene*, *oppune*, *expune*, *propune*, not only when theſe verbs are in the infinitive mood, but in the preterits, participles, and verbal nouns formed from them, as *impugned*, *impugning*, and *impugner*, muſt be pronounced *impuned*, *impuning*, and *impuner*. The ſame may be obſerved of the reſt. Perhaps it will gratify a curious obſerver of pronunciation to ſee the diverſity and uncertainty of our orthöepiſts in their notation of the words before us.

impūne. Sheridan, Scott, Nares, Murray. Barclay ſays the *g* in this word and its derivatives is mute, but takes no notice of the quantity of the *u*.
impŭn. Buchanan, Kenrick, Perry.
impŭng. W. Johnſton.
oppūne. Sheridan, Scott, Nares, Murray.
oppŭn. Kenrick, Perry, Barclay.
oppŭng. W. Johnſton.
propūne. Sheridan, Scott, Perry, Nares.
propŭng. Barclay.
imprēne. Nares, Murray.
imprĕn. Sheridan, Kenrick, Perry. Barclay ſays the *g* is mute, but ſays nothing of the quantity of the *e*.
expūne. Sheridan, Scott, Nares.
expŭn. Perry, Barclay.
impūner. Sheridan.
impūned. Murray.
impŭnner. Perry, Barclay.
oppŭgner. Sheridan.
propŭgner. Sheridan.
propūner. Scott.
propŭnner. Perry.

Nothing is clearer than that all theſe words ought to follow the ſame fortune, and ſhould be pronounced alike. How then ſhall be reconciled Mr. Sheridan's pronouncing *impugn*, *oppugn*, *expugn*, and *propugn*, with the *u* long, and *impregn* with the *e* ſhort? Kenrick, who has not the word *propugn*, is conſiſtent in pronouncing the reſt with the vowel ſhort. The ſame may be obſerved of Scott, who adopts the long ſound, but has not the word *impregn*. Mr. Perry gives the ſhort ſound to all but *propugn*, where he makes the *u* long, but abſurdly makes the verbal noun *propunner*; and W. Johnſton, who has only *impugn* and *oppugn*, pronounces

Digitized from Best Copy Available

pronounces the vowel ſhort, and ſpells them *impung* and *oppung*. Barclay, under the word *impugn*, ſays the *g* in this word and its derivatives is mute, without noticing the quantity of the vowels, but ſpells *oppugn*, *oppún*; and of *impregn*, only ſays the *g* is mute; but writes *propugn*, *propung*, in the manner that W. Johnſton does *impugn* and *oppugn*: but Mr. Nares obſerves, that analogy ſeems to require a ſimilar pronunciation in all theſe words, and that the vowel ſhould be long. The ſame inconſiſtency is obſervable in Mr. Sheridan's pronunciation of the verbal nouns; for he expunges the *g* in *impugner*, and writes it *impuner*, but preſerves it in *oppugner* and *propugner*. Mr. Scott has only the word *propugner*, which he very properly, as well as conſiſtently, ſpells *propuner*. Mr. Perry has *propunner* and *impunner*, and Barclay *impunner* only.—The inconſiſtency here remarked ariſes from not attending to the analogy of pronunciation, which requires every verbal noun to be pronounced exactly like the verb, with the mere addition of the termination: thus *ſinger* is only adding *er* to the verb *ſing*, without ſuffering the *g* to articulate the *e* as it does in *finger* and *linger*, &c. The ſame may be obſerved of a *ſigner*, one who *ſigns*: and as a corroboration of this doctrine, we may take notice that the additional *er* and *eſt*, in the comparatives and ſuperlatives of adjectives, make no alteration in the ſound of the radical word: this is obvious in the words *benigner*, *benigneſt*, &c. except *younger*, *longer*, and *ſtronger*. See No. 381.

387. But in every other compound where theſe letters occur, the *n* articulates the latter ſyllable, and *g* is heard diſtinctly in the former, as *ſig-nify*, *malig-nity*, *aſſig-nation*, &c. Some affected ſpeakers, either ignorant of the rules for pronouncing Engliſh, or over-complaiſant to the French, pronounce *phyſiognomy*, *cognizance*, and *recognizance*, without the *g*; but this is a groſs violation of the firſt principles of ſpelling. The only words to keep theſe ſpeakers in countenance are *poignant* and *champignon*, not long ago imported from France, and pronounced *poinant*, *champinion*. The firſt of theſe words will be probably hereafter written without the *g*; while the latter, confined to the kitchen, may be looked upon as technical, and allowed an excluſive privilege. See COGNIZANCE.

388. *Bagnio*, *ſeignior*, *ſeraglio*, *intaglio*, and *oglio*, pronounced *ban-yo*, *ſeen-yur*, *ſeral-yo*, *intal yo*, and *ole-yo*, may be conſidered as foreign coxcombs, and treated with civility, by omitting the *g*, while they do not pervert the pronunciation of our native Engliſh words.

GM in the ſame Syllable.

389. What has been ſaid of *gn* is applicable to *gm*. We have but one word in the language where theſe letters end a word with the accent on it, and that in *phlegm*; in this the *g* is always mute and the *e* according to analogy, ought to be pronounced long, as if the word were written *fleme*; but a ſhort pronunciation of the *e* has generally obtained, and we commonly hear it *flem*: it is highly probable Pope pronounced it properly, where he ſays,

> "Our critics take a contrary extreme;
> "They judge with fury, but they write with *phlegm*."
> *Eſſay on Criticiſm.*

Perhaps it would not be difficult to reduce this word to analogy, as ſome ſpeakers ſtill pronounce the *e* long: but in the compounds of this word, as in thoſe where *gn* occur, the vowel is ſhortened, and the *g* pronounced as in *phleg-mon*, *phleg-monous*, *phleg-matic*, and *phleg-magogues*; though Mr. Sheridan, for no reaſon

Digitized from Best Copy Available

reaſon I can conceive, ſinks the *g* in the laſt word. When theſe letters end a ſyllable not under the accent, the *g* is ſilent, but the preceding vowel is ſhortened: thus *paradigm*, *parapegm*, *diaphragm*, *apophthegm*, are pronounced *paradim*, *parapem*, *diaphram*, *opothem*.

GH.

390. This combination, at the beginning of a word, drops the *h*, as in *ghoſt*, *ghaſtly*, *aghaſt*, *gherkin*, pronounced *goſt*, rhyming with *moſt*; *gaſtly*, *agaſt*, *guerkin*: but when theſe letters come at the end of a word, they form ſome of the greateſt anomalies in our language; *gh*, at the end of words, is generally ſilent, and conſequently the preceding vowel or diphthong is long as *high*, *nigh*, *thigh*, *neigh*, *weigh*, *inveigh*, *eugh* (the obſolete way of ſpelling *yew*, a tree), *bough*, *dough*, *though*, *although*, *clough* (a cliff), *plough*, *furlough*, *ſlough* (a miry place), *through*, *throughout*, *thorough*, *borough*, *usquebaugh*, *pugh!*

391. *GH* is frequently pronounced like *f*, as *laugh*, *laughter*, *cough*, *chough*, *clough* (an allowance in weight), *ſlough* (the caſt ſkin of a ſnake or ſore), *enough*, *rough*, *tough*, *trough*.

392. *Gh* is ſometimes changed into *ck*, as *hough*, *ſhough*, *lough*, pronounced *hock*, *ſhock*, *lock*; ſometimes we hear only the *g* ſounded, as in *burgh*, *burgher*, and *burgherſhip*.

GHT.

393. *Gh* in this termination is always ſilent, as *fight*, *night*, *bought*, *fought*, &c. The only exception is *draught*; which, in poetry, is moſt frequently rhymed with *caught*, *taught*, &c.; but, in proſe, is ſo univerſally pronounced as if written *draft*, that the poetical ſound of it grows uncouth, and is becoming obſolete. *Draughts*, the game, is alſo pronounced *drafts*. *Drought*, (dryneſs) is vulgarly pronounced *drowth*: it is even written ſo by Milton; but in this he is not to be imitated, having miſtaken the analogy of this word, as well as that of *height* which he ſpells *heighth*, and which is frequently ſo pronounced by the vulgar. See the words HEIGHT and DROUGHT.

H.

394. This letter is no more than breathing forcibly before the ſucceeding vowel is pronounced. At the beginning of words, it is always ſounded, except in *heir*, *heireſs*, *honeſt*, *honeſty*, *honour*, *honourable*, *herb*, *herbage*, *hoſpital*, *hoſtler*, *hour*, *humble*, *humour*, *humorous*, *humorſome*. Ben Johnſon leaves out the *h* in *hoſt*, and claſſes it in this reſpect with *honeſt*.

395. *H* is always ſilent after *r*, as *rhetoric*, *rhapſody*, *rheum*, *rheumatiſm*, *rhinoceros*, *rhomb*, *rhubarb*, *myrrh*, *catarrh*, and their compounds.

396. *H* final, preceded by a vowel, is always ſilent, as *ah! hah! oh! foh! ſirrah*, *hallelujah*, *Meſſiah*.

397. This letter is often ſunk after *w*, particularly in the capital, where we do not find the leaſt diſtinction of ſound between *while* and *wile*, *whet* and *wet*, *where* and *were*. Trifling as this difference may appear at firſt ſight, it tends greatly to weaken and impoveriſh the pronunciation, as well as ſometimes to confound words of a very different meaning. The Saxons, as Dr. Lowth obſerves, placed the *h* before the *w*, as *hwat*; and this is certainly its true place; for, in the pronunciation of all words beginning with *wh*, we ought to breathe forcibly

Digitized from Best Copy Available

forcibly before we pronounce the *w*, as if the words were written *hoo-at*, *hoo-ile*, &c. and then we ſhall avoid that feeble, cockney pronunciation, which is ſo diſagreeable to a correct ear.

J.

398. *J* is pronounced exactly like ſoft *g*, and is perfectly uniform in its ſound, except in the word *hallelujah*, where it is pronounced like *y*.

K.

399. *K* has exactly the ſound of hard *c*: it is always ſilent before *n* in the ſame ſyllable, as *knee*, *kneel*, *knack*, *knight*, *know*, *knuckle*, *knab*, *knag*, *knap*, *knare*, *knave*, *knit*, *knock*, *knot*, *knoll*.

400. It has been a cuſtom within theſe twenty years to omit the *k* at the end of words when preceded by *c*. This has introduced a novelty into the language, which is that of ending a word with an unuſual letter, and is not only a blemiſh in the face of it, but may poſſibly produce ſome irregularity in future formatives: for *mimicking* muſt be written with the *k*, though to *mimic* is without it. If we uſe *colic* as a verb, which is not uncommon, we muſt write *colicking* and *colicked*; and though *physicking* and *physicked* are not the moſt elegant words, they are not quite out of the line of formation. This omiſſion of *k* is, however, too general to be counteracted, even by the authority of Johnſon; but it is to be hoped it will be confined to words from the learned languages: and indeed, as there is not the ſame vanity of appearing learned in the Saxon as in the Latin and Greek, there is no great fear that *thick* and *ſtick* will loſe their *k*, though they never had it in the original.

L.

401. Ben Johnſon ſays *L* melteth in the ſounding, and is therefore called a liquid. This, however, cannot be the reaſon that *r* is called a liquid: for no two letters can, in this reſpect, be more oppoſite. See No. 21.

L is mute in *almond*, *calf*, *half*, *calve*, *halve*, *chaldron*, *falcon*, *folk*, *yolk* (better written *yelk* with the *l* ſounded), *fulfil*, *halſer*, *malmſey*, *ſalmon*, *ſalve*, *talbot* (a ſpecies of dog). See SALVE.

402. *L* is mute alſo between *a* and *k* in the ſame ſyllable, as *balk*, *chalk*, *talk*, *ſtalk*, *walk*.

403. *L* is ſilent likewiſe between *a* and *m* in the ſame ſyllable, as *alms*, *balm*, *calm*, *palm*, *pſalm*, *qualm*, *ſhalm*; but when the *m* is detached from the *l* by commencing another ſyllable, the *l* becomes audible. Thus, though the *l* is mute in *pſalm*, it is always heard in *pſal-miſt*, *pſal-mody*, and *pal-miſtry*; but in *balmy* and *palmy*, where the *y* is an adjective termination of our own, no alteration is made in the ſound of the ſubſtantive which ſinks the *l*. (386.) *Calmer* and *calmeſt* ought to have the *l* mute, as they are only degrees of compariſon; and *palmer* and *palmerworm* (except in the language of ſcripture, where the *l* in *palmerworm* ought to be heard) are only a ſort of verbal nouns, which never alter the ſound of the original word, and therefore ought to have the *l* mute. But though *l* is ſometimes mute in the noun *ſalve*, and in the verb to *ſalve*, it is always heard in *ſalver* (a kind of plate). See SALVE.

404. *L* ought always to be ſuppreſſed in the auxiliary verbs *would*, *could*, *ſhould*: it is ſometimes ſuppreſſed in *fault*; but this ſuppreſſion is become vulgar (ſee the

Digitized from Best Copy Available

the word). In *soldier*, likewiſe, the *l* is ſometimes ſuppreſſed, and the word pronounced *so-jer*; but this is far from being the moſt correct pronunciation: *l* ought always to be heard in this word, and its compounds *soldierly*, *soldiership*, &c.

405. *L*, preceded by a mute, and followed by *e*, in a final ſyllable, has an imperfect ſound, which does not do much honour to our language. The *l*, in this ſituation, is neither ſounded like *el* nor *le*, but the *e* final is ſuppreſſed, and the preceding mute articulates the *l*, without either a preceding or a ſucceeding vowel; ſo that this ſound may be called a monſter in Grammar—a ſyllable without a vowel! This will eaſily be perceived in the words *able*, *table*, *circle*, &c. which are pronounced as if written *abl*, *tabl*, *circl*, &c. and in all thoſe ſtill more Gothick and uncouth abbreviated participial terminations, *peopled*, *bridled*, *saddled*, *trifles*, *gaffles*, &c. pronounced *pee-pl'd*, *bri-dl'd*, *sad-dl'd*, *tri-flz*, *gaf-flz*, &c. (359) (472).

406. This letter has not only, like *f* and *s*, the privilege of doubling itſelf at the end of a word, but it has an excluſive privilege of being double where they remain ſingle; though by what right cannot well be conceived. Thus, according to the general rule, when a verb ends in a ſingle conſonant, preceded by a ſingle vowel, and the accent is on the laſt ſyllable, the conſonant is doubled when a participial termination is added, as, *abet*, *abetting*, *beg*, *begging*, *begin*, *beginning*, &c. but when the accent is not on the laſt ſyllable of the verb, the conſonant remains ſingle, as *ſuffered*, *ſuffering*, *benefiting*, &c. but the *l* is doubled, whether the accent be on the laſt ſyllable or not, as *duelling*, *levelling*, *victualling*, *travelling*, *traveller*, &c. This groſs irregularity, however, would not have been taken notice of in this place, if it had not ſuggeſted an abſurdity in pronunciation, occaſioned by the omiſſion of *l*. Though the latter *l* is uſeleſs in *traveller*, *victualler*, &c it is not ſo in *controller*: for as *ll* is a mark of the deep broad ſound of *a* in *ball*, *tall*, *all*, &c (84); ſo the ſame letters are the ſign of the long open ſound of *o* in *boll* (a round ſtalk of a plant), to *joll*, *noll* (the head), *knoll* (a little hill), *poll*, *clodpoll*, *roll*, *ſcroll*, *droll*, *troll*, *ſtroll*, *toll*: for which reaſon, leaving out one *l* in *bethral*, *catcal*, *miscal*, *overfal*, *forestal*, *reinstal*, *downfal*, *withal*, *control*, and *unrol*, as we find them in Johnſon's Dictionary, is an omiſſion of the utmoſt importance to the ſound of the words; for as the pronunciation ſometimes alters the ſpelling, ſo the ſpelling ſometimes alters the pronunciation.* Accordingly we find ſome ſpeakers, chiefly the natives of Ireland, inclined to give the *a* its middle ſound, to words commencing with *al*, followed by another conſonant, becauſe they do not ſee the *ll* in the *all* with which theſe words are compounded: thus we ſometimes hear *Almighty*, *albeit*, ſo pronounced as to make their firſt ſyllable rhyme with the firſt of *al-ley*, *val-ley*; and *extol* is pronounced by the Scotch ſo as to rhyme with *coal*; and with juſt as much reaſon as we pronounce *control* in the ſame manner. For though compounds may, in ſome caſes, be allowed to drop ſuch letters of their ſimples, as either are not neceſſary to the ſound, as in *Christmas*; or might poſſibly lead to a wrong one, as in *Reconcileable* (which ſee); yet where, by omitting a letter, the ſound may be altered, the omiſſion is pernicious and abſurd. (84.) The ſame obſervations might be extended to the numerous termination *full*, where, in compounds, one *l* is omitted, though nothing can be more certain, than that *ful*, with a ſingle *l*, has not the ſame ſound as when this letter is doubled; for who could ſuppoſe, without being

* This omiſſion of the letter *L*, I ſee, has been rectified in the laſt quarto edition of Johnſon's Dictionary; and it would have been well if the Editors had acknowledged their obligations and extended their emendations to the word *Codle*, and ſeveral others.

ing uſed to the abſurdity, that *fulfil* ſhould ſtand for *fullfill*: but this abbreviation is too inveterate and extenſive to afford any hope, that the great arbiters of orthography, the printers, will ever ſubmit to the additional trouble of putting another *l*.

M.

407. *M* preſerves its ſound in every word, except *comptroller; compt* and *accompt* are now univerſally written as they are pronounced *count* and *account*; and though *m* and *p* are preſerved to the eye in the officer called a *comptroller*, the word is pronounced exactly like the noun *controller*, one who controls.

N.

408. *N* has two ſounds; the one ſimple and pure, as in *man, net*, &c.; the other compounded and mixed, as in *hang, thank*, &c. The latter ſound is heard when it is followed by the ſharp or flat guttural mutes *g* hard, or *k*; or its repreſentatives *c* hard, *qu* or *x*: but it may be obſerved, that ſo prone is our language to the flat mutes, that when *n* is followed by *k*, or its repreſentatives, the flat mute *g* ſeems interpoſed between them: thus *thank, banquet, anxious*, are pronounced as if written, not *than-k ban-quet, an-xious*, but, *thangk, bangquet, angkshus*. But this coalition of the ſound of *n* and *g*, or hard *c*, is only when the accent is on them; for when the *g* or hard *c* articulates the accented ſyllable, the *n* becomes pure: thus, though *congress* and *congregate* are pronounced as if written *cong-gress* and *cong-gregate*, yet the firſt ſyllable of *congratulate*, and *congreſſive* ought to be pronounced without the ringing ſound of *n*, and exactly like the ſame ſyllable in *contrary*. The ſame difference may be obſerved in the words *concourſe* and *concur*; the firſt word, which has the accent on the firſt ſyllable, is pronounced as if written *cong-courſe*: and the laſt, which has the accent on the ſecond ſyllable, with *n* pure. It muſt, however, be carefully obſerved, that the ſecondary accent has the ſame power of melting the *n* into the ſucceeding hard *g* or *c* as the primary (522); thus *congregation* and *concremation* have the firſt ſyllable pronounced as if written *cong*.

409. It may, perhaps, be worthy of notice, that when *n* is followed by *k*, the *k* has a finiſhed or complete ſound, as in *link, think*, &c.; but when *n* is followed by hard *g*, the *g* has an unfiniſhed or imperfect ſound, as in *hang, bang*, &c. where we may obſerve the tongue to reſt upon the palate in the ſound of *g*; but when this letter is carried off to articulate another ſyllable, its ſound is completed, as in *anger* and *Bangor* (the name of a town), where the ſound of *g* may be perceived to be very different from the noun *hanger* (a ſword), and *banger* (one who beats or bangs). This perfect ſound of *g* is heard in all ſimples, as *anger, angle, finger, linger, conger, anguiſh, languiſh, diſtinguiſh, extinguiſh, unguent*: but in words derived from verbs or adjectives, ending in *ng*, the *g* continues imperfect, as it was in the theme. Thus a *ſinger* (one who ſings), does not finiſh the *g* like *finger*, but is merely *er* added to *ſing*: the ſame may be obſerved of *ſing-ing, bring-ing*, and *hang-ing*. So adjectives formed by the addition of *y* have the imperfect ſound of *g*, as in the original word: thus *ſpringy, ſtringy, dungy*, and *wingy*, are only the ſound of *e* added to *ſpring, ſtring, dung*, and *wing*; but the comparative and ſuperlative adjectives, *longer, ſtronger*, and *younger*; *longeſt, ſtrongeſt*, and *youngeſt*; have the *g* hard and perfectly ſounded, as if written *long-ger, ſtrong-ger, young-ger*, &c. where the *g* is hard, as in *fin-ger, lin-ger*, &c. And it may be looked upon as a general rule, that nouns, adjectives,

adjectives, or verbs, do not alter their original ſound upon taking an additional ſyllable. In theſe three words, therefore, the Iriſh pronounce more agreeably to analogy than the Engliſh; for, if I miſtake not, they do not articulate the *g* (381).

410. Hitherto we have conſidered theſe letters as they are heard under the accent; but when they are unaccented in the participial termination *ing*, they are frequently a cauſe of embarraſſment to ſpeakers who deſire to pronounce correctly. We are told, even by teachers of Engliſh, that *ing*, in the word *singing*, *bringing*, and *swinging*, muſt be pronounced with the ringing ſound, which is heard when the accent is on theſe letters, in *king*, *sing* and *wing*, and not as if written without the *g* as *singin*, *bringin*, *swingin*. No one can be a greater advocate than I am for the ſtricteſt adherence to orthography, as long as the public pronunciation pays the leaſt attention to it; but when I find letters given up by the Publick, with reſpect to ſound, I then conſider them as cyphers; and, if my obſervation does not greatly fail me, I can aſſert, that our beſt ſpeakers do not invariably pronounce the participial *ing*, ſo as to rhyme with *sing*, *king*, and *ring*. Indeed, a very obvious exception ſeems to offer itſelf in thoſe verbs that end in theſe letters, as a repetition of the ringing ſound in ſucceſſive ſyllables would produce a *Tautophony*, (ſee the word,) and have a very bad effect on the ear; and therefore, inſtead of *singing*, *bringing*, and *flinging*, our beſt ſpeakers are heard to pronounce *sing-in*, *bring-in*, and *fling-in*; and for the very ſame reaſon that we exclude the ringing ſound in theſe words, we ought to admit it when the verb ends with *in*; for if, inſtead of *sinning*, *pinning*, and *beginning*, we ſhould pronounce *sin-nin*, *pin-nin*, and *begin-nin*, we ſhould fall into the ſame diſguſting repetition as in the former caſe. The participial *ing*, therefore, ought always to have its ringing ſound, except in thoſe words formed from verbs in this termination; for *writing*, *reading*, and *speaking*, are certainly preferable to *writin*, *readin*, and *speakin*, wherever the pronunciation has the leaſt degree of preciſion or ſolemnity.

411. *N* is mute when it ends a ſyllable, and is preceded by *l* or *m*, as *kiln*, *hymn*, *limn*, *solemn*, *column*, *autumn*, *condemn*, *contemn*. In *hym ning*, and *lim-ning*, the *n* is generally pronounced, and ſometimes, in very ſolemn ſpeaking, in *condem-ning* and *contem ning*; but, in both caſes, contrary to analogy, which forbids any ſound in the participle that was not in the verb (381).

P.

412. This letter is mute before *s* and *t* at the beginning of words, *psalm*, *psalmist*, *psalmody*, *psalmography*, *psalter*, *psaltry*; the prefix *pseudo*, ſignifying falſe, as *pseudography*, *pseudology*, and the interjection *pshaw!* To theſe we may add, *ptisan*, *ptyalism*, *ptysmagogue*. It is mute in the middle of words between *m* and *t*, in *empty*, *sempstress*, *peremptory*, *sumptuous*, *presumptuous*, *redemption*, *exemption*, and *raspberry*. In *cupboard* it coaleſces with and falls into its flat ſound *b*, as if written *cubboard*. It is mute in a final ſyllable between the ſame letters, as *tempt*, *attempt*, *contempt*. *exempt*, *prompt*, *accompt*. In *receipt* it is mute between *i* and *t*, and in the military *corps* (a body of troops), both *p* and *s* are mute, as cuſtom has acquieſced in the French pronunciation of moſt military terms.

PH.

413. *Ph* is generally pronounced like *f*, as in *philosophy*, *phantom*, &c. In *nephew* and *Stephen* it has the ſound of *v*. In *diphthong* and *triphthong* the ſound of

Digitized from Best Copy Available

f *p* only is heard; and the *h* is mute likewiſe in *naphtha*, *ophthalmick*, &c. In *pophthegm* both letters are dropped. The ſame may be obſerved of *phthiſis*, *hthiſic*, and *phthiſical*. In *ſapphire* the firſt *p* ſlides into *ph*, by an accentual oalition of ſimilar letters, very agreeable to analogy. See EXAGGERATE.

Q.

414. *Q* has always the ſound of *k*: it is conſtantly followed by *u*, pronounced like *w*; and its general ſound is heard in *quack*, *quill*, *queen*, &c. pronounced *wack*, *kwill*, *kween*, &c. That the *u* ſubjoined to this letter has really the power f *w*, may be obſerved in the generality of words where *a* ſucceeds; for we nd the vowel go into the broad ſound in *quart*, *quarrel*, *quantity*, &c. as much s in *war*, *warrant*, *want*, &c. (85.) But it muſt be carefully noted, that this road ſound is only heard under the accent; when the *a*, preceded by *qu*, is not ccented, it has the ſound of every other accented *a* in the language. (92.) Thus the *a* in *quarter*, *quarrel*, *quadrant*, &c. becauſe it has the accent, is broad: he ſame may be obſerved when the accent is ſecondary only (522) (527), as n *quadrogeſimal*, *quadriſyllable*, &c.; but when the accent is on the ſucceeding yllable, as in *qua-dratick*, *qua-drangular*, &c. the *a* goes into the obſcure ſound pproaching to the Italian *a* (92).

415. As a great number of words, derived from the French, have theſe letters in them, according to our uſual complaiſance for that language, we adopt he French pronunciation: thus in *coquet*, *doquet*, *etiquette*, *masquerade*, *harlequin*, *blique*, *antique*, *opaque*, *pique*, *piquant*, *piquet*, *burleſque*, *groteſque*, *caſque*, *moſque*, *uadrille*, *quater-couſin*, the *qu* is pronounced like *k*. *Quoif* and *quoit* ought to e written and pronounced *coif*, *coit*. *Paquet*, *laquey*, *chequer*, and *riſque*, have een very properly ſpelled by Johnſon as they are pronounced *packet*, *lackey*, *hecker*, and *riſk*. *Quoth* ought to be pronounced with the *u*, as if written *wuth*, and therefore is not irregular. *Liquor* and *harlequin* always loſe the *u*; nd *conquer*, *conquerable*, and *conqueror*, ſometimes, particularly on the Stage. This deviation, however, ſeems not to have gone beyond recovery; and *conqueſt* s ſtill regularly pronounced *conkweſt*. *Quote* and *quotation* are perfectly regular, and ought never to be pronounced as ſome do, *cote* and *cotation*. *Cirque*, contracted from *circus*, and *cinque*, *cinque-foil*, *cinque-ports*, *cinque-ſpotted*, are pronounced *ſirk* and *ſink*; and *critique*, when we mean a criticiſm, to diſtinguiſh it rom *critick*, is pronounced *criteek*, rhyming with *ſpeak*. See QUOIT and QUOTATION.

R.

416. This letter is never ſilent, but its ſound is ſometimes tranſpoſed. In a inal unaccented ſyllable, terminating with *re*, the *r* is pronounced after the *e*, s *acre*, *lucre*, *ſabre*, *fibre*, *ochre*, *eagre*, *maugre*, *ſepulchre*, *theatre*, *ſpectre*, *metre*, etre, *mitre*, *nitre*, *antre*, *luſtre*, *accoutre*, *maſſacre*; to which we may add, *centre* nd *ſceptre*; ſometimes written *center* and *ſcepter*; but, in my opinion, very mproperly, as this peculiarity is fixed, and eaſily underſtood; while reducing *neagre* to *meager* diſturbs the rule, and adds another anomaly to our pronunciation, by making the *g* hard before *e* (98).

417. The ſame tranſpoſition of *r* is always perceived in the pronunciation of *pron* and *iron*; and often in that of *citron* and *ſaffron*, as if written *apurn*, *iurn*, *iturn*, *ſaffurn*: nor do I think the two firſt can be pronounced otherwiſe without a diſagreeable ſtiffneſs: but the two laſt may preſerve the *r* before the vowel

Digitized from Best Copy Available

with great propriety. *Children* and *hundred* have ſlid into this analogy, when uſed colloquially, but preſerve the *r* before the *e* in ſolemn ſpeaking.

418. As this letter is but a jar of the tongue, ſometimes againſt the roof of the mouth, and ſometimes at the orifice of the throat, it is the moſt imperfect of all the conſonants; and, as its formation is ſo indefinite, no wonder, when it is not under the accent, that the vowels which precede it ſhould be ſo indefinite in their ſounds, as we may perceive in the words *friar, lier, elixir, nadir, mayor, martyr*, which, with reſpect to ſound, might be written *friur, liur, elixur, nadur, mayur, martur*. (98.) Theſe inaccuracies in pronunciation, ſays an ingenious writer, 'we ſeem to have derived from our Saxon anceſtors. Dr. Hicks obſerves in the firſt chapter of his Saxon Grammar, that "Comparativa apud "eos (Anglo-ſaxonas) indifferenter exeunt in *ar, ær, er, ir, or, ur, yr*; et Su- "perlativa in *ast, æst, est, ist, ost, ust, yst*; participia præſentis temporis in *and*, "*ænd, end, ind, ond, und, ynd*; præteriti verò in *ad, æd, id, od, ud, yd*; pro vario "ſcilicet vel ævi vel loci dialecto." 'Upon various other occaſions alſo they 'uſed two or more vowels and diphthongs indifferently; and this not always 'from difference of age or place, becauſe theſe variations are frequently found 'in the ſame page. This will account for the difference between the ſpelling 'and pronunciation of ſuch anomalous words as *busy* and *bury*, now pronounced 'as if written *bisy* and *bery*, (the *i* and *e* having their common ſhort ſound,) and 'formerly ſpelt indifferently with *e, u*, or *y*.' *Eſſay on the Harmony of Language*. Robſon, 1774.

419. There is a diſtinction in the ſound of this letter, ſcarcely ever noticed by any of our writers on the ſubject, which is, in my opinion, of no ſmall importance; and that is, the rough and ſmooth *r*. Ben Jonſon, in his Grammar, ſays it is ſounded firm in the beginning of words, and more liquid in the middle and ends, as in *rarer, riper*; and ſo in the Latin. The rough *r* is formed by jarring the tip of the tongue againſt the roof of the mouth near the fore teeth: the ſmooth *r* is a vibration of the lower part of the tongue, near the root, againſt the inward region of the palate, near the entrance of the throat. This latter *r* is that which marks the pronunciation of England, and the former that of Ireland. In England, and particularly in London, the *r* in *lard, bard, card, regard*, &c. is pronounced ſo much in the throat as to be little more than the middle or Italian *a*, lengthened into *laad, baad, caad, regaad*; while in Ireland the *r*, in theſe words, is pronounced with ſo ſtrong a jar of the tongue againſt the fore-part of the palate, and accompanied with ſuch an aſpiration or ſtrong breathing at the beginning of the letter, as to produce that harſhneſs we call the Iriſh accent. But if this letter is too forcibly pronounced in Ireland, it is often too feebly ſounded in England, and particularly in London, where it is ſometimes entirely ſunk; and it may, perhaps, be worthy of obſervation, that, provided we avoid a too forcible pronunciation of the *r*, when it ends a word, or is followed by a conſonant in the ſame ſyllable, we may give as much force as we pleaſe to this letter at the beginning of a word, without producing any harſhneſs to the ear: thus *Rome, river, rage*, may have the *r* as forcible as in Ireland; but *bar, bard, card, hard*, &c. muſt have it nearly as ſoft as in London.

S.

420. As the former letter was a jar, this is a hiſs; but a hiſs which forms a much more definite and complete conſonant than the other. This conſonant, like the other mutes, has a ſharp and a flat ſound; the ſharp ſound is heard in the name of the letter, and in the words, *same, sin, this*; the flat ſound is that of

Digitized from Best Copy Available

of *z*, heard in *is*, *his*, *was*: and theſe two ſounds, accompanied by the aſpirate, or *h*, form all the varieties found under this letter (41).

421. *S* has always its ſharp hiſſing ſound at the beginning of words, as *soon*, *sin*, &c. and when it immediately follows any of the ſharp mutes, *f*, *k*, *p*, *t*, as *scoffs blocks*, *hips*, *pits*, or when it is added to the mute *e* after any of theſe letters, as *strifes*, *flakes*, *pipes*, *mites*.

422. *S* is ſharp and hiſſing at the end of the monoſyllables *yes*, *this*, *us*, *thus*, *gas*; and at the end of words of two or more ſyllables, if it be preceded by any of the vowels but *e*, and forms a diſtinct ſyllable: thus *es* in *pipes* and *mites* do not form a diſtinct ſyllable; and as they are preceded by a ſharp mute, the *s* is ſharp likewiſe: but in *prices* theſe letters form a ſyllable, and the *s* is pronounced like *z*, according to the general rule.

423. The only exception to this rule is, the words *as*, *whereas*, *has*, *his*, *was*; for *bias*, *dowlas*, *Atlas*, *metropolis*, *basis*, *chaos*, *tripos*, *pus*, *chorus*, *cyprus*, &c. have the final *s* pronounced ſharp and hiſſing.

424. Agreeably to this rule, the numerous terminations in *ous*, as *pious*, *superfluous*, &c. have the *s* ſharp, and are pronounced exactly like the pronoun *us*; and every double *s* in the language is pronounced in the ſame manner, except in the words *dissolve*, *possess*, and their compounds; *scissars*, *hussy*, and *hussar*.

425. *S* in the inſeparable prepoſition *dis*, when either the primary or ſecondary accent is on it (522), is always pronounced ſharp and hiſſing: the word *dismal*, which ſeems to be an exception, is not ſo in reality; for, in this word, *dis* is not a prepoſition: thus *dissolute*, *dissonant*, &c. with the primary accent on *dis*; and *disability*, *disagree*, &c. with the ſecondary accent on the ſame letters, have the *s* ſharp and hiſſing; but when the accent is on the ſecond ſyllable, the *s* is either ſharp or flat, as it is followed either by a vowel, or a ſharp or flat conſonant: thus *disable*, *disaster*, *disease*, *disinterested*, *dishonest*, *disorder*, *disuse*, have all of them the *s* in *dis* flat like *z*, becauſe the accent is not on it, and a vowel begins the next ſyllable; but *discredit*, *disfavour*, *diskindness*, *dispense*, *distaste*, have the *s* ſharp and hiſſing, becauſe a ſharp conſonant begins the ſucceeding accented ſyllable; and *disband*, *disdain*, *disgrace*, *disjoin*, *disvalue*, have the *s* flat like *z*, becauſe they are ſucceeded by a flat conſonant in the ſame ſituation (435).

426. *S* in the inſeparable prepoſition *mis* is always ſharp and hiſſing, whether the accent be on it or not; or whether it be followed either by a vowel, or a ſharp or flat conſonant, as *miscreant*, *misaim*, *misapply*, *misorder*, *misuse*, *misbegot*, *misdeem*, *misgovern*, &c. See the prefix Miss.

427. *S*, followed by *e* in the final ſyllable of adjectives, is always ſharp and hiſſing, as *base*, *obese*, *precise*, *concise*, *globose*, *verbose*, *morbose*, *pulicose*, *tenebricose*, *corticose*, *jocose*, *oleose*, *rugose*, *desidiose*, *close*, *siliculose*, *calculose*, *tumulose*, *animose*, *venenose*, *arenose*, *siliginose*, *crinose*, *loose*, *operose*, *morose*, *edematose*, *comatose*, *acetose*, *aquose*, *siliquose*, *actuose*, *diffuse*, *profuse*, *occluse*, *recluse*, *abstruse*, *obtuse*, except *wise* and *otherguise*, and the pronominal adjectives *these* and *those*.

428. *S*, in the adjective termination *sive*, is always ſharp and hiſſing, as *suasive*, *persuasive*, *assuasive*, *dissuasive*, *adhesive*, *cohesive*, *decisive*, *precisive*, *incisive*, *derisive*, *cicatrisive*, *visive*, *plausive*, *abusive*, *diffusive*, *infusive*, *inclusive*, *conclusive*, *exclusive*, *elusive*, *delusive*, *prelusive*, *allusive*, *illusive*, *collusive*, *amusive*, *obtrusive*, &c.

429. *S*, in the adjectives ending in *sory*, is always ſharp and hiſſing, as *suasory*, *persuasory*, *decisory*, *derisory*, *delusory*, &c.

430. The ſame may be obſerved of *s* in the adjectives ending in *some*, as *troublesome*, &c. and ſubſtantives in *osity*, *generosity*, &c.

431. *Se*, preceded by the liquids *l*, *n*, or *r*, has the *s* ſharp and hiſſing, as *pulse*, *appulse*, *denſe*, *tenſe*, *intenſe*, *ſenſe*, *verſe*, *adverſe*, &c. except *cleanſe*.

S *pronounced like* z.

432. *S* has always its flat buzzing ſound, as it may be called, when it immediately follows any of the flat mutes *b*, *d*, *g* hard, or *v*, as *ribs*, *heads*, *rags*, *ſieves* (24).

433. *S* is pronounced like *z*, when it forms an additional ſyllable with *e* before it, in the plurals of nouns, and the third perſon ſingular of verbs; even though the ſingulars and firſt perſons end in ſharp hiſſing ſounds, as *aſſes*, *riches*, *cages*, *boxes*, &c.: thus *prices* and *prizes* have both the final *s* flat, though the preceding mute in the firſt word is ſharp (422).

434. As *s* is hiſſing, when preceded by a liquid, and followed by *e* mute, as *tranſe*, *tenſe*, &c.; ſo when it follows any of the liquids without the *e*, it is pronounced like *z*, as *morals*, *means*, *ſeems*, *hers*. In the ſame analogy, when *s* comes before any of the liquids, it has the ſound of *z*, as *cosmetic*, *diſmal*, *piſmire*, *chaſm*, *priſm*, *theiſm*, *ſchiſm*, and all polyſyllables ending in *aſm*, *iſm*, *oſm*, or *yſm*, as *enthuſiaſm*, *judaiſm*, *microcoſm*, *paroxyſm*, &c.

435. *S*, in the prepoſition *dis*, is either ſharp or flat, as it is accented or unaccented, as explained above; but it ought always to be pronounced like *z*, when it is not under the accent, and is followed by a flat mute, a liquid, or a vowel, as *diſable*, *diſeaſe*, *diſorder*, *diſuſe*, *diſband*, *diſdain*, *diſgrace*, *diſvalue*, *diſjoin*, *diſlike*, *diſlodge*, *diſmay*, *diſmember*, *diſmount*, *diſmiſs*, *diſnatured*, *diſrank*, *diſreliſh*, *diſrobe* (425). Mr. Sheridan, and thoſe orthöepiſts who have copied him, ſeems to have totally overlooked this tendency in the liquids to convert the *s* to *z* when this letter ends the firſt ſyllable without the accent, and the liquids begin the ſecond ſyllable with it.

436. *S* is pronounced like *z*, in the monoſyllables *as*, *is*, *his*, *was*, *theſe*, *thoſe*, and in all plurals whoſe ſingulars end in a vowel, or a vowel followed by *e* mute, as *commas*, *operas*, *ſhoes*, *aloes*, *dues*, and conſequently when it follows the *w* or *y*, in the plurals of nouns, or the third perſon ſingular of verbs, as *ways*, *betrays*, *news*, *views*, &c.

437. Some verbs ending in *ſe* have the *s* like *z*, to diſtinguiſh them from nouns or adjectives of the ſame form.

438. *Sy* and *ſey*, at the end of words, have the *s* pronounced like *z*, if it has a vowel before it, with the accent on it, as *eaſy*, *greaſy*, *queaſy*, *cheeſy*, *daiſy*, *miſy*, *roſy*, *cauſy*, *noiſy*; but if the accent is on the antepenultimate ſyllable, the *s* is ſharp, as *hereſy*, *poeſy*, &c.; if a ſharp mute precede, the *s* is ſharp, as *tricksy*, *tipſy*; if a liquid precede, and the accent is on the penultimate ſyllable, the *s* is flat as *palſy*, *flimſy*, *clumſy*, *panſy*, *tanſy*, *phrenſy*, *quinſy*, *tolſey*, *whimſey*, *malmſey*, *jerſey*, *kerſey*. *Purſey* has the *s* ſharp and hiſſing from its relation to *purſe*, and *minſtrelſey* and *controverſy* have the antepenultimate and preantepenultimate accent

accent: thus we ſee why *busy*, *bousy*, *lousy*, and *drowsy*, have the *s* like *z*, and *jealousy* the ſharp hiſſing *s*.

439. *S*, in the termination *sible*, when preceded by a vowel, is pronounced like *z*, as *persuasible*, *risible*, *visible*, *divisible*, *infusible*, *conclusible*; but if a liquid conſonant precede the *s*, the *s* then becomes ſharp and hiſſing, as *sensible*, *responsible*, *tensible*, *reversible*, &c.

440. *S*, in the terminations *sary* and *sory*, is ſharp and hiſſing, as *dispensary*, *adversary*, *suasory*, *persuasory*, *decisory*, *incisory*, *derisory*, *depulsory*, *compulsory*, *incensory*, *compensory*, *suspensory*, *sensory*, *responsory*, *cursory*, *discursory*, *lusory*, *elusory*, *delusory*, *illusory*, *collusory*. *Rosary* and *misery*, which have the *s* like *z*, are the only exceptions.

441. *S*, in the termination *ise*, is pronounced like *z*, except in the adjectives before mentioned, and a few ſubſtantives, ſuch as *paradise*, *anise*, *rise*, *grise*, *verdigrise*, *mortise*, *travise*.

442. *S*, in the terminations *sal* and *sel*, when preceded by a vowel, is pronounced like *z*, as *nasal*, *ousel*, *housel*, *nousal*, *reprisal*, *proposal*, *refusal*, and ſharp and hiſſing when preceded by a conſonant, as *mensal*, *universal*, &c.

443. *S*, in the termination *son*, *sen*, and *sin*, is pronounced like *z*, as *reason*, *season*, *treason*, *cargason*, *diapason*, *orison*, *benison*, *venison*, *denison*, *foison*, *poison*, *prison*, *damson*, *crimson*, *chosen*, *resin*, *rosin*, *raisin*, *cousin*. But the *s* in *mason*, *bason*, *garrison*, *caparison*, *comparison*, *parson*, and *person*, is ſharp and hiſſing (170).

444. *S*, after the inſeparable prepoſitions *pre* and *pro*, is ſharp, as in *presage*, *preside*, *presidial*, *presuance*, *presension*, *prosecute*, *prosecution*, *prosody* *prosopopeia*, but flat like *z* in *presence*, *president*, *presidency*, *presume*, *presumptive*, *presumption*; but where the *pre* is prefixed to a word, which is ſignificant when alone, the *s* is always ſharp, as *pre suppose*, *pre surmise*, &c.

445. *S*, after the inſeparable prepoſition *re*, is almoſt always pronounced like *z*, as *resemble*, *resent*, *resentment*, *reserve*, *reservation*, *reservoir*, *residue*, *resident*, *residentiary*, *reside*, *resign*, *resignment*, *resignation*, *resilience*, *resiliency*, *resilition*, *resin*, *resist*, *resistance*, *resolve*, *resolution*, *resolute*, *result*, *resume*, *resumption*, *resurrection*.

446. *S* is ſharp after *re* in *resuscitation*, *resupination*, &c. and when the word added to it is ſignificant by itſelf, as *research*, *reseige*, *reseat*, *resurvey*. Thus to *resign*, with the *s* like *z*, ſignifies to yield up; but to *re-sign*, to ſign again, has the *s* ſharp, as in *sign*: ſo to *resound*, to reverberate, has the *s* like *z*; but to *re-sound*, to ſound again, has the *s* ſharp and hiſſing.

447. Thus we ſee, after purſuing this letter through all its combinations, how difficult it often is to decide by analogy, when we are to pronounce it ſharp and hiſſing, and when flat like *z*. In many caſes it is of no great importance: in others it is the diſtinctive mark of a vulgar or a polite pronunciation. Thus *design* is never heard with the *s* like *z* but among the loweſt order of the people; and yet there is not the leaſt reaſon from analogy why we ſhould not pronounce it in this manner, as well as in *resign*: the ſame may be obſerved of *preside* and *desist*, which have the *s* ſharp and hiſſing; and *reside* and *resist*, where the ſame letter is pronounced like *z*. It may, however, be remarked, that *re* has the *s* like *z* after it more regularly than any other of the prefixes.

448. It may, perhaps, be worthy of obſervation, that though *s* becomes ſharp or flat, as it is followed by a ſharp or flat conſonant, or a liquid, as *cosmetic*, *dismal*, *disband*, *disturb*, &c. yet if it follows a liquid or a flat conſonant, except in the ſame ſyllable, it is generally ſharp. Thus the *s* in *tubs*, *suds*, &c. is like *z*; but in *subserve*, *subside*, *subsist*, it is ſharp and hiſſing: and though it is flat in *absolve*, it is ſharp in *absolute* and *absolution*; but if a ſharp conſonant

conſonant precede, the *s* is always ſharp and hiſſing, as *tipsy*, *tricksy*: thus in the pronunciation of the word *Glasgow*, as the *s* is always ſharp and hiſſing, we find the *g* invariably ſlide into its ſharp ſound *k*; and this word is always heard as if written *Glaskow*. We ſee, therefore, that a preceding ſharp conſonant makes the ſucceeding *s* ſharp, but not inverſely.

449. *S* is always ſharp and hiſſing when followed by *c*, except in the word *discern*.

S *aspirated, or sounding like* ſh, *or* zh.

450. *S*, like its fellow dental *t*, becomes aſpirated, and goes either into the ſharp ſound *sh*, or the flat ſound *zh*, when the accent is on the preceding vowel, and it is followed by a ſemi-conſonant diphthong, as *nauseate*, or a diphthongal vowel, as *pleasure*, pronounced *nausheate* and *plezhure* (195).

451. *S*, in the termination *sion*, preceded by a vowel, goes into the flat aſpiration *zh*, as *evasion*, *cohesion*, *decision*, *confusion*, pronounced *evazhion*, &c.; but when it is preceded by a liquid or another *s*, it has the ſharp aſpiration *sh*, as *expulsion*, *dimension*, *reversion*, pronounced *expulshion*, &c.

452. The ſame may be obſerved of *s* before *u*; when a vowel precedes the *s*, with the accent on it, the *s* goes into the flat aſpiration, as *pleasure*, *measure*, *treasure*, *rasure*, pronounced *plezhure*, &c.; but when preceded by a liquid, or another *s*, it is ſounded *sh*, as *sensual*, *censure*, *tonsure*, *pressure*, pronounced *senshual*, *censhure*, &c.

453 From the clearneſs of this analogy, we may perceive the impropriety of pronouncing *Asia* with the ſharp aſpiration, as if written *Ashia*; when, by the foregoing rule, it ought undoubtedly to be pronounced *Azhia*, rhyming with *Aspasia*, *euthanasia*, &c. with the flat aſpiration of *z*. This is the Scotch pronunciation of this word, and unqueſtionably the true one: but if I miſtake not, *Persia* is pronounced in Scotland with the ſame aſpiration of *s*, and as if written *Perzhia*; which is as contrary to analogy as the other is agreeable to it.

454 The tendency of the *s* to aſpiration before a diphthongal ſound has produced ſeveral anomalies in the language, which can only be detected by recurring to firſt principles: for which purpoſe it may be neceſſary to obſerve, that the accent or ſtreſs naturally preſerves the letters in their true ſound; and as feebleneſs naturally ſucceeds force, ſo the letters, immediately after the ſtreſs, have a tendency to ſlide into different ſounds, which require leſs exertion of the organs. Hence the omiſſion of one of the vowels in the pronunciation of the laſt ſyllable of *fountain*, *mountain*, *captain*, &c. (208): hence the ſhort ſound of *i* in *respite*, *servile*, &c.; hence the *s* pronounced like *z* in *disable*, where the accent is on the ſecond ſyllable; and like *s* ſharp and hiſſing in *disability*, where there is a ſecondary ſtreſs on the firſt ſyllable; and hence the difference between the *x* in *exercise*, and that in *exert*; the former having the accent on it, being pronounced *cks*, as if the word were written *ecksercise*; and the latter without the accent, pronounced *gz*, as if the word were written *egzert*. This analogy leads us immediately to diſcover the irregularity of *sure*, *sugar*, and their compounds, which are pronounced *shure* and *shugar*, though the accent is on the firſt ſyllable, and ought to preſerve the *s* without aſpiration; and a want of attending to this analogy has betrayed Mr. Sheridan into a ſeries of miſtakes in the ſound of *s* in the words *suicide*, *presume*, *resume*, &c. as if written *shcoicide*, *pre-zhoom*, *re-zhoom*, &c.: but if this is the true pronunciation of theſe words, it may be aſked, why is not *suit*, *suitable*,

able, pursue, &c. to be pronounced *shoot, shoot-able, pur-shoo?* &c. If it be answered, Cuſtom; I own this decides the queſtion at once. Let us only be aſſured, that the beſt ſpeakers pronounce *a* like *o*, and that is the true pronunciation: but thoſe who ſee analogy ſo openly violated, ought to be aſſured of the certainty of the cuſtom before they break through all the laws of language to conform to it (69) (71). See SUPERABLE.

455. We have ſeen, in a great variety of inſtances, the verſatility of *s*, how frequently it ſlides into the ſound of *z*: but my obſervation greatly fails me if it ever takes the aſpiration, unleſs it immediately follows the accent, except in the words *sure, sugar*, and their compounds; and theſe irregularities are ſufficient, without adding to the numerous catalogue we have already ſeen under this letter.

456. The analogy we have juſt been obſerving directs us in the pronunciation of *usury, usurer*, and *usurious*. The two firſt have the accent on the firſt ſyllable, which permits the *s* to go into aſpiration, as if the words were written *uzhury* and *uzhurer*: but the accent being on the ſecond *u* in the laſt word, the *s* is prevented from going into aſpiration, and is pronounced *uzurious* (479) (480).

457. Though the *ss* in *passion, mission*, &c. belong to ſeparate ſyllables, as if ſpelt *pas-sion, mis-sion*, &c. yet the accent preſſes the firſt into the ſame aſpiration as the laſt, and they are both pronounced with the ſharp aſpirated *hiss*, as if they were but one *s*. See EXAGGERATE.

458. *S* is ſilent in *isle, island, aisle, demesne, puisne, viscount*, and at the end of ſome words from the French, as *pas, sous, vis-à-vis*; and in *corps* the two laſt letters are ſilent, and the word pronounced *core* (412).

T.

459. *T* is the ſharp ſound of *D* (41); but though the latter is often changed into the former, the former never goes into the latter. The ſound to which this letter is extremely prone is that of *s*. This ſound of the *t* has greatly multiplied the hiſſing in our own language, and has not a little promoted it in moſt modern tongues. That *p* and *b*, *t* and *d*, *k* and *g* hard, *s* and *z*, ſhould ſlide into each other, is not ſurpriſing, as they are diſtinguiſhed only by a nice ſhade of ſound; but that *t* ſhould alter to *s* ſeems a moſt violent tranſition, till we conſider the organic formation of theſe letters, and of thoſe vowels which always occaſion it. If we attend to the formation of *t*, we ſhall find that it is a ſtoppage of the breath by the application of the upper part of the tongue near the end, to the correſpondent part of the palate; and that if we juſt detach the tongue from the palate, ſufficiently to let the breath paſs, a hiſs is produced which forms the letter *s*. Now the vowel that occaſions this tranſition of *t* to *s* is the ſqueezed ſound of *e*, as heard in *y* conſonant (8): which ſqueezed ſound is a ſpecies of hiſs; and this hiſs, from the abſence of accent, eaſily ſlides into the *s*, and *s* as eaſily into *sh*: thus *mechanically* is generated that hiſſing termination *tion*, which forms but one ſyllable, as if written *shun* (195).

460. But it muſt be carefully remarked, that this hiſſing ſound, contracted by the *t* before certain diphthongs, is never heard but after the accent: when the accent falls on the vowel immediately after the *t*, this letter, like *s* or *c* in the ſame ſituation, preſerves its ſimple ſound: thus the *c* in *social* goes into *sh*, becauſe the accent is on the preceding vowel; but it preſerves the ſimple ſound of *s* in *society*, becauſe the accent is the ſucceeding vowel. The ſame analogy is obvious

obvious in *satiate* and *satiety;* and is perfectly agreeable to that difference made by accent in the ſound of other letters (71). See SATIETY.

461. As the diphthongs *ia, ie, io,* or *iu,* when coming after the accent, have the power of drawing the *t* into *ſh,* ſo the diphthongal vowel *u,* in the ſame ſituation, has a ſimilar power. If we analyſe the *u,* we ſhall find it commence with the ſqueezed ſound of *e,* equivalent to the conſonant *y* (39). This letter produces the ſmall hiſs before taken notice of (459), and which may be obſerved in the pronunciation of *nature,* and borders ſo cloſely on *nat:hur,* that it is no wonder Mr. Sheridan adopted this latter mode of ſpelling the word to expreſs its ſound. The only fault of Mr. Sheridan in depicting the ſound of this word, ſeems to be that of making the *u* ſhort, as in *bur, cur,* &c. a, every correct ear muſt perceive an elegance in lengthening the ſound of the *u,* and a vulgarity in ſhortening it. The true pronunciation ſeems to lie between both.

462. But Mr. Sheridan's greateſt fault ſeems to lie in not attending to the nature and influence of the accent: and becauſe *nature, creature, feature, fortune, misfortune,* &c. have the *t* pronounced like *ch,* or *tſh,* as if written *nea-chure, fea-tſhure,* &c. he has extended this change of *t* into *tch* or *tſh,* to the word *tune,* and its compounds, *tutor, tutoreſs, tutorage, tutelage, tutelar, tutelary,* &c. *tumult, tumour,* &c. which he ſpells *tſhoon, tſhoon-eble,* &c. *tſhoo-tur, tſhoo-triſs, tſhoo-tur-idzh, tſhoo-tel-idzh, tſhoo-tel-er, tſhoo-tel-er-y,* &c. *tſhoo-mult, tſhoo-mur,* &c. Though it is evident, from the foregoing obſervations, that as the *u* is under the accent, the preceding *t* is preſerved pure, and that the words ought to be pronounced as if written *tewtor, tewmult, tewmour,* &c. and neither *tſhootur, tſhoomult, tſhoomour,* as Mr. Sheridan writes them, nor *tootor, toomult, toomour,* as they are often pronounced by vulgar ſpeakers. See SUPERABLE.

463. Here, then, the line is drawn by analogy. Whenever *t* comes before theſe vowels, and the accent immediately follows it, the *t* preſerves its ſimple ſound, as in *Miltiades, elephantiaſis, ſatiety,* &c.; but when the accent precedes the *i,* it then goes into *ſh, tch,* or *tſh.* as *natſhure* or *natchure, na-ſhion, vir-tſhue* or *vir-tchue, patient,* &c. or *naſhion, paſhent,* &c. (464). In ſimilar circumſtances, the ſame may be obſerved of *d,* as *arduous, hideous,* &c. (293) (294) (376). Nor is this tendency of *t* before long *u* found only when the accent immediately precedes; for we hear the ſame aſpiration of this letter in *ſpiritual, ſpirituous, ſignature, ligature, forfeiture,* as if written *ſpiritſhual, ſpiritſhuous, ſignatſhure, ligatſhure, forfeitſhure,* &c. where the accent is two ſyllables before theſe letters; and the only termination which ſeems to refuſe this tendency of the *t* to aſpiration is that in *tude,* as *latitude, longitude, multitude,* &c.

464. This pronunciation of *t* extends to every word where the diphthong or diphthongal ſound commences with *i* or *e,* except in the terminations of verbs and adjectives, which preſerve the ſimple in the augment, without ſuffering the *t* to go into the hiſſing ſound, as *I pity, thou pitieſt, he pities, or pitied, mightier, worthier, twentieth, thirtieth,* &c. This is agreeable to the general rule, which forbids the adjectives or verbal terminations to alter the ſound of the primitive verb or noun. See No. 381. But in the words *beſtial, celeſtial, frontier, admixtion,* &c. where the *ſ, x* or *n* precedes the *t,* this letter is pronounced like *tch* or *tſh,* inſtead of *ſh* (291), as *beſ-tchial, celeſ-tchial, fron-tcheer, admix-tchion,* &c.; as alſo when the *t* is followed by *eou,* whatever letter precede, as *righteous, piteous, plenteous,* &c. pronounced *righ-tcheous, pit-cheous, plen-tcheous,* &c. The ſame may be obſerved of *t* when ſucceeded by *uou,* as *unctuous, preſumptuous,* &c. pronounced *ung-tchuous, preſump-tchuous,* &c. See the words.

TH.

465. This liſping ſound, as it may be called, is almoſt peculiar to the Engliſh (41) (50) (469). The Greek Θ was certainly not the ſound we give it: like its principal letter, it has a ſharp and a flat ſound; but theſe are ſo little ſubject to rule, that a catalogue will, perhaps, be the beſt guide.

466. *Th*, at the beginning of words, is ſharp, as in *thank*, *think*, &c. except in the following words: *This*, *that*, *than*, *the*, *thee*, *their*, *them*, *then*, *thence*, *there*, *theſe*, *they*, *thine*, *thither*, *thoſe*, *thou*, *though*, *thus*, *thy*, and their compounds.

467. *Th*, at the end of words, is ſharp, as *death*, *breath*, &c. except in *beneath*, *booth*, *with*; and the verbs to *wreath*, to *loath*, to *uncloath*, to *ſeeth*, to *ſmooth*, to *ſooth*, to *mouth*: all which ought to be written with the *e* final; not only to diſtinguiſh ſome of them from the nouns, but to ſhow that *th* is ſoft: for though *th*, when final, is ſometimes pronounced ſoft, as in to *loath*, to *mouth*, &c. yet *the* at the end of words is never pronounced hard. There is as obvious an analogy for this ſound of the *th* in theſe verbs, as for the *z* ſound of *s* in verbs ending in *ſe* (437); and why we ſhould write ſome verbs with *e*, and others without it, is inconceivable. The beſt way to ſhow the abſurdity of our orthography in this particular, will be to draw out the nouns and verbs as they ſtand in Johnſon's Dictionary.

Adjectives and Nouns.	Verbs.
breath,	to *breathe*.
wreath,	to *wreath*, to *inwreathe*.
loath,	to *loathe*.
cloth,	to *cloathe*, to *uncloath*.
bath,	to *bathe*.
ſmooth,	to *ſmooth*.
mouth,	to *mouth*.
ſwath,	to *ſwathe*.
ſheath,	to *ſheath*. / to *ſheathe*.
ſooth,	to *ſooth*.

Surely nothing can be more evident than the analogy of the language in this caſe. Is it not abſurd to heſitate a moment at writing all the verbs with the *e* final? This is a departure from our great lexicographer, which he himſelf would approve, as nothing but inadvertency could have led him into this unmeaning irregularity.—It may not be improper to obſerve here, that thoſe ſubſtantives which in the ſingular end with *th* ſharp adopt the *th* flat in the plural, as *path*, *paTHs*; *bath*, *baTHs*, &c. Such a propenſity is there to ſlide into the flat ſound of *s*, that we frequently hear this ſound in the genitive caſe, as *My wive's portion*, for *my wife's portion*. In the ſame manner we hear of paying ſo much for *houze-rent and taxes*, inſtead of *house-rent and taxes*; and ſhopkeepers tell us they have *goods of all prizes*, inſtead of *all prices*. Nay, ſome go ſo far as to pronounce the plural of *truth*, *truTHs*; but this muſt be carefully avoided.

468. *Th* is hard in the middle of words, either when it precedes or follows a conſonant, as *panther*, *nepenthe*, *orthodox*, *orthography*, *orthoëpy*, *thwart*, *athwart*, *ethnic*, *miſanthrope*, *philanthropy*, &c. except *brethren*, *farthing*, *farther*, *northern*, *worthy*, *burthen*, *murther*, where the *th* is flat; but the two laſt words are better written *burden* and *murder*.

Digitized from Best Copy Available

469. *Th* between two vowels is generally ſoft in words purely Engliſh, as *father, feather, heathen, hither, thither, whither, whether, either, neither, weather, wether, with*er, *gather, together, pother, mother.*

470. *Th* between two vowels, in words from the learned languages, is generally hard, as *apathy, sympathy, antipathy, Athens, atheist, authentic, author, authority, athirst, cathartic, cathedral, catholic, catheter, ether, ethics, lethargy, Lethe, leviathan, litharge, lithotomy, mathesis, mathematics, method, pathetic, plethora, polymathy, prothonotary, anathema, amethyst, theatre, amphitheatre, apothecary, apotheosis.*

471. *Th* is ſometimes pronounced like ſimple *t*, as *Thomas, thyme, Thames, asthma, phthiſis, phthiſic, phthiſical,* and is ſilent in *twelfthtide,* pronounced *twelftide.*

T ſilent.

472. *T* is ſilent when preceded by *s*, and followed by the abbreviated terminations *en* and *le*, as *haſten, chaſten, faſten, liſten, gliſten, chriſten, moiſten,* which are pronounced as if written *hace'n, chace'n,* &c.; in *burſten* the *t* is heard: ſo *caſtle, neſtle, treſtle, wreſtle, thiſtle, whiſtle, epiſtle, briſtle, griſtle, joſtle, apoſtle, throſtle, buſtle, juſtle, ruſtle,* are pronounced as if written *caſſle, neſſle,* &c.; in *peſtle* the *t* is pronounced; in *often, faſten,* and *ſoften,* the *t* is ſilent, and at the end of ſeveral words from the French, as *trait, gout* (taſte), *eclat.* In the firſt of theſe words the *t* begins to be pronounced; in the laſt, it has been ſometimes heard; but in the ſecond, never. *Toupet* is more frequently written *toupee,* and is therefore not irregular. In *billet-doux* the *t* is ſilent, as well as in *hautboy.* The ſame ſilence of *t* may be obſerved in the Engliſh words, *Chriſtmas, cheſtnut, mortgage, oſtler, bankruptcy,* and in the ſecond ſyllable of *miſtletoe.* In *currant* and *currants* the *t* is always mute. See No. 102, 103, 405.

V.

473. *V* is flat *f*, and bears the ſame relation to it as *b* does to *p*, *d* to *t*, hard *g* to *k*, and *z* to *s* (41). It is never irregular: and if ever ſilent, it is in the word *twelvemonth,* where both that letter and the *e*, are, in colloquial pronunciation, generally dropped, as if written *twel'month.*

W initial.

474. That *w* at the beginning of a word is a conſonant, has been proved already (9) (59). It is always ſilent before *r*, as in *wrack, wrangle, wrap, wrath, wreak, wreath, wreck, wren, wrench, wreſt, wreſtle, wretch, wriggle, wright, wring, wrinkle, wriſt, write, writhe, wrong, wrought, wry, awry, bewray;* and before *h* and the vowel *o*, when long, as *whole, who,* &c. pronounced *hole, hoo,* &c.

475. *W* before *h* is pronounced as if it were after the *h*, as *hoo-y, why, hoo-en, when,* &c.; but in *whole, whoop,* &c. the ſingle and double *o* coaleſcing with the ſame ſound in *w*, this laſt letter is ſcarcely perceptible. In *ſwoon,* however, this letter is always heard; and pronouncing it *ſoon,* is vulgar. In *ſword* and *anſwer* it is always ſilent. In *two* it mingles with its kindred ſound, and the number *two* is pronounced like the adverb *too.* In the prepoſitions *toward* and *towards,* the *w* is dropped, as if written *toard* and *toards,* rhyming with *board* and *boards*; but in the adjectives and adverbs *toward* and *towardly, froward* and *frowardly,* the *w* is heard diſtinctly. It is ſometimes dropped in the laſt ſyllable of *awkward,* as if written *awkard*; but this pronunciation is vulgar.

X.

476. *X* is a letter compoſed of thoſe which have been already conſidered, and therefore will need but little diſcuſſion (48) (51). It is flat or ſharp like its component letters, and is ſubject to the ſame laws.

477. *X* has a ſharp ſound like *ks*, when it ends a ſyllable with the accent upon it, as *exercise*, *excellence*, &c. or when the accent is on the next ſyllable, if it begin with a conſonant, as *excuse*, *expence*, &c. (71).

478. *X* has its flat ſound like *gz*, when the accent is not on it, and the following ſyllable having the accent begins with a vowel, as *exert*, *example*, *exist*, &c. pronounced *egzert*, *egzample*, *egzist*, &c. The ſame ſound may be obſerved if *h* follow, as in *exhibit*, *exhale*, &c. pronounced *egzhibit*, *egzhale*; but if the ſecondary accent be on the *x* in the polyſyllable *exhibition*, *exhalation*, &c. this letter is then ſharp, as in *exercise* (71); but in compound words where the primitive ends in *x*, this letter retains its primitive ſound, as *fixation*, *taxation*, *vexation*, *vexatious*, *relaxation*, &c.; to which we may add the ſimples in our language, *doxology* and *proximity*; ſo that this propenſity of *x* to become *egz*, ſeems confined to the inſeparable prepoſition.

479. *X*, like *s*, is aſpirated, or takes the ſound of *h* after it, only when the accent is before it: hence the difference between *luxury* and *luxurious*; *anxious* and *anxiety*: in the true pronunciation of which words, nothing will direct us but recurring to firſt principles. It was obſerved that *s* is never aſpirated, or pronounced like *sh*, but when the accent is on the preceding ſyllable (450); and that when the accent is on the ſucceeding vowel, though the *s* frequently is pronounced like *z*, it is never ſounded *zh*: from which premiſes we may conclude, that *luxury* and *luxurious*, ought to be pronounced *lucksbury* and *lugzurious*, and not *lug-zho-ryus*, as Mr. Sheridan ſpells it. The ſame errour runs through his pronunciation of all the compounds, *luxuriance*, *luxuriant*, *luxuriate*, &c. which unqueſtionably ought to be pronounced *lug-zu-ri-ance*, *lug-zu-ri-ant*, *lug-zu-ri-a'e*, &c. in four ſyllables, and not in three only, as they are divided in his Dictionary.

480. The ſame principles will lead us to decide in the words *anxious* and *anxiety*: as the accent is before the *x* in the firſt word, it is naturally diviſible into *ank-sious*, and as naturally pronounced *ank-shus*; but as the accent is after the *x* in the ſecond word, and the hiſſing ſound cannot be aſpirated (456), it muſt neceſſarily be pronounced *ang-ziety*. But Mr. Sheridan, without any regard to the component letters of theſe words, or the different poſition of the accent, has not only ſpelled them without aſpiration, but without letting the *s* in the compoſition of the laſt word, go into *z*; for thus they ſtand in his Dictionary: *ank-syus*, *ank-si-e-ty* (456).

481. The letter *x*, at the beginning of words, goes into *z*, as *Xerxes*, *Xenophon*, &c. pronounced *Zerkses*, *Zenophon*, &c.; it is ſilent at the end of the French *billet-doux*, and pronounced like *s* in *beaux*; often and better written *beaus*.

Y initial.

482. *Y*, as a conſonant, has always the ſame ſound; and this has been ſufficiently deſcribed in aſcertaining its real character (40); when it is a vowel at the end of a word or ſyllable with the accent upon it, it is ſounded exactly like the firſt ſound of *i*, as *cy-der*, *ty-rant*, *re-ply*, &c.; but at the end of a word or ſyllable, without the accent, it is pronounced like the firſt ſound of *e*, *liberty*, *fury*, *tenderly*, &c.

Z.

483. *Z* is the flat *s*, and bears the ſame relation to it as *b* does to *p*, *d* to *t*, hard *g* to *k*, and *v* to *f*. Its common name is *izzard*, which Dr. Johnſon explains into *s* hard; if, however, this be the meaning, it is a groſs miſnomer: for the *z* is not the hard, but the ſoft *s*:* but as it has a leſs ſharp, and therefore not ſo audible a ſound, it is not impoſſible but it may mean *s surd*. *Zed*, borrowed from the French, is the more faſhionable name of this letter; but, in my opinion, not to be admitted, becauſe the names of the letters ought to have no diverſity.

484. *Z*, like *s*, goes into aſpiration before a diphthong, or a diphthongal vowel after the accent, as is heard in *vizier*, *glazier*, *grazier*, &c. pronounced *vizh-i-er*, *glazh-i-er*, *grazh-i-er*, &c. The ſame may be obſerved of *azure*, *razure*, &c.

485. *Z* is ſilent in the French word *rendezvous*; and is pronounced in the Italian manner, as if *t* were before it, in *mezzotinto*, as if written *metzotinto*.

Thus have we endeavoured to exhibit a juſt idea of the principles of pronunciation, both with reſpect to ſingle letters, and their various combinations into ſyllables and words. The attentive reader muſt have obſerved how much the ſounds of the letters vary, as they are differently aſſociated, and how much the pronunciation of theſe aſſociations depends upon the poſition of the accent. This is a point of the utmoſt importance, and a want of attending to it has betrayed ſeveral ingenious men into the groſſeſt abſurdities. This will more fully appear in the obſervations on accent, which is the next point to be conſidered.

OF THE NATURE OF ACCENT.

486. The accent of the ancients is the opprobrium of modern criticiſm. Nothing can ſhow more evidently the fallibility of the human faculties than the total ignorance we are in at preſent of the nature of the Latin and Greek accent.* This would be ſtill more ſurpriſing if a phenomenon of a ſimilar kind did not daily preſent itſelf to our view. The accent of the Engliſh language, which is conſtantly ſounding in our ears, and every moment open to inveſtigation, ſeems as much a myſtery as that accent which is removed almoſt two thouſand years from our view. Obſcurity, perplexity, and confuſion, run through every treatiſe on the ſubject, and nothing could be ſo hopeleſs as an attempt to explain it, did not a circumſtance preſent itſelf, which at once accounts for the confuſion, and affords a clew to lead us out of it.

487. Not one writer on accent has given us ſuch a definition of the voice as acquaints us with its eſſential properties: they ſpeak of high and low, loud and ſoft, quick and ſlow, but they never once mention that ſtriking property which diſtinguiſhes

* Profeſſor Ward, ſpeaking of the reaſon for doubling the *s* at the end of words, ſays, "*s* doubled retains its proper force, which, when ſingle at the end of words, is *ſoftened* into *z*, "as *his*, *hiss*." And Dr. Wallis tells us, that it is almoſt certain when a noun has *s* hard in the laſt ſyllable, and becomes a verb; that in the latter caſe the *s* becomes ſoft, as a *houſe* is pronounced with the hard *s*, and to *houſe* with the *s* ſoft.

* See Obſervations on the Greek and Latin Accent and Quantity, at the end of the Key to the Claſſical pronunciation of Greek, Latin, and Scripture Proper Names.

diſtinguiſhes ſpeaking from ſinging ſounds, and which, from its ſliding from high to low, and from low to high, may not improperly be called the inflection of the voice. No wonder, when writers left this out of the account, that they ſhould blunder about the nature of accent: it was impoſſible they ſhould do otherwiſe; ſo partial an idea of the ſpeaking voice muſt neceſſarily lead them into errour. But let us once divide the voice into its riſing and falling inflections, the obſcurity vaniſhes, and accent becomes as intelligible as any other part of language.

488. Keeping this diſtinction in view, let us compare the accented ſyllable with others, and we ſhall find this general concluſion may be drawn: "The "accented ſyllable is always louder than the reſt; but when it has the riſing in- "flection, it is higher than the preceding, and lower than the ſucceeding ſylla- "ble; and when it has the falling inflection, it is pronounced higher as well as "louder than the other ſyllables, either preceding or ſucceeding." The only exception to this rule is, "when the accent is on the laſt ſyllable of a word "which has no emphaſis, and which is the concluding word of a diſcourſe." Thoſe who wiſh to ſee this clearly demonſtrated, may conſult Elements of Elocution, ſecond edition, page 181. On the preſent occaſion it will be ſufficient to obſerve, that the ſtreſs we call accent is as well underſtood as is neceſſary for the pronunciation of ſingle words, which is the object of this treatiſe; and therefore, conſidering accent merely as ſtreſs, we ſhall proceed to make ſome remarks on its proper poſition in a word, and endeavour to detect ſome errours in the uſe and application of it.

The different Poſitions of the Engliſh Accent.

489. Accent, in its very nature, implies a compariſon with other ſyllables leſs forcible; hence we may conclude, that monoſyllables, properly ſpeaking, have no accent: when they are combined with other monoſyllables and form a phraſe, the ſtreſs which is laid upon one, in preference to others, is called emphaſis. As emphaſis evidently points out the moſt ſignificant word in a ſentence, ſo, where other reaſons do not forbid, the accent always dwells with greateſt force on that part of the word which, from its importance, the hearer has always the greateſt occaſion to obſerve; and this is neceſſarily the root, or body of the word. But as harmony of termination frequently attracts the accent from the root to the branches of words, ſo the firſt and moſt natural law of accentuation ſeems to operate leſs in fixing the ſtreſs than any of the other. Our own Saxon terminations, indeed, with perfect uniformity, leave the principal part of the word in quiet poſſeſſion of what ſeems its lawful property (501); but Latin and Greek terminations, of which our language is full, aſſume a right of preſerving their original accent, and ſubjecting many of the words they beſtow upon us, to their own claſſical laws.

490. Accent, therefore, ſeems to be regulated, in a great meaſure, by etymology. In words from the Saxon, the accent is generally on the root; in words from the learned languages, it is generally on the termination; and if to theſe we add the different accent we lay on ſome words, to diſtinguiſh them from others, we ſeem to have the three great principles of accentuation; namely, the radical, the terminational, and the diſtinctive.

Accent on Diſſyllables.

491. Every word of two ſyllables has neceſſarily one of them accented, and but one. It is true, for the ſake of emphaſis, we ſometimes lay an equal ſtreſs upon

Digitized from Best Copy Available

upon two ſucceſſive ſyllables, as *di-rect, some-times;* but when theſe words are pronounced alone, they have never more than one accent. For want of attending to this diſtinction, ſome writers have roundly aſſerted, that many diſſyllables have two accents, ſuch as *convoy, concourse, discord, ship-wreck:* in which, and ſimilar inſtances, they confound the diſtinctneſs, with which the latter ſyllables are neceſſarily pronounced, with accentual force; though nothing can be more different. Let us pronounce the laſt ſyllable of the noun *torment* as diſtinctly as we pleaſe, it will ſtill be very different with reſpect to force, from the ſame ſyllable in the verb to *torment*, where the accent is on it; and if we do but carefully watch our pronunciation, the ſame difference will appear in every word of two ſyllables throughout the language. The word *Amen* is the only word which is pronounced with two conſecutive accents when alone.

492. There is a peculiarity of accentuation in certain words of two ſyllables, which are both nouns and verbs, that is not unworthy of notice; the nouns having the accent on the firſt ſyllable, and the verbs on the laſt. This ſeems an inſtinctive effort in the language (if the expreſſion will be allowed me) to compenſate in ſome meaſure for the want of different terminations for theſe different parts of ſpeech.* The words which admit of this diverſity of accent, are the following:

cónverſe

* It is not improbable that the verb, by receiving a participial termination, has inclined us to pronounce that part of ſpeech with an accent nearer the end than we do the noun: for though we can without any difficulty pronounce the verb with the accent on the noun, we cannot ſo eaſily pronounce the participle and the adverb formed from it with that accent: thus we can pronounce to *tránsport* with the accent on the firſt ſyllable; but not ſo eaſily *tránsporting* and *tránsportingly*. This is a ſolid reaſon for the diſtinction, and ought to induce us where we can to obſerve it. A *ſépulchre* and to *ſepúlchre* ſeem to require it. See the word.

493. To this analogy, ſome ſpeakers are endeavouring to reduce the word *contents*; which, when it ſignifies the matter contained in a book, is often heard with the accent on the firſt ſyllable; but though this pronunciation ſerves to diſtinguiſh words which are different in ſignification, and to give, in ſome meaſure, a difference of form to the noun and verb, in which our tongue is remarkably deficient, ſtill it is doubtful whether this diſtinction be of any real advantage to the language. See Bowl. This diverſity of accentuation ſeems to have place in ſome compound verbs. See Counterbalance and the ſubſequent words.

494. Sometimes words have a different accent, as they are adjectives or ſubſtantives.

495. Sometimes the ſame parts of ſpeech have a different accent to mark a difference of ſignification.

to *cónjure*, to practiſe magic;	to *conjúre*, to intreat.
déſert, a wilderneſs	*deſért*, merit
búffet, a blow	*buffét*, a cupboard
ſínister, inſidious	*ſiníster*, the left ſide.

496. In this analogy ſome ſpeakers pronounce the word *Concordance* with the accent on the firſt ſyllable, when it ſignifies a dictionary of the Bible; and with the accent on the ſecond, when it ſignifies agreement: but beſides that, there is not the ſame reaſon for diſtinguiſhing nouns from each other, as there is nouns from verbs; the accent on the firſt ſyllable of the word *Concordance* gives a harſhneſs and poverty to its ſound, which ought to be avoided.

497. But though the different accentuation of nouns and verbs of the ſame form does not extend ſo far as might be expected, it is certain, that in words of two ſyllables, where the noun and verb are of different forms, there is an evident tendency in the language to place the accent upon the firſt ſyllable of the noun, and on the laſt of the verb. Hence the nouns *outrage*, *upſtart*, and *uproar*, have the accent on the firſt ſyllable: and the verbs to *uplift*, to *uphold*, and to *outſtrip*, on the laſt.

498. This analogy will appear ſtill more evident if we attend to the accent of thoſe nouns and verbs which are compounded of two words. Every diſſyllable compounded of words which, taken ſeparately, have a meaning, may be deemed a qualified ſubſtantive; and that word which qualifies or deſcribes the other, is that which moſt diſtinguiſhes it, and conſequently is that which ought to have the accent: accordingly we find that *inkhorn*, *outrage*, *chairman*, *freehold*, *sand-box*, *book-case*, *pen-knife*, have the accent on the firſt ſyllable, which is the ſpecifying part of the word; while *gainsay*, *foresee*, *overlook*, *undersell*, have the accent on the laſt ſyllable, which is the leaſt diſtinguiſhing part of the word. This rule, however, is either by the caprice of cuſtom, or the love of harmony, frequently violated, but is ſufficiently extenſive to mark the general tendency of the language. Akenſide brings the verb to *comment* under this analogy:

"——————The ſober zeal
"Of age, *commenting* on prodigious things."
Pleasures of the Imagination.

And Milton in the ſame manner the verb to *commerce*:

"And looks *commercing* with the ſkies,
"Thy rapt ſoul ſitting in thine eyes."——*Il Penseroso.*

499. Something very analogous to this we find in the nouns we verbalize, by changing the *s* ſharp of the noun into the *s* flat, or *z* of the verb (437), as *a use*, and to *use*; where we may remark, that when the word in both parts of ſpeech is a monoſyllable, and ſo not under the laws of accent, the verb, however, claims the privilege of lengthening the ſound of the conſonant, when it can, as well as when it cannot, prolong the accentuation: thus we not only find *grass* altered to *graze*, *brass* to *braze*, *glass* to *glaze*, *price* to *prize*, *breath* to *breathe*, &c. but the *c* or *s* ſharp altered to the *s* flat in *advice* to *advise*, *excuse* to *excuse*, *device* to *devise*, &c. The noun adopting the ſharp hiſſing ſound, and the verb the ſoft buzzing one, without transferring the accent from one ſyllable to another. The vulgar extend this analogy to the noun *practice* and the verb to *practise*, pronouncing the firſt with the *i* ſhort and the *c* like ſharp *s*, as if written *practiss*, and the laſt with the *i* long and the *s* like *z*, as if written *practize*; but correct ſpeakers pronounce the verb like the noun; that is, as if written *practiss*. The noun *prophesy* and the verb to *prophesy* follow this analogy, only by writing the noun with the *c* and the verb with the *s*, and without any difference of ſound, except pronouncing the *y* in the firſt like *e*, and in the laſt like *i* long; where we may ſtill diſcover a trace of the tendency to the barytone pronunciation in the noun, and the oxytone in the verb (467). See APPENDIX.

500. This ſeems to be the favourite tendency of Engliſh verbs; and where we find it croſſed, it is generally in thoſe formed from nouns, rather than the contrary: agreeably to this, Dr. Johnſon has obſerved, that though nouns have often the accent on the latter, yet verbs have it ſeldom on the former ſyllable; thoſe nouns which, in the common order of language, muſt have preceded the verbs, often tranſmit this accent to the verbs they form, and inverſely: thus the noun *water* muſt have preceded the verb to *water*, as the verb to *correspond* muſt have preceded the noun *correspondent*; and to *pursue* muſt claim priority to *pursuit*. So that we may conclude, whenever verbs deviate from this rule, it is ſeldom by chance, and generally in thoſe words only where a ſuperior law of accent takes place.

Accent

Accent on Trisyllables.

501. As words increaſe in ſyllables, the more eaſily is their accent known. Nouns ſometimes acquire a ſyllable by becoming plural; adjectives increaſe a ſyllable by being compared; and verbs, by altering their tenſe, or becoming participles: adjectives become adverbs, by adding *ly* to them; and prepoſitions precede nouns or verbs without altering the accent of the word to which they are prefixed: ſo that when once the accent of diſſyllables is known, thoſe polyſyllables, whoſe terminations are perfectly Engliſh, have likewiſe their accent invariably ſettled. Thus *lion* becomes *lioness; poet, poetess; polite* becomes *politer*, or *politely*, or even *politelier; miſchief, miſchievous; happy, happineſs;* nay, *lioness* becomes *lionesses; miſchief, miſchievousness;* and *ſervice, ſerviceable, ſerviceableness, ſerviceably*, and *unſerviceably*, without diſturbing the accent, either on account of the prepoſitive *un*, or the ſubjunctives *able, ably*, and *ableness*.

502. Hence we may perceive the glaring abſurdity which prevails even in the firſt circles; that of pronouncing the plural of *princeſs*, and even the ſingular, with the accent on the ſecond ſyllable, like *ſucceſs* and *ſucceſſes;* for we might juſt as well ſay, *dutchéſs* and *dutchéſſes*, as *princéſs* and *princéſſes;* nor would a correct ear be leſs hurt with the latter than with the former.

503. So few verbs of three ſyllables follow the analogy obſervable in thoſe of two, that of protracting the accent to the laſt ſyllable, that this œconomy ſeems peculiar to diſſyllables: many verbs, indeed, of three ſyllables are compounded of a prepoſition of two ſyllables: and then, according to the primary law of formation, and not the ſecondary of diſtinction, we may eſteem them radical, and not diſtinctive: ſuch are *contradict, intercede, ſupersede, contraband, circumſcribe, ſuperſcribe*, &c. while the generality of words ending in the verbal terminations *ise* and *ize*, retain the accent of the ſimple, as *criticiſe, tyrannize, modernize*, &c.: and the whole tribe of triſyllable verbs in *ate*, very few excepted, refuſe the accent on the laſt ſyllable: but words of three ſyllables often take their accent from the learned languages from which they are derived; and this makes it neceſſary to inquire how far Engliſh accent is regulated by that of the Greek and Latin.

On the Influence of the Greek and Latin Accent, on the Accent of Engliſh Polyſyllables.

(a) As our language borrows ſo largely from the learned languages, it is not wonderful that its pronunciation ſhould be in ſome meaſure influenced by them. The rule for placing the Greek accent was, indeed, eſſentially different from that of the Latin; but words from the Greek, coming to us through the Latin, are often ſo much latinized as to loſe their original accent, and to fall into that of the Latin; and it is the Latin accent which we muſt chiefly regard, as that which influences our own.

(b) The firſt general rule that may be laid down is, that when words come to us whole from the Greek or Latin, the ſame accent ought to be preſerved as in the original: thus *horizon, ſonorous, decorum, dictator, gladiator, mediator, delator, ſpectator, adulator*, &c. preſerve the penultimate accent of the original; and yet the antepenultimate tendency of our language has placed the accent on the firſt ſyllable of *orator, ſenator, auditor, cicatrix, plethora*, &c. in oppoſition to the Latin pronunciation of theſe words, and would have infallibly done the ſame by *abdomen, bitumen*, and *acumen*, if the learned had not ſtepped in to reſcue theſe claſſical words from the invaſion of the Gothic accent, and

Digitized from Best Copy Available

to preſerve the ſtreſs inviolably on the ſecond ſyllable: nor has even the interpoſition of two conſonants been always able to keep the accent from mounting up to the antepenultimate ſyllable, as we may ſee in *minister*, *sinister*, *character*, &c.; and this may be ſaid to be the favourite accent of our language. See MISCELLANY.

(c) But notwithſtanding this prevalence of the antepenultimate accent, the general rule ſtill holds good; and more particularly in words a little removed from common uſage, ſuch as terms in the arts and ſciences: theſe are generally of Greek original; but coming to us through the Latin, moſt commonly contract the Latin accent when adopted into our language. This will appear plainly by the following liſts: and firſt, let us ſelect ſome where the Greek and Latin accents coincide:

plethōra,	πληθώρα,	antiphrăſis,	ἀντίφρασις,
metabăſis,	μετάβασις,	protăſis,	πρότασις,
emphăſis,	ἔμφασις,	metathĕſis,	μετάθεσις,
antiſpăſis,	ἀντίσπασις,	epenthĕſis,	ἐπένθεσις,
antithĕſis,	ἀντίθεσις,	aphaerĕſis,	ἀφαίρεσις.

(d) Another liſt will ſhow us where the accents of theſe languages differ:

antanaclāſis,	ἀντανάκλασις,	hydrophōbia,	ὑδροφοβία,
catachrēſis,	κατάχρησις,	cyclopædia,	κυκλοπαιδεία,
paracentēſis,	παρακέντησις,	aporĭa,	ἀπορία,
apoſiopēſis,	ἀποσιώπησις,	proſopopœia,	προσωποποιία,
antiptōſis,	ἀντίπτωσις,	epiphonēma,	ἐπιφώνημα,
anadiplōſis,	ἀναδίπλωσις,	diaphorēſis,	διαφόρησις,
auxēſis,	ἄυξησις,	diplōma,	δίπλωμα,
mathēſis,	μάθησις,	parogōge,	παραγωγή,
exegēſis,	ἐξήγησις,	apoſtrŏphe,	ἀποστροφή.

In this liſt we perceive the peculiar tendency of the Latin language to accent the long penultimate vowel, and that of the Greek, to pay no regard to it if the laſt vowel is ſhort, but to place the accent on the antepenultimate. It will, however, be eaſily perceived, that in this caſe we follow the Latin analogy: this analogy will appear more evident by a liſt of words ending in *osis*, where, though the *o* in the penultimate ſyllable is the omega, the Greek accent is on the antepenultimate:

ὑπερβάρωσις,	ἀκαμόρφωσις,	ἀναστόμωσις,	ἀμαύρωσις,
ἀποθέωσις,	μεταμόρφωσις,	συνάρθρωσις,	συνοικείωσις,
γόμφωσις,	παραφίμωσις,	διόρθρωσις,	ἀποτεύρωσις.

This analogy has led us to accent certain words formed from the Greek where the omega was not in the penultimate of the original, in the ſame manner as thoſe words where this long vowel was found: ſuch as *Exostosis*, formed from ἔξω and ὀστέον, *Synneurosis* from σύν and νεῦρον, &c. This tendency therefore has ſufficiently formed an analogy; and ſince rules, however abſurdly formed at firſt, are better than no rules at all, it would, in my opinion, be adviſable to conſider every word of this form as ſubject to the penultimate accent, and to look upon *apotheosis* and *metamorphosis* as exceptions.

(e) The next rule we may venture to lay down as a pretty general one, is, that if the words derived from the learned languages, though angliciſed by altering the termination, contain the ſame number of ſyllables as in the original

Digitized from Best Copy Available

ginal languages, they are generally to be pronounced with the ſame accent: that is, with the ſame accent as the firſt perſon preſent of the indicative mood active voice, or as the preſent participle of the ſame verb. The reality of this rule will beſt appear by a ſelection of ſuch claſſes of words as have an equal number of ſyllables in both languages.

(f) Words which have *a* in the penultimate ſyllable:

prévalent,	prævălens,	ínfamous,	infāmis,
equívalent,	æquivălens,	própagate,	propāgo,
adjácent,	adjăcens,	índagate,	indāgo,
lígament,	ligāmen,	ſúffragan,	ſuffrāgans.

In this ſmall claſs of words we find all but the two firſt have a different accent in Engliſh from that of the Latin. The rule for placing the accent in that language being the ſimpleſt in the world: if the penultimate ſyllable is long, the accent is on it; if ſhort, the accent is on the antepenultimate.

(g) Words which have *e* in the penultimate ſyllable:

pénetrate,	penĕtro,	exúberant,	exuběrans,
díſcrepant,	diſcrĕpans,	éminent,	emĭnens,
precédent,	præcēdens,	éxcellent,	excēllens,
élegant,	elĕgans,	álienate,	alīeno,
exúperant,	exupĕrans,	délegate,	delēgo.

In this claſs we find the penultimate *e* accented in Engliſh as in Latin, except in the three laſt words. The word *alienate* departs from the Latin accentuation, by placing the ſtreſs on the firſt ſyllable, as if derived from the Engliſh noun, *alien*. The *e* in *penetro* is either long or ſhort in Latin, and in this caſe we generally prefer the ſhort ſound to the long one.

(h) Words which have *i* in the penultimate ſyllable:

acclívous,	acclīvus,	perſpícience,	perſpiciens,
declívous,	declīvus,	cónſcience,	conſcĭens,
proclívous,	proclīvus,	obédience,	obedĭens,
lítigant,	litĭgans,	péſtilence,	peſtĭlens,
mítigant,	mitigans,	ſúpplicate,	ſupplĭcans,
ſíbilant,	ſibĭlans,	éxplicate,	explĭcans,
vígilant,	vigĭlans,	ábdicate,	abdĭcans,
ſúlminant,	fulmĭnans,	próvidence,	providens,
diſcríminate,	diſcrimĭno,	féſtinate,	feſtīno,
hábitant,	habĭtans,	méndicant,	mendĭcans,
benéficent,	benefĭcus,	réſident,	reſĭdens,
áccident,	accĭdens,	díffidence,	diffĭdens,
évident,	evĭdens,	cónfidence,	confĭdens,
índigent,	indigens,	invéſtigate,	inveſtīgo,
díligent,	dilĭgens,	cáſtigate,	caſtīgo,
négligent,	negligens,	éxtricate,	extrĭco,
éxigence,	exigens,	írritate,	irrīto,
intélligence,	intellĭgens,	prófligate,	profligo,
defícience,	deficĭens.	ínſtigate,	inſtīgo.

In the foregoing liſt of words we find a very general coincidence of the Engliſh and Latin accent, except in the laſt eleven words, where we depart from the Latin accent on the penultimate, and place it on our own favourite ſyllable

ſyllable the antepenultimate. Theſe laſt words muſt therefore be ranked as exceptions.

(i) Words which have *o* in the penultimate ſyllable:

intérrogate,	interrŏgo,	omnípotent,	omnipŏtens,
árrogant,	arrŏgans,	ínnocent,	innŏcens,
díſſonant,	diſſŏnans,	rénovate,	renŏvo,

índolence,	indŏlens,	ígnorant,	ignōrans,
armípotent,	armipŏtens,	ſúffocate,	ſuffōco.

In this liſt the difference of the Engliſh and Latin accent is conſiderable. The ſix laſt words deſert the Latin penultimate for the Engliſh antepenultimate accent, and *condolence* falls into an accentuation diametrically oppoſite.

(k) Words which have *u* in the penultimate ſyllable:

fábulate,	fabŭlor,	pópulate,	popŭlo,
máculate,	macŭlo,	ſúbjugate,	ſubjŭgo,
ádjuvate,	adjŭvo,	abdúcent,	abdūcens,

ímpudent,	impŭdens,	péculate,	pecūlor,
ſpéculate,	ſpecŭlor,	índurate,	indūro,
púllulate,	pullŭlo,	óbdurate,	obdūro.

Here we find the general rule obtain, with, perhaps, fewer exceptions than in any other claſs. *Adjuvate*, *peculate*, and *indurate*, are the only abſolute deviations; for *obdurate* has the accent frequently on the ſecond ſyllable. See the word.

(l) To theſe liſts, perhaps, might be added the Engliſh words ending in *tion*, *sion*, and *ity*: for though *tion* and *sion* are really pronounced in one ſyllable, they are by almoſt all our orthöepiſts generally divided into two; and conſequently *nation*, *pronunciation*, *occasion*, *evasion*, &c. contain the ſame number of ſyllables as *natio*, *pronunciatio*, *occasio*, *evasio*, &c. and have the accent in both Engliſh and Latin, on the antepenultimate ſyllable. The ſame may be obſerved of words ending in *ity*, as *diversity*, *variety*, &c. from *diversitas*, *varietas*, &c.

(m) By this ſelection (which, though not an exact enumeration of every particular, is yet a ſufficient ſpecimen of the correſpondence of Latin and Engliſh accent) we may perceive that there is a general rule running through both languages, reſpecting the accent of polyſyllables, which is, that when a ſingle vowel in the penultimate is followed by a ſingle conſonant, the accent is on the antepenultimate. This is ſo agreeable to Engliſh analogy, that in words derived from the Latin, where the penultimate vowel, followed by a ſingle conſonant, is long, and conſequently has the accent, we almoſt always neglect this exception, as it may be called, in the Latin language, and fall into our own general rule of accenting the antepenultimate. Nor is it unworthy of being remarked, that when we neglect the accent of the original, it is almoſt always

Digitized from Best Copy Available

always to place it at leaſt a ſyllable higher; as *adjacent* and *condolence* are the only words in the whole ſelection, where the accent of the Engliſh word is placed lower than in the Latin.

(n) There is, indeed, a remarkable coincidence of accent between Latin verbs of three ſyllables, commencing with a prepoſition, and the Engliſh words of two ſyllables, derived from them, by dropping a ſyllable,* as *excello, rebello, inquiro, confino, confuto, consumo, desiro, exploro, procedo, proclamo*, have the accent in Latin on the ſecond ſyllable; and the Engliſh verbs *excel, rebel, inquire, confine, confute, conſume, deſire, explore, proceed, proclaim*, have the accent on the ſame ſyllable. This propenſity of following the Latin accent in theſe words, perhaps, in this, as well as in other caſes, formed a general rule, which at laſt, neglected the Latin accent, in words of this kind; as we find *prefer, confer, defer, deſert, compare, compleat, congeal, divide, diſpute, prepare*, have the accent on the ſecond ſyllable, though *præfĕro, defĕro, confĕro, desĕro, compăro, complĕo, congĕlo, divĭdo, dispŭto, præpăro*, have the accent on the firſt; and this propenſity, perhaps, laid the foundation of that diſtinction of accent which is ſo remarkable between diſſyllable nouns and verbs of the ſame form (492).

(o) But when Engliſh polyſyllables are derived from the Latin by dropping a ſyllable, ſcarcely any analogy is more apparent than the coincidence of the principal accent of the Engliſh word, and the ſecondary accent (522), we give to the Latin word, in the Engliſh pronunciation of it. Thus *parſimony, ceremony, matrimony, melancholy*, &c. have the accent on the firſt ſyllable, becauſe, in pronouncing the Latin words *parſimonia, cæremonia, matrimonia, melancholia*, &c. we are permitted, and prone in our Engliſh pronunciation of theſe words, to place a ſecondary accent on that ſyllable. See ACADEMY, IRREPARABLE, &c.

(p) With reſpect to the quantity of the antepenultimate ſyllable in polyſyllables, it may be obſerved, that, regardleſs of the quantity of the original, we almoſt, without exception, follow the analogy of our own language. This analogy uniformly ſhortens the vowel, unleſs it be *u*, followed by a ſingle conſonant, or any other vowel followed by a ſingle conſonant, ſucceeded by a ſemi-conſonant diphthong: thus the firſt *u* in *dūbious* is pronounced long, though ſhort in the Latin word *dŭbius:* the ſame may be obſerved of the *e* and *o* in *mĕdium* and *empŏrium;* and the firſt *i* in *delĭrium*, and the firſt *e* in *dēlĭcate*, are pronounced ſhort in Engliſh according to our own analogy (507), though theſe letters are long in the Latin *delīrium* and *delīcatus*. For the *quantity* of Engliſh diſſyllables derived from the Greek and Latin, ſee SYLLABICATION, No. 543, 544, &c.

Terminational Accent.

504. We have ſeen that the Saxon terminations, regardleſs of harmony, always leave the accent where they found it, let the adventitious ſyllables be ever ſo numerous. The Saxons, attentive chiefly to ſenſe, preſerved the ſame ſimplicity in the accentuation, as in the compoſition of their words; and, if ſenſe were the only object of language, it muſt be confeſſed, that our anceſtors were, in this reſpect, ſuperior to the Greeks and Romans. What method could ſo rigidly

* Ben Jonſon ſeems to have had a faint idea of this coincidence, where he ſays, "all verbs "coming from the Latin, either of the ſupine or otherwiſe, hold the accent as it is found in the "firſt perſon preſent of thoſe Latin verbs, as *ánimo, ánimate, célebro, célebrate;* except words "compounded of *facio*, as *lique-facio, liquefy;* and of *ſtatuo*, as *conſtituto, conſtitūte*." rigidly preſerve, and ſo ſtrongly convey the ſenſe of words, as that which always left the accent on the root, where the principal meaning of the word undoubtedly lies? But the neceſſities of human nature require that our thoughts ſhould not only be conveyed with force, but with eaſe; to give language its due effect, it muſt be agreeable as well as forceful; and the ear muſt be addreſſed while we are informing the mind. Here, then, terminational accent, the muſic of language, interpoſes; corrects the diſcordant, and ſtrengthens the feeble ſounds; removes the difficulty of pronunciation which ariſes from placing the accent on initial ſyllables, and brings the force gently down to the latter part of the word, where a cadence is formed, on the principles of harmony and proportion.

505. To form an idea of the influence of termination upon accent, it will be ſufficient to obſerve, that words which have *ei, ia, ie, io, eou*, in their termination, always have the accent on the preceding ſyllable: thus *atheiſt, alien, regalia, ambroſia*, &c. the numerous terminations in *ion, ian*, &c. as *gradation, promotion, confuſion, logician, phyſician*, &c. thoſe in *ious*, as *harmonious, abſtemious*, &c. thoſe in *eous*, as *outrageous, advantageous*, &c. Theſe may not improperly be ſtyled ſemiconſonant diphthongs (196).

506. The only exceptions to this rule are one word in *iac*, as *elegiac*, which has the accent on the *i*, and the following words in *iacal*, as *proſodiacal, cardiacal, heliacal, genethliacal, maniacal, demoniacal, ammoniacal, theriacal, paradiſiacal, aphrodiſiacal*, and *hypochondriacal;* all which have the accent on the antepenultimate *i*, and that long and open, as in *idle, title*, &c.

507. Nothing can be more uniform than the poſition of the accent in words of theſe terminations; and, with very few exceptions; the quantity of the accented vowel is as regular as the accent; for when theſe terminations are preceded by a ſingle conſonant, every accented vowel is long, except *i;* which, in this ſituation, is as uniformly ſhort: thus *occaſion, adheſion, eroſion*, and *confuſion*, have the *a, e, o*, and *u*, long; while *viſion* and *deciſion* have the *i* ſhort. The ſame may be obſerved of *probation, concretion, devotion, ablution*, and *exhibition*. The exceptions are *impetuous, especial, perpetual, diſcretion* and *battalion*, which laſt ought to be ſpelt with double *l*, as in the French, from which it is derived, and then it would follow the general rule. *National* and *rational*, form two more exceptions; and theſe are almoſt the only irregularities to which theſe numerous claſſes of words are ſubject.

508. Nearly the ſame uniformity, both of accent and quantity, we find in words ending in *ic*. The accent immediately precedes this termination, and every vowel under this accent but *u* is ſhort; thus *Satanic, pathetic, eliptic, harmonic*, &c. have the accent on the penultimate, and the vowel ſhort; while *tunic, runic*, and *cubic*, have the accented vowel long.

509. The ſame may be obſerved of words ending in *ical*, as *fanatical, poetical, levitical, canonical*, &c. which have the accent on the antepenultimate ſyllable, and the vowels *e, i*, and *o*, ſhort; but *cubical* and *muſical*, with the accent on the ſame ſyllable, have the *u* long.

510. The only exceptions to this rule are *arſenic, choleric, ephemeric, turmeric, empiric, rhetoric, biſhopric* (better written *biſhoprick*, ſee No. 400), *lunatic, arithmetic, ſplenetic, heretic, politic*, and, perhaps *phlegmatic;* which, though more frequently heard with the accent on the antepenultimate ſyllable, ought, if poſſible, to be reduced to regularity. Words ending in *ſcence* have uniformly the accent on the penultimate ſyllable, as *quieſcence, reminiſcence*, &c.; *concupiſcence*, which has the accent on the antepenultimate, is the only exception.

511. In the ſame manner, if we take a view of the words ending in *ity*, we find

Digitized from Best Copy Available

find the accent invariably placed on the preceding ſyllable, as in *diverſity*, *congruity*, &c. On a cloſer inſpection we find every vowel in this antepenultimate ſyllable, when no conſonant intervenes, pronounced long, as *deity*, *piety*, &c. A nearer inſpection ſhows us, that, if a conſonant precede this termination, the preceding accented vowel is ſhort, except it be *u*, as *severity*, *curioſity*, *impunity*, &c.: we find too, that even *u* contracts itſelf before two conſonants, as in *curvity*, *taciturnity*, &c. and that *ſcarcity* and *rarity* (ſignifying uncommonneſs; for *rarity*, thinneſs, has the *a* ſhort); are the only exceptions to this rule throughout the language. The ſame obſervations are applicable to words ending in *ify*, as *juſtify*, *clarify*, &c. The only words where the antepenultimate accent in words of this termination does not ſhorten the vowel, are *glorify* and *notify*. The *y* in theſe words is always long, like the firſt ſound of *i*; and both accent and quantity are the ſame when theſe words take the additional ſyllable *able*, as *juſtifiable*, *rarefiable*, &c. (183.)

512. To theſe may be added the numerous claſs of words ending in *arous*, *erous*, and *orous*, as *barbarous*, *vociferous*, and *humorous*; all which have the accent on the antepenultimate ſyllable, except *canorous* and *ſonorous*; which ſome unlucky ſcholar happening to pronounce with the accent on the penultimate ſyllable, in order to ſhow their derivation from the Latin adjectives, *canorus* and *ſonorus*, they ſtand like ſtrangers amidſt a crowd of ſimilar words, and are ſure to betray a mere Engliſh ſcholar into a wrong pronunciation.

To polyſyllables in theſe terminations might be added thoſe in *ative*, *atory*, *itive*, &c.; words ending in *ative* can never have the accent on the penultimate ſyllable, if there is a higher ſyllable to place it on, except in the word *creative*; and when this is the caſe, as it is ſeldom otherwiſe, the accent ſeems to reſt on the root of the word; or on that ſyllable which has the accent on the noun, adjective or verb, with which the word in *ative* correſponds: thus *copulative*, *eſtimative*, *alterative*, &c. follow the verbs to *copulate*, to *eſtimate*, to *alter*, &c. When derivation does not operate to fix the accent, a double conſonant will attract it to the antepenultimate ſyllable, as *appellative*; and two conſonants have ſometimes this power, in oppoſition to derivation, as *adverſative* and *argumentative*, from *adverſe* and *argument*. *Indicative* and *interrogative* are likewiſe exceptions, as they do not follow the verbs to *indicate* and *interrogate*: but as they are grammatical terms, they ſeem to have taken their accent from the ſecondary accent, we ſometimes give to the Latin words *indicativus* and *interrogativè* (ſee the word ACADEMY). Words ending in *ary*, *ery*, or *ory*, have generally the accent on the root of the word; which, if it conſiſts of three ſyllables, muſt neceſſarily be accented on the firſt, as *contrary*, *treachery*, *factory*, &c.; if of four or five, the accent is generally on that ſyllable which has the accent in the related or kindred words; thus *expoſtulatory* has the accent on the ſame radical ſyllables as *expoſtulate*; and *congratulatory*, as *congratulate*: *interrogatory* and *derogatory* are exceptions here, as in the termination *ative*; and if *pacificatory*, *ſacrificatory*,* *ſignificatory*, *veſicatory*, &c. have not the accent on the firſt ſyllable, it ſeems to ariſe from the averſion we ſeem to have at placing even the ſecondary accent on the antepenultimate *a*, (which we ſhould be very apt to do if the principal accent were on the firſt ſyllable,) and

* Theſe words ought certainly to be accented alike; and accordingly we find Dr. Johnſon, Mr. Sheridan, Mr. Barclay, and Mr. Smith, place the accent on the ſecond ſyllable; but though Fenning accents *ſignificatory* in the ſame manner, he places the accent on the antepenultimate of *pacificatory*; and Kenrick likewiſe accents the ſecond ſyllable of *ſignificatory*, but the firſt of *pacificatory*: the other orthöepiſts who have not got theſe words have avoided theſe inconſiſtencies.

and the difficulty there would be in pronouncing ſuch long words with ſo many unaccented ſyllables at the end, if we were to lay the accent on the firſt. Words ending in *ative* have the accent regularly on the penultimate ſyllable, except *adjective*, which, like *indicative*, being a grammatical word, ſeems to have taken its accent from the ſecondary ſtreſs of the Latin *adjectivus* (ſee ACADEMY); and every word ending in *tive*, preceded by a conſonant, has the accent on the penultimate ſyllable likewiſe, except *ſubſtantive*; and, perhaps, for the reaſon juſt given. After all, it muſt be owned, that words ending in *ative* and *atory* are the moſt irregular and deſultory of any in the language; as they are generally accented very far from the end, they are the moſt difficult to pronounce; and therefore, whenever uſage will permit, we ſhould incline the ſtreſs as much as poſſible to the latter ſyllables: thus *refractory* ought never to have the accent on the firſt ſyllable; but *refectory*, with the accent on the firſt, is a ſchool term, and, like *ſubſtantive*, *adjective*, *indicative*, and *interrogative*, muſt be left in quiet poſſeſſion of their Latin ſecondary accent.

Enclitical Accent.

513. I have ventured to give the name of *enclitical* to the accent of certain words, whoſe terminations are formed of ſuch words as ſeem to loſe their own accent, and throw it back on the laſt ſyllable of the word with which they coaleſce, ſuch as *theology*, *orthography*, &c. The readineſs with which theſe words take the antepenultimate accent, the agreeable flow of ſound to the ear, and the unity it preſerves in the ſenſe, are ſufficient proofs of the propriety of placing the accent on this ſyllable, if cuſtom were ambiguous. I do not remember to have heard the accent diſputed in any word ending in *ology*; but *orthography* is not unfrequently pronounced with the accent on the firſt ſyllable, like *orthodoxy*. The temptation we are under to diſcover our knowledge of the component parts of words, is very apt to draw us into this pronunciation; but as thoſe words which are derived from the Greek, and are compounded of λόγος, have univerſally given into this enclitical accentuation, no good reaſon appears for preventing a ſimilar pronunciation in thoſe compounded of γραφω, as by placing the accent on the antepenultimate ſyllable the word is much more fluent and agreeable to the ear. It is certain, however, that at firſt ſight the moſt plauſible reaſoning in the world ſeems to lie againſt this accentuation. When we place the accent on the firſt ſyllable, ſay our opponents, we give a kind of ſubordinate ſtreſs to the third ſyllable *graph*: by which means the word is divided into its primitives ορθος and γράφω, and thoſe diſtinct ideas it contains, are preſerved, which muſt neceſſarily be confounded by the contrary mode; and that pronunciation of compounds, ſay they, muſt certainly be the beſt which beſt preſerves the import of the ſimples.

514. Nothing can be more ſpecious than this reaſoning, till we look a little higher than language, and conſider its object; we ſhall then diſcover, that in uniting two words under one accent, ſo as to form one compound term, we do but imitate the ſuperior operations of the mind, which, in order to collect and convey knowledge, unites ſeveral ſimple ideas into one complex one. "The end of language," ſays Mr. Locke, "is by ſhort ſounds to ſignify with "eaſe and diſpatch general conceptions, wherein not only abundance of par-"ticulars are contained, but alſo a great variety of independent ideas are col-"lected into one complex one, and that which holds theſe different parts to-"gether in the unity of one complex idea, is the word we annex to it." For, as Mr. Locke continues, "Men, in framing ideas, ſeek more the convenience "of

Digitized from Best Copy Available

" of language and quick deſpatch by ſhort and comprehenſive ſigns, than the " true and preciſe nature of things; and therefore, he who has made a com- " plex idea of a body with life, ſenſe, and motion, with a faculty of reaſon " joined to it, need but uſe the ſhort monoſyllable, *man*, to expreſs all parti- " culars that correſpond to that complex idea." So it may be ſubjoined, that in framing words for the purpoſe of immediate communication, the end of this communication is beſt anſwered by ſuch a pronunciation as unites ſimples into one compound, and at the ſame time renders the compound as much a ſimple as poſſible: but it is evident that this is done by no mode of accentuation, ſo well as that which places the accent on the antepenultimate ſyllable of the words *theólogy*, *orthógraphy*; and therefore that this accentuation, without inſiſting on its ſuperior harmony, muſt beſt anſwer the great end of language (328).

515. This tendency in our language, to ſimplify compounds, is ſufficiently evident in that numerous catalogue of words, where we find the long vowel of the ſimple changed into a ſhort one in the compound, and by this means loſing much of its original import to the ear: thus *breakfast*, *shepherd*, *vineyard*, *meadow*, *shadow*, *zealous*, *hearken*, *valley*, *cleanse*, *cleanly* (neat), *forehead*, *wilderness*, *bewilder*, *kindred*, *hinder*, *knowledge*, *darling*, *fearful*, *pleasant*, *pleasure*, *whitster*, *whitleather*, *seamstress*, *stealth*, *wealth*, *health*, *wisdom*, *wizard*, *parentage*, *lineage*, *children*, *pasty*, *gosling*, *collier*, *holiday*, *Christmas*, *Michaelmas*, *windlass*, *cripple*, *hinder*, *stripling*, *starling*, *housewife*, *husband*, *primer*, *peascod*, *fieldfare*, *birth* from *bear*, *dearth* from *dear*, *weary* from *wear*, and many others, entirely loſe the ſound of the ſimple in their compound or derivative.

516. The long *i* in *white*, when a ſimple, is almoſt univerſally changed into a ſhort one in proper names, as *Whitchurch*, *Whitefield*, *Whitbread*, *Whitlock*, *Whitaker*, &c. for compendiouſneſs and deſpatch being next in importance to perſpicuity, when there is no danger of miſtake, it is no wonder that the organs ſhould fall into the ſhorteſt and eaſieſt ſounds.

517. It muſt, however, be obſerved, that this tendency to unite ſimples into a compound, by placing an accent exactly where the two words coaleſce, is ſtill ſubſervient to the laws of harmony. The Greek word δοκέω, which ſignifies to *opine*, and from which the laſt ſyllables of *orthodoxy* are derived, was never a general ſubjunctive word like λογος and γραφω; and even if it had been ſo, the aſſemblage of conſonants in the letter *x* would have prevented the ear from admitting an accent on the ſyllable immediately preceding, as the *x* would, by this means, become difficult to pronounce. Placing the accent, therefore, on the firſt ſyllable of *orthodoxy*, gives the organs an opportunity of laying a ſecondary ſtreſs upon the third, which enables them to pronounce the whole with diſtinctneſs and fluency: thus *Galaxy* and *Cachexy*, having the accent on the firſt ſyllable, are very difficult to pronounce; but this difficulty is removed by placing the accent a ſyllable higher in the words *apoplexy*, *ataraxy*, and *anorexy*.

518. But the numerous claſſes of words that ſo readily adopt this enclitical accent, ſufficiently prove it to be agreeable to the genius of our pronunciation. This will more evidently appear by adducing examples. Words in the following terminations have always the accent on that ſyllable where the two parts unite, that is, on the antepenultimate ſyllable:

In *logy*, as *apology*, *ambilogy*, *genealogy*, &c.
In *graphy*, as *geography*, *orthography*, *historiography*, &c.
In *phagus*, as *sarcophagus*, *ichthyophagus*, *androphagus*, &c.

In *loquy*, as *obloquy*, *soliloquy*, *ventriloquy*, &c.
In *strophe*, as *catastrophe*, *apostrophe*, *anastrophe*, &c.
In *meter*, as *geometer*, *barometer*, *thermometer*, &c.
In *gonal*, as *diagonal*, *octagonal*, *polygonal*, &c.
In *vorous*, as *carnivorous*, *granivorous*, *piscivorous*, &c.
In *ferous*, as *bacciferous*, *cocciferous*, *somniferous*, &c.

519. Some of these Greek compounds seem to refuse the antepenultimate accent, for the same reason as *orthodoxy*; such as *necromancy*, *chiromancy*, *hydromancy*; and those terminating in *archy*, as *hierarchy*, *oligarchy*, *patriarchy*; all of which have the accent on the first syllable, which gives the organs time to recover their force upon the third, and to pronounce the two consonants with much more ease than if the accent immediately preceded them; but *periphrasis* and *antiphrasis*, besides their claim to the accent of their originals, readily admit of the accent on the second syllable, because the consonants in the two last syllables do not come together, and are therefore easily pronounced after the accent. Words of more than two syllables ending in *ogue*, as *pedogogue*, *dialogue*, &c. have the accent on the antepenultimate. *Orthöepy* having no consonant in the antepenultimate syllable, naturally throws its accent on the first. See MONOMACHY.

520. By this view of the enclitical terminations we may easily perceive how readily our language falls into the antepenultimate accent in these compounded polysyllables; and that those terminations which seem to refuse this accent, do it rather from a regard to etymology than analogy: thus words ending in *asis*, as *periphrasis*, *apophasis*, *hypostasis*, *antiperistasis*, &c. have the antepenultimate accent of their originals. The same may be observed of those ending in *esis*, as *hypothesis*, *antithesis*, *parenthesis*, &c.; but *exegesis*, *mathesis*, *auxesis*, *catachresis*, *paracentesis*, *aposiopesis*, have the accent on the penultimate syllable, because the vowel in this syllable is long in Greek and Latin. But all words ending in *osis* have the accent on the penultimate, except *metaphorphosis* and *apotheosis*, which desert the accent of their Latin originals, while those in *ysis* are accented regularly on the antepenultimate in Greek, Latin, and English, as *analysis*, *paralysis*, &c. We may note too, that every *s* in all these terminations is sharp and hissing. See the words EXOSTOSIS and APOTHEOSIS.

521. Words of three syllables ending in *ator* have the accent on the penultimate, as *spectator*, *collator*, *delator*, &c. except *orator*, *senator*, *legator*, and *barrator*. But words in this termination of more than three syllables, though they have generally the accent on the penultimate, are subject to a diversity not easily reduced to the rule: thus *navigator*, *propagator*, *dedicator*, &c. are sometimes

Digitized from Best Copy Available

ſometimes pronounced with the accent on the firſt ſyllable, and ſometimes on the third: but as theſe words may be pronounced with an accent on both theſe ſyllables, it is of leſs conſequence on which ſyllable we place the accent, when we uſe only one (528). The general rule certainly inclines to the penultimate accent; but as all theſe words are verbal nouns, and, though generally derived from Latin words of the ſame terminations, have verbs correſponding to them in our own language, it is very natural to preſerve the accent of the verb in theſe words, as it gives an emphaſis to the moſt ſignificant part of them: thus *equivocator*, *prevaricator*, *dedicator*, might be regularly formed from the verbs to *equivocate*, to *prevaricate*, and to *dedicate*; and, agreeably to analogy, would have been written *equivocater*, *prevaricater*, and *dedicater*; but an affectation of preferring every analogy to our own, has given theſe words a Latin termination, which anſwers no purpoſe, but to involve our language in abſurdities; but the ear, in this caſe, is not quite ſo ſervile as the eye: and though we are obliged to write theſe words with *or*, and not *er*, we generally hear them pronounced as if they were formed from our own verbs, and not from Latin nouns in *ator*. But when the word has no verb in our own language to correſpond to it, the accent is then placed with great propriety upon the *a*, as in Latin: thus *violator*, *inſtigator*, *navigator*, &c. ought to have the accent on the firſt ſyllable; and *emendator*, *gladiator*, *adulator*, &c. on the laſt but one.

SECONDARY ACCENT.

522. Hitherto we have conſidered that accent only, which neceſſarily diſtinguiſhes one ſyllable in a word from the reſt; and which, with very little diverſity, is adopted by all who ſpeak the Engliſh language.

523. The ſecondary accent is that ſtreſs we may occaſionally place upon another ſyllable, beſides that which has the principal accent, in order to pronounce every part of the word more diſtinctly, forcibly, and harmoniouſly. Thus this accent may be placed on the firſt ſyllable of *converſation*, *commendation*, &c.

524. There are few authors who have not taken notice of two accents upon ſome of the longer polyſyllables, but none have once hinted that one of theſe is not eſſential to the ſound of the word: they ſeem to have ſuppoſed both accents equally neceſſary, and without any other difference than that one was pronounced more forcibly than the other. This miſtake aroſe from a want of ſtudying the ſpeaking voice. A knowledge of this would have told them, that one accent only was eſſential to every word of more than one ſyllable, and that the ſecondary ſtreſs might, or might not, be adopted, as diſtinctneſs, force, or harmony ſhould require: thus *complaiſant*, *contraband*, *caravan*; and *violin*, *partiſan*, *artiſan*, *courteſan*, *metaphyſick*, have frequently an accent on the firſt, as well as on the third ſyllable, though a ſomewhat leſs forcible one. The ſame may be obſerved of *repartee*, *referee*, *privateer*, *domineer*, &c.; but it muſt ſtill be obſerved, that though an accent be allowable on the firſt ſyllable of theſe words, it is by no means neceſſary; they may all be pronounced with one accent, and that on the laſt ſyllable, without the leaſt deviation from propriety.

525. In order to give ſome idea of the nature of the ſecondary accent, let us ſuppoſe, that, in giving our opinion of an aſtronomical argument, we ſay,

" It

Digitized from Best Copy Available

"It is a dirĕct demonstrátion of the Copernican syſtem."

In this ſentence, as an accent is neceſſarily upon the laſt ſyllable of *direct*, we ſeldom lay a ſtreſs on the firſt ſyllable of *demonstration*, unleſs we mean to be uncommonly emphatical; but in the following ſentence,

"It is a démonſtrátion of the Copernican ſyſtem."

Here, as no accented word precedes *demonstration*, the voice finds a reſt, and the ear a force, in placing an accent on the firſt, as well as on the third ſyllable.

526. But though we may, or may not, uſe the ſecondary accent at pleaſure, it is by no means a matter of indifference on what ſyllable we place it: this is fixed with as much certainty as the place of the principal accent itſelf; and a wrong poſition of one, would as much derange the ſound of the word, as a wrong poſition of the other: and it muſt be carefully noted, that though we lay no ſtreſs upon the ſyllable which may have the ſecondary accent, the conſonants and vowels have exactly the ſame ſound as if the doubtful ſyllable (as it may be called) were accented. Thus, though I lay no ſtreſs upon the ſecond ſyllable of *negociation*, *pronunciation*, *eccleſiaſtic*, &c. the *c* and *s* go into the ſound of *sh* and *zh*, as if the ſecondary accent were on the preceding ſyllable (357) (451) (459).

527. It may be obſerved, in the firſt place, that the ſecondary accent is always two ſyllables, at leaſt, diſtant from the principal accent: thus in *demonstration*, *lamentation*, *provocation*, &c. the ſecondary accent is on the firſt ſyllable, and the principal on the third; and in *arteriotomy*, *meteorology*, and *hypochondriacal*, the ſecondary accent is on the firſt, and the principal on the fourth ſyllable; and in the word *indivisibility* we may place two ſecondary accents, one upon the firſt, and the other on the third.

528. In the next place it may be obſerved, that though the ſyllable on which the principal accent is placed, is fixed and certain, yet we may, and do frequently make the ſecondary principal, and the principal ſecondary: thus *caravan*, *complaisant*, *violin*, *repartee*, *referee*, *privateer*, *domineer*, *courtezan*, *artizan*, *charlatan*, may all have the greateſt ſtreſs on the firſt, and the leaſt on the laſt ſyllable, without any violent offence to the ear: nay, it may be aſſerted, that the principal accent on the firſt ſyllable of theſe words, and none at all on the laſt, though certainly improper, has nothing in it grating or diſcordant; but placing an accent on the ſecond ſyllable of theſe words would entirely derange them, and produce an intolerable harſhneſs and diſſonance. The ſame obſervations may be applied to *demonstration*, *lamentation*, *provocation*, *navigator*, *propagator*, *alligator*, and every ſimilar word in the language. But, as we have obſerved, No. 526, the conſonants *t*, *d*, *c*, and *s*, after the ſecondary accent, are exactly under the ſame predicament as after the primary; that is, if they are followed by a diphthong or diphthongal vowel, theſe conſonants are pronounced like *sh*, *tsh*, *zh*, or *j*, as *sententiosity*, *partiality*, &c. (526).

QUANTITY.

529. In treating this part of pronunciation, it will not be neceſſary to enter into the nature of that quantity which conſtitutes poetry; the quantity here conſidered will be that which relates to words taken ſingly; and this is nothing more

Digitized from Best Copy Available

more than the length or ſhortneſs of the vowels, either as they ſtand alone, or as they are differently combined with vowels or conſonants. (63.)

530. Quantity, in this point of view, has already been fully conſidered under every vowel and diphthong in the language. What remains to be ſaid on this ſubject is, the quantity of vowels under the ſecondary accent. We have ſeen that vowels, under the principal accent, before the diphthongs *ia*, *ie*, *eou*, *ion*, are all long, except *i*. (507.) That all vowels are long before the terminations *ity* and *ety*, as *deity*, *piety*, &c. (511); that if one or more conſonants precede theſe terminations, every preceding accented vowel, except the *a* in *ſcarcity* and *rarity*, ſignifying uncommonneſs, is ſhort but *u*: and that the ſame analogy of quantity is found before the terminations *ic* and *ical*, and the numerous enclitical terminations we have juſt been pointing out. Here we find cuſtom conformable to analogy; and that the rules for the accent and quantity of theſe words admit of ſcarcely any exceptions. In other parts of the language, where cuſtom is more capricious, we can ſtill diſcover general rules; and there are but very few words in which the quantity of the vowel under the principal accent is not aſcertained. Thoſe who have but a common ſhare of education, and are converſant with the pronunciation of the capital, are ſeldom at a loſs for the quantity of the vowel under that accent which may be called principal; but the ſecondary accent in the longer polyſyllables does not ſeem to decide the quantity of the vowels ſo invariably. Mr. Sheridan divides the words *deglutition*, *depravation*, *degradation*, *dereliction*, and *democratical*, into *de-glu-ti-tion*, *de-pra-va-tion*, *de-gra-da-tion*, *de-re-lic-tion*, and *de-mo-crat-i-cal*; while Dr. Kenrick more accurately divides them into *deg-lu-ti-tion*, *dep-ra-va-tion*, *deg-ra-da-tion*, and *dem-o-crat-i-cal*; but makes not any diſtinction between the firſt *o* in *profanation* and *profane*, *prodigality* and *prodigious*, *prorogation* and *prorogue*, though he diſtinguiſhes this letter in the firſt ſyllable of *progress* and that in *progression*: and though Mr. Sheridan divides *retrograde* into *ret-ro-grade*, he divides *retrogradation*, *retrogreſſion*, *retroſpect*, *retroſpection*, and *retroſpective*, into *re-tro-gra-da-tion*, *re-tro-gres-ſion*, *re-tro-ſpect*, *re-tro-ſpec-tion*, and *re-tro-ſpec-tive*. At the firſt ſight of theſe words we are tempted to prefer the prepoſition in a diſtinct ſyllable, as ſuppoſing that mode to convey more diſtinctly each part of the word; but cuſtom at large, the beſt interpreter of nature, ſoon lets us ſee that theſe prepoſitions coaleſce with the word they are prefixed to, for reaſons greatly ſuperior to thoſe which preſent themſelves at firſt. (514.) If we obſerve the tendency of pronunciation, with reſpect to inſeperable prepoſitions, we ſhall find, that thoſe compound words which we adopt whole from other languages, we conſider as ſimples, and pronounce them without any reſpect to their component parts; but thoſe compounds which we form ourſelves retain the traces of their formation, in the diſtinction which is obſervable between the prepoſitive and radical part of the word: thus *retrograde*, *retrogreſſion*, *retroſpect*, and *retroſpective*, coming compounded to us from the Latin, ought, when the accent is on the prepoſition, to ſhorten the vowel, and unite it to the root, as in *res-ur-rec-tion*, *rec-ol-lec-tion*, *prep-o-ſit-ion*, &c.; while *re-commit*, *re-convey*, &c. being compounds of our own, muſt preſerve it ſeparate.

531. From what has been obſerved, ariſes this general rule: where the compound retains the primary ſenſe of the ſimples, and the parts of the word are the ſame in every reſpect, both in and out of compoſition, then the prepoſition is pronounced in a diſtinct ſyllable; but when the compound departs ever ſo little from the literal ſenſe of the ſimples, the ſame departure is obſervable in the pronunciation; hence the different ſyllabication and pronunciation of *re-commence* and *rec-om-mend*; the former ſignifies a repetition of a commencement, but

Digitized from Best Copy Available

but the latter does not imply a repetition of a commendation: thus *re-petition* would ſignify to petition again; while *rep-etition* ſignifies only an iteration of the ſame act, be it what it will. The ſame may be obſerved of the words *re-create* and *rec-reate*, *re-formation* and *ref-ormation*.

532. That this is perfectly agreeable to the nature of the language, appears from the ſhort pronunciation of the vowel in the firſt ſyllable of *preface*, *prelate*, *prelude*, *prologue*, &c. as if divided into *pref-ace*, *prel-ate*, *prel-ude*, *prol-ogue*, &c. It is much to be regretted, however, that this ſhort ſound of the penultimate vowel has ſo much obtained in our language, which abounds too much in theſe ſounds; nor can etymology be always pleaded for this pronunciation; for in the foregoing words, the firſt vowel is long in the Latin *præfatio*, *prælatus*, *prælu-dium*, though ſhort in *prŏlogus*: for though in words from the Greek the prepoſition προ was ſhort, in Latin it was generally long; and why we ſhould ſhorten it in *progress*, *project*, &c. where it is long in Latin, can only be accounted for by the ſuperficial application of a general rule, to the prejudice of the ſound of our language. (543.)

533. It will be neceſſary, however, to obſerve, that in forming a judgement of the propriety of theſe obſervations, the niceſt care muſt be taken not to confound thoſe prepoſitions which are under the primary and ſecondary accent, with thoſe which immediately precede the ſtreſs; for *preclude*, *pretend*, &c. are under a very different predicament from *prologue*, *preposition*, &c.; and the very ſame law that obliges us to pronounce the vowel ſhort in the firſt ſyllable of *prov-i-dence*, *prov-o-cation*, and *prof-a-nation*, obliges us to pronounce the vowel open, and with ſome degree of length in *pro-vide*, *pro-voke*, and *pro-fane*. The ſame may be obſerved of the *e* in *re-pair* and *rep-a-ration*, *re-ply* and *rep-li-cation*, *repeat* and *rep-e-tition*, the accent making the whole difference between the quantity of the vowel in one word and the other.

534. The only exception to the ſhortening power of the ſecondary accent is the ſame as that which prevents the ſhortening power of the primary accent, (503.) namely, the vowel *u*, as in *lucubration*, or when any other of the vowels are ſucceeded by a ſemi-conſonant diphthong, (196:) thus *mediator* and *mediatorial* have the *e* in the firſt ſyllable as long as in *mediate*; *deviation* has the *e* in the firſt ſyllable as long as in *deviate*, notwithſtanding the ſecondary accent is on it, and which would infallibly have ſhortened it, if it had not been for the ſucceeding diphthong *ia*; and even this diphthong in *gladiator* has not the power of preſerving the firſt ſyllable long, though Mr. Sheridan, by his marking it, has made it ſo.

535. From what has been ſeen of accent and quantity, it is eaſy to perceive how prone our language is to an antepenultimate accent, and how naturally this accent ſhortens the vowel it falls upon: nay, ſo great a propenſity have vowels to ſhrink under this accent, that the diphthong itſelf, in ſome words, and analogy in others, are not ſufficient to prevent it, as *valiant*, *retaliate*. Thus, by the ſubjoining only of *al* to *nation*, with the *a* long, it becomes *national*, with the *a* ſhort, though contrary to its relation with *occasion* and *congregation*, which do not ſhorten the *a* upon being made *occasional* and *congregational*: in like manner the acquiſition of the ſame termination to the word *nature*, makes it *nat-u-ral*; but this, it may be preſumed, is derived from the Latin *naturalis*, and not from adding *al* to the Engliſh word, as in the foregoing inſtances; and thus it comes under the ſhortening power of the antepenultimate accent, notwithſtanding the ſemi-conſonant diphthong *u*.

536. The ſame ſhortening power in the antepenultimate accent may be obſerved in *rational* and *ratiocinate*, where the firſt *a* in the firſt word, and the *o* in the

Digitized from Best Copy Available

the ſecond, are ſhort. The firſt *a* in the ſecond word is ſhort alſo by the power of the ſecondary accent; though Mr. Sheridan has, in my opinion, very erroneouſly divided *ratiocination* into *ra-sho-sy-na-shun;* that is, into a ſyllable leſs than it ought to have, with the *o* long inſtead of ſhort.

537. The accent on the Latin antepenultimate ſeemed to have ſomething of a ſimilar tendency: for though the great difference in the nature of the Latin and Engliſh accent will allow us to argue from one to the other, but in very few circumſtances (503), yet we may perceive in that accent, ſo different from ours in general, a great coincidence in this particular; namely, its tendency to ſhorten an antepenultimate ſyllable. Biſhop Hare tells us, that "Quæ acuuntur " in tertia ab extrema, interdum acuta corripiunt, ſi poſitione ſola longa ſunt, " ut *óptime*, *sérvitus*, *pérvelim*, *Pámphilus*, et pauca alia, quo Cretici mutantur, in " Anapeſtos. Idem factum eſt in *néutiquam*, licet incipiat diphthongo." *De Metr. Comic*, pag. 62. Thoſe words which have the acute accent on the antepenultimate ſyllable, have ſometimes that ſyllable ſhortened, if it was only long by poſition, as *óptime*, *sérvitus*, *pérvelim*, *Pámphilus*, and a few others, which by this means are changed from Cretic to Anapeſtic feet; nay, *néutiquam* undergoes the ſame fate, though it begins with a diphthong.

SYLLABICATION.

538. Dividing words into ſyllables is a very different operation, according to the different ends propoſed by it. The object of ſyllabication may be, either to enable children to diſcover the ſound of words they are unacquainted with, or to ſhow the etymology of a word, or to exhibit the exact pronunciation of it.

539. When a child has made certain advances in reading, but is ignorant of the ſound of many of the longer words, it may not be improper to lay down the common general rule to him, that a conſonant between two vowels muſt go to the latter, and that two conſonants coming together muſt be divided. Farther than this, it would be abſurd to go with a child; for telling him that compounds muſt be divided into their ſimples, and that ſuch conſonants as may begin a word may begin a ſyllable, requires a previous knowledge of words, which children cannot be ſuppoſed to have; and which, if they have, makes the diviſion of words into ſyllables unneceſſary. Children, therefore, may be very uſefully taught the general rule abovementioned, as, in many caſes, it will lead them to the exact ſound of the word, as in *pro-vi-ded:* and in others, it will enable them to give a good gueſs at it, as in *de-li-cate;* and this is all that can be expected: for when we are to form an unknown compound ſound, out of ſeveral known ſimple ſounds; (which is the caſe with children, when we wiſh them to find out the ſound of a word by ſpelling it;) this, I ſay, is the only method that can be taken.

540. But an etymological diviſion of words is a different operation: it is the diviſion of a perſon acquainted with the whole word, and who wiſhes to convey by this diviſion, a knowledge of its conſtituent parts, as *ortho-graphy*, *theo-logy*, &c

541. In the ſame manner, a perſon, who is pre-acquainted with the whole compound ſound of a word, and wants to convey the ſound of each part to one unacquainted with it, muſt divide it into ſuch partial ſounds as, when put together again, will exactly form the whole as *or-thog-ra-phy*, *the-ol-o-gy*, &c. This is

the

Digitized from Best Copy Available

the method adopted by thoſe who would convey the whole ſound, by giving diſtinctly every part; and, when this is the object of ſyllabication, Dr. Lowth's rule is certainly to be followed. "The beſt and eaſieſt rule," ſays the learned biſhop, "for dividing the ſyllables in ſpelling, is, to divide them as they "are naturally divided in a right pronunciation, without regard to the deri- "vation of words, or the poſſible combination of conſonants, at the beginning "of a ſyllable" *Introduction to Eng. Gram.* pag. 7.

542. In this view of ſyllabication we conſider it only as the picture of actual pronunciation; but may we not conſider it as directed likewiſe by ſome laws of its own? Laws, which ariſe out of the very nature of enunciation, and the ſpecific qualities of the letters? Theſe laws certainly direct us to ſeparate double conſonants, and ſuch as are uncombinable from the incoaleſcence of their ſounds: and if ſuch a ſeparation will not paint the true ſound of the word, we may be certain that ſuch ſound is unnatural, and has ariſen from caprice: thus the words *Chamber*, *Cambridge*, and *Cambrick*, muſt be divided at the letter *m*, and as this letter, by terminating the ſyllable according to the ſettled rules of pronunciation, ſhortens the vowel—the general pronunciation given to theſe words muſt be abſurd, and contrary to the firſt principles of the language. *Angel*,* *ancient*, *danger*, *manger*, and *ranger*, are under the ſame predicament; but the paucity of words of this kind, ſo far from weakening the general rule, ſtrengthen it. See CHANGE.

543. By an induction which demonſtrates the ſhortening power of the antepenultimate accent, has been ſhown the propriety of uniting the conſonant to the vowel in the firſt ſyllable of *demonſtration*, *lamentation*, *propagation*, &c. we thus decide upon the quantity of theſe vowels, which are ſo uncertain in our beſt dictionaries; and may we not hope, by a ſimilar induction, and with the firſt principles of language in view, to decide the true, genuine, and analogical ſound of ſome words of another kind which waver between different pronunciations? The antepenultimate accent has unqueſtionably a ſhortening power; and I have not the ſmalleſt doubt that the penultimate accent has a lengthening power: that is, if our own words, and words borrowed from other languages of two ſyllables, with but one conſonant in the middle, has been left to the general ear, the accent on the firſt ſyllable would have infallibly lengthened the firſt vowel. A ſtrong preſumption of this ariſes from our pronunciation of all Latin diſſyllables in this manner, without any regard to the quantity of the original, (ſee DRAMA,) and the ancient practice of doubling the conſonant when preceded by a ſingle vowel in the participial terminations, as to *begin*, *beginning*, to *regret*, *regretted*: and I believe it may be confidently affirmed, that words of two ſyllables from the Latin, with but one conſonant in the middle, would always have had the firſt vowel long, if a pedantic imitation of Latin quantity had not prevented it (ſee DRAMA). Let an Engliſhman, with only an Engliſh education, be put to pronounce *zephyr*, and he will, without heſitation, pronounce the *e* long, as in *zenith*: if you tell him the *e* is pronounced ſhort in the Latin *zephyrus*, which makes it ſhort in Engliſh, and he ſhould happen to aſk you the Latin quantity of the firſt ſyllable of *comic*, *mimic*, *ſolace*, &c. your anſwer would be a contradiction to your rule.—What irrefragably proves this to be the genuine analogy of Engliſh quantity, is the different quantity we give a Latin word of two ſyllables when in the nominative, and when in an oblique caſe: thus in the firſt ſyllable

* It is highly probable that, in Ben Jonſon's time, the *a* in this word was pronounced as in *an*, ſince he claſſes it to ſhow the ſhort ſound of *a* with *art*, *act*, and *apple*. Grammar.

Digitized from Best Copy Available

ſyllable of *sidus* and *nomen*, which ought to be long; and of *miser* and *onus*, which ought to be ſhort, we equally uſe the common long ſound of the vowels: but in the oblique caſes, *sideris*, *nominis*, *miseri*, *oneris*, &c. we uſe quite another ſound, and that a ſhort one: and this analogy runs through the whole Engliſh pronunciation of the learned languages (533) (535).

544. But the ſmall dependence of the Engliſh quantity on that of the Latin will be beſt ſeen by a ſelection of words of two ſyllables, with the accent on the firſt, and but one conſonant in the middle, and comparing them with the Latin words from which they are derived.

Engliſh diſſyllables which have but one conſonant, or a mute and liquid in the middle, and have the firſt ſyllable accented, contraſted with the Latin words from which they are derived, marked with their reſpective quantities.

545. In this view of the Latin and Engliſh quantity, we ſee how uncertain it is to argue from the former to the latter; for though the Latin *accent* is frequently a rule for placing the Engliſh accent, as in words derived whole from that language, as *abdomen, acumen*, &c. (503), or preſerving the ſame number of ſyllables, as in *impudent, elegant*, from *impudens, elegans*, &c. (503), yet the *quantity* of the Latin ſeems to have no influence on that of the Engliſh. In words of two ſyllables, where one conſonant comes between two vowels, as *focus, baſis, local*, &c. though the vowel in the firſt ſyllable is ſhort, in Latin, it is long in Engliſh; and inverſely, *florid, frigid, livid*, &c. have the vowels in the firſt ſyllable ſhort, though theſe vowels are long in *floridus, frigidus, lividus*, &c.; ſo that if any thing like a rule can be formed, it is, that when a word of three ſyllables in Latin, with the two firſt ſhort, is angliciſed by dropping the laſt ſyllable; we ſhorten the firſt ſyllable of the Engliſh diſſyllable, unleſs it ends with the vowel *u* (535). Thus we ſee the ſhortening power of our Engliſh antepenultimate accent, which ſhortens every antepenultimate vowel but *u* in our pronunciation of Latin words; as in *mimicus vividus*, &c. and continues its ſhortening power in the penultimate accent of theſe words when angliciſed into *mimick* and *vivid;* and hence it is that the ſhort quantity of the firſt vowel in diſſyllables is become ſo prevalent in our language, to the great detriment of its ſound, and the diſturbance of its ſimplicity.

It may be neceſſary, in the next place, to take a view of ſuch words as are either of Saxon or French original, or not ſo immediately derived from the Latin, as to be influenced by its quantity.

From the peruſal of this ſelection we ſee a great majority of words where the firſt vowel is ſounded ſhort, and therefore, to ſome inſpectors it may ſeem improbable that the original tendency of our Saxon language was to the long quantity of the penultimate vowel. But as Mr. Nares very judiciouſly obſerves, "the rule is ſufficiently general to be admitted, and is undoubtedly "founded in the nature of our pronunciation:" for which he quotes Dr. Wallis, who ſays, "Hæc videtur genuina linguæ noſtræ ratio antiqua." *Elements of Orthöepy*, pag. 225.

546. Thoſe who have made the progreſs of languages their ſtudy, will obſerve, it is preſumed, that the broad ſounds of vowels change to the ſlender,* the difficult conſonants to the eaſier, and the long vowels to ſhort ones. This, it is imagined, will be found to be true in all languages, as well as our own; and ſuch alteration ſeems founded in the nature of man and of ſociety. The next object to underſtanding a language being deſpatch, it is no wonder that ſhort ſounds have been encroaching on us, and depriving us of the tune of our words for the ſake of gaining time. This is apparent in the abbreviation of ſimples when compounded, as in *knowledge*, *ſhepherd*, &c. (518): but as it is the buſineſs of art to correct and regulate the eccentricities of nature and the exceſſes of cuſtom, it ſhould be the care of every philoſophic grammarian to keep his eye upon the original genius and general ſcope of his language, and to ſuffer cuſtom to depart as little from them as poſſible. But although no inconſiſtency or want of analogy can alter any pronunciation which is once acknowledged and ſettled, yet when a pronunciation is wavering, conſiſtency, analogy, and general principles, ought to decide againſt a great majority of mere faſhion and caprice.

Thus have I endeavoured to give a diſtinct view of the correſpondence between the accent and quantity of the learned languages and our own; and to reſcue a plain Engliſhman (who, as Ben Jonſon ſays of Shakeſpeare, has little Latin and leſs Greek,) from the ſupercilious criticiſm of thoſe Greeklings and Latinitaſters, who are often remarkably ignorant of their own language, and yet frequently decide upon its accent and quantity, becauſe they have a ſmattering of Greek and Latin. If the queſtion turns upon the accent of an Engliſh word, the Latin word it is derived from is immediately produced, and ſentence paſſed without appeal; and yet if the Engliſhman were to aſk the rule on which this deciſion is founded, the ſcholar would, in all probability, be at a loſs to tell him. Has every Engliſh word, he might ſay, the ſame accent as the Latin word from which it is derived? This the ſcholar could not anſwer in the affirmative, as the leaſt recollection would tell him that *parſimony*, *acrimony*, &c. cannot be accented after the Latin *parſimonia*, *acrimonia*, &c. as the Latin is never accented higher than the antepenultimate. But perhaps the Engliſh word is adopted whole from the Latin. Here is undoubtedly a fair pretence for pronouncing it with the Latin accent; and yet we ſee how many exceptions there

* Alioqui, pro uſu, abuſus & inveteratus error nobis obtruderetur. Olim enim pro mutatione ſonorum mutabantur & literæ: & ſi quando conſuetudo aliquid mutaſſet, ſcribendi quoque modus ſtatim variabatur. Unde quum apud Ennium & Plautum *Sont* & *Servos* diceretur & ſcriberetur, poſtea multis aurium delicijs *o* vocali rejecta, quod vaſtus illius videretur ſonus, *u* litera ſubſtituta eſt, & ſono expreſſa; ita ut eorum loco *Sunt* & *Servus* prolatum & ſcriptum ſit. are to this rule (see No. 503, *b.*) Or, perhaps, the English word, though anglicised, retains the same number of syllables. This, indeed, may be said to be a *general* rule for preserving the Latin accent, but so general as to be neglected in a thousand instances (see No. 503, *f, g, h, i, k.*) But if the scholar, as is often the case, huddles quantity and accent together, and infers the English *quantity* from the Latin; the English scholar needs only to refer him to the selections here given, (No. (544) (545,) to show the inanity of such a plea. Upon the whole, therefore, I flatter myself that men of learning will be gratified to see the subject in a clearer point of view than any in which it has ever been exhibited; and the plain English scholar will be indebted to me for giving him as clear and distinct an idea of the connexion between the Greek and Latin accent and quantity, and the accent and quantity of his native tongue, as if he had Homer and Horace by heart; and for placing him out of the reach of those pert minor critics, who are constantly insulting him with their knowledge of the dead languages.

Of the Quantity of the Unaccented Vowels not in the same Syllable with Consonants.

547. Accented syllables, as we have before observed, (179,) are so strongly marked as to be easily comprehended when they are once settled by custom or analogy; but those immediately before or after the accent are in a state of uncertainty, which some of our best judges find themselves unable to remove. Some grammarians have called all the open vowels before or after the accent short, though the ear so evidently dictates the contrary in the *u* in *utility*, the *o* in *obedience*, &c. Some have saved themselves the trouble of farther search by comprehending these vowels under the epithet obscure; nay, so unfixed do the sounds of these vowels seem, that Dr. Kenrick, whose *Rhetorical Dictionary* shows he was possessed of very great philological abilities, seems as much at a loss about them as the meanest grammarian in the kingdom; for when he comes to mark the sound of the vowel *o* in the first syllable of a series of words with the accent on the second, he makes the *o* in *promulge*, *propel*, and *prolix*, long, as they ought to be; and the same letter in *proboscis*, *proceed*, and *procedure*, short. *Dominion*, *domestic*, *donation*, and *domain* are marked as if pronounced *dom-inion*, *dom-estic*, *don-ation*, and *dom-ain*, with the *o* short; while the first of *docility*, *potential*, and *monotony*, have the *o* marked long, as in *donor*, *potent*, and *modish*; though it is certain to a demonstration, that the etymology, accent, and letters, being the same, the same sound must be produced, unless where custom has precisely marked a difference; and that the first syllables of *promulge*, *propel*, and *prolix*, and those of *proboscis*, *proceed*, and *procedure*, have no such difference, seems too evident to need proof.*

548. I know it may be demanded with great plausibility, how do I know that there is not this very inconsistency in custom itself? What right have I to suppose that custom is not as vague and capricious in these syllables as in those under the accent? To which I answer: if custom has determined the sound of these vowels, the dispute is at an end. I implicitly acquiesce in the decision; but if professors of the art disagree in their opinions, it is a shrewd sign that custom is not altogether so clear in its sentence; and I must insist on recurring to principles till custom has unequivocally decided.

549. Every vowel that is neither shortened by the accent, nor succeeded by a double consonant, naturally terminates a syllable; and this terminating vowel, though not so properly long as if the accent were on it, would be very improperly termed short, if by short, as is often the case, be meant shut (65). According to this idea of syllabication, it is presumed that the word *opinion* would fall into three distinct parts, and every part be terminated by a consonant but the first, thus *o-pin-ion*.

* I am aware that this ingenious writer seems to avoid this inconsistency, by premising, in his Rhetorical Grammar, page 43, that he has sometimes marked the *o* in words beginning with a preposition with the oratorial, and sometimes with the colloquial pronunciation: thus, in *commune*, *communicate*, &c. the oratorial sound is given as in the first syllable of *common*, while the colloquial sound changes the *o* into *u*, as if the words were written *cummune*, *cummunicate*, &c.: but the distinction in these examples does not touch the point: here there is a change only of one short sound for another, and not any promiscuous use of a long and short, or open and shut sound of the same letter. Dr. Kenrick himself, when he marks the *o* in *proboscis*, *proceed*, and *procedure*, does not adopt the short *u*, as he does in *commune*, *communicate*, &c.; nor is he aware of the essential difference with respect to the quantity of the vowel, in the double consonant in one set of words, and the single one in the other.

550. But it may be demanded, what reaſon is there in the nature of the thing for dividing the word in this manner, rather than into *op-in-ion*, where a conſonant ends every ſyllable? In this, as in many other caſes of delicacy, we may be allowed to prove what is right, by firſt proving what is wrong. Every ear would be hurt, if the firſt ſyllable of *opinion* and *opulence* were pronounced exactly alike, *op-in-ion* would be as different from *o-pin-ion* as *o-pu-lence* from *op-u-lence*, and conſequently a different ſyllabication ought to be adopted; but as *opulence* is rightly divided into *op-u-lence*, *opinion* muſt be divided into *o-pin-ion;* that is, the *o* muſt be neceſſarily ſeparated from the *p*, as in *o-pen*; for, as was before obſerved, every vowel pronounced alone has its open ſound, as nothing but its junction with a conſonant can ſhut it, and conſequently unaccented vowels not neceſſarily joined to a conſonant are always open; therefore, without violating the fundamental laws of pronunciation, *opinion* muſt neceſſarily be divided into *o-pin-ion* and not *op-in-ion*, and the *o* pronounced as in the word *open* and not as in *opulence*; which was the thing to be proved.

551. If theſe reaſons are valid with reſpect to the vowel in queſtion, they have the ſame force with reſpect to every other vowel not ſhut by a conſonant throughout the language. That the vowels in this ſituation are actually open, we may eaſily perceive by obſerving *that* vowel, which, from its diphthongal and ſemi-conſonant ſound, is leſs liable to ſuffer by obſcure pronunciation than any other. The letter *u*, in this ſituation, always preſerves itſelf full and open, as we may obſerve in *utility*, *lucubration*, &c. The *o*, the moſt open of all the ſimple vowels, has the ſame tendency in *obedience*, *opake*, *poſition*, &c. the *e* in the firſt ſyllable of *event*, in the ſecond of *delegate*, the firſt and third of *evangeliſt*, in the ſecond of *gayety*, *nicety*, &c. the *a* in the firſt of *abate*, and the ſecond of *probable*, &c. and the *i* in *nullity*. This unaccented letter being no more than *e*, and this ſound, when long, correſponding exactly with its ſhort ſound, (which is not the caſe with any of the other vowels (65) (66), the difference between the long and ſhort, or open and ſhut ſound of this letter, is leſs perceptible than in any other: yet we may eaſily perceive that a delicate pronunciation evidently leaves it open when unaccented in *indiviſibility*, as this word would not be juſtly pronounced if the *i* in every ſyllable were cloſed by a conſonant, as if divided into *in-div-is-ib-il-it-y*; the firſt, third, and fifth ſyllables, would, indeed, be juſtly pronounced according to this diviſion, as theſe have all accentual force, which ſhuts this vowel, and joins it to the ſucceeding conſonant; but in the ſecond, fourth, and ſixth ſyllables, there is no ſuch force, and conſequently it muſt remain open and unconnected with the conſonant; though, as was before obſerved, the long and ſhort ſound of this vowel are ſo near each other, that the difference is leſs perceived than in the reſt. Every ear would be diſpleaſed at ſuch a pronunciation as is indicated by *ut-til-lit-y*, *luc-ub-bration*, *op-pin-ion*, *pos-ition*, *ev-vent*, *ev-van-gel-liſt*, *ab-bate*, *prob-bab-ble*, &c.; but for exactly the ſame reaſons that the vowels out of the ſtreſs ought to be kept open in theſe words, the ſlender *i* muſt be kept open in the ſame ſituation in the word *in-di-vis-i-bil-i-ty*, and every ſimilar word in the language.*

552. From all this it will neceſſarily follow, that the cuſtom adopted by the ancients and moderns of joining the ſingle conſonant to the latter vowel in ſyllabication, when inveſtigating the unknown ſound of a word, has its foundation in reaſon and good ſenſe: that the only reaſon why vowels are ſhort and ſhut, is their junction with a conſonant; ſo thoſe that are not joined to conſonants, when we are not ſpeaking metrically, cannot be ſaid to be either ſhort or ſhut: and that as all accented vowels, when final or pronounced alone, have their open ſound, ſo thoſe vowels that are alone or final in a ſyllable muſt neceſſarily retain their open ſound likewiſe, as nothing but uniting inſtantaneouſly with the ſucceeding conſonant can ſhut them: and though nothing but a delicate ear will direct us to the degree of openneſs with which we muſt pronounce the firſt unaccented *o* in *docility*, *domeſtic*, *potential*, *proceed*, *monaſtic*, *monotony*, &c. we may be aſſured that it is exactly under the ſame predicament, with reſpect to ſound, in all theſe words: and as they can never be pronounced ſhort and ſhut, as if written *doſſility*, *dommeſtic*, &c. without hurting the dulleſt ear; ſo the *e* in *event*, *evangeliſt*, &c. and the *i* in the third ſyllable of *utility*, and in the ſecond, fourth, and ſixth of *indivisibility*, can never be founded as if joined to the conſonant without offending every delicate ear, and overturning the firſt principles of pronunciation.

* It is plain that Mr. Sheridan conſidered the unaccented vowel *i*, whether ending a ſyllable, or joined to the ſucceeding conſonant, as ſtanding for the ſame ſound; for we ſee him ſometimes making uſe of one diviſion, and ſometimes of another: thus he divides the word *diver-ſi-ty* with the *i* terminating the penultimate ſyllable, and *u-ny-ver-ſit-y* with the ſame *i* united to the conſonant. The ſame variety takes place in the words *di-viſ-i-bil-i-ty* and *in-di-viſ-i-bil-it-y*, while Dr. Kenrick divides all words of this termination regularly in the former manner.

553. The only considerable exception to this general rule of syllabication which determines the ſound of the unaccented vowels, is when *e* ſucceeds the accent, and is followed by *r*, as in *literal, general, misery*, &c. which can never be pronounced *lit-e-ral, gen-e-ral, mis-e-ry*, &c. without the appearance of affectation. In this ſituation we find the *r* corrupt the ſound of the *e*, as it does that of every other vowel when in a final unaccented ſyllable. For this conſonant being nothing more than a jar, it unavoidably mixes with the *e* in this ſituation, and reduces it to the obſcure ſound of ſhort *u*, (418,) a ſound to which the other unaccented vowels before *r* have ſometimes ſo evident a tendency.

554. An obſcure idea of the principles of ſyllabication juſt laid down, and the contradiction to them perceived in this exception, has made moſt of our orthöepiſts extremely wavering and uncertain in their diviſion of words into ſyllables, when the unaccented *e* has preceded *r*, where we not only find them differing from each other, but ſometimes even from themſelves:

555. I have been the more copious in my collection of theſe varieties, that I might not appear to have taken the advantage of any overſight or miſtake of the preſs: nor is it any wonder when the principles of ſyllabication ſo ſtrongly incline us to leave the vowel *e*, like the other vowels, open before a ſingle conſonant; and the ear ſo decidedly tells us, that this letter is not always open when preceded by the accent, and followed by *r*, it is no wonder, I ſay, that a writer ſhould be perplexed, and that he ſhould ſometimes incline to one ſide, and ſometimes to the other. I am conſcious I have not always been free from this inconſiſtency myſelf. The examples therefore which I have ſelected, will, I hope, fully juſtify me in the ſyllabication I have adopted; which is, that of ſometimes ſeparating the *e* from the *r* in this ſituation, and ſometimes not. When ſolemn and deliberate ſpeaking has ſeemed to admit of lengthening the *e*, I have ſometimes made it end the ſyllable; when this was not the caſe, I have ſometimes joined it to the *r*: thus, as *e* in the penultimate ſyllable of *incarcerate, reverberate*, &c. ſeems, in ſolemn ſpeaking, to admit of a ſmall degree of length and diſtinctneſs, it ends a ſyllable; but as no ſolemnity of pronunciation ſeems to admit of the ſame length and openneſs of the *e* in *tolerate, deliberate*, &c. it is united with *r*, and ſounded in the notation by ſhort *u*. It ought, however, to be carefully obſerved, that though the *e* in this ſituation is ſometimes ſeparated from the *r*, there is no ſpeaking, however deliberate and ſolemn, that will not admit of uniting it to *r*, and pronouncing it like ſhort *u*, without offending the niceſt and moſt critical ear.

556. It muſt alſo be noted, that this alteration of the ſound of *e* before *r* is only when it follows the accent, either primary or ſecondary, (522) (530;) for when it is in the firſt ſylla-

ble of a word, though unaccented, it keeps its true ſound: thus, though the *e* is pronounced like *u* in *alter*, *alteration*, &c. yet in *perfection*, *terrific*, &c. this letter is as pure as when the accent is on it in *perfect*, *terrible*, &c.

557. Something like the corruption of the ſound of unaccented *e* before *r* we may perceive in the colloquial pronunciation of the vowel *o* in the ſame ſituation; and accordingly we find our beſt orthoepiſts differ in their notation of this letter: thus *memory*, *memorable*, *immemorable*, *memorably*, *memorize*, have the *o* pronounced like ſhort *u* by Mr. Sheridan and Mr. Scott; and *memorandum*, with the *o*, as in *open*; while Dr. Kenrick gives the *o* in all theſe words the ſound it has in the conjunction *or*. Mr. Sheridan marks the unaccented *o* in *corporal*, *corporate*, and *corporation*, like the *o* in *open*; but Mr. Scott pronounces this *o* in *corporal*, *corporate*, and *corporation*, like ſhort *u*, and the ſame letter in *incorporate*, and *incorporation* like Mr. Sheridan; and Dr. Kenrick, like the *o* in the former inſtances. Mr. Sheridan and Mr. Scott are uniform in their pronunciation of the ſame vowel like ſhort *u* in *armour*, *armorer*, *armory*, *pillory*, *suasory*, *perſuaſory*, *allegory*, *compulſory*, *curſory*, and *predatory*; while Dr. Kenrick pronounces the *o* in *armour*, and *armory* like the *o* in *open*, and the ſame letter in *pillory*, *allegory*, and *curſory*, like the *o* in *or*, *nor*, &c. This diverſity, among good judges, can ariſe from nothing but the ſame uncertainty of the ſound of this letter that we have juſt obſerved of the *e*; but if we narrowly watch our pronunciation, we ſhall find that the unaccented *o* may be opened and lengthened, in deliberate ſpeaking, without hurting the ear, which is not always the caſe with *e*; and this has induced me generally to ſeparate the *o* from the ſucceeding *r* when immediately following the accent; though I am ſenſible that the rapidity of colloquial ſpeaking often reduces it to ſhort *u* without offending the ear: but when the *o* is removed more than one ſyllable from the accent, the moſt deliberate ſpeaking generally lets it ſlide into the other vowel: for which reaſon I have commonly marked it in this manner. See COMMAND.

558. It may, perhaps, appear to ſome of my readers, that too much time has been ſpent upon theſe nice diſtinctions of ſound, in which judges themſelves are found to diſagree; but when we conſider how many ſyllables in the language are unaccented, and that theſe ſyllables are thoſe in which the peculiar delicacy of the pronunciation of natives conſiſts: when we reflect on the neceſſity of having as diſtinct and permanent ſounds as poſſible, to which we may refer theſe fleeting and evaneſcent ones, we ſhall not look upon an attempt to arreſt and inveſtigate them as a uſeleſs part of philology.

In the courſe of a critical inveſtigation of the powers of the letters in the foregoing Principles, there is ſcarcely a word of any difficulty or diverſity of ſound which has not been noticed, and the true pronunciation, with the reaſons and authorities for it, pointed out; ſo that if the inſpector ſhould not meet with ſufficient information in the Dictionary under the word, let him conſult the Principles under the *vowel, diphthong,* or *conſonant*, he wiſhes to be explained, and it is highly probable he will meet with the ſatisfaction he requires. Thus to know ſomething more concerning the *g* in the word *impugn*, which ſome ſpeakers pronounce and others ſuppreſs, let him look into the Principles under the letter *G*, No. 386, and he will find additional obſervations to thoſe in the Dictionary under the word. It is true that moſt of theſe doubtful, as well as other words, are referred to the Principles; but if this reference ſhould by chance be omitted, it is hoped that this Advertiſement will ſupply the deficiency.

N. B. A word not found in the Dictionary, may poſſibly be met with in the Appendix.

A CRITICAL PRONOUNCING

DICTIONARY

AND EXPOSITOR OF THE

ENGLISH LANGUAGE.

The figures between the parentheſes refer to the numbers in the Principles of Pronunciation prefixed to this Dictionary, where the different ſounds of the letters are explained at large. Thus (73) *refers to the firſt ſound of the letter* A; (93) *to the firſt ſound of the letter* E; *and ſo of the reſt.*

The figures over the letters refer to the vowels in the words at the top of the page; and the index ☞ *before theſe words, refers to the table of ſimple and diphthongal ſounds, where the different ſounds of the vowels are exhibited at one view. Thus* ☞ (559) *refers to the table in the oppoſite page.*

A

☞ (559). Fāte, fär, fâll, fåt; mè, mêt; pine, pĭn; nō, mōve, nŏr, nŏt; tūbe, tŭb, bûll; öil: pŏund; *th*in, THIS.

A, The firſt letter of the alphabet (73). A, an article ſet before nouns of the ſingular number; a man, a tree. Before a word beginning with a vowel, it is written an, as an ox; A is ſometimes a noun, as great A; A is placed before a participle, or participial noun; gone a hunting, come a begging: A has a ſignification denoting proportion; the landlord hath a hundred a year.

☞ The change of the letter *a* into *an* before a vowel or mute *h* for the ſake of ſound, ſeems to deſerve more attention than has generally been given to it by any of our grammarians, and will therefore be conſidered under the article *An*; which ſee.

Of the Alphabetical Pronunciation of the Letter A.

So many profound and ingenious obſervations have been made upon this firſt ſtep to literature, that volumes might be filled with the erudition that has been laviſhed on this letter alone. The priority of place it claims, in all alphabets, has made it ſo much the object of attention, that philologiſts ſuppoſe the foundation of learning but weakly laid till the natural and civil hiſtory of the firſt letter be fully ſettled.

But, however deep have been their reſearches into the origin of this letter, we find no author in our language has hitherto attempted to ſettle the diſputes that have ariſen between the natives of England, Ireland, and Scotland, about the true ſound of it, when called by its name. Inſtead, therefore, of tracing this character through the circles of Gomer, the Egyptian Hieroglyphics, the myſterious Abraxas, or the Iriſh Ogum, I ſhall endeavour to obviate a difficulty that frequently ariſes when it is pronounced in the Hornbook: or, in other words, to enquire what is the true name of the firſt letter of the Engliſh alphabet—whether we are to ſay *Aye, B, C; Ah, B, C;* or *Aw, B, C.*

And firſt, it will be neceſſary to conſider the nature of a vowel; which grammarians are generally agreed in defining to be "a ſimple articulate ſound, formed by the impulſe of the voice by the opening only of the mouth in a particular manner." Now, as every vowel by itſelf is ſounded long, as nothing but its junction with a conſonant can make it otherwiſe, it is natural, when pronouncing this vowel alone, to give it the long open ſound; but as this long open ſound is threefold, as heard in *face, father*, and *water*, a queſtion ariſes, which of theſe long ſounds ſhall we adopt as a common name to the whole ſpecies of this letter? The Engliſh make choice of the *a* in *face*, the Iriſh of that in *father*, and the Scotch of that in *water*. Each party produces words where the letter *a* is ſounded in the manner they contend for; but when we demand why one ſhould have the preference, the controverſy is commonly at an end; any farther reaſons are either too

remote or too insignificant to be produced: and indeed, if a diversity of names to vowels did not confound us in our spelling, or declaring to each other the component letters of a word, it would be entirely needless to enter into so trifling a question as the mere name of a letter; but when we find ourselves unable to convey signs to each other on account of this diversity of names, and that words themselves are endangered by an improper utterance of their component parts, it seems highly incumbent on us to attempt a uniformity in this point, which, insignificant as it may seem, is undoubtedly the foundation of a just and regular pronunciation.

The first rule for naming a letter, when pronounced alone, seems to be this: Whatever sound we give to a letter when terminating a syllable, the same sound ought to be given to it when pronounced alone; because, in both cases, they have their primary, simple sound, uninfluenced by a succeeding vowel or consonant; and therefore, when we pronounce a letter alone, it ought to have such a sound as does not suppose the existence of any other letter. But wherever *a* terminates a syllable with the accent upon it, (the only state in which it can be said to be pure,) it has always the English sound of that letter. The only exceptions to this rule are, the words *fa-ther*, *ma-ster*, and *wa-ter*; and that these are merely exceptions, appears from the uniformity with which the *a* is pronounced otherwise in *parent*, *papal*, *taper*, *fatal*, &c. The other vowels have their names exactly similar to the sound they have in a similar situation, as the *e* like that in *me-grim*, the *i* like the *i* in *ti-tle*; the *o* as the *o* in *no-ble*, and the *u* like the *u* in *tu-tor*. Thus, as it appears from the general analogy of pronunciation, that the sound of the *a*, which the English adopt, is the only one that does not necessarily suppose the existence of any other sound, it inevitably follows that theirs only is the proper appellation of that letter.

But there is another analogy by which we may determine the true sound of the vowels when pronounced singly; and that is, the sound they have when preserved long and open by the final *e*. Thus we call the letter *e* by the sound it has in *theme*, the letter *i* as it sounds in *time*, the letter *o* as heard in *tone*, and the *u* as in *tune*; and why the letter *a* should not be pronounced as heard in *face*, cannot be conceived, as each of the other vowels has, like *a*, a variety of other sounds, as they are united with letters which, in some measure, alter their quality.

In consequence of entertaining a different idea of the *a*, when pronounced in the alphabet, we see the natives of Ireland very prone to a different pronunciation of the words where this letter occurs; and, indeed, it is quite consistent with their doctrine of the sound of *a*, that the words *parent*, *papal*, *taper*, and *fatal*, should be pronounced *pah-rent*, *pah-pal*, *tah-per*, and *fah-tal*. We find the Scotch likewise inclinable to the same pronunciation of *a*, when in *words*, as when alone. Thus we hear *Sawtan* for *Satan*, *sawcred* for *sacred*, and *law-ity* for *laity*; and this is perfectly consistent with the manner in which they pronounce the letter *a*, when alone: there is no medium. If this be not the true pronunciation of these words, the *a* is certainly to be sounded as the English do: for, whenever the English give the Italian sound, as it may be called, to the *a*, except in the words *father* and *master*, it is always in consequence of its junction with some consonant, which determines it to that sound; as in monosyllables terminating in *r*, as *bar*, *car*, *far*: but where it is not affected by a succeeding consonant, as in the words *parent*, *papal*, *natal*, *fatal*, we then hear it pronounced as the slender English *a*, both in and out of composition.

It will, perhaps, be objected, that the most frequent short sound of *a*, as heard in *cat*, *rat*, *mat*, *carry*, *marry*, *parry*, is the short sound of the Italian *a* in *father*, *car*, *mar*, *par*, and not the short sound of the *a* in *care*, *mare*, and *pare*; but it may be answered, that this want of correspondence between the name of the letter, and the most frequent short sound, is common to the rest of the vowels: for the *o*, as heard in *cot*, *not*, *rot*, is not the short sound of the *o* in *coat*, *note*, *wrote*, but of the *a* in *water*, or of the diphthongs in *caught*, *naught*, and *wrought*; and if we ought to call the *a*, *ah*, because its short sound corresponds to *ah*, for the very same reason we ought to call the *o*, *au*; and a similar alteration must take place with the rest of the vowels. As therefore, from the variety of sounds the vowels have, it is impossible to avoid the inconvenience of sometimes sounding the letter one way in a syllable, and another way in a word, we must either adopt the simple long sound when we would pronounce the letter alone, or invent new names for every different sound in a different word, in order to obviate the difficulty.

It must not be dissembled, however, that the sound of *a*, when terminating a syllable not under the accent, seems more inclined to the Irish than the English *a*, and that the ear is less disgusted with the sound of *Ah-mer-i-cah* than of *A-mer-i-cay*: but to this it may be answered, that letters not under the accent

in a thousand instances, deviate from their true sound; that the vowel *a*, like several other vowels in a final syllable not accented, has an obscure sound, bordering on *u*; but if the *a*, in this situation, were pronounced ever so distinctly, and that this pronunciation were clearly the *a* in *father*, it would be nothing to the purpose: when the *a* is pronounced alone, it may be said not only to be a letter, but a distinct character, and a noun substantive; and, as such, has the same force as the letters in an accented syllable. The letter *a*, therefore, as the first character in the alphabet, may always be said to have the accent, and ought to have the same long, open sound, as is given to that letter when accented in a syllable, and not influenced in its sound by any preceding or succeeding consonant.

We may therefore conclude, that if all vowels, when pronounced alone, are accented and long, if spelling be the pronunciation of letters alone, as it would be absurd to suppose ourselves acquainted with the different consonants that determine the sound of the vowels before they are pronounced,) it follows, that in spelling, or repeating the component parts of a word, we ought to give those parts their simple and uncombined sound: but there is no uncombined sound of the vowel *a*, except the slender sound contended for, unless in the words *father* and *master*; and therefore, when we repeat letters singly, in order to declare the sound of a word, we must undoubtedly give the first letter of the alphabet the sound we ever give it in the first syllable of the numerous class *la-dy*, *pa-gan*, *ma-son*, *ba-son*, &c.

Thus, after placing every objection in its strongest light, and deducing our arguments from the simplest and clearest principles, this important question seems at last decided in favour of the English; who, independent of the arguments in their favour, may be presumed to have a natural right to determine the name of the letter in question, though it has been so often litigated by their formidable and learned, though junior relations. For though, in some cases, the natives of Ireland and Scotland adhere rather more closely to analogy than the English themselves, yet in this we find the English pronounce perfectly agreeable to rule; and that the slender pronunciation of the letter *a*, as they pronounce it in the alphabet, is no more than giving it that simple sound, it ever has, when unconnected with vowels or consonants that alter its power.

☞ I have differed from Mr. Sheridan in marking the *ss* in this word; and, I think, with the best usage on my side. Though double *s* is almost always pronounced sharp and hissing, yet when a sharp *s* precedes, it seems more agreeable to the ear to pronounce the succeeding *s* flat. Thus, though the termination *ition* is always sharp, yet because the *s* in *transition* is necessarily sharp, the *t* goes into the flat sound, as if written *tranzishion*, which see.

☞ In the first edition of this Dictionary I followed the accentuation of Johnson and Ash in this word, and placed the stress upon the first syllable, contrary to what I had done some years before in the Rhyming Dictionary, where I had placed the accent on the second, and which was the accentuation adopted by *Mr. Sheridan*. Upon a nearer inspection of the analogies of the language, I find this the preferable mode of marking it, as words in this termination, though very irregular, generally follow the stress of the corresponding noun or verb; and consequently this word ought to have the same accent as *absolve*, which is the more immediate relation of the word in question, and not the accent of *absolute*, which is the most distant. (512). *Kenrick*, *W. Johnston*, *Entick*, and *Nares*, have not inserted this word; and *Mr. Perry* very improperly accents it upon the third syllable.

☞ Dr. Johnſon tells us, that this word was anciently and properly accented on the firſt ſyllable, though now frequently on the ſecond. That it was accented on the firſt ſyllable till within theſe few years, is pretty generally remembered; and if Shakeſpeare did not, by poetical licenſe, violate the accentuation of his time, it was cer-

Digitized from Best Copy Available

tainly pronounced so two centuries ago, as appears by Dr. Johnson's quotation of him:

"Our court shall be a little *academy*,
"Still and contemplative in living arts."
Love's Labour's Lost.

And in Ben Jonson's *New Inn* we find the same accentuation:

——— "Every house became
"An *academy* of honour, and those parts
"We se departed."———

But the accentuation of this word formerly, on the first syllable, is so generally acknowledged, as not to stand in need of poetic authority. The question is, whether this accentuation, or that which places the stress on the second syllable, is the most proper? To wave, therefore, the authority of custom, which precludes all reasoning on language, and reduces the dispute to a mere matter of fact, it may be presumed that whatever is agreeable to the most general usage of the language in similar words, is the most proper in this; and if it appears that general usage, in similar words, is in favour of the old pronunciation, it must certainly, for that reason, be allowed to be the best. And first it may be observed, that as our language is almost as averse to the accent on the last syllable, as the Latin, it is a general custom with us, when we adopt a word from the Latin, and abridge it of one or two of its syllables, to remove the accent at least a syllable higher than it was in the original language, that the accent, when the word is naturalized, may not rest on the last. Thus of *Homérus*, we make *Hómer*; of *Virgílius*, *Vírgil*; and of *Horátius*, *Hórace*: *Hyacínthus*, altered to *Hy'acinth*, removes the accent two syllables higher; and *cæremónia*, become *céremony*, does the same; and no law, that I know of, forbids us to accent *academia*; or if you will Ἀκαδημία when turned into *academy*, on the first syllable, as it was constantly accented by our ancestors, who, receiving Greek through the medium of Latin, generally pronounced Greek words according to the Latin analogy, and therefore necessarily placed the accent of *academia* on the third syllable, which, when reduced to *academy* required the accent to be removed higher.

But how, it will be said, does this account for placing the accent on the first syllable of the English word *academy*, rather than the second? To this it may be answered, that the numberless instances of preference given by the accent to the first syllable in similar words, such as *melancholy*, *parsimony*, *dilatory*, &c. might be a sufficient authority without any other reason. But, perhaps, it will be pardoned me if I go farther, and hazard a supposition that seems to account for the very common practice of placing the accent of so many of the longer polysyllables from the Latin on the first or second syllable. Though in the Latin there never was more than one accent upon a word, yet, in our pronunciation of Latin, we commonly place an accent on alternate syllables, as in our own words; and when the Latin word, by being anglicised, becomes shorter, the alternate accent becomes the principal. Thus, in pronouncing the Latin word *academia*, the English naturally place an accent on the first and third syllable, as if divided into *ăc-a-dē-mi-a*; so that when the word becomes anglicised into *ăc-a-de-my*, the first syllable retains the accent it had when the word was Latin. On the other hand, it may be conjectured with some probability, that a fondness for pronouncing like the French has been the occasion of the alteration. As the English ever suppose the French place the accent on the last syllable, in endeavouring to pronounce this word after their manner, the stress must naturally fall on the second and last syllables, as if divided into *a-căd-a-mie*; and from an imitation of this, it is probable, the present pronunciation of the word was produced. Thus we have a very probable reason why so many of our longer words from the Latin are accented so near the beginning; as, in this mode of pronouncing them, they seem to retain one of the accents of the original. Hence the long train of words, *voluntary*, *comparable*, *disputable*, *admirable*, &c. have the accent on the first syllable, because in pronouncing the words *voluntarius*, *comparabilis*, *disputabilis*, *admirabilis*, &c. we commonly lay a stress upon the first, as well as the third syllable. As to the analogy, as Mr. Sheridan pretends, of pronouncing this word with the accent on the second syllable, because words ending in *my* have the accent on the antepenultimate, nothing can be more ill founded. True it is, that words of this termination never have the accent on the penultimate; but that, for this reason, they must necessarily have the accent on the antepenultimate, I cannot well comprehend. If *polygamy*, *œconomy*, *astronomy*, &c. (513) have their accent on the antepenultimate, it arises from the nature of the terminations; which being, as it were, a species, and applicable to a thousand other words, have, like *logy* and *graphy*, the accent always on the preceding syllable; which

ſeems beſt to unite the compound into one word: but *academy* being a ſimple, is ſubject to no ſuch rule, and ſeems naturally to incline to a different analogy of pronunciation. Thus Dr. Johnſon ſeems to have decided juſtly in ſaying the word *academy* ought to have the accent on the firſt ſyllable; though preſent uſage, it muſt be confeſſed, ſeems to lead to the contrary pronunciation.

☞ This word is in no Engliſh Dictionary I have met with; but, conceiving its formation to be perfectly agreeable to the analogy of Engliſh adjectives, and finding it uſed by ſeveral very reſpectable authors, I have ventured to inſert it. Mr. Foſter, in his Eſſay on Accent and Quantity, ſays, "When a "high note ſucceeds a low one, or riſes above "the grave tone of voice, the perception of "it is ſudden and inſtantaneous, before the "continuance of the note is determined one "way or the other for long or ſhort. This "I more clearly conceive, than I can per- "haps expreſs. I can however engage to "make it perceptible to a common Engliſh "ear in any Greek word, according to its "preſent *accentual* mark." And Dr. Galley, in his Diſſertation againſt Greek Accents, makes uſe of the ſame word, where he ſays, "For if ΠΟΣΩΙ means, according to Mr. "Foſter, that oratorical or common diſcourſe "differs from muſic only in the number of "ſounds, *i. e.* that the former has only four "or five notes, but that the latter has many "more, then the *accentual* pronunciation of "a Greek ſentence will not differ from the "ſinging of the ſame ſentence, when ſet to "four or five correſponding notes in muſic, "*i. e.* it will in both caſes be a ſong."

To ACCENTUATE, âk-ſên'tſhû-âte. v. a. (461). To place the accent properly.

ACCENTUATION, âk-ſên-tſhû-â'ſhŭn. s. The act of placing the accent in pronunciation, or writing.

To ACCEPT, âk-ſêpt'. v. a. To take with pleaſure, to receive kindly.

ACCEPTABILITY, âk-ſêp-tâ-bil'lê-tê. s. The quality of being acceptable.

ACCEPTABLE, âk'ſêp-tâ-bl. a. Grateful; pleaſing.

☞ Within theſe twenty years this word has ſhifted its accent from the ſecond to the firſt ſyllable. There are now few polite ſpeakers who do not pronounce it *ac'ceptable*; and it is much to be regretted that this pronunciation is become ſo general; for where conſonants of ſo different an organ as *p* and *t* are near the end of a word, the word is pronounced with much more difficulty when the accent is removed higher than when it is arreſted by theſe letters; for, in this caſe, the force which accompanies the accent facilitates the organs in their tranſition from the formation of the one letter to the other. As nature, therefore, directs us to place the accent upon theſe conſonants in all words ending in *active*, *ective*, *itive*, *otive*, and *utive*; *able*, *ible*, *ofible*, and *utible*; ſo we ought to liſten to the ſame voice in pronouncing *acceptable*, *ſuſceptible*, *corruptible*, with the accent on the ſecond ſyllable.—See *Commendable*.

ADVERTISEMENT, { ăd-vĕr'tĭz-mĕnt / ăd-vĕr tīze'mĕnt. } s. intelligence, information; notice of any thing publiſhed in a paper of intelligence.

☞ As nouns ending in *ment* always follow the accentuation of the verbs from which they are formed, we frequently hear *advertiſement* taxed with the groſſeſt irregularity for having the accent on a different ſyllable from *advertiſe*. The origin of this irregularity ſeems to have ariſen from a change which has taken place in the pronunciation of the verb ſince the noun has been formed: *advertiſe* and *chaſtiſe* were, in Shakeſpeare's time, both accented on the penultimate, and therefore *advertiſement* and *chaſtiſement* were formed regularly from them.

"Wherein he did the King his lord *advertiſe*." HEN. VIII.

"My grief cries louder than *advertiſement*." MUCH ADO, &c.

"Oh, then how quickly ſhould this arm of mine,
"Now priſ'ner to the paliſy, *chaſtiſe* thee."
" RICHARD II.

"And *chaſtiſement* doth therefore hide its head." JUL. CÆSAR.

But ſince that time the verbs *advertiſe* and *chaſtiſe* have fallen into an analogy more agreeable to verbs of the ſame form—for the verbs to *promiſe*, *practiſe*, *franchiſe*, *mortiſe*, and *diverſiſe*, are the only words where the termination *iſe* has not the accent either primary or ſecondary; and if an alteration muſt be made to reconcile the pronunciation of the ſimple with that of the compound, we ſhould find it much eaſier to change *advértiſement* and *chaſtiſement* into *advertiſement* and *chaſtiſement*, than *advertiſe* and *chaſtiſe* into *advértiſe* and *chaſtiſe*; but the irregularity ſeems too inveterate to admit of any alteration.

ALIEN, āle'yĕn. a. (505). Foreign, or not of the ſame family or land; eſtranged from, not allied to.

ALIEN, āle'yĕn. s. (113) (283). A foreigner, not a deniſon, a ſtranger; in law, an alien is one born in a ſtrange country, and never enfranchiſed.

ALIENABLE, āle'yĕn-ā-bl. a That of which the property may be transferred.

To ALIENATE, āle'yĕn-āte. v. a. To transfer the property of any thing to another; to withdraw the heart or affections.

☞ There is a ſtrong propenſity in undiſciplined ſpeakers to pronounce this word with the accent on *e* in the penultimate; but this cannot be too carefully avoided, as all the compounds of *alien* have invariably the accent on the firſt ſyllable. But whether the *a* in this ſyllable be long or ſhort, is a diſpute among our beſt Orthöepiſts. Mr. Perry, Mr. Buchanan, W. Johnſton, Dr. Kenrick, and Mr. Elphinſtone, join it with the conſonant, and make it ſhort; but Mr. Sheridan ſeparates it from the *l*, and makes it long and ſlender: and though Mr. Elphinſtone's opinion has great weight with me, yet I here join with Mr. Sheridan againſt them all; not only becauſe I judge his pronunciation of this word the moſt agreeable to the beſt uſage, but becauſe it is agreeable to an evident rule which lengthens every vowel with the accent on it, except *i* when followed by a ſingle conſonant and a diphthong. See Principles, No. (505) (534).

"O! *alienate* from Heav'n, O ſpir't accurſt!"
Milton's Par. Loſt, b. v. 877.

☞ A few years ago there was an affectation of pronouncing this word, when a noun, with the accent on the firſt ſyllable; and this had an appearance of preciſion from the general cuſtom of accenting nouns in this manner, when the ſame word, as a verb, had the accent on the laſt (492): but a cloſer inſpection into the analogies of the language ſhewed this pronunciation to be improper, as it interfered with an univerſal rule, which was, to pronounce the *y* like *e* in a final unaccented ſyllable. But whatever was the reaſon of this novelty, it now ſeems to have ſubſided; and this word is now generally pronounced with the accent on the ſecond ſyllable, as it is uniformly marked by all the Orthöepiſts in our language.

☞ This word is divided into three syllables by Mr. Sheridan, and but into two by Dr. Kenrick, Mr. Perry, Mr. Scott, and W. Johnston. The latter is, in my opinion, preferable. My reason is, that though this plural word is perfectly Latin, and in that language is pronounced in three syllables; yet as we have the singular *aloe* in two syllables, we ought to form the plural according to our own analogy, and pronounce it in two syllables likewise.—See ANTIPODES.

ALTERCATION, ăl-tŭr-kă'shŭn. s. Debate, controversy. (84).

☞ The first syllable of this word, and of the sixteen that follow it, except *although*, are subject to a double pronunciation, between which it is not very easy to decide. There is a general rule in the language, that *l*, followed by another consonant, gives the preceding *a* its broad sound, as in *salt*. This rule is subject to several exceptions (84); and if we take in these words into the exceptions, there is some doubt of the exception's becoming the general rule. But the *a* in question is now so generally pronounced, as in the first syllable of *alley*, *valley*, &c. that we should risk the imputation of inaccuracy to sound it otherwise. Mr. Sheridan, Dr. Kenrick, and Mr. Scott, are uniformly for this latter sound of *a*. Mr. Perry

marks all in the same manner, except *altercate* and *altercation;* and W. Johnston has only the words *altercation* and *alternative*, which he pronounces in the former manner. It is certain that the former was the true Anglosaxon sound, and it is highly probable that the latter has only obtained within these few years, in words obviously derived from the Latin as these are; but there seems to be a grossness in one sound, and a neatness in the other, which has so decidedly given one of them the preference.

AN, ăn. article. One, but with leſs emphaſis; any, or ſome.

☞ This indefinite, and, as it may be called, the *euphonic* article, is ſaid by all our Grammarians to be uſed before a vowel or *h* mute; but no notice is taken of uſing *a* inſtead of it before what is called a vowel, as *a uſeful book*, *a uſual ceremony*, *a uſurer*, &c.; nor is any mention made of its conſtant uſage before *h* when it is not mute, if the accent of the word be on the ſecond ſyllable, as *an heroic action*, *an hiſtorical account*, &c. This want of accuracy ariſes from a want of analyzing the vowels, and not attending ſufficiently to the influence of accent on pronunciation. A proper inveſtigation of the power of the vowels would have informed our Grammarians, that the letter *u*, when long, is not ſo properly a vowel as a ſemiconſonant, and perfectly equivalent to commencing *y* (8); and that a feeling of this has inſenſibly influenced the beſt ſpeakers to prefix *a* to it in their converſation, while a confuſed idea of the general rule ariſing from an ignorance of the nature of the letters has generally induced them to prefix *an* to it in writing. The ſame obſervations are applicable to the *h*. The ear alone tells us, that before *heroic*, *hiſtorical*, &c. the *an* ought invariably to be uſed; but by not diſcovering that it is the abſence of accent on the *h* that makes *an* admiſſible in theſe words, we are apt to prefix *an* to words where the *h* is ſounded, as *an horſe*, *an houſe*, &c. and thus ſet our ſpoken and written language at variance. This ſeems better to account for the want of accuracy in this article than a conjecture I once heard from Dr. Johnſon, that our anceſtors, particularly in the time of the Spectator, where this miſapplication of the article frequently occurs, did not pronounce the *h* at the beginning of words ſo often as we do. However this may be, it ſeems neceſſary to a correctneſs of language to make our orthography and pronunciation as conſiſtent as poſſible: for which purpoſe it may not be uſeleſs to attend to the following general rules. The article *A* muſt be uſed before all words beginning with a conſonant, and before the vowel *u* when long: and the article *An* muſt be uſed before all words beginning with a vowel, except long *u*; before words beginning with *h* mute, as *an hour*, *an air*, &c. or before words where the *h* is not mute, if the accent be on the ſecond ſyllable, as *an heroic action*, *an hiſtorical account*, &c. For the few words in our language where the *h* is mute, ſee this letter in the Principles, No. 394: and for a juſt idea of the letter *u*, and the reaſon why it admits of *an* before it when long, ſee Principles, No. 8, and the Notes upon it.

☞ We frequently hear diſputes whether this word ſhould be pronounced in four ſyllables, as it is here, with the accent on the ſecond, or in three, as if divided into *an-ti-podes*, with the accent on the firſt ſyllable, and the laſt rhyming with *abodes*. To ſolve the difficulty it muſt be obſerved, that the word is pure Latin; and that when we adopt ſuch words into our own language, we ſeldom alter the accent. If, indeed, the ſingular of this word were in uſe like *fatellite* (155), then we ought to form the plural regularly, and pronounce it in three ſyllables only; but as it is always uſed in the plural, and is perfect Latin, we ought to pronounce it in four.

"To counterpoiſe this hero of the mode,
"Some for renown are ſingular and odd;
"What other men diſlike is ſure to pleaſe,
"Of all mankind, theſe dear *antipodes*:

APOSTLE, ā-pŏs'ſl. s. (472) (405). A perſon ſent with mandates, particularly applied to them whom our Saviour deputed to preach the goſpel.

☞ This word is ſometimes heard in the pulpit, as if divided into *a-po-ſtle*; the ſecond ſyllable like the firſt of *po-et*. If the long quantity of the *o*, in the Latin *apoſtulus*, is urged for a ſimilar length of the Engliſh *apoſtle*, let us only turn to No. 537 of the Principles, and we ſhall ſee the futility of arguing from the Latin quantity to ours. If theſe reaſons are not ſatisfactory, it is hoped that thoſe who are abettors of this ſingular pronunciation will alter *e-piſ-tle* into *e-pi-ſtle*, the ſecond ſyllable like *pie*, and then their reaſoning and practice will be uniform.

APOSTLESHIP, ā-pŏs'ſl-ſhĭp. s. The office or dignity of an apoſtle.

APOSTOLICAL, ăp-pŏſ-tŏl'ē-kăl. a. Delivered by the apoſtles.

APOTHECARY, ā-pŏ*th*'ē-kā-rē. s. A man, whoſe employment it is to keep medicines for ſale. (470).

☞ There is a corrupt pronunciation of this word, not confined to the vulgar, as if it were written *Apteeary*.

APOTHEGM, ăp'ŏ-*th*ĕm. s. (503). A remarkable ſaying.

APOTHEOSIS, ăp-ŏ-*th*ē'ŏ-sĭs. s. Deification.

☞ This word, like *Metamorphoſis*, has deſerted its Latin accentuation on the penultimate ſyllable, and returned to its original Greek accent on the antepenultimate. See Principles, No. 503, page 39. The other words of this termination, as *Anaſtaſis*, *Antiſtaſis*, &c. retain the Latin accent, though all theſe words in Greek have the accent on the antepenultimate. This accentuation on the antepenultimate is ſo agreeable to the genius of our own tongue, that it is no wonder it is ſo prevalent. Johnſon, Sheridan, Kenrick, Aſh, Scott, Buchanan, Bailey, and Perry,

have adopted it as I have done; and only Smith, Barclay, and Entick, accent the penultimate. So eminent a poet as Garth approves of the choice I have made, where he ſays,

"Allots the prince of his celeſtial line
"An *apotheoſis*, and rites divine."

APOTOME, ă-pŏt'ŏ-mè. s. The remainder or difference of two incommenſurable quantities.

APOSEM, ăp'ŏ-zĕm. s. (503). A decoction.

To APPAL, ăp-pâll'. v. a. (406). To fright, to depreſs.

☞ Dr. Johnſon tells us, that this word might more properly have been written *Appale*; and we find Bacon, in his Hiſtory of Henry VII. actually writes the compound *Appalement*. Whether Johnſon founds his opinion upon the *pale* colour which fear generally produces, or upon the derivation of the word from the French *Appalir*, it cannot be certainly known; but this is certain, that this word has been ſo often rhymed with *all*, *ball*, *fall*, &c. that ſuch a change as Dr. Johnſon recommends would be attended with no ſmall inconvenience. It may be obſerved too, that ſpelling this word with ſingle *l* as he has done, is at variance with its general pronunciation: for one *l*, when final, does not broaden the *a* like that in *all*, but leaves it in the ſound of that vowel in *fal-low*, *tal-low*, &c. Conſidering therefore that the pronunciation of this word is ſo irrevocably fixed, it is but borrowing an *l* from the Latin *Palleo* to make the ſound and the ſpelling exactly correſpond. We are often fond of neglecting the French for the Latin etymology when there is no neceſſity,—in the preſent caſe ſuch a preference would be commendable.

APPALEMENT, ăp-pâll'mĕnt. s. Depreſſion, impreſſion of fear.

To APPRECIATE, ăp-prē'shē-ăte. v. a. ☞ This word is not in Johnſon; and Bailey, who has it, ſeems not to have given its preſent ſignification, for he explains it, "to ſet a high value or eſteem upon any thing;" for my recollection fails me, if it has not been generally uſed in the ſenſe of the French word it comes from, *Apprécier*, to appraiſe, to rate, to value, to declare the juſt price of any thing, as nearly ſynonimous to the Engliſh word to *eſtimate*.

APPRECIABLE, ăp-prē'shē-ă-bl. a. ☞ This word is the genuine offspring of the former; and if we admit the parent, we cannot refuſe the child, eſpecially as the latter ſeems of more uſe than the former; for though we may pretty well ſupply the place of *appreciate* by *eſtimate*, we have not ſo good a word as *appreciable* to expreſs the capability of being eſtimated.

☞ This word is vulgarly pronounced *Sparrowgraſs*. It may be obſerved, that ſuch words as the vulgar do not know how to ſpell, and which convey no definite idea of the thing, are frequently changed by them into ſuch words as they do know how to ſpell, and which do convey ſome definite idea. The word in queſtion is an inſtance of it: and the corruption of this word into *Sparrowgraſs* is ſo general, that *aſparagus* has an air of ſtiffneſs and pedantry. See Lantern.

ASPECT, ăs'pĕkt. s. Look, air, appearance; countenance; glance, view, act of beholding; direction towards any point, position; disposition of any thing to something else, relation; disposition of a planet to other planets.

☞ This word, as a noun, was universally pronounced with the accent on the last syllable till about the middle of the seventeenth century. It grew antiquated in Milton's time, and is now entirely obsolete. Dr. Farmer's observations on this word, in his no less solid than ingenious Essay on *The Learning of Shakespeare*, are so curious, as well as just, that the reader will, I doubt not, be obliged to me for quoting them:

"Sometimes a very little matter detects a forgery. You may remember a play called the Double Falsehood, which Mr. Theobald was desirous of palming upon the world for a posthumous one of Shakespeare: and I see it is classed as such in the last edition of the Bodleian catalogue. Mr. Pope himself, after all the strictures of Scriblerus, in a letter to Aaron Hill, supposes it of that age; but a mistaken accent determines it to have been written since the middle of the last century:

——"This late example
"Of base Henriquez, bleeding in me new,
"From each good *aspect* takes away my trust."

And in another place,

"You have an *aspect*, Sir, of wondrous wisdom."

"The word *aspect*, you perceive, is here accented on the *first* syllable, which, I am confident, in *any* sense of it, was never the case in the time of Shakespeare; though it may sometimes appear to be so, when we do not observe a preceding Elision.

"Some of the professed imitators of our old poets have not attended to this and many other *minutiæ*: I could point out to you several performances in the respective *styles* of Chaucer, Spencer, and Shakespeare, which the *imitated* bard could not possibly have either read or construed.

"This very accent hath troubled the annotators on Milton. Dr. Bently observes it to be a *tone* different from the present use." "Mr. Manwaring, in his Treatise of Harmony and Numbers, very solemnly informs us, that this verse is defective both in accent and quantity.

"His words here ended; but his meek *aspect*,
"Silent, yet spake."——

"Here, says he, a syllable is *acuted* and *long*, whereas it should be *short* and *graved!*"

"And a still more extraordinary gentleman, one Green, who published a specimen of a *new version* of the Paradise Lost, into blank verse, "by which that amazing work is brought somewhat nearer the summit of perfection," begins with correcting a blunder in the fourth book,

——"The setting sun
"Slowly descended, and with right *aspect*—
"Levell'd his evening rays."

"*Not so* in the *new version*:

"Meanwhile the setting sun descending slow—
"Levell'd with *aspect* right his ev'ning rays."

"Enough of such commentators.—The celebrated Dr. Lee had a *spirit*, who would sometimes condescend to correct him, when peccant in *quantity*: and it had been kind of him to have a little assisted the *weights* above mentioned.—Milton affected the *antique*; but it may seem more extraordinary, that the old accent should be adopted in Hudibras."

To AUTHENTICATE, âw-*th*ên'tê-kâte. v. a. To eſtabliſh any thing by authority. (91).

☞ I have inſerted this word without any precedent from our other Dictionaries; but it is, in my opinion, ſufficiently eſtabliſhed by good uſage to give it a place in all of them.

AUTHENTICITY, âw-*th*ên-tîs'sê-tê. s. Authority, genuineneſs.

AUTHORITY, âw-*th*ôr'ê-tê. s. Legal power; influence, credit; power, rule; ſupport, countenance; teſtimony, credibility.

☞ This word is ſometimes pronounced as if written *autority*. This affected pronunciation is traced to a gentleman who was one of the greateſt ornaments of the law, as well as one of the politeſt ſcholars of the age, and whoſe authority has been ſufficient to ſway the bench and the bar, though *author*, *authentic*, *theatre*, *theory*, &c. and a thouſand ſimilar words where the *th* is heard, are conſtantly ſtaring them in the face.

The public ear, however, is not ſo far vitiated as to acknowledge this innovation; for though it may with ſecurity, and even approbation, be pronounced in Weſtminſter Hall, it would not be quite ſo ſafe for an actor to adopt it on the ſtage.

I know it will be ſaid, that *autoritas* is better Latin, that the purer Latin never had the *h*; and that our word, which is derived from it, ought, on that account, to omit it. But it may be obſerved, that, according to the beſt Latin critics, the word ought to be written *auctoritas*, and that, according to this reaſoning, we ought to write and pronounce *auctority* and *auctor*: but this, I preſume, is farther than theſe innovators would chooſe to go. The truth is, ſuch ſingularities of pronunciation ſhould be left to the lower order of critics; who, like coxcombs in dreſs, would be utterly unnoticed if they were not diſtinguiſhed by petty deviations from the reſt of the world.

☞ A word with the grave accent on the laſt ſyllable. If the inſpector does not know what is meant by the grave accent, it may be neceſſary to inform him, that writers on the Greek accent tell us that every ſyllable which has not the acute accent has the grave; and as there could but be one ſyllable acuted in that language, the reſt muſt neceſſarily be grave. What theſe accents are has puzzled the learned ſo much that they ſeem neither to underſtand each other nor themſelves; but it were to be wiſhed they had kept this diſtinction into acute and grave out of our own language, as it is impoſſible to annex any clear ideas to it, except we conſider the grave accent merely as the abſence of the acute, which reduces it to no accent at all. If we divide the voice into its two leading inflections, the riſing and falling, and call the former the acute and the latter the grave, we can annex diſtinct ideas to theſe words: and perhaps it is an ignorance of this diſtinction of ſpeaking ſounds, and confounding them with high and low, or loud and ſoft, that occaſions the confuſion we meet with in writers on this ſubject.—See *Elements of Elocution*, page 66. Alſo obſervations on the Greek and Latin Accent and Quantity, at the end of the *Key to the Claſſical Pronunciation of Greek and Latin Proper Names.*

☞ This word, as Dr. Kenrick obſerves, is frequently pronounced ſo as to rhyme with *herd*: but I am of his opinion that this pronunciation is improper. Mr. Scott and Mr. Perry give it both ways. Buchanan ſounds it ſhort, like Mr. Sheridan. W. Johnſton makes it rhyme with *laird*, a Scotch lord: but Mr. Elphinſton, who is the moſt accurate obſerver of pronunciation I ever met with, gives it as I have done. The ſtage has, in my opinion, adopted the ſhort ſound of the diphthong without good reaſon, and in this inſtance ought not to be followed; as the long ſound is not only more agreeable to analogy, but to general uſage. I am glad to find my opinion confirmed by ſo good a judge as Mr. Smith; and though the poets ſo often ſacrifice pronunciation to rhyme, that their authority, in theſe caſes, is not always deciſive, yet, as Shakeſpeare ſays on another occaſion,

"They ſtill may help to thicken other proofs
"That do demonſtrate thinly."—*Othello.*

"Rail'd at their covenant, and jeer'd
"Their reverend perſons to my *beard*."
Hudibras.

"Some thin remains of chaſtity appear'd
"Ev'n under Jove, but Jove without a *beard*."
Dryden.

The impropriety of pronouncing this word as it is heard on the ſtage, will perhaps appear more perceptible by carrying this pronunciation into the compounds, as the falſe ſound of *great* may be detected by the phraſe *Alexander the Great* (241).

"Old propheſies foretel our fall at hand,
"When *bearded* men in floating caſtles land.
"And as young ſtriplings whip the top for ſport,
"On the ſmooth pavement of an empty court,
"The wooden engine flies and whirls about,
"Admir'd with clamours of the *beardleſs* rout."
Dryden.

☞ From what oddity I know not, this word is frequently pronounced as if accented on the laſt ſyllable but one, and is generally found written as if it ought to be ſo pronounced, the *t* being doubled, as is uſual when a participle is formed from a verb that has its accent on the laſt ſyllable. Dr. Johnſon, indeed, has very judiciouſly ſet both orthography and pronunciation to rights, and ſpells the word with one *t*, though he finds it with two in the quotations he gives us from Garth and Swift. That the former thought it might be pronounced with the accent on the ſecond ſyllable, is highly preſumable from the uſe he makes of it, where he ſays:

"Bigotted to this idol, we diſclaim
"Reſt, health, and eaſe, for nothing but a name."

For if we do not lay the accent on the ſecond ſyllable, here the verſe will be unpardonably rugged. This miſtake muſt certainly take its riſe from ſuppoſing a verb which does not exiſt, namely, as *bigot*; but as this word is derived from a ſubſtantive, it ought to have the ſame accent; thus though the words *ballot* and *billet* are verbs as well as nouns, yet as they have the accent on the firſt ſyllable, the participial adjectives derived from them have only one *t*, and both are pronounced with the accent on the firſt ſyllable, as *balloted*, *billeted*. *Bigoted* therefore ought to have but one *t*, and to preſerve the accent on the firſt ſyllable.

☞ Mr. Nares has very judiciouſly corrected a falſe etymology of Dr. Johnſon in this word, which might eventually lead to a falſe pronunciation. Dr. Johnſon derives it from *ball* and *yard*, or ſtick, to puſh it with. So Spencer—

"With dice, with cards, with *balliards* far unfit,
"With ſhuttle-cocks, unſeeming manly wit."

☞ (559).—Fāte, fār, fall, fāt;—mē, mēt;—pīne, pĭn;—

Spencer, says Mr. Nares, was probably miſled, as well as the Lexicographer, by a falſe notion of the etymology. The word, as well as the game, is French, *billiard*; and made by the addition of a common termination, from *bille*, the term for the ball uſed in playing.

BIPAROUS, bĭp'pā-rŭs. a. (503). Bringing forth two at a birth.

☞ This word and *Bipedal* have the *i* long in Dr. Aſh and Mr. Sheridan; but Mr. Perry makes the *i* in the firſt long, and in the laſt ſhort: analogy, however, ſeems to decide in favour of the ſound I have given it. For though the penultimate accent has a tendency to lengthen the vowel when followed by a ſingle conſonant, as in *biped*, *tripod*, &c. the antepenultimate accent has a greater tendency to ſhorten the vowel it falls upon. ——See BIGAMY and TRIPOD (503).

BIPARTITE, bĭp'pār-tīte. a. (155). Having two correſpondent parts.

☞ Every orthöepiſt has the accent on the firſt ſyllable of this word but Entick, who places it on the ſecond; but a conſiderable difference is found in the quantity of the firſt and laſt *i*. Sheridan and Scott have them both long. Nares the laſt long, Perry both ſhort, and Buchanan and W. Johnſton as I have done it. The varieties of quantity on this word are the more ſurpriſing, as all theſe writers that give the ſound of the vowels make the firſt *i* in *tripartite* ſhort, and the laſt long; and this uniformity in the pronunciation of one word ought to have led them to the ſame pronunciation of the other, ſo perfectly ſimilar. The ſhortening power of the antepenultimate accent is evident in both (503).

BITUMEN, bē-tū'mĕn. s. (118) (503). A fat unctuous matter dug out of the earth, or ſcummed off lakes.

☞ This word, from the propenſity of our language to the antepenultimate accent, is often pronounced with the ſtreſs on the firſt ſyllable, as if written *bit'u-men;* and this laſt mode of ſounding the word may be conſidered as the moſt common, though not the moſt learned pronunciation. For Dr. Aſh is the only orthöepiſt who places the accent on the firſt ſyllable; but every one who gives the ſound of the unaccented vowels, except Buchanan, very improperly makes the *i* long, as in *idle;* but if this ſound be long, it ought to be ſlender, as in the ſecond ſyllable of *viſible, terrible,* &c. (117) (551).

BITUMINOUS, bē-tū'mē-nŭs. a. (118). Compounded of bitumen.

BLINDWORM, blīnd'wŭrm. s. A ſmall viper, venomous.

To BLINK, blĭnk. v. n. To wink; to ſee obſcurely.

☞ This word has been uſed for ſome years, chiefly in Parliament, as a verb active; as when a ſpeaker has omitted to take notice of ſome material point in queſtion, he is ſaid to *blink* the queſtion. It were to be wiſhed that every word which finds its way into that houſe had as good a title to remain there as the preſent word. It combines in its ſignification an omiſſion and an artful intention to omit; and as this cannot be ſo handſomely or ſo comprehenſively expreſſed by any other word, this word, in this ſenſe, ought to be received.

☞ This word is univerſally pronounced in common converſation as it is here marked: but in reading it would ſavour ſomewhat of vulgarity to contract it to a ſound ſo very unlike the orthography. It would be adviſable, therefore, in thoſe who are not of the naval profeſſion, where it is technical, to pronounce this word, when they read it, diſtinctly as it is written.

☞ I do not heſitate to follow Dr. Kenrick and Mr. Nares in this word, and all its compounds, in giving the *o* its fourth ſound, equivalent to the ſecond ſound of *u*, though contrary to Mr. Sheridan's pronunciation, which makes it rhyme with *Tom, from* &c. Dr. Johnſon's derivation of the word to *bump*, from the ſame origin as *bomb*, makes the pronunciation I have given more agreeable to analogy.

Bomb-chest, bŭm'tſhĕſt. s. A kind of cheſt filled with bombs, placed underground, to blow up in the air.

Bomb-ketch, bŭm'kĕtſh. } s.

Bombastick, bŭm-băs'tĭk. a. High-ſounding, pompous.

☞ Dr. Aſh is the only lexicographer who has inſerted this word; but I think its general uſage entitles it to a place in the language, eſpecially as it has the true adjective termination, and relieves us from the inconvenience to which our language is ſo ſubject, that of having the ſubſtantive and adjective of the ſame form; and though, as *bombast* ſtands in Dr. Johnſon, the ſubſtantive has the accent on the laſt ſyllable, and the adjective on the firſt, contrary, I think, to the analogy of accentuation (494); yet this is but a bungling way of ſupplying the want of different words for different parts of ſpeech.—See Bowl.

☞ This word is pronounced four ways, *Bozum*, *Buzzum*, and *Boozum*, the *oo* like *u* in *bull*; and *bouzom*, as *ou* in *house*. Sheridan and Scott adopt the third sound; Perry seems to mark the fourth; Dr. Kenrick has the second and fourth, but seems to prefer the former; and W. Johnston has the second; and that is, in my opinion, the most general: but the stage seems to have adopted the fourth sound, which has given it a currency among polite speakers, and makes it the most fashionable. Mr. Elphinston, a nice observer, as well as a deep investigator, announces the second, but tells us that the third was the original pronunciation.

To BOW, bō. To bend ſideways.

☞ While ſome words are narrowing and contracting their original ſignification, others are dividing and ſubdividing into a thouſand different acceptations. The verb to *bow* rhyming with *cow* might originally ſignify flexure every way, and ſo ſerve for that action which made any thing crooked, let its direction be what it would: but it appears certain, that at preſent it only means that flexure which is vertical, and which may be called a *bowing down*, but is by no means ſo applicable to that flexure which is ſideways or horizontal, and for which, neceſſity ſeems inſenſibly to have brought the verb I have inſerted into uſe. This verb ſeems accompanied by the word *out* as the other is by *down*, and we may ſay ſuch a thing *bows down*, but another thing *bows out*, or ſwells ſideways: the firſt verb is pronounced ſo as to rhyme with *cow*, *now*, &c. and the laſt with *go*, *no*, &c. Milton ſeems to have uſed the word with this ſound, where in his *Penſeroſo* he ſays——

"And love the high *embowed* roof,
"With antique pillars' maſſy proof."

But as nothing can tend more to the ambiguity of language than to have words ſpelled in the ſame manner founded differently in order to diſtinguiſh their meaning by their pronunciation, I would humbly adviſe to

☞ (559).—Fāte, fär, fall, fåt;—mē, mĕt;—pine, pĭn;—

ſpell the word *bow* (to ſhoot with), and the verb to *bow* (to bend ſideways), with the final *e*; this ſlight addition will relieve a reader from the embarraſſment he is under at firſt ſight, where he is not thoroughly acquainted with the circumſtances of a relation, and does not know how to pronounce the word till he has read the context. For the propriety of this additional *e*, ſee the words Bowl and Form.

I cannot refrain from quoting Mr. Nares on this word, as his opinion has great authority:—"A bow for arrows, and to bow, "when it ſignifies merely to bend any thing, "have *ow* like *ō* long. This diſtinction I "believe to be right, though our great "Lexicographer has not noticed it. He "gives to *bow*, in every ſenſe, the regular "ſound of *ow*. (that is rhyming with *cow*.) "But of this inſtance the firſt and fourth "appear to be erroneous; the third is "doubtful; and in the ſecond, the word is "uſed to expreſs an inclination of the body, "but metaphorically applied to trees. See "the four inſtances from Shakeſpeare, Dry-"den, and Locke, under *To bow*, v. a. "No. 1."

A want of attending to the different ideas the word *bow* conveys, as it is differently ſounded, has occaſioned the inconſiſtent ſea terms; the *bow* of a ſhip, rhyming with *cow*; and an anchor, called the beſt *bower*, rhyming with *bour*; and *bow*, in the word *bowſprit*, rhyming with *go*, *no*, &c.

Bow-bent, bō'bĕnt. a. Crooked.

Bow-hand, bō'hănd. s. The hand that draws the bow.

Bow-legged, bō'lĕgd. a. (359). Having crooked legs.

Bowels, bŏu'ĕls. s. Inteſtines, the veſſels and organs within the body; the inner parts of any thing; tenderneſs, compaſſion.

Bower, bŏu'ŭr. s. (98). An arbour: it ſeems to ſignify, in Spenſer, a blow, a ſtroke.

Bower, bŏu'ŭr s. Anchor ſo called.

Bowery, bŏu'ŭr-rē. a. Full of bowers.

Bowl, bōle. s. A veſſel to hold liquids; the hollow part of any thing; a baſin, a fountain.—See the next word.

Bowl, bōle. s. Round maſs rolled along the ground.

☞ Many reſpectable ſpeakers pronounce this word ſo as to rhyme with *howl*, the noiſe made by a dog. Dr. Johnſon, Mr. Elphinſton, and Mr. Perry, declare for it; but Mr Sheridan, Mr. Scott, Dr. Kenrick, and Mr. Smith, pronounce it as the veſſel to hold liquor, rhyming with *bole*. I remember having been corrected by Mr. Garrick for pronouncing it like *howl*; and am upon the whole of opinion, that pronouncing it as I have marked it is the preferable mode, though the leaſt analogical. But as the veſſel has indiſputably this ſound, it is rendering the language ſtill more irregular to give the ball a different one. The inconvenience of this irregularity is often perceived in the word *bow*; to have the ſame word ſignify different things, is the fate of all languages; but pronouncing the ſame word differently to ſignify different things, is multiplying difficulties without neceſſity; for though it may be alleged that a different pronunciation of the ſame word to ſignify a different thing is in ſome meaſure remedying the poverty and ambiguity of language, it may be anſwered, that it is in reality increaſing the ambiguity by ſetting the eye and ear at variance, and obliging the reader to underſtand the context before he can pronounce the word. It may be urged, that the Greek and Latin languages had theſe ambiguities in words which were only diſtinguiſhable by their quantity or accent. But it is highly probable that the Greek language had a written accent to diſtinguiſh ſuch words as were pronounced differently to ſignify different things, and this is equivalent to a different ſpelling; and though the Latin word *lego* ſignified either *to read* or *to ſend*, according to the quantity with which the firſt ſyllable was pronounced, it was certainly an imperfection in that language which ought not to be imitated. Ideas and combinations of ideas will always be more numerous than words; and therefore the ſame word will often ſtand for very different ideas; but altering the ſound of a word without altering the ſpelling, is forming an unwritten language.

To Bowl, bōle. v. a. To play at bowls; to throw bowls at any thing.

Bowler, bō'lŭr. s. He that plays at bowls.

Bowline, bŏu'lĭn. s. A rope faſtened to the middle part of the outſide of a ſail.

Bowling-green, bō'ling-grēn. s. A level piece of ground, kept ſmooth for bowlers.

Bowman, bō'măn. s. (88). An archer.

Bowsprit, bŏ'ſprit. s. Boltſprit; which ſee.

Bowstring, bō'ſtring. s. The ſtring by which the bow is kept bent.

Bow-window, bō'win'dō.

☞ Dr. Johnſon derives this word, and, perhaps, juſtly, from *Bay-window*, or a window forming a *bay* in the internal part of the room; but preſent cuſtom has univerſally

agreed to call theſe windows *bow-windows*, from the curve, like a *bow*, which they form by jutting outwards. However original and juſt, therefore, Dr. Johnſon's derivation may be, there is little hope of a conformity to it, either in writing or pronunciation, while there is apparently ſo good an etymology, both for ſenſe and ſound, to ſupport the preſent practice.—See To Bow.

BOWYER, bô'yûr. s. (98). An archer; one whoſe trade is to make bows.

BOX, bôks. s. A tree; the wood of it.

BRACE, brâſe. s. A pair, a couple.

BRACELET, brâſe'lêt. s. An ornament for the arms.

☞ I have in the pronunciation of this word, made the *a* long and ſlender, as in *brace*, as I find it in Dr. Kenrick, W. Johnſton, Mr. Perry, and Mr. Scott; and not ſhort as in *braſs*, as Mr. Sheridan has marked it; and which, I believe, is the prevailing pronunciation in Ireland: for though many compounds ſhorten the vowel in the ſimple, as is ſhewn at large in the Principles of Pronunciation, (308) (515); yet I think ſuch words are exceptions as are only diminutives, plurals and feminines.—See PATRONESS.

☞ There is a plauſible derivation of this word from the French *Bon Pere*, which, ſay the anti-clerical critics, was the toaſt which the Monks gave to the Pope in a full glaſs. The farther a derivation is traced, the better it is liked by the common crowd of critics; but Mr. Elphinſton, who ſaw farther into Engliſh and French etymology than any author I have met with, contents himſelf with deriving this word from the word *Bump*, which, as a verb, ſignifies the action of ſome heavy body that makes a denſe noiſe, and,

as a noun, implies the general effect of ſuch an action on the animal frame, which is a protuberance or ſwelling; and the ſwelling out of the liquor when a glaſs is full ſeems the natural offſpring of the ſubſtantive *Bump*.

Dr. Aſh, whoſe etymological knowledge ſeems very extenſive, gives this word the ſame derivation, but tells us that the word *Bumpkin* is of uncertain etymology; a little attention, however, would, I think, have led him to the ſame origin of this word as the former; for the heavy and protuberant form of the ruſticks, to whom this word is generally applied, might very naturally generate the appellation.

☞ The general ſound of this word is like the verb to *buy;* but we not unfrequently hear it pronounced like the verb to *be.* This latter ſound, however, is only tolerable in colloquial pronunciation, and then only when uſed as a prepoſition; as when we ſay, Do you travel *by* land or *by* water? But in reading theſe lines of Pope:

" *By* land, *by* water, they renew the charge;
" They ſtop the chariot, and they board the barge."

Here we ought to give the word *by* the ſound of the verb to *buy;* ſo that pronouncing this like *be,* is, if the word will be pardoned me, a *colloquialiſm.*

☞ Mr. Sheridan is the only orthöepiſt who accents this word on the firſt ſyllable as I have done; and yet every other lexicographer, who has the word, accents *Anorexy*, *Ataxy*, and *Artaraxy*, on the firſt ſyllable, except Mr. Sheridan, who accents *Anorexy*, and Bailey *Ataxy* on the penultimate.—Whence this variety and inconſiſtency ſhould ariſe, it is not eaſy to determine. *Orthodoxy* and *Apoplexy* had ſufficiently chalked out the analogy of accentuation in theſe words. The terminations in *axy* and *exy* do not form a ſpecies of words which may be called enclitical, like *logy* and *graphy* (517), but ſeem to be exactly under the predicament of thoſe Latin and Greek words, which, when adopted into Engliſh by dropping their laſt ſyllable, remove the accent at leaſt two ſyllables higher.—See ACADEMY.

CANT, kănt. s. A corrupt dialect uſed by beggars and vagabonds; a form of ſpeaking peculiar to ſome certain claſs or body of men; a whining pretenſion to goodneſs; barbarous jargon; auction.

☞ It is ſcarcely to be credited, that the writer in the Spectator ſigned T. ſhould adopt a derivation of this word from one *Andrew Cant*, a Scotch Preſbyterian Miniſter, when the Latin *cantus*, ſo expreſſive of the ſinging or whining tone of certain preachers is ſo obvious an etymology. The Cant of particular profeſſions is an eaſy derivation from the ſame origin, as it means the ſet phraſes, the routine of profeſſional language, reſembling the chime of a ſong. *Quaint*, from which ſome derive this word, is a much leſs probable etymology.

To CANT, kănt. v. n. To talk in the jargon of particular profeſſions; to ſpeak with a particular tone.

☞ I have in this word departed from Mr. Sheridan and Dr. Kenrick, becauſe I think the beſt uſage has entirely departed from them. About thirty years ago the firſt ſyllable of *Chamber* was univerſally pronounced ſo as to rhyme with *Palm*, *Pſalm*, &c.; but ſince that time it has been gradually narrowing to the ſlender ſound of *a* in *came*, *fame*, &c. and ſeems now to be fully eſtabliſhed in this ſound. This, however, is to be regretted, as it militates with the laws of ſyllabication: there are few words in the language which we cannot ſo divide into parts as to ſhow by this diviſion the quantity of the vowels; this word forms an exception; for *mb*, being uncombinable conſonants, we cannot end the firſt ſyllable with *a*; and if we join *m* to it, the *a* becomes ſhort, and requires another ſound. But if two ſuch words as *Cam* and *Bridge* could not reſiſt the blind force of cuſtom, which has for ſo many years reduced them to *Camebridge*, why ſhould we wonder that *Chamber* and *Cambrick*, *Tinmouth* and *Yarmouth*, ſhould yield to the ſame unrelenting tyrant?

To CHAMBER, tſhâme'bŭr. v. n. To be wanton, to intrigue; to reſide as in a chamber.

CHAMBERER, tſhâme'bŭr-ŭr. s. A man of intrigue.

☞ This word, with others of the ſame form, ſuch as *range*, *ſtrange*, *mange*, &c. are in the weſt of England, pronounced with the ſhort ſound of *a* in *ran*, *man*, &c. The ſame may be obſerved of the *a* in the firſt ſyllable of *angle*, *ancient*, &c. which, in that part of the kingdom, ſounds like the article *an*; and this though diſagreeable to a London ear, and contrary to the beſt uſage, which forms the only rule, is more analogical than pronouncing them as if written *chainge*, *ſtrainge*, *aincient*, *aingel*, &c.; for we find every other vowel in this ſituation ſhort, as *revenge*, *hinge*, *ſpunge*, &c.

To CHANGE, tſhānje. v. n. To undergo change, to ſuffer alteration.

CHANGE, tſhānje. s. An alteration of the ſtate of any thing; a ſucceſſion of one thing in the place of another; the time of the moon in which it begins a new monthly revolution; novelty; an alteration of the order in which a ſet of bells is ſounded; that which makes a variety; ſmall money.

To CHAR, tshâre. v. n. To work at other's houſes by the day.

☞ "As the maid that milks,
"And does the meaneſt *chars*."
—*Shakeſpeare.*

In Ireland they ſeem to have retained the genuine pronunciation of this, as well as many other old Engliſh words; I mean that which is agreeable to the orthography, and rhyming with *tar*. In Engliſh it is generally heard like *chair* to ſit on, and its compound *charwoman*, like *chair-woman*. Skinner, I know, admits that the word may be derived from the Dutch *keeren*, to ſweep; and Junius ſpells the word *chare*, and tells us the Saxons have the ſame word ſpelled cyppe, ſignifying buſineſs or charge, but be its derivation what it will, either the orthography, or the pronunciation, ought to be altered; for, as it ſtands at preſent, it is a ſingular and diſgraceful anomaly.

CHAR-WOMAN, tshâre'wŭm-ăn. s. A woman hired accidentally for odd work.

CHARACTER, kăr'ăk-tŭr. s (353). A mark, a ſtamp, a repreſentation; a letter uſed in writing or printing; the hand or manner of writing; a repreſentation of any man as to his perſonal qualities; an account of any thing as good or bad; the perſon with his aſſemblage of qualities.

CHARM, tſhărm. s. Words or philtres, imagined to have ſome occult power; ſomething of power to gain the affections.

To CHARM, tſhărm. v. a. To fortify with charms againſt evil; to make powerful by charms; to ſubdue by ſome ſecret power; to ſubdue by pleaſure.

CHARMER, tſhăr'mŭr. s. One that has the power of charms, or enchantments; one that captivates the heart.

CHARMING, tſhăr'mĭng. particip. a. Pleaſing in the higheſt degree.

CHARMINGLY, tſhăr'mĭng-lē. ad. In ſuch a manner as to pleaſe exceedingly.

CHARMINGNESS, tſhăr'mĭng-nĕs. s. The power of pleaſing.

CHARNEL, tſhăr'nĕl. a. Containing fleſh or carcaſes.

CHARNEL-HOUSE. tſhăr'nĕl-hŏuſe. s. The place where the bones of the dead are repoſited.

CHART, kărt, or tſhărt. s. A delineation of coaſts.

☞ As this word is perfectly angliciſed, by cutting off the *a* in the Latin *Charta*, and *ns* in the Greek χαρτης, we ought certainly to naturalize the initial letters by pronouncing them as in *Charter*, *Charity*, &c.: but ſuch is our fondneſs for Latin and Greek originals, that we catch at the ſhadow of a reaſon for pronouncing after theſe languages, though in direct oppoſition to the laws of our own. Thus we moſt frequently, if not univerſally, hear this word pronounced as *Cart*, a carriage, and perfectly like the French *Carte*.

CHARTER, tſhăr'tŭr. s. A charter is a written evidence; any writing beſtowing privileges or rights; privilege, immunity, exemption.

CHARTER-PARTY, tſhăr'tŭr-păr-tē. s. A paper relating to a contract, of which each party has a copy.

To CHASTEN, tſhāſe'tn. v. a. (405). To correct, to puniſh.

☞ This word is ſometimes falſely pronounced with the *a* ſhort, ſo as to rhyme with *faſten*; but it is exactly under the ſame predicament as the verb to *baſte*, which, when formed into what is called an inchoative verb, becomes *baſten*, and with which *chaſten*, is a perfect rhyme.

To CHASTISE, tſhăs-tize'. v. a. To puniſh, to correct by puniſhment; to reduce to order or obedience.

CHASTITY, tſhás'tė-tė. s. (511). Purity of the body; freedom from obſcenity; freedom from bad mixture of any kind.

☞ I have in this word departed from Mr. Sheridan, and ſeveral other ſpeakers, in the ſound of the *a* in the firſt ſyllable, as no analogy can be clearer than that which prevails in words of this termination, where the antepenultimate accent always ſhortens the vowel. Thus, though the *a*, *e*, and *i*, are long in *humane*, *ſerene*, and *divine*, they are ſhort in *humanity*, *ſerenity*, and *divinity*; and unleſs cuſtom clearly forbids, which I do not believe is the caſe, *chaſtity* ought certainly to have the *a* as I have marked it.

CHASTLY, tſhåſte'lė. ad. Without incontinence, purely, without contamination.

☞ In theſe words Dr. Johnſon has very improperly omitted the ſilent *e*; they ought to be written *chaſtely* and *chaſteneſs*.—See Introduction to Rhyming Dictionary, Orthographical Aphoriſm the VIIIth.

CHEERFUL, tſhéér'fůl, or tſhér'fůl. a. Gay, full of life, full of mirth; having an appearance of gayety.

☞ This word, like *fearful*, has contracted an irregular pronunciation that ſeems more expreſſive of the turn of mind it indicates than the long open *e*, which languiſhes on the ear, and is not akin to the ſmartneſs and vivacity of the idea. We regret theſe irregularities, but they are not to be entirely prevented; and as they ſometimes ariſe from an effort of the mind to expreſs the idea more forcibly, they ſhould not be too ſtudiouſly avoided; eſpecially when cuſtom has given them conſiderable currency; which I take to be the caſe with the ſhort pronunciation of the preſent word. orthöepiſts ſeem to adopt the latter pronunciation; and W. Johnſton, Dr. Kenrick, and Mr. Perry, the former; and as this is agreeable to the orthography, and, it may be added, to the etymology (which indicates that ſtate of mind which ariſes from being full of good cheer), it ought, unleſs the other has an evident preference in cuſtom, to be looked upon as the moſt accurate (241) (242).

CHEERFULLY, tſhēēr'fŭl-lē. ad. Without dejection, with gayety.

CHEERFULNESS, tſhēēr'fŭl-nĕs. s. Freedom from dejection, alacrity; freedom from gloomineſs.

CHERUBICK, tſhē-rū'bĭk. a. Angelick, relating to the Cherubim.

CHERUBIM, tſhĕr'ŭ-bĭm. s. The Hebrew plural of Cherub.

☞ Thoſe who underſtand no language but their own, are apt to commit an unpardonable fault with critics, by miſtaking this word for a ſingular, and writing the plural *Cherubims*. Others are apt to commit a much greater fault in ſpeaking, which is that of forming an adjective from this word, as if written *Cherubimical*, or *Cherubinical*, inſtead of *Cherubick*. How hard is the fate of an Engliſhman, who, to write and ſpeak his own language properly, muſt not only underſtand French, Latin, and Greek, but Hebrew alſo!

CHERUBIN, tſhĕr'ŭ-bĭn. a. Angelical.

CHINA, tſhā'nė, or tſhī'nā. s. China ware, porcelain, a ſpecies of veſſels made in China, dimly tranſparent.

☞ What could induce us to ſo irregular a pronunciation of this word is ſcarcely to be conceived. One would be apt to ſuppoſe that the French firſt imported this porcelain, and that when we purchaſed it of them we called it by their pronunciation of China (*Sheen*); but being unwilling to drop the *a*, and deſirous of preſerving the French ſound of *i*, we awkwardly tranſpoſed theſe ſounds, and turned *China* into *Chaince*. This abſurd pronunciation ſeems only tolerable when we apply it to the porcelain of China, or the Oranges, which are improperly called China Oranges; but even in theſe caſes it ſeems a pardonable pedantry to reduce the word to its true ſound.

☞ Scholars have lately diſcovered, that all the nations of Europe, have, for many centuries paſt, been erroneous in ſpelling this word with a *y* inſtead of an *e*; that is, *Chymiſt* inſtead of *Chemiſt*: and if we crave their reaſons, they very gravely tell us, that inſtead of deriving the word from χυμος, juice, or from χεω, χευω, or χυω, to melt, it is more juſtly derived from the Arabic *kema*, black. But Dr. Johnſon, who very well underſtood every thing that could be urged in favour of the new orthography, has very judiciouſly continued the old; and indeed, till we ſee better reaſons than have yet appeared, it ſeems rather to favour of an affectation of Oriental learning, than a liberal deſire to rectify and improve our language. But let the word originate in the Eaſt or Weſt, among the Greeks or Arabians, we certainly received it from our common *Linguaducts*, (if the word will be pardoned me,) the Latin and French,

which ſtill retain either the *y*, or its ſubſtitute *i*.

Beſides, the alteration produced a change in the pronunciation, which, from its being but ſlight, is the leſs likely to be attended to; and therefore the probability is, that, let us write the word as we will, we ſhall ſtill continue to pronounce the old way; for in no Engliſh word throughout the language does the *e* ſound like *y*, or *i* ſhort, when the accent is on it.

This improvement, therefore, in our ſpelling, would, in all probability, add a new irregularity to our pronunciation, already incumbered with too many. Warburton, in his Edition of Pope's Works, ſeems to have been the firſt writer of note who adopted this mode of ſpelling from Boerhaave, and the German critics; and he ſeems to have been followed by all the inſcriptions on the chymiſts ſhops in the kingdom. But till the voice of the people has more decidedly declared itſelf, it is certainly the moſt eligible to follow Dr. Johnſon and our eſtabliſhed writers in the old orthography.—See Mr. Nares's Engliſh Orthoepy, page 285, where the reader will ſee judiciouſly expoſed the folly of altering ſettled modes of ſpelling for the ſake of far-fetched and fanciful etymologies.

CIRCUMFLEX, sĕr'kŭm-flĕks. s. An accent used to regulate the pronunciation of syllables.

☞ All our prosodists tell us, that the Circumflex accent is a composition of the grave and the acute; or that it is a raising and falling of the voice upon the same syllable. If they are desired to exemplify this by actual pronunciation, we find they cannot do it, and only pay us with words. This accent, therefore, in the ancient as well as modern languages, with respect to sound, has no specific utility. The French, who make use of this Circumflex in writing, appear, in the usual pronunciation of it, to mean nothing more than long quantity.—See BARYTONE.—If the inspector would wish to see a rational account of this accent, as well as of the *grave* and *acute*, let him consult a work lately published by the Author of this Dictionary, called *A Rhetorical Grammar*, the third edition; or, *A Key to the Classical Pronunciation of Greek and Latin Proper Names*.

To CLOTHE, klōthe. v. a. (467). To inveſt with garments, to cover with dreſs; to adorn with dreſs; to furniſh or provide with clothes.

CLOTHES, klōze. s. Garment, raiment; thoſe coverings of the body that are made of cloth.

☞ This word is not in Johnſon's Vocabulary, though he has taken notice of it under the word *Cloth*, and ſays it is the plural of that word. With great deference to his authority, I think it is rather derived from the verb to *clothe*, than from the noun *cloth*, as this word has its regular plural *cloths*, which plural regularly ſounds the *th* as in *this* (469), and not as *x*; which is a corruption that, in my opinion, is not incurable. I ſee no reaſon why we may not as eaſily pronounce the *th* in this word as in the third perſon of the verb To *clothe*.

☞ How Dr. Johnſon could be guilty of ſo groſs an overſight as to ſpell this word and its compounds with one *d* is inconceivable. By the general rule of Engliſh pronunciation, as the word ſtands here, it ought to be pronounced with the *o* long, the firſt ſyllable rhyming with *go*, *no*, and *ſo*. Falſe and abſurd, however, as this ſpelling is, the veneration I have for Dr. Johnſon's authority forbids me to alter it in this Dictionary, though I ſhall never follow it in practice. Perhaps the ſame veneration induced Mr. Sheridan to let this word ſtand as he found it in Johnſon. Dr. Kenrick has ventured to inſert another *d* in the verb; but in the ſubſtantive, derived from the preſent participle *Codling*, lets it ſtand with one *d*. Some will be apt to think that when *d* ends a ſyllable, and a conſonant follows the *d*, which begins another, that the buſineſs is done, and that the quantity of the vowel is ſufficiently ſecured: but this is a miſtake; for unleſs we previouſly underſtand the ſimple, the *o* in the compound, by the general rule, muſt be long. Now the firſt principle of orthography is, that, if poſſible, the letters ſhould of themſelves point out the ſound of the word, without the neceſſity of recurring to etymology to find out the ſound of the letters; and that we ſhould never have recourſe to etymology, but where fixing the ſound would unſettle the ſenſe. Thus *Coddling*, a kind of apple, ought to be written with double *d*, both becauſe it determines the ſound of the *o*, and ſhews its derivation from the verb to *Coddle*. And *Codling*, a ſmall cod fiſh, ought to have but one *d*, becauſe putting two, in order to fix the ſound of *o*, would confound it with another word. To write *Saddler*, therefore, with one *d*, as we frequently ſee it on ſhops, is an error againſt the firſt principles of ſpelling; as, without neceſſity, it obliges us to underſtand the derivation of the word before we are ſure of its ſound. The word *Stabling* and *Stabler*, for ſtable-keeper in Scotland, with the word *Fabled* in Milton, all preſent their

true ſound to the eye without knowing their primitives; and this eſſential rule has generated the double conſonant in the participles and verbal nouns, *beginning*, *regretted*, *complotter*, &c. But this rule, rational and uſeful as it is, is a thouſand times violated by an affectation of a knowledge of the learned languages, and an ignorant prejudice againſt cluſters of conſonants, as they are called. Thus *couple*, *trouble*, *double*, *treble*, and *triple*, have ſingle conſonants, becauſe their originals in Latin and French have no more, though double conſonants would fix the ſound of the preceding vowels, and be merely double to the eye.

vowels appear more perceptibly than in the prepositional syllables, *Col*, *Com*, *Con*, and *Cor*. When the accent is on these syllables, in *College*, *Commissary*, *Conclave*, *Corrigible*, &c. &c. the *o* has distinctly its short sound. The same may be observed of this *o*, when the principal accent is on the third syllable, and the secondary accent on the first (523); as in *Colonnade*, *Commendation*, *Condescension*, *Correspondent*, &c. &c.: for in this case there is a secondary accent on the first syllable, which preserves the *o* in its true sound (522); but when the accent is on the second syllable, this vowel slides into a sound like short *u*, and the words To *Collect*, To *Commit*, To *Convince*, To *Corrupt*, &c. &c. are heard as if written *Cullect*, *Cummit*, *Cunvince*, *Currupt*, &c. &c. It is true, that when these words are pronounced alone with deliberation, energy, and precision, the *o* in the first syllable preserves nearly its true sound; but this seems to slide insensibly into short *u* the moment we unite these words with others, and pronounce them without premeditation. The deliberate and solemn sound is that which I have given in this Dictionary: nor have I made any difference between words where the accent is on the second syllable; and why Mr. Sheridan, and those who have followed him, should in *Combust*, *Commute*, *Complete*, &c. &c. give the sound of short *o* in *from*; and in *Command*, *Commit*, *Commence*, &c. &c. give the same letter the sound of short *u* in *drum*, I cannot conceive; they are all susceptible of this sound or none, and therefore should all be marked alike. If custom be pleaded for this distinction, it may be observed that this plea is the best in the world when it is evident, and the worst when obscure. No such custom ever fell under my observation; I have always heard the first syllable of *compare* and *compel*, of *commence* and *compose*, pronounced alike, and have therefore made no distinction between them in this Dictionary. I have given them all the sound of the *o* in *Comma*; though I am sensible that, in colloquial pronunciation, they all approach nearer to the short *u*, and are similar to the same syllables in *Comfort*, *Combat*, &c. And it may be laid down as a general rule, without an exception, "that *o* "in an initial syllable, immediately before "the accent, and succeeded by two uncom-"binable consonants, may, in familiar con-"versation, be pronounced like the same "letter in *come*, *done*," &c.

☞ The propenſity of the unaccented *o* to fall into the ſound of ſhort *u* is no-where more perceptible than in the firſt ſyllables of words beginning with *col, com, con*, or *cor*, when the accent is on the ſecond ſyllable. Thus the *o* in to *collect* and *college*; in *commend* and *comment*; in *connect* and *conſul*; in *correct* and *corner*, cannot be conſidered as exactly the ſame in all: the *o* in the firſt word of each of theſe pairs has certainly a different ſound from the ſame letter in the ſecond; and if we appreciate this ſound, we ſhall find it coincide with that which is the moſt nearly related to it, namely the ſhort *u*. I have not however ventured to ſubſtitute this *u*, not that I think it incompatible with the moſt correct and ſolemn pronunciation, but becauſe where there is a poſſibility of reducing letters to their radical ſound without hurting the ear, this radical ſound ought to be the model; and the greater or leſſer departure from it, left to the ſolemnity or familiarity of the occaſion. To foreigners, however, it may not be improper to remark, that it would be always better for them to adopt the *u* inſtead of *o*; this will ſecure them from the ſmalleſt impropriety, for natives only can ſeize ſuch nice diſtinctions as ſometimes divide even judges themſelves. Mr. Sheridan was certainly of opinion that this unaccented *o* might be pronounced like *u*, as he has ſo marked it in *command, commence, commiſſion*, and *commend*; though not in *commend-r*; and in *compare*, though not in *comparative*; but in almoſt every other word where this *o* occurs, he has given it the ſound it has in *conſtant*. Mr. Scott has exactly followed Mr. Sheridan in theſe words, and Dr. Kenrick has uniformly marked them all with the ſhort ſound of *o*. Why Mr. Sheridan and Mr. Scott ſhould make any difference in the firſt ſyllables of theſe words, where the letters and accents are exactly the ſame, I cannot conceive: theſe ſyllables may be called a ſpecies; and, if the occaſion were not too trifling for ſuch a compariſon, it might be obſerved, that as nature varies in individuals, but is uniform in the ſpecies, ſo cuſtom is ſometimes various in accented ſyllables, which are definitely and ſtrongly marked, but commonly more regular in unaccented ſyllables, by being left, as it were, to the common operation of the organs of pronunciation.—See the words COLLECT and DOMESTIC.

COMMENDABLE, kŏm'mĕn-dă-bl. / kŏm-mĕn'dă-bl. a. Laudable, worthy of praiſe.

☞ This word, like *Acceptable*, has, ſince Johnſon wrote his Dictionary, ſhifted its accent from the ſecond to the firſt ſyllable. The ſound of the language certainly ſuffers by theſe tranſitions of accent. However, when cuſtom has once decided, we may complain, but muſt ſtill acquieſce. The accent on the ſecond ſyllable of this word is grown vulgar, and there needs no other reaſon for baniſhing it from polite pronunciation.

CONFESSOR, kŏn'fĕs-sŭr. s. One who makes profeſſion of his faith in the face of danger; he that hears confeſſions, and preſcribes penance; he who confeſſes his crimes.

☞ Dr. Kenrick ſays, this word is ſometimes, but improperly accented on the firſt ſyllable; but it may be obſerved, that this impropriety is become ſo univerſal, that not one who has the leaſt pretenſion to politeneſs dares to pronounce it otherwiſe. It is, indeed, to be regretted, that we are ſo fond of Latin originals as entirely to neglect our own; for this word can now have the accent on the ſecond ſyllable, only when it means one who confeſſes his crimes: a ſenſe in which it is ſcarcely ever uſed. Mr. Sheridan and Entick have the accent on the firſt ſyllable of this word, Mr. Scott on the firſt and ſecond; Dr. Johnſon, Mr. Perry, Buchanan, W. Johnſton, Aſh, Bailey, and Smith, on the ſecond: but notwithſtanding this weight of authority, the beſt uſage is certainly on the other ſide.

CONFEST, kŏn-fĕſt'. a. Open, known, not concealed.

☞ Dr. Kenrick tells us, that this is a poetical word for *Confeſſed*; and, indeed, we frequently find it ſo written by Pope and others:

"This clue thus found unravels all the reſt;
"The proſpect clears, and Clodio ſtands
"confeſt."

But that this is a mere compliance with the prejudices of the eye, and that there is not the leaſt neceſſity for departing from the common ſpelling, ſee Principles of Engliſh Pronunciation, No. 360.

CONFESTLY, kŏn-fĕſt'lē. ad. Indiſputably, properly CONFESSEDLY (364).

CONFIDANT, kŏn-fē-dănt'. s. A perſon truſted with private affairs.

☞ This word, very unlike moſt others from the ſame ſource, has been made to alter its French orthography, in order to approach a little nearer to the Engliſh pronunciation of it. Some affected ſpeakers on the ſtage pronounce the firſt ſyllable like *cone*, as it is marked in the firſt edition of Mr. Sheridan's Dictionary; and this is perfectly of a piece with the affectation which has altered the ſpelling of the laſt. By Dryden and South, as quoted by Dr. Johnſon, we find this word ſpelled like the adjective *confident*; and it is more than probable that its French pronunciation is but of late date; but ſo univerſal is its uſe at preſent, that a greater mark of ruſticity cannot be given than to place the accent on the firſt ſyllable, and to pronounce the laſt *dent* inſtead of *dant*.

To CONFIDE, kŏn-fīde'. v. n. To truſt in.

To CONFIGURE, kŏn-fĭg'ūre. v. a. To diſpoſe into any form.

CONFINE, kŏn'fine. s. (140) (492). Common boundary, border, edge.

☞ Dr. Johnſon tells us, that the ſubſtantive *confine* was formally pronounced with the accent on the laſt ſyllable. The examples, however, which he gives us from the poets, prove only that it was accented both ways. But, indeed, it is highly probable that this was the caſe; for inſtances are numerous of the propenſity of latter pronunciation to place the accent higher than formerly; and when by this accentuation a noun is diſtinguiſhed from a verb, it is ſuppoſed to have its uſe.—See BOWL.

To CONFINE, kŏn-fine'. v. n. To border upon, to touch on different territories.

To CONFISCATE, kŏn-fĭs'kāte. v. a. To transfer private property to the publick, by way of penalty.

CONFISCATE, kŏn-fĭs'kāte. a. Transferred to the publick as forfeit.

☞ Dr. Kenrick blames Dr. Johnſon for accenting this word on the ſecond ſyllable, when the example he brings from Shakeſpeare accents it on the firſt; but it may be obſerved, that as the verb ought to have the accent on the ſecond ſyllable, the adjective, which is derived from it, ought to have the accent on the ſame ſyllable likewiſe; and the example from Shakeſpeare muſt be looked upon as a poetical licenſe.

CONFISCATION, kŏn-fĭs-kā'shŭn. s. The act of transferring the forfeited goods of criminals to publick uſe.

CONFITENT, kŏn'fĕ-tĕnt. s. One confeſſing.

☞ It is a ſcandal to ſeminaries of learning that the latter pronunciation of this word ſhould prevail there. Thoſe who ought to be the guardians of propriety are often the perverters of it. Hence *Accidence* for *Accidents*, *Prepoſtor* for *Prepoſitor*, and *Conſtur* for *Conſtrue*; for it muſt be carefully noted, that this laſt word is under a different predicament from thoſe which end with *r* and mute *e*: here the vowel *u* muſt have its long ſound, as in the word *true*; this letter cannot be ſunk or tranſpoſed like *e* in *Centre*, *Sceptre*, &c.

To CONTEMPLATE, kŏn-tĕm'plāte. v. a. To ſtudy, to meditate.

☞ There is a very prevailing propenſity to pronounce this word with the accent on the firſt ſyllable; a propenſity which ought to be checked by every lover of the harmony of language. That very ſingular analogy in our tongue, of placing the accent on the laſt ſyllable of the verb, and the firſt of the noun, (492,) ſeems to have taken place chiefly for the convenience of forming participles, adverbs, and verbal nouns; which would be inharmonious and difficult to pronounce, if the verb had the accent on the firſt ſyllable. This analogy ſhould teach us to avoid placing the accent on the firſt ſyllable of this and ſimilar verbs, however we may pronounce nouns and adjectives; for though to *Cŏntemplate* with the accent on the firſt ſyllable is not of very difficult pronunciation, yet *Cŏntemplating* and *Cŏntemplatingly* are almoſt unpronounceable.

To CONTEMPLATE, kŏn-tĕm'plāte. v. n. To muſe, think ſtudiouſly with long attention.

CONTRACT, kŏn'trăkt. s. (492). A bargain, a compact; an act whereby a man and woman are betrothed to one another; a writing in which the terms of a bargain are included.

☞ Mr. Nares, in his Engliſh Orthöepy, page 338, has very properly criticiſed Dr. Johnſon's obſervation on this word, where he ſays, 'Dr. Johnſon has accented this word 'on the laſt ſyllable, and has ſubjoined this 'remark, "anciently accented on the firſt." 'It is evident that the whole article ſhould 'be reverſed: the word ſhould ſtand with the 'accent on the firſt, and the remark ſhould 'be, "anciently accented on the laſt." The juſtneſs of theſe obſervations will appear from the quotations:

"This is the hand which, with a vow'd *con-*
"*tract*,
"Was faſt belock'd in thine."—*Shakeſpeare.*

"I did; and his *contract* with Lady Lucy,
"And his *contract* by deputy in France.—*Ibid.*

But that the accent ſhould now be placed on the firſt ſyllable, needs no proof but the general ear, and the general analogy of diſſyllable nouns and verbs of the ſame form (492).

CONTRARIETY, kŏn-trā-rī'ē-tē. s. Repugnance, oppoſition; inconſiſtency, quality or poſition deſtructive of its oppoſite.

CONTRARILY, kŏn'trā-rē-lē. ad. In a manner contrary; different ways, in oppoſite directions. Little uſed.

☞ This and the following word are by Dr. Johnſon accented on the ſecond ſyllable; no doubt from the harſhneſs that muſt neceſſarily ariſe from placing the accent on the firſt, when ſo many unaccented ſyllables are to ſucceed. But if harmony were to take place, we ſhould never ſuffer the ſtreſs on the firſt ſyllable of *Contrary*, from which theſe words are formed; but that once admitted, as it invariably is by the beſt ſpeakers, we ſhould croſs the moſt uniform analogy of our language, if we accented the adverb differently from the ſubſtantive and the adjective; and therefore, however harſh they may ſound, theſe words muſt neceſſarily have the accent on the firſt ſyllable. See CONTRARY.

CONTRARINESS, kŏn'trā-rē-nĕs. s. Contrariety, oppoſition.

CONTRARIOUS, kŏn-trā'rē-ŭs. a. Oppoſite, repugnant.

CONTRARY, kŏn'trā-rē. a. Oppoſite, contradictory; inconſiſtent, diſagreeing; adverſe, in an oppoſite direction.

☞ The accent is invariably placed on the firſt ſyllable of this word by all correct ſpeakers, and as conſtantly removed to the ſecond by the illiterate and vulgar. When common ears refuſe a ſound, it is a ſtrong preſumption *that* ſound is not agreeable to the general harmony of the language. The learned often vitiate the natural taſte for their own language by an affected veneration for others; while the illiterate, by a kind of vernacular inſtinct, fall into the moſt analogical pronunciation, and ſuch as is moſt ſuitable to the general turn of the language. Anciently this word was moſt commonly pronounced by the learned, as it is now by the vulgar, with the accent on the ſecond ſyllable; but nothing can be now more firmly eſtabliſhed than the accent on the firſt ſyllable, and the other pronunciation muſt be ſcrupulouſly avoided.—See CONTRARILY.

CONTRITE, kŏn'trīte. a. (140). Bruiſed, much worn; worn with ſorrow, haraſſed with the ſenſe of guilt, penitent.

☞ This word ought to have the accent on the laſt ſyllable, both as it is an adjective, from which is formed the abſtract ſubſtantive *contriteneſs*, and as the accent on the firſt ſyllable has a tendency to ſhorten the *i* in the laſt (140). Accordingly Dr. Johnſon, Mr. Scott, and Bailey, place the accent on the laſt ſyllable; but Mr. Sheridan, Mr. Nares, Mr. Elphinſtone, Dr. Aſh, W. Johnſton, Perry, Buchanan, and Entick, place it on the firſt, with unqueſtionably the beſt uſage on their ſide.

CONTRITELY, kŏn'trīte-lē. ad. Penitently.

CONTROVERTIST, kŏn'trō-vĕr-tĭſt. s. Diſputant, chiefly on religious ſubjects.

☞ It is with ſome ſurpriſe I have frequently obſerved thoſe profound philologiſts, the Monthly Reviewers, write this word *Controversialist*. "He appears to be a ſenſible, ingenious, and candid Controverſialiſt: one "who writes from a regard to truth, and "with the full conviction of his own mind." M. R. November 1794, p. 346. But nothing is more evident than that every verbal noun ought to be formed from the verb, and conſequently that to *controvert* ought to form *controvertist*. Dr. Johnſon has only produced the authority of Tillotſon; to which I will beg leave to add a much better from the Idler, No. 12. It is common for *controvertists*, in the heat of diſputation, to add one poſition to another till they reach the extremities of knowledge, whoſe truth and falſehood loſe their diſtinction.

CONTUMACIOUS, kŏn-tū-mā'ſhŭs. a. Obſtinate, perverſe, ſtubborn.

CONTUMACIOUSLY, kŏn-tū-mā'ſhŭs-lē. ad. Obſtinately, inflexibly, perverſely.

CONVENTICLE, kŏn-vĕn'tē-kl. s. An assembly, a meeting; an assembly for worship; a secret assembly.

☞ In the first edition of this Dictionary I followed Mr. Sheridan's accentuation of this word upon the first syllable, as I apprehended it was more agreeable to polite usage, though less agreeable to the ear than the accent on the second; but from a farther inquiry, and a review of the authorities for both, I am strongly persuaded in favour of the latter accentuation. For the former we have Sheridan, Ash, W. Johnston, and Entick; and for the latter, Dr. Johnson, Kenrick, Nares, Scott, Perry, Buchanan, and Bailey. The other accentuation seems chiefly adopted by the poets, who should not be deprived of their privilege of altering the accents of some words to accommodate them to the verse:

"For 'twere a sin to rob them of their mite."
Pope.

CONVENTICLER, kŏn-vĕn'tĭk-lŭr. s. One that supports or frequents private and unlawful assemblies.

CONVERSABLE, kŏn-vĕr'sā-bl. a. Qualified for conversation, fit for company.

CONVERSABLENESS, kŏn-vĕr'sā-bl-nĕs. s. The quality of being a pleasing companion.

CONVERSABLY, kŏn-vĕr'sā-blē. ad. In a conversable manner.

CONVERSANT, { kŏn'vĕr-sănt. / kŏn-vĕr'sănt. } a.
Acquainted with, familiar; having intercourse with any, acquainted; relating to, concerning.

☞ There are such considerable authorities for each of these pronunciations as render a decision on that ground somewhat difficult. Dr. Johnson, Dr. Ash, Dr. Kenrick, Mr. Perry, Buchanan, and Baily, place the accent on the second syllable; and Mr. Nares, W. Johnston, and Entick, accent the first. Mr. Sheridan and Mr. Scott place it on both, and consequently leave it undecided. Analogy seems to demand the stress on the second syllable; perhaps not so much from the relation the word bears to the verb to *converse*, since it may possibly be derived from the noun *cónverse* (492), as from the very general rule of accenting words of three syllables, that are not simples in our language, on the second syllable when two consonants occur in the middle. This rule, however, is frequently violated in favour of the antepenultimate accent (the favourite accent of our language), as in *ággrandize*, *ámnesty*, *chárácter*, *cónvertite*, *áncestor*, *mágistrate*, *próteśtant*, &c.; and where there is but one consonant in the middle, nothing is more common than to find the accent of the dissyllable verb neglected, and the trisyllable noun adopting the antepenultimate accent. Thus the words *Confident*, *President*, *Provident*, &c. are not accented like the verbs *Confide*, *Preside*, &c. &c. but are considered as simples, and follow the general rule; which is, that all simples of three syllables, with but one consonant in the middle, have the accent on the first, and that the vowel in this syllable is short (503). Upon the whole, therefore, since authorities are so equal and analogy so precarious, usage must be the umpire; and my observation fails me if that which may be called the best usage does not decide in favour of the accent on the first syllable.

CONVERSATION, kŏn-vĕr-sā'shŭn. s. Familiar discourse, chat, easy talk, a particular act of discoursing upon any subject; commerce, intercourse; familiarity; behaviour, manner of acting in common life.

To CONVERSE, kŏn-vĕrse'. v. n. To cohabit with, to hold intercourse with; to be acquainted with; to discourse familiarly upon any subject; to have commerce with a different sex.

CONVERSE, kŏn'vĕrse. s. (592). Manner of discoursing in familiar life; acquaintance, cohabitation, familiarity; with geometricians it means the contrary.

☞ It is highly probable that this substantive was anciently pronounced like the verb, with the accent on the second syllable; but no-

thing is now better eſtabliſhed than the accent on the firſt. Even the line of Pope,

"Generous *cónverſe;* a ſoul exempt from pride,"

however rugged with the accent on the firſt ſyllable of this word, cannot with propriety be read otherwiſe.

Conusance, kŏn'ŭ-sânſe. s. Cognizance, notice. A law term.—See Cognizance.

☞ Perhaps it may be pleaded by the gentlemen of the law, that this is the word they uſe inſtead of *Cognizance*, and conſequently, that the charge againſt them of mutilating that word falls to the ground. But it may be anſwered, that the ſecond ſyllable of theſe words are ſo different as to leave us in no doubt which they make uſe of; and that the words *Cognizable*, *Cognizor*, and *Cognizee*, being pronounced by them without the *g*, are ſufficient proofs of the juſtneſs of the accuſation.

☞ There is certainly a tendency in the *d* as well as in the *t* to ſlide into a ſoft hiſſing ſound when preceded by the accent, and followed by a diphthong or a diphthongal vowel, commencing with the ſound of *e*. This is evident by the current pronunciation of *immediate*, *verdure*, &c. as if written *immejiate*, *verjure*, &c. (294); and this pronunciation is ſo agreeable to the genius of our language, that the organs ſlide into it inſenſibly. Mr. Sheridan, in order to mark this ſound, has adopted the *y*, and ſpelled the word *Cor-dyal*: and if *y* is here articulated as a conſonant, as is intended, its connexion with *d* produces a ſound ſo near the hiſs in *Cor-je-al*, as to be with difficulty diſtinguiſhed from it.

COROLLARY, kŏr'ō-lăr-ē. s. (168). The concluſion; an inference.

☞ Dr. Johnſon, Mr. Sheridan, Dr. Aſh, W. Johnſton, Buchanan, Entick, and Smith, accent this word on the firſt; and Dr. Kenrick, Scott, Perry, and Bailey, on the ſecond ſyllable. The weight of authority is certainly for the accentuation I have adopted, and analogy ſeems to confirm this authority. For as the word is derived from *Corollarium*, with the accent on the antepenultimate, our pronunciation of this word generally lays an additional accent on the firſt ſyllable, which, when the word is ſhortened by dropping a ſyllable in *Corollary*, becomes the principal accent, as in a thouſand other inſtances.—See ACADEMY.

CORONAL, kŏr'ō-năl. s. (168). A crown, a garland.

☞ In the pronunciation of this word and its compounds, Mr. Sheridan has adopted a vulgariſm, of which one could ſcarcely have ſuſpected him; but pronouncing *covetſhus* for *covetous* is not only a vulgariſm, but contrary to analogy. All theſe diphthongs and diphthongal vowels which draw the preceding conſonants to aſpiration are ſuch as commence with the ſound of *e*; which, from its nearneſs to the ſound of double *e*, and the nearneſs of this ſound to the commencing ſound of *y*, approaches to the hiſſing ſound of *s*, *z*, and ſoft *c*, and in the abſence of accent coaleſces with them. *T* and *D* being formed in the ſame ſeat of ſound as the *s*, *z*, and ſoft *c*, when the accent is before them, eaſily ſlide into the ſame ſound before ſimilar vowels, but never before any other: for we might with as much propriety pronounce *calamitous* and *neceſſitous*, *calamitſhus* and *neceſſitſhus*, as *covetous*, *covetſhus* (459).

☞ Dr. Johnſon tells us this word is of uncertain etymology. It is certain however, that it comes from the French; and Menage tells us it aroſe among them from the *Croats*, who, being in alliance with France againſt the Emperor, came to Paris, and were remarked for the linen they wore about their necks. This ſoon became a faſhion, and was called after the original wearers *Croat*, which, by a ſmall alteration, became *Cravat*. This word is ſometimes, but improperly, pronounced with the accent on the firſt ſyllable. This pronunciation is adopted only by Dr. Aſh, and Buchanan, while Dr. Johnſon, Mr. Elphinſton, Mr. Sheridan, Mr. Nares, Mr. Scott, W. Johnſton, Kenrick, Entick, and Bailey, are uniformly for the accent on the laſt ſyllable.

CUCUMBER, kōŭ'kŭm-bŭr. s. (159). The name of a plant, and fruit of that plant.

☞ In ſome counties of England, eſpecially in the Weſt, this word is pronounced as if written *Coocumber*: this, though rather nearer to the orthography than *Cowcumber*, is yet faulty, in adopting the obtuſe *u* heard in *bull*, rather than the open *u* heard in *Cucumis*, the Latin word whence *Cucumber* is derived: though from the adoption of the *b*, I ſhould rather ſuppoſe we took it from the French *Concombre*. But however this may be, it ſeems too firmly fixed in its ſound of *Cowcumber* to be altered, and muſt be claſſed with its irregular fellow eſculent *Aſparagus*, which ſee.

☞ This word, before Dr. Johnſon's Dictionary altered it, was, I believe, univerſally ſpelled with double *m*. Our anceſtors were homebred enough to think, that if we received a word from the Latin, and conformed to the quantity of that language, that it was neceſſary to ſhow that conformity by a ſpecific orthography of our own. Thus, the firſt *u* in *Cuminum* being ſhort, they doubled the *m* to indicate that ſhortneſs; as the analogy of our language would infallibly pronounce the *u* long, if the conſonant were ſingle in the ſame manner as in *Cubic*, *Cupid*, &c.—See DRAMA.

CYCLE, sī'kl. s. (405). A circle; a round of time, a ſpace in which the ſame revolution begins again, a periodical ſpace of time; a method, or account of a method, continued till the ſame courſe begins again; imaginary orbs, a circle in the heavens.

CYCLOID, sī'klŏid. s. A geometrical curve.

☞ Sheridan and Buchanan pronounce the *y* in this word ſhort; and Aſh, Kenrick, and W. Johnſton, long.

CYCLOIDAL, sē-klŏid'ăl. a. (180). Relating to a cycloid.

CYCLOPÆDIA, sī-klō-pē'ĕd-â. s. A circle of knowledge, a courſe of the ſciences.

☞ I have in this word differed from Mr. Sheridan and Dr. Johnſon, by placing the accent on the antepenultimate ſyllable inſtead of the penultimate. I know that Greek words of this termination have the accent on the penultimate ſyllable; but the antepenultimate accentuation is more agreeable to the genius of our tongue, and ſeems to have prevailed. For though Dr. Johnſon has given this word the penultimate accent, he has placed the accent on the antepenultimate ſyllable of *Ambroſia*, *Euthanaſia*, and *Hydrophobia*, though theſe have all the accent on the penultimate in the Greek. It is true the *i* in the laſt ſyllable but one of *Cyclopædia* is a diphthong in the original; and this will induce thoſe who are fond of ſhowing their Greek learning to lay the accent on the penultimate, as its oppoſition

to general uſage will be an additional reaſon with them for preferring it. The pronunciation I have adopted I ſee is ſupported by Dr. Kenrick, Entick, Scott, Perry, and Buchanan, which abundantly ſhows the general current of cuſtom.

To theſe obſervations may be added, that if the *i* be accented, it muſt neceſſarily have the long open ſound, as in *Elegiac*, and not the ſound of *e*, as Mr. Sheridan has marked it.

CYGNET, sĭg'nĕt. s. A young ſwan.

CYLINDER, sĭl'ĭn-dŭr. s. A body having two flat ſurfaces and one circular.

CYNOSURE, sĭn'ō-sūre, or sī'nō-sūre. s. The ſtar near the north pole, by which ſailors ſteer.

☞ I have, in the firſt ſyllable of this word, contrary to Mr. Sheridan, preferred the ſhort to the long ſound of *y*. My firſt reaſon is, that this letter in Greek is the ſame as in *Cynic* and *Cylinder*; both which have the *y* ſhort. The next reaſon is, the very general rule in our language of pronouncing the vowel ſhort in all ſimples which have the accent on the antepenultimate ſyllable (535) (537) (503). I am not certain, however, that the beſt uſage is not againſt me. Scott has the firſt ſound, and Sheridan and Entick the ſecond; the reſt of the Dictionaries either have not the word, or do not mark the quantity of the vowels.

CYPRESS-TREE, sī'prĕs-trēē. s. A tall ſtraight tree: its fruit is of no uſe, its leaves are bitter, and the very ſmell and ſhade of it are dangerous; it is the emblem of mourning.

DAMNATORY, dăm'nă-tŭr-ė. a. (512). Containing a ſentence of condemnation.

DAMNED, dămmd, or dăm'nėd. part. a. Hateful, deteſtable.

☞ This word, in familiar language, is ſcarcely ever uſed as an adjective, and pronounced in one ſyllable, but by the loweſt vulgar and profane; in ſerious ſpeaking it ought always, like *curſed*, to be pronounced in two (362). Thus in Shakeſpeare——

"But oh what *damned* minutes tells he o'er,
"Who dotes, yet doubts--ſuſpects, yet ſtrongly loves."

There is a very ſingular uſage of this word, as a verb or participle, when it ſignifies the condemnation of a play; but this application of it, though authoriſed by the politeſt ſpeakers, has an unhallowed harſhneſs in it to pious ears, and an affectation of force to judicious ones. It is, at leaſt, the figure called *Catachreſis*.

DAMNIFICK, dăm-nĭf'ĭk. a. Procuring loſs, miſchievous.

To DAMNIFY, dăm'nė-fi. v. a. To endamage, to injure; to hurt, to impair.

To DARE, dâre. v. n. pret. I durſt, part. I have dared. To have courage for any purpoſe, to be adventurous.

☞ If I am not miſtaken, there is a prevailing pronunciation of this word in Ireland, which makes it a perfect rhyme to *far*, *bar*, &c. That this is contrary to univerſal uſage in England, and to the moſt general rule in the language, needs not be inſiſted on; the only word of a ſimilar form which is ſo pronounced, is the firſt perſon plural of the verb to *be*. But this it muſt be remembered, is an auxiliary verb; and the auxiliary verbs, being as irregular in their pronunciation as in their form, are but indifferent models by which to regulate the reſt of the language.

To DARE, dâre. v. a. To challenge, to defy.

☞ In this ſenſe, this verb is regular.

☞ All our lexicographers, except Dr. Johnſon, place the accent on the ſecond ſyllable of this word; and this accentuation, it muſt be confeſſed, is agreeable to the beſt uſage. But Dr. Johnſon's accentuation on the firſt ſyllable is unqueſtionably the moſt agreeable to Engliſh analogy; firſt, becauſe it is a triſyllable and a ſimple (503); next, becauſe it is derived from the latter Latin *Decretalis*; which, in our pronunciation of it, has an accent on the firſt and third ſyllable; and therefore, when adopted into our language, by dropping the laſt ſyllable, takes the accent on the firſt. See *Academy*. That this is the general analogy of accenting words from the Latin which drop the laſt ſyllable, is evident from the words *Decrement*, *Increment*, *Interval*, &c.

☞ Some military coxcombs have endeavoured to introduce the French pronunciation of this word *Défilé*, as if written *Deff-fe-lay*: others have endeavoured to bring it nearer to our own analogy, by pronouncing it in three ſyllables, as if written *Deff'fe-le*. I am ſorry to find Mr. Sheridan has adopted this pronunciation: he is followed only by Bailey and Aſh; the firſt of whom has it both ways, and the laſt gives it only as an uncommon pronunciation. Dr. Johnſon and the reſt are decidedly for the general pronunciation, which is the ſame as the verb to *defile*: and if this were urged as a reaſon to alter the pronunciation of the ſubſtantive, it may be anſwered that the remedy would be worſe than the diſeaſe.—See BOWL.

To theſe obſervations it may be added, that if we pronounce this word exactly like the French, becauſe it is a military term, we ought to pronounce a File of muſqueteers, a *Feel* of muſqueteers.

To DENIGRATE, dên'è-gråte, or dè-nî'gråte. v. a. To blacken.

☞ All our lexicographers, except Dr. Johnſon, accent this word on the ſecond ſyllable. Placing the accent on the firſt, is undoubtedly conformable to a very prevailing analogy of our language (503). But all words derived from Latin words, retaining the ſame number of ſyllables, ſeem to retain the accent of their original. (503, *e*.) Thus to *Denigrate* has the accent on *i*, becauſe that letter is long, and has the accent in *Denigro*; and to *Emigrate* has the accent on the firſt ſyllable, becauſe in *Emigro* the ſame letter is ſhort, and the accent is on the antepenultimate.—See ARIETATE and COACERVATE.

In the laſt edition of this Dictionary, I followed the general voice of all our orthöepiſts, except Dr. Johnſon, without recollecting that the *i* in the Latin *denigro* might be pronounced either long or ſhort; and that when this is the caſe, we generally adopt the ſhort ſound in words derived from that language: and as this ſhort ſound is more agreeable to the analogy of our own language, Dr. Johnſon's accentuation ſeems to be the preferable (503) (545).

To DESPATCH, dè-ſpâtch'. v. a. To ſend away haſtily; to ſend out of the world, to put to death; to perform a buſineſs quickly; to conclude an affair with another.

☞ There is a general rule in pronunciation; viz. when a vowel ends a ſyllable immediately before the accent, that vowel has a tendency to lengthen, and is often, particularly in ſolemn ſpeaking, pronounced as open as if the accent were on it. See To COLLECT. (544).—This general tendency inclines us to divide words in ſuch a manner as to make the vowel end the unaccented ſyllable: and if the two ſucceeding conſonants are combinable, to carry them both to that ſyllable which has the accent. When the *e* is thus left to finiſh the ſyllable before the ac-

cent in *de-ſpair*, *de-ſpatch*, &c. it inclines to its open ſlender ſound, which, being rapidly pronounced falls into the ſhort *i*, which is exactly its ſhort ſound (105) (107); for when the *e* is ſhort by being cloſed by a conſonant, like other vowels, it goes into a different ſound from the long one (544). Thus the word *deſpatch*, till Dr. Johnſon corrected it, was always written with an *i*; and now it is corrected, we do not find the leaſt difference in the pronunciation.

Dis, dis, or diz. (425) (435). An inſeparable particle uſed in compoſition, implying commonly a privative or negative ſignification of the word to which it is joined; as, to *arm*, to *diſarm*; to *join*, to *diſjoin*; &c.

☞ When the accent, either primary or ſecondary, is on this inſeparable prepoſition, the *s* is always ſharp and hiſſing; but when the accent is on the ſecond ſyllable, the *s* will be either hiſſing or buzzing, according to the nature of the conſecutive letter. That is, if a ſharp mute, as *p*, *t*, &c. ſucceed, the preceding *s* muſt be pronounced ſharp and hiſſing, as *diſpoſe*, *diſtaſte*, &c.; but if a flat mute, as *b*, *d*, &c. or a vowel or a liquid begin the next ſyllable, the foregoing *s* muſt be ſounded like *z*, as *diſburſe*, *diſdain*, &c.; but if the ſecondary accent be on this inſeparable prepoſition, (523) as in *diſbelief*, &c. the *s* retains its pure hiſſing ſound. *Diſmal*, which ſeems to be an objection to the firſt part of this rule, is in reality a confirmation of it;

for the firſt ſyllable in this word is not a prepoſition, but a contraction of the Latin word *dies*; and *diſmal* is evidently derived from *dies malus*. For want of this clue, Mr. Sheridan has given the *s* pure to *diſgrace, diſguiſe*, &c.

☞ This word and its companion *Concrete* one would have ſuppoſed ſhould have the ſame accentuation in all our Pronouncing Dictionaries, and yet ſcarcely any two words are more differently accented. The accent is placed on the laſt ſyllable of *Concrete* by Dr. Aſh, Buchanan, Perry, Entick, and Bailey; and on the firſt by Sheridan, Dr. Johnſon, Smith, W. Johnſton, and Dr. Kenrick. Scott accents the laſt ſyllable of this word when an adjective, and the firſt when a ſubſtantive, a diſtinction very agreeable to analogy (494; but Entick, directly contrary to this analogy, reverſes this order. *Diſcrete* is always uſed as an adjective, but has ſcarcely leſs diverſity of accentuation than *Concrete*. Dr. Johnſon, Dr. Kenrick, Mr. Nares, Mr. Scott, Perry, and Entick, accent it on the laſt ſyllable; and Dr. Aſh, Mr. Sheridan, and Bailey, on the firſt. When I wrote the Rhyming Dictionary I accented both theſe words on the firſt ſyllable; but this accentuation I imagine aroſe from contrafting them, which often places the accent on the oppoſing parts, as in *internal* and *external*: but upon maturer conſideration I apprehend the accent ought to be placed on the firſt ſyllable of *Concrete* when a ſubſtantive, and on the laſt of both words when adjectives.

☞ Dr. Johnſon, Dr. Aſh, Dr. Kenrick, W. Johnſton, Mr. Smith, Perry, and Bailey, are for the ſecond pronunciation of this word; and Mr. Sheridan, Mr. Nares, Buchanan, and Entick, for the firſt; and this, notwithſtanding the majority of ſuffrages againſt it, is, in my opinion, decidedly moſt agreeable to the beſt uſage. It were undoubtedly to be wiſhed that words of this form preſerved the accent of the verb to which they correſpond; but this correſpondence we find entirely ſet aſide in *lamentable*, *comparable*, *admirable*, and many others with which *Diſputable* muſt certainly claſs. Mr. Scott gives both modes of accenting this word; but by his placing the word with the accent on the firſt ſyllable firſt, we may preſume he prefers this pronunciation.—See INDISPUTABLE.

☞ Some curious inſpector may, perhaps, wonder why I have given *diſunion*, *diſuſe*, &c. the pure *s* and not the *z*, ſince I have laid it down as a general rule under the prepoſitive particle *Dis*, that the *s* immediately before the accent, when a vowel begins the next ſyllable, is always flat; but it muſt be remembered, that long *u* in theſe words is not a pure vowel (8): not that I think the *z*, in this caſe, would be palpably wrong; for, though long *u* may be called a ſemiconſonant, it is ſufficiently vocal to make the *s*, or *z*, ſound, in theſe words, perfectly indifferent.—See DIS.

☞ Dr. Johnſon ſeems to have accented this word on the laſt ſyllable, in compliance with the verb *advertiſe*, which is exactly of the ſame form, and therefore he thought ought to be accented in the ſame manner. But by making *divertiſe* conform in accentuation to *advertiſe*, we make the general rule ſtoop to the exception, rather than the exception to the general rule. For in all verbs of three or more ſyllables, where the termination *iſe* is only the verbal formation, and does not belong to the root, we never find the accent on it; as *criticiſe*, *exerciſe*, *epitomiſe*, &c.—See ADVERTISEMENT.

DOLOUR, dŏ'lŭr. s. (314). Grief, ſorrow; lamentation, complaint.

☞ Mr. Nares, W. Johnſton, Buchanan, Elphinſton, and Entick, make the firſt *o* in this word ſhort, as in *Dollar*; and Mr. Sheridan, Mr. Scott, Mr. Perry, and Dr. Aſh, long, as in *Donor*: the latter is, in my opinion, the moſt analogical (542).

DOLT, dŏlt. s. A heavy ſtupid fellow.

DOLTISH, dŏlt'ĭſh. a. Stupid, blockiſh.

DOMAIN, dŏ-mane'. s. Dominion, empire; poſſeſſion, eſtate.

DOME, dōme. s. A building, a houſe, a fabrick; a hemiſpherical arch, a cupola.

☞ There is a ſtrong propenſity, particularly in the people of London, to pronounce this word ſo as to rhyme with *room*; but this is contrary to all our Dictionaries which give the ſound of the vowels, and ought not to be ſuffered to add to the already too numerous exceptions to the general ſound of *o*.

DOMESTICAL, dŏ-mĕſ'tĕ-kăl. } a.
DOMESTICK, dŏ-mĕſ'tĭk. }

Belonging to the houſe, not relating to things publick; private, not open; inhabiting the houſe, not wild; not foreign, inteſtine.

☞ Dr. Johnſon obſerves, that of Engliſh, as of all living tongues, there is a double pronunciation, one curſory and colloquial, the other regular and ſolemn. He gives no inſtances of this double pronunciation; and it is at firſt a little difficult to conceive what are the words in which this obſervation is verified. Solemn ſpeaking ſeems to have no effect upon the accented vowels; for, let us pronounce them as rapidly or as ſolemnly as we will, we certainly do not make any change in the quantity or quality of them. The only part of the language in which Dr. Johnſon's obſervation ſeems true, is ſome of the vowels when unaccented; and of theſe the *o* ſeems to undergo the greateſt change in conſequence of ſolemnity or rapidity. Thus the *o* in *obey* is, in ſolemn ſpeaking, pronounced as long and full as in the firſt ſyllable of *open*; but in rapid and curſory ſpeaking, as ſhort as the *o* in *oven*. This latter ſound, however, muſt not be given as a model; for, let the pronunciation be ever ſo rapid and familiar, there is a certain elegance in giving the *o*, in this ſituation, its full, open ſound, approaching to that which it has when under the accent; and though nothing but a delicacy of ear will direct us to the degree of openneſs with which we muſt pronounce the unaccented *o* in *Domeſtick*, *Docility*, *Potential*, *Proceed*, *Monaſtick*, *Monotony*, &c. we may be aſſured that theſe vowels are exactly under the ſame predicament; and can never be pronounced ſhort and ſhut, as if written *Dommeſtick*, *Doſſility*, *Pottential*, &c. without hurting the ears of every good ſpeaker, and overturning the firſt principles of pronunciation (547) (548).

The ſame obſervations ſeem to hold good of the unaccented *o* in every word ending in *ory*; as *tranſitory*, *dilatory*, &c. The *o* in rapid ſpeaking certainly goes into ſhort *u*, as if written *tranſitury*, *dilatury*, &c.; but in ſolemn pronunciation approaches to the accented open ſound of *o* in *glory*, *ſtory*, &c.; but as the *o* in theſe terminations never admits of being pronounced quite ſo open as when ending a ſyllable before the accent, I have, like Mr. Sheridan, given it the colloquial ſound of ſhort *u* (512.—See COMMAND.

☞ I have differed from Mr. Sheridan, Mr. Scott, W. Johnſton, and Entick, in the quantity of the vowel in the firſt ſyllable of this word, not only as I think it contrary to the beſt uſage, but as it is at variance with the analogy of words in this termination. nents; for (waving the utter uncertainty of arguing from the Latin quantity to ours) this would prove that the *a* and *e* in the firſt ſyllable of *Sanative* and *Lenitive* ought to be long likewiſe. Dr. Kenrick, Dr. Aſh, and Mr. Perry, are on my ſide.

☞ The laſt mode of pronouncing this word is that which was univerſally current till within theſe few years; but the firſt has inſenſibly ſtolen into uſe, as we may obſerve from the ſeveral Dictionaries which have adopted it. Mr. Sheridan, W. Johnſton, Mr. Nares, and, as far as we can judge by the poſition of the accent, Entick and Bailey pronounce it with the firſt *a* long; and Dr. Kenrick, Buchanan, and, if we may gueſs at Dr. Aſh by his accent, with the ſame letter ſhort. Mr. Scott gives both ways; but, by placing the ſound with the long *a* firſt, ſeems to prefer it. The authorities are certainly on the ſide I have adopted; but I wiſh alſo to eſtabliſh it by analogy.

And firſt it may be obſerved, that if any argument can be drawn from the Latin quantity to the Engliſh, it is certainly in favour of the firſt pronunciation; for in a Latin word of two ſyllables, where a conſonant comes between two vowels, the conſonant always goes to the laſt, and the firſt vowel is pronounced long, without the leaſt regard to the quantity. Thus *Crătes*, the philoſopher, and *crātes*, a hurdle; *dĕcus*, honour, and *dēdo*, to give; *ŏvo*, to triumph, and *ōvum*, an egg; *Nŭma*, the legiſlator, and *Nūmen*, the divinity, have the firſt vowels always ſounded long by an Engliſh ſpeaker, although in the Latin the firſt vowel in the firſt word of each of theſe pairs is ſhort. From this univerſal manner of pronouncing Latin words, though contrary to Latin quantity, it is no wonder, when we adopt words from that language without any alteration, we ſhould pronounce them in the ſame manner; and it may be fairly concluded, that this uniform pronunciation of the Latin ariſes from the genius of our own tongue; which always inclines us to lengthen the accented vowel before a ſingle conſonant in words of two ſyllables; otherwiſe, what reaſon can we aſſign for the rule laid down by our anceſtors for doubling the conſonant in verbs, verbal nouns and participles, where a ſingle vowel was preceded by a ſingle conſonant in the theme? But an affectation of Latinity ſeems to have diſturbed the general pronunciation of our own language, as much as our own pronunciation has diſturbed the Latin quantity: for, though we neglect the quantity of Latin diſſyllables, when we are pronouncing that language, yet in diſſyllables of our own, formed from the Latin, and angliciſed, we ſeem to be, in ſome meaſure, guided by the Latin quantity. To what elſe can we attribute the ſhort ſound of the firſt vowel in *magic*, *placid*, *tepid*, *vigil*, *novel*, &c.? and to what but the genuine force of vernacular pronunciation can we aſcribe the long ſound of *u* in this ſituation, let the quantity of the Latin original be what it will? Thus, though *epic*, *topic*, *cynic*, and *tonic*, have the firſt vowel ſhort, *tunic*, *ſtupid*, *Cupid*, *tumid*, &c. have the *u* long, though always ſhort in the Latin words from whence they are derived. But however this may be in words angliciſed from the Latin, and ending in a conſonant, perhaps, in nothing is our pronunciation more regular than in the quantity of the firſt vowel in a word of two ſyllables ending with a vowel: in this caſe the firſt vowel is invariably long; and why the word in queſtion ſhould be the only exception, cannot eaſily be accounted for. We have no words originally Engliſh of this form; but thoſe we adopt from other languages ſufficiently ſhew the analogy of pronunciation: thus *Gola*, *Coma*, *China*, *Era*, *Strata*, *Quota*, *Fico*, *Dado*, *Sago*, *Bravo*, *Tyro*, *Hero*, *Negro*, &c. &c. have all the firſt ſyllable long; and why *Drama* ſhould not fall into the ſame analogy, I cannot conceive. A corroboration of this is the pronunciation of *Lama*, *Brama*, *Zama*, and *Zara*, and all proper names of the ſame form from the Greek and Latin, as *Cato*, *Plato*, *Strato*, *Crito*, *Draco*, &c.; and I think it may be with confidence aſſerted, that an Engliſhman, who had never heard the word *Drama* pronounced, would naturally place the accent upon the firſt ſyllable, and pronounce the vowel in that ſyllable long and ſlender (544).

DYSENTERY, dis'sĕn-tĕr-è. s. A looſeneſs, wherein very ill humours flow off by ſtool, and are alſo ſometimes attended with blood.

☞ Dr. Johnſon, Dr. Aſh, Dr. Kenrick, and Buchanan, accent this word on the ſecond ſyllable; and Mr. Sheridan, Mr. Nares, Mr. Scott, W. Johnſton, Perry, Entick, and Bailey, on the firſt. That this is in poſſeſſion of the beſt uſage, I have not the leaſt doubt; and that it is agreeable to the analogy of accenting words from the learned languages which we naturalize by dropping a ſyllable, is evident from the numerous claſs of words of the ſame kind. See ACADEMY, INCOMPARABLE, &c. A collateral proof too that this is the true pronunciation is, that MESENTERY, a word of the ſame form, is by all the above-mentioned lexicographers who have the word, except Bailey, accented on the firſt ſyllable.

DYSPEPSY, dis'pĕp-sè. s. A difficulty of digeſtion.

DYSPHONY, dis'fō-nè. s. A difficulty in ſpeaking.

To ECHO, ĕk'kŏ. v. a. To ſend back a voice.

ECLAIRCISSEMENT, ĕk-klâre'sĭz-mĕnt. s. Explanation, the act of clearing up an affair.

☞ This word, though long in uſe, is not yet naturalized. Every ſyllable but the laſt may be perfectly pronounced by an Engliſhman who does not ſpeak French; but this ſyllable having a naſal vowel, not followed by hard *c* or *g*, (ſee ENCORE,) is an inſuperable difficulty: the neareſt ſound to it would perhaps be to make it rhyme with *long* and *ſtrong*. But a ſpeaker would, perhaps, riſk leſs by pronouncing it like an Engliſh word at once, than to imitate the French ſound awkwardly.

ECLAT, ė-klâw'. s. (472). *French.* Splendour, ſhow, luſtre.

ECLECTICK, ėk-lĕk'tĭk. a. Selecting, chooſing at will.

EDIBLE, ĕd'ĕ-bl. a. (503). Fit to be eaten.

EDICT, ē'dĭkt. s. A proclamation of command or prohibition.

☞ Good speakers seem divided about the quantity of the vowel in the first syllable of this word. Kenrick, Perry, and Buchanan, make it short; and Sheridan, Nares, Entick, Ash, Scott, and W. Johnston, long. This majority has induced me to make it long likewise, and not any length of the same letter in the Latin *edictum*; for though the Latin accent is frequently a rule for the placing of ours, the quantity of Latin has almost as little to do with our quantity as it has with that of the Chinese or Hebrew.—See Introduction to Rhyming Dictionary, page xix.

EDIFICATION, ĕd-ē-fē-kā'shŭn. s. The act of building up man in the faith, improvement in holiness; improvement, instruction.

EDIFICE, ĕd'ē-fĭs. s. (142). A fabrick, a building.

EDITOR, ĕd'ē-tŭr. s. (166). Publisher, he that revises or prepares any work for publication.

To EDUCATE, ĕd'jŭ-kāte. v. a. (91). To breed, to bring up.

☞ This pronunciation may seem odd to those who are not acquainted with the nature of the letters; but it is not only the most polite, but, in reality, the most agreeable to rule.—See Principles, No. 294, 376.

EDUCATION, ĕd-jŭ-kā'shŭn. s. Formation of manners in youth.

To EDUCE, ē-dūse'. v. a. To bring out, to extract.

EEL, ēēl. s. A serpentine slimy fish, that lurks in mud.

E'EN, ēēn. ad. Contracted from Even.

EFFABLE, ĕf'fā-bl. a. (405). Expressive, utterable.

To EFFACE, ĕf-fāse'. v. a. To destroy any form painted or carved; to bolt out; to destroy, to wear away.

☞ The strong tendency of the vowel to open, when it terminates a syllable, immediately before the accent, makes us frequently hear the *e* in these words, when the accent is on the second syllable, pronounced as open as if there were but one *f*. The same may be observed of the *o* in *occasion*, *offence*, *official*, &c. This is certainly a deviation from rule; but it is so general, and so agreeable to the ear, as to be a distinguishing mark of elegant pronunciation.

EFFECT, ĕf-fĕkt'. s. (98). That which is produced by an operating cause; consequence, event; reality, not mere appearance; in the plural, goods, moveables.

To EFFECT, ĕf-fĕkt'. v. a. To bring to pass, to attempt with success, to achieve; to produce as a cause.

EGOTISM, ĕ'gò-tîzm. s. Too frequent mention of a man's ſelf.

☞ Contrary to my own judgement I have made the *e* in the firſt ſyllable of this word long, becauſe I ſee it is uniformly ſo marked by all the Dictionaries I have ſeen: but I am much miſtaken if analogy does not in time recover her rights, and ſhorten this vowel by joining it to the *g*, as if written *eg-o-tiſm*; not becauſe this vowel is ſhort in the Latin *ego*, (for the Engliſh quantity has very little to do with the Latin,) but becauſe the word may be looked upon as a ſimple in our language, and the accent is on the antepenultimate ſyllable. Mr. Elphinſton, whoſe opinion in this point is of the greateſt weight, makes the firſt vowel ſhort.—See Principles, No. 511, 530, 536.

EJECTMENT, ē-jĕkt'mĕnt. s. A legal writ by which any inhabitant of a house, or tenant of an estate, is commanded to depart.

EIGHT, āyt. a. Twice four. A word of number.

☞ The genuine sound of the diphthong in this word and its compounds does not seem to be that of the first sound of *a*, which Mr. Sheridan has given it under the second sound of *e*, but a combination of the first sound of *a* and *e* pronounced as closely together as possible. But as this distinction is very delicate, and may not be more easily apprehended than that between *meat* and *meet*, (246,) I have given the diphthong the same sound as Mr. Sheridan has done.

EIGHTH, āyt*th*. a. Next in order to the seventh.

☞ This word, as it is written, by no means conveys the sound annexed to it in speaking: for the abstract termination *th* being a perfect lisp, is quite distinct from the final *t* of *eight*, and can never coalesce with it without depriving the word of one of its letters. The only sound conveyed by the letters of this word, as now spelt, is as if written *ayth*: and if we would spell this sound as we pronounce it, and as the analogy of formation certainly requires, we must necessarily write it *eighth*. This would have an unusual appearance to the eye; and this would be a sufficient reason with the multitude for opposing it: but men of sense ought to consider, that the credit of the language is concerned in rectifying this radical fault in its orthography.

EIGHTEEN, āy'tēēn. a. Twice nine.

EIGHTEENTH, āy'tēēn*th*. a. The next in order to the seventeenth.

EIGHTFOLD, āyt'fōld. a. Eight times the number or quantity.

To ELECT, ė-lĕkt'. v. a. To chooſe for any office or uſe; in theology, to ſelect as an object of eternal mercy.

ELECT, ė-lĕkt'. a. Choſen, taken by preference from among others; choſen to an office not yet in poſſeſſion; choſen as an object of eternal mercy.

ELECTARY, ė-lĕk'tă-rė. s. A form of medicine made of conſerves and powders, of the conſiſtence of honey.

☞ This is an alteration of the word *Electuary*, which has taken place within theſe few years; and, it muſt be owned, is an alteration for the better: for, as there is no *u* in the Latin *Electarium*, there can be no reaſon for inſerting it in our Engliſh word, which is derived from it.

ELECTION, ė-lĕk'ſhŭn. s. The act of chooſing one or more from a greater number; the power of choice; voluntary preference; the determination of God, by which any were ſelected for eternal life; the ceremony of a publick choice.

ELECTIVE, ė-lĕk'tĭv. a. Exerting the power of choice.

ELEGANCY, ĕl'ė-gân-ſė. }

ELEGANT, ĕl'ė-gânt. a. Pleaſing with minuter beauties; nice, not coarſe, not groſs.

ELEGANTLY, ĕl'ė-gânt-lė. ad. In ſuch a manner as to pleaſe without elevation.

ELEGIACK, ĕl-ė-jī'ăk. a. Uſed in elegies; mournful, ſorrowful.

☞ Our own analogy would lead us to place the accent upon the ſecond ſyllable of this word; but its derivation from the Latin *elegiacus* and the Greek ἐλεγειακος, (in both which the antepenultimate is long) obliges us, under pain of appearing groſsly illiterate, to place the accent on the ſame letter. But it may be obſerved, that we have ſcarcely an inſtance in the whole language of adopting a Latin or Greek word, and curtailing it of a ſyllable, without removing the accent higher on the Engliſh word.—See ACADEMY.

ELEGY, ĕl'ė-gė. s. A mournful ſong; a funeral ſong; a ſhort poem, without points or turns.

ELEMENT, ĕl'ė-mĕnt. s. ELM, ĕlm. s. The name of a tree.

ELOCUTION, ĕl-ō-kū'ſhŭn. s. The power of fluent ſpeech; eloquence, flow of language; the power of expreſſion or diction.

☞ This word originally, both among the Greeks and Romans, ſignified the choice and order of words; and Dryden and other moderns have uſed it in the ſame ſenſe; it is now ſcarcely ever uſed but to ſignify pronunciation. The French ſeem to have been the firſt who uſed it in this ſenſe: Addiſon has followed them; and as it is perfectly agreeable to the Latin original *e* and *loquor*, and ſerves to diſtinguiſh oratorical pronunciation from pronunciation in general, the alteration is not without its uſe.

ELOGY, ĕl'ō-jē. s. (503). Praiſe, panegyrick.

To EMBALM, ém-bám'. v. a. (403). To impregnate a body with aromaticks, that it may reſiſt putrefaction.

☞ The affinity between the long *e* and the ſhort *i*, when immediately followed by the accent, has been obſerved under the word *Deſpatch*. But this affinity is no where more remarkable than in thoſe words where the *e* is followed by *m* or *n*. This has induced Mr. Sheridan to ſpell *embrace*, *endow*, &c. *imbrace*, *indow*, &c. and this ſpelling may, perhaps, ſufficiently convey the curſory or colloquial pronunciation; but my obſervation greatly fails me if correct public ſpeaking does not preſerve the *e* in its true ſound, when followed by *m* or *n*. The difference is delicate, but, in my opinion, real.

☞ I have differed from Mr. Sheridan and Buchanan in the pronunciation of the laſt ſyllable of this word, as I think the long ſound of *i* is more agreeable to the ear, as well as to the beſt uſage, though I confeſs not ſo analogical as the ſhort *i*. Dr. Kenrick, Scott, W. Johnſton, and Perry, pronounce the *i* long as I have done.—See UMPIRE.

EMPIRICK, ĕm'pē-rĭk, or ĕm-pĭr'ĭk. s. A trier or experimenter, ſuch perſons as venture upon obſervation only; a quack.

☞ Dr. Johnſon tells us, the firſt accentuation is adopted by Dryden, and the laſt by Milton; and this he prefers. There is indeed a ſtrong analogy for the laſt, as the word ends in *ic* (509); but this analogy is ſometimes violated in favour of the ſubſtantives, as in *Lunatic*, *Heretic*, &c.; and that this is the caſe in the word in queſtion, may be gathered from the majority of votes in its favour: for though Dr. Johnſon, Mr. Sheridan, Mr. Nares, and W. Johnſton, are for the latter; Dr. Kenrick, Dr. Aſh, Mr. Scott, Mr. Perry, Buchanan, Entick, Bailey, and Barclay, are for the former. This word claſſes too with thoſe that almoſt always adopt the antepenultimate accent (503); but the adjective has more properly the accent on the ſecond ſyllable.

To EMPOVERISH, ĕm pŏv'ĕr-ĭsh. v. a. To make poor; to leſſen fertility.

☞ This word, before Dr. Johnſon's Dictionary was publiſhed, was always written *impoveriſh*; nor ſince he has reformed the orthography do we find any conſiderable difference in the ſound of the firſt ſyllable, except in ſolemn ſpeaking; in this caſe we muſt undoubtedly preſerve the *e* in its true ſound.—See EMBALM.

EMPOVERISHER, ĕm pŏv'ĕr-ĭsh-ŭr. s. One that makes others poor; that which impairs fertility.

EMPOVERISHMENT, ĕm-pŏv'ĕr-ĭsh-mĕnt. s. Diminution, waſte.

EMPYEMA, ĕm-pī-ē'mă. s. (92). A collection of purulent matter in any part whatſoever, generally uſed to ſignify that in the cavity of the breaſt only.

☞ I have differed from Mr. Sheridan in the ſound of the *y* in the ſecond ſyllable of this word, merely from the diſagreeable effect it has on the ear, to pronounce two vowels of exactly the ſame ſound in immediate ſucceſſion. This ſameneſs is, in ſome meaſure,

avoided by giving *y* the long diphthongal ſound of *i*; and the ſame reaſon has induced me to the ſame notation in the word *Empyrean*. If good uſage is againſt me, I ſubmit.

EMPYREAL, ĕm-pir'ė-ăl. a. Formed of fire, refined beyond aerial.

EMPYREAN, ĕm-pi-ré'ăn, or ĕm-pîr'ė-ăn. s. The higheſt heaven, where the pure element of fire is ſuppoſed to ſubſiſt. —See EMPYEMA.

☞ This word has the accent on the penultimate ſyllable in Sheridan, Kenrick, Barclay, Nares, and Bailey; and on the antepenultimate in Aſh, Buchanan, Perry, and Entick: and this laſt accentuation is, in my opinion, the moſt correct; for as the penultimate is ſhort, there is the ſame reaſon for placing the accent on the antepenultimate as in *Cerulean*; though Poets, with their uſual licenſe, generally accent the penultimate.—See EUROPEAN.

☞ Though in curſory ſpeaking we frequently hear the *e* confounded with the ſhort *i* in the firſt ſyllables of *encamp*, *enchant*, &c. without any great offence to the ear, yet ſuch an interchange in *encomium*, *encomiaſt*, &c, is not only a departure from propriety, but from politeneſs; and it is not a little ſurpriſing that Mr. Sheridan ſhould have adopted it. The truth is, preſerving the *e* pure in all words of this form, whether in rapid or deliberate ſpeaking, is a correctneſs well worthy of attention.

To ENCOMPASS, ĕn-kŭm'pâs. v. a. To encloſe, to encircle; to go round any place.

ENCOMPASSMENT, ĕn-kŭm'pâs-mĕnt. s. Circumlocution, remote tendency to talk.

ENCORE, ŏng-kōre'. ad. Again, once more.

☞ This word is perfectly French, and, as uſual, we have adopted it with the original pronunciation. In other words which we have received from the French, where the naſal vowel has occurred, we have ſubſtituted an awkward pronunciation in imitation of it, which has at once ſhown our fondneſs for foreign modes of ſpeaking, and our incapacity of acquiring them: thus *Caiſſon* has been turned into *Caſſoon*, *Ballon* into *Balloon*, *Dragon* into *Dragoon*, and *Chamont* (a character in the Orphan) into *Shamoon*; but in the word before us, this naſal ſound is followed by *c* hard, which after *n* always involves hard *g* (408); and this is preciſely an Engliſh ſound. An Engliſhman, therefore, does not find the difficulty in pronouncing the naſal ſound in this word, which he would in another that does not admit of the ſucceeding hard *c* or *g*; as *entendement*, *attentif*, &c.; for if in pronouncing the *en* in theſe words the tongue ſhould once touch the roof of the mouth, the French naſal ſound would be ruined. No wonder then that a mere Engliſh ſpeaker ſhould pronounce this French word ſo well, and the reſt of the naſal vowels ſo ill. It does not ariſe from the habit they contract at Theatres, (where it would be the moſt barbarous and ill-bred pronunciation in the world to call for the repetition of an Engliſh ſong in plain Engliſh). It does not, I ſay, ariſe from cuſtom, but from coincidence. The ſound, in the word before us, is common to both nations; and though the French may give it a ſomewhat lighter ſound than the Engliſh, they are both radically the ſame. Adopting this word, however, in the Theatre, does the Engliſh no manner of credit. Every language ought to be ſufficient for all its purpoſes. A foreigner who underſtood our language, but who had never been preſent at our dramatic performances, would ſuppoſe we had no equivalents in Engliſh, ſhould he hear us cry out *Encore*, *Bravo*, and *Braviſſimo*, when we only wiſh to have a ſong repeated, or to applaud the agility of a dancer.

☞ Before Johnſon publiſhed his Dictionary, theſe words were univerſally ſpelled *indict* and *indite*. That great reformer of our language ſeems to have conſidered, that as the Latin *indicere* came to us through the French *enditer*, we ought to adopt the French rather than the Latin preposition, eſpecially as we have conformed to the French in the ſound of the latter part of this word. But notwithſtanding his authority, to *indict*, ſignifying to charge, ſtands its ground, and to *indite* is uſed only when we mean to draw up or compoſe; in this ſenſe, perhaps, it may not be improper to ſpell it *endite*, as it may ſerve to diſtinguiſh it from the other word, ſo different in ſignification.

Ensign, ĕn'sīne. s. (385). The flag or ſtandard of a regiment; badge, or mark of diſtinction; the officer of foot who carries the flag.

☞ I have given the laſt ſyllable of this word the long ſound, as I am convinced it is the moſt correct, though I am of opinion that, in the military profeſſion, it is oftener pronounced ſhort, as if written *enſin*. Some reaſons from analogy might be produced in favour of this latter pronunciation (144); but they do not ſeem ſufficient to outweigh the more general uſage which declares for the former.

ENSIGNBEARER, ĕn'sine-bā-rŭr. s. He that carries the flag.

ENSIGNCY, ĕn'sĭn-sē. s. The office of an enſign.

☞ I have not met with this word in any of our Dictionaries, but, from its very frequent uſe in the polite world, am perſuaded it deſerves a place there, and particularly in a Pronouncing Dictionary; as it muſt be remarked, that though the ſecond ſyllable of *Enſign* is generally and more correctly pronounced with the *i* long, the ſame letter in the ſame ſyllable of *Enſigncy* is always ſhort.

To ENVELOP, ĕn-vĕl'ŭp. v. a. To enwrap, to cover; to hide, to surround; to line, to cover on the inside.

ENVELOPE, ŏn-vē-lōpe'. s. A wrapper, an outward case.

☞ This word, signifying the outward case of a letter, is always pronounced in the French manner by those who can pronounce French, and by those who cannot the *e* is changed into an *o*. Sometimes a mere Englishman attempts to give the nasal vowel the French sound, and exposes himself to laughter by pronouncing *g* after it, as if written *ongvé-lope*. This is as ridiculous to a polite ear as if he pronounced it, as it ought to be pronounced, like the verb to *envelop*.

To ENVENOM, ĕn-vĕn'ŭm. v. a. (166). To poison; to make odious; to enrage.

ENVIABLE, ĕn'vē-ă-bl. a. (405). Deserving envy.

To ENVIRON, ĕn-vī'rŭn. v. a. (166). To surround; to envelop; to besiege, to hem in; to enclose, to invest.

ENVIRONS, ŏn-vē-rŏnz', or ĕn-vī'rŭns. s. (166). The neighbourhood or neighbouring places round about the country.

☞ This word is in general use, and ought to be pronounced like the English verb to *environ*: but the vanity of appearing polite keeps it still in the French pronunciation: and as the nasal vowels in the first and last syllable are not followed by hard *c* or *g*, it is impossible for a mere Englishman to pronounce it fashionably.—See ENCORE.

EQUIPOISE, ė'kwė-pŏize. s. Equality of weight, equilibration.

EQUIPOLLENCE, ė-kwė-pŏl'lĕnſe. s. Equality of force or power.

☞ The ſtrong tendency of our language to an enclitical pronunciation (513), would induce me to give the antepenultimate accent to this and the following word, in oppoſition to Mr. Sheridan and others; as no good reaſon can be given to the ear, why they ſhould not have this accent, as well as *equivalent*, *equivocal*, &c. But as *Æquivalens* and *Æquivocus* have the accent on the antepenultimate in Latin, and *Æquipollens* on the penultimate, and the number of ſyllables being the ſame in both languages, the accent is generally on the ſame ſyllable (503).

EQUIPOLLENT, ė-kwė-pŏl'lĕnt. a. Having equal power of force.

ESCHEAT, ĕs-tſhēte'. s. Any lands, or other profits, that fall to a lord within his manor by forfeiture, or the death of his tenant, dying without heir general or eſpecial.

☞ This and the three following words not being derived from the learned languages, have the *ch* pronounced in the Engliſh manner.

To ESCHEAT, ĕs-tſhēte'. v. a. To fall to the lord of the manor by forfeiture.

ESCHEATOR, ĕs-tſhē'tŭr. s. (166). An officer that obſerves the eſcheats of the king in the county whereof he is eſcheator.

To ESCHEW, ĕs-tſhōō'. v. a. To fly, to avoid, to ſhun.

☞ This word, from its being almoſt antiquated, has eſcaped the criticiſm of all our orthöepiſts, except Mr. Elphinſton, who contends that it ought to be pronounced as if written *eſkew*. "No wonder *eſkew*, (he "ſays,) often falſely articulated becauſe falſely exhibited *eſchew*, was ocularly traced "from the old *ſcheoir* (afterwards *echoir*) to "devolve or eſcheat, rather than from *eſquiver*, to parry, avoid or *eſkeu*; by thoſe "to whom the body of the child and the "foul of the parent were equally unknown." The etymological abilities of this gentleman in the French and Engliſh languages are unqueſtionable; but the pronunciation of this word ſeems fixed to its orthography; and beyond the reach of etymology to alter. Words like land have a limitation to their rights. When an orthography and pronunciation have obtained for a long time, though by a falſe title, it is perhaps better to leave them in quiet poſſeſſion, than to diſturb the language by an ancient, though perhaps better claim.

EXACTNESS, êgz-âkt'nês. s. Accuracy, nicety; regularity of conduct, ſtrictneſs of manners.

To EXAGGERATE, êgz-âdje'ê-râte. v. a. To heighten by repreſentation.

☞ This word is ſometimes heard with the double *g* hard, as in *dagger*; but every one who has a ſcrap of Latin knows, that *exaggerate*, comes from *exaggero*, and that all words from that language have the *g* ſoft before *e* and *i*; the third ſyllable, therefore, muſt have the *e* ſoft. But it will be ſaid, that, according to the laws of pronunciation, the firſt *g* ought to be hard as the firſt *c* is in *flaccid*, *ſiccity*, &c. To which it may be anſwered, that, ſtrictly ſpeaking, it ought to be ſo; but polite uſage has ſo fixed the firſt as well as the laſt *g* in the ſoft ſound, that none but a confirmed pedant would have the boldneſs to pronounce them differently.

This uſage too we find is not without all foundation in analogy. Wherever there is a conſiderable difficulty in keeping ſounds ſeparate, they will infallibly run into each other. This is obſervable in the ſound of *ſ*, which, when final, always adopts the ſound of *z* when a flat conſonant precedes (434); the firſt *ſ* likewiſe in the terminations *ſeſſion*, *miſſion*, &c. neceſſarily runs into the ſound of *ſh* like laſt *ſ*: but it may be ſaid, that the firſt *g* in *exaggerate* has no ſuch relation to the ſecond as *ſ* has to *ſh*; and that this very difference between the two conſonants makes us preſerve the firſt *c* in *flaccid* and *ſiccity* in its hard ſound of *k*, which is perfectly diſtinct from the other ſound of *c*, which is nothing more than *s*. To this it can only be replied by way of mitigation, that hard *g* and ſoft *g* or *j* are formed nearer together in the mouth than hard *c* or *k* and ſoft *c* or *ſ*; and therefore as they are more liable to coaleſce, their coaleſcence is more excuſable.

To EXHALE, ĕgz hāle'. v. a. (478). To send or draw out vapours or fumes.

☞ Though the ablest grammarians (Beauzée Grammaire Générale, tom. I. p. 66.) have determined *H* to be a consonant, they have not decided whether it belongs to the flat or sharp class. If we consult our ear when we place an unaccented *x* before it, we shall judge it belongs to the former, as the *x* in this situation generally slides into *gz*.

EXHALEMENT, ĕgz-hāle'mĕnt. s. Matter exhaled, vapour.

To EXHAUST, ĕgz-hâwst'. v. a. (425). To drain, to diminish; to draw out totally, to draw out till nothing is left.

To EXHORT, ĕgz-hôrt'. v. a. To incite by words to any good action.

EXHORTATION, ĕks-hôr-tā'shŭn. s. The act of exhorting, incitement to good; the form of words by which one is exhorted.

EXHORTATORY, ĕgz-hôr'tā-tŭr-ē. a. Tending to exhort. For the last *o*, see DOMESTICK (512).

EXHORTER, ĕgz-hôr'tŭr. s. One who exhorts.

To EXICCATE, ĕk sĭk'kāte. v. a. To dry.

☞ The first syllable of this word (strictly speaking) ought to be pronounced according to the rule laid down under the preposition *Ex*: but in this pronunciation we totally lose the sharp *s* which commences the Latin word *sicco*, to dry; of which this word is compounded; and thus the sound of the word is radically injured, and its etymology lost. But it will be said, the Latins made the same excision of the radical *s* on account of the coincidence with the *s* contained in the *x* of the preposition, and wrote the word *exicco*. It is allowed these corruptions obtained amongst them, as amongst us; though it is doubtful whether the same inconvenience arose amongst them in this word as with us: for Vossius makes it highly probable that the Latins never gave the flat sound *egz* to the letter *x*; and the best manuscripts inform us, that writing this word with an *x*, as *exsicco*, and thus preserving the composition distinct and perfect, is the most accurate orthography.

☞ This word, as a ſubſtantive, has the accent always on the firſt ſyllable; as a verb, it was formerly accented on either ſyllable; but it is now, as Mr. Nares obſerves, univerſally accented as the noun.

EXILE, ĕg-zīle'. a. (178). Small, ſlender, not full.

☞ This word as an adjective derived from the Latin *exilis*, is by Nares, Sheridan, Aſh, and Entick, accented on the laſt ſyllable. The third edition of Johnſon's folio edition has the accent on the laſt alſo; but the quarto edition has it on the firſt. Authority is certainly on the ſide of the ultimate accent; but it may be queſtioned whether it is not contrary to analogy, for the penultimate *i* being long in Latin has no neceſſary influence on the Engliſh word, any more than it has on *hoſtile*, *ſervile*, &c.

☞ I have differed from Mr. Sheridan in the accentuation of this word. He has placed the accent on the ſecond ſyllable, with the authority of every Dictionary, and of every good Speaker, againſt him. In the firſt edition of this Dictionary, when I ſuppoſed Mr. Sheridan's accentuation of this word agreeable to analogy, I did not recollect the verb to *explicate*, whence it is derived, and which, in my opinion, ought to determine its accentuation.—See Principles, No. 512. Dr. Johnſon, Mr. Scott, Mr. Perry, Dr. Kenrick, Dr. Aſh, Entick, and Barclay, place the accent on the firſt ſyllable, as I have done.

☞ The *a* in this word ſeems floating between long and ſhort quantity, as it was in the Latin *Fabrica*. I have, like Mr. Sheridan, made it ſhort; for though Latin words of two ſyllables, when adopted into Engliſh, always have the accent on the firſt, and the vowel generally long, as *baſis*, *focus*, *quota*, &c.; when words of three ſyllables in Latin, with but one conſonant in the middle, are angliciſed by reducing them to two ſyllables; as the penultimate in ſuch Latin words is generally ſhort, and the accent of conſequence antepenultimate, the firſt vowel in the Engliſh word is generally ſhort from the ſhortening power of the antepenultimate accent in our pronunciation of the Latin word from whence it is derived; thus the Latin *Mimicus*, reduced to the Engliſh *Mimic*, has the firſt vowel ſhort, though long in Latin, becauſe we think it ſhort in our pronunciation of Latin: the ſame may be obſerved of the words *florid*, *vivid*, and *livid*, from the Latin *floridus*, *vividus*, and *lividus*. Thus, though *Fabrica* might have the firſt vowel long in Latin, yet as we always pronounce it ſhort in the Engliſh pronunciation of that language, ſo, when it is reduced to the Engliſh *Fabric*, it ſeems more agreeable to this uſage to make the firſt ſyllable ſhort.
Authority ſeems likewiſe to favour this pronunciation; for Mr. Sheridan, Mr. Elphinſton, Mr. Nares, Mr. Scott, Mr. Perry, and, as far as we can judge by the poſition of the accent, Bailey, are for the *a* ſhort; and Buchanan, W. Johnſton, and, if we can gueſs by accent, Dr. Aſh and Entick, for the long *a*. See Principles, No. 544.

☞ Dr. Johnſon has placed the accent on the laſt ſyllable both of this word and *Jocund*; in which he is conſiſtent, but contrary both to cuſtom and to Engliſh analogy. Mr. Sheridan places the accent on the firſt ſyllable of *Jocund*, and on the laſt of this word. The reaſons are the ſame for accenting both; they both come from the Latin *facundus* and *jocundus*; and there is ſcarcely a more invariable rule in our language than that of removing the accent higher when we adopt a word from the Latin, and abridge it of its latter ſyllables.—See ACADEMY.

fâr'wêl, or fâr-wêl'. }
The parting compliment, adieu; it is ſometimes uſed only as an expreſſion of ſeparation without kindneſs.

☞ To all theſe different pronunciations is this word ſubject. The accentuation, either on the firſt or laſt ſyllable, depends much on the rhythm of the ſentence.—See COMMODORE and COMMONWEALTH.

When it is uſed as a ſubſtantive, without an adjective before it, the accent is generally on the firſt ſyllable; as,

" See how the morning opes her golden gates,
" And takes her *fárewell* of the glorious ſun."
Shakeſp.

Or if the adjective follow the ſubſtantive, as,

" If chance the radiant ſun with *fárewell* ſweet
" Extend his ev'ning beam, the fields revive,
" The birds their notes renew, and bleating herds
" Atteſt their joy, that hill and valley ring."
Milton.

But if the adjective precede the ſubſtantive, the accent is generally placed on the laſt ſyllable; as,

" Treading the path to nobler ends,
" A long *farewéll* to love I gave."
Waller.

" As in this grove I took my laſt *farewéll*."
Dryden.

Or when it is governed by a verb, as, " I bade " him *farewéll*," or, " I bade *farewéll* to " him."

When it is uſed as an adjective, the accent is always on the firſt ſyllable; as, " A *fárewell* " Sermon."

☞ (559).—Fāte, fār, fāll, fāt;—mē, mēt;—pine, pīn;—

But when it is uſed as an interjection, (for with great deference to Dr. Johnſon, I cannot think it an adverb,) the accent is either on the firſt or ſecond ſyllable, as the rhythm of pronunciation ſeems to require.

" But *fārewell*, king; ſith thus thou will appear,
" Freedom lives hence, and Baniſhment is here."
Shakeſp.

——" O queen, *farewēll*, be ſtill poſſeſt
" Of dear remembrance, bleſſing ſtill and bleſt."
Pope.

With reſpect to the pronunciation of *a* in the firſt ſyllable of this word, Mr. Sheridan ſays, that in England the firſt ſyllable is pronounced like *far*, and in Ireland like *fare*. But if this be really the caſe, the two nations ſeem to have changed dialects; for nothing can be more evident to the moſt ſuperficial obſerver, than the tendency in Ireland to pronounce the *a* like that in *far*, and in England like that in *fare*. Not that I think the pronunciation of the firſt ſyllable of *farewell*, like *far*, either vicious or vulgar: I am convinced many good ſpeakers ſo pronounce it; but the other pronunciation I think the more eligible, as well as more general; Dr. Kenrick and Mr. Scott pronounce it with the ſecond ſound of *a*, and W. Johnſton and Mr. Perry with the firſt.

☞ Dr. Johnſon tells us, that the *l* in this word is ſometimes ſounded and ſometimes mute, and that in converſation it is generally ſuppreſſed. To this Dr. Kenrick adds, that it is needleſsly ſuppreſſed. None of our lexicographers have marked this letter mute, but Mr. Sheridan. Mr. Nares ſays, the word is pronounced both ways, and leaves it undetermined; but Mr. Elphinſton decides poſitively againſt retaining the *l* even in writing: his reaſons are, that as the French have left out the *l* in their antiquated *faulte*, we ought to leave it out of our Engliſh word, which was derived from their ancient one. This reaſoning, however, I think is not concluſive. If after deriving words from the living languages, and uſing them for centuries, we were to alter them as the parent language happens to alter, our own language would have no ſtability. The truth is, the French language is much more altered within the laſt two centuries than the Engliſh, and is greatly enfeebled by dropping its conſonants. Its naſal vowels too have added to its weakneſs, by rendering both vowels and conſonants leſs diſtinct. The *l* in queſtion has nothing harſh or uncommon in its ſound, and if it were mute, would deſert its relation to the Latin *falſitas*, and form a diſgraceful exception; and if poets have ſometimes diſmiſſed it to rhyme the word with *thought*, *fought*, &c. they have as readily admitted it to rhyme with *malt*, *ſalt*, and *aſſault*.

To FEAGUE, fēēg. v. a. (337). To whip, to chastise.

FEALTY, fē'ăl-tē. s. Duty due to a superior lord.

☞ Dr. Kenrick, Mr. Sheridan, Mr. Scott, Buchanan, W. Johnston, and, if we may judge by the position of the accent, Entick, make only two syllables of this word; Mr. Perry, Mr. Nares, and, by the position of the accent, Dr. Ash, three. I do not hesitate a moment to pronounce the last division the best; not only as it is immediately derived from a French word of three syllables *feaulté*, but as this is generally its quantity in Milton and Shakespeare.

"I am in parliament pledge for his truth,
"And lasting *fealty* to the new-made king."
Shakespeare.

"———— Let my sovereign
"Command my eldest son, nay, all my sons,
"As pledges of my *fealty* and love."—*Ibid.*

"———— Man disobeying,
"Disloyal, breaks his *fealty*, and sins
"Against the high supremacy of heav'n."
Milton.

"——— Each bird and beast behold
"After their kinds; I bring them to receive
"From thee their names; and pay thee *fealty*
"With low subjection."—*Ibid.*

"Whether his first design be to withdraw
"Our *fealty* to God, or to disturb
"Conjugal love."—*Ibid.*

In these quotations from Johnson we see the first only makes *fealty* two syllables; and even here it may be presumed there is a poetical license exactly like that which Young uses in the word *really*:

"Why *really* sixty-five is somewhat old."

☞ I had always ſuppoſed that the diphthong in this word and its compound *enfeoff* was pronounced like the long open *e*, but upon inquiry into its actual pronunciation by the gentlemen of the law found I had been in an errour; and though Mr. Sheridan and Mr Scott mark *feoff* with the ſhort *e*, they are in the ſame errour reſpecting *enfeoff*, which they mark with the long *e*. Dr. Kenrick and Mr. Barclay are under the ſame miſtake in *feoff*, by pronouncing the diphthong long; and Mr. Nares is wrong alſo in pronouncing *enfeoff* in the ſame manner. Mr. Perry is the only one who is right in pronouncing the diphthong ſhort in both. So much, however, had my ear been uſed to the long ſound of this diphthong, that it eſcaped me in the word *enfeoff* and *enfeoffment*; which, to be conſiſtent, I ought certainly to have marked with the ſhort ſound, as in *feoff* and *feoffee*.

FETUS, fē'tŭs. s. (296) (489). Any animal in embryo, any thing yet in the womb.

☞ Whence can ariſe the different quantity of the *e* in *Fetus* and *Fetid*? Till a better reaſon appear, let us ſuppoſe the following: *Fetus*, except the diphthong, retains its Latin form, and therefore is naturally pronounced with its firſt ſyllable long. *Fetid* is angliciſed; and as moſt of theſe angliciſed words of two ſyllables are derived from Latin words of three where the firſt, be it ſhort or long, is in our Engliſh-Latin pronounced ſhort, the ſame ſyllable in the Engliſh words is generally ſhort likewiſe. This has eſtabliſhed ſomething like a rule; and this rule has ſhortened the firſt ſyllable of *Fetid*, though long in the Latin *Fetidus*.—See DRAMA.

FIERCE, fêêrſe, or fêrſe. a. Savage, ravenous; vehement; outrageous; angry, furious; ſtrong, forcible.

☞ The firſt mode of pronouncing this word is the moſt general; the ſecond is heard chiefly on the Stage. Actors, who have ſuch continual occaſion to expreſs the paſſions, feel a propriety in giving a ſhort vowel ſound to a word denoting a rapid and violent emotion; and therefore, though this pronunciation may be ſaid to be grammatically improper, it is philoſophically right. FLORIST, flŏ'rĭſt. s. A cultivator of flowers.

☞ Why we ſhould pronounce *floriſt* and *floret* with the long *o*, and *florid* and *florin* with the ſhort ſound of that letter, cannot eaſily be gueſſed. They are all from the ſame original, are all angliciſed, and conſiſt but of two ſyllables; and the only thing that can be gathered from them is, the uncertainty of arguing from the Latin quantity to ours. See DRAMA, and Principles, No. 544.

FLORULENT, flŏr'ŭ-lĕnt. a. Flowery, bloſſoming.

FLOUR, flŏŭr. s. The edible part of corn, or any grain reducible to powder.

☞ This word ſpelled in this manner is not in Johnſon, though nothing ſeems better ſettled by cuſtom than this diſtinction in the ſpelling between this word and the *flower* of a plant. That words written alike ought not to be ſounded differently in order to ſignify different things, has been proved, it is preſumed, under the word BOWL: but that words ſignifying different things, though ſounded alike, ought to be written differently, ſeems evident from the neceſſity there is of making words which are the ſigns of ideas as different as the ideas themſelves. In the former caſe we do not know how to pronounce the word *Bow*, till we have its meaning fixed by what follows; in the latter, though the ear is not ſure of the idea till it has heard the context, the eye in reading is at no loſs for the meaning of the word, nor are the organs in ſuſpenſe how to pronounce it. The want of a different ſound to expreſs a different idea, is an imperfection of the language in both caſes; but the want of a different mark to expreſs difference of idea to the eye, would be a double imperfection.

To FORGE, fôrjē. v. a. To form by the hammer; to make by any means; to counterfeit, to falſify.

FORGER, fôre'jûr. s. One who makes or forms; one who counterfeits any thing.

☞ This word is ſometimes, but without the leaſt foundation in analogy, written *forgerer*. If it ſhould be urged that the word comes from the French verb *forger*, and therefore, like *fruiterer* from *frutier*, we add an *er* to make it a verbal noun; it may be anſwered, that we have the word to *forge* in the ſame ſenſe as the French, but we have no verb to *fruit*, and therefore there is an excuſe for adding *er* in the laſt word which has no place in the former.

FORGERY, fôre'jûr-ê. s. The crime of falſification; ſmith's work, the act of the forge.

To FORGET, fôr-gĕt'. v. a. Preter. Forgot, Part. Forgotten or Forgot. To loſe memory of, to let go from the remembrance; not to attend, to neglect.

☞ The *o* in this and ſimilar words is like that in *Forbear*—which ſee.

FORLORN, fôr-lôrn'. a. Deſerted, deſtitute, forſaken, wretched, helpleſs; loſt, deſperate, ſmall, deſpicable.

☞ This word is ſometimes, but improperly, pronounced ſo as to rhyme with *mourn*. Mr. Sheridan, Dr. Kenrick, Mr. Scott, Mr. Perry, and W. Johnſton, make it rhyme with *corn*.

FORLORNNESS, fôr-lôrn'nĕs. s. Miſery, ſolitude.

FORM, fôrm, or fôrm. s. The external appearance of any thing, ſhape; particular model or modification; beauty, elegance of appearance; ceremony, formality, order; external appearance without the eſſential qualities, empty ſhow; external rites; ſtated method, eſtabliſhed practice; a long ſeat; a claſs, a rank of ſtudents; the ſeat or bed of a hare.

☞ When this word ſignifies a long ſeat, or a claſs of ſtudents, it is univerſally pronounced with the *o*, as in *four*, *more*, &c. It is not a little ſurpriſing that none of our Dictionaries, except Mr. Smith's and Mr. Nares's, take any notice of this diſtinction in the ſound of the *o* when the word ſignifies a ſeat or claſs. It were to be wiſhed, indeed, that we had fewer of theſe ambiguouſly ſounding words, which, while they diſtinguiſh to the ear, confuſe and puzzle the eye.—See BOWL.

☞ Some ſpeakers, and thoſe not vulgar ones, pronounce the *e* in the firſt ſyllable of this and the following words, when the accent is on it, ſhort: as if written *frek-wenſe, frek-wently*, &c. They have undoubtedly the ſhort *e* in the Latin *Frequens* to plead; and the Latin quantity is often found to operate in angliciſed words of two ſyllables, with the accent on the firſt: but uſage, in theſe words, ſeems decidedly againſt this pronunciation. Mr. Sheridan, Dr. Kenrick, Mr. Elphinſton, Mr. Scott, Mr. Perry, Mr. Smith, W. Johnſton, and, if we may judge by the poſition of the accent, Dr. Aſh and Entick are for the *e* long in the firſt ſyllable; and Buchanan only marks it with the ſhort *e*. The verb to *frequent* having the accent on the ſecond ſyllable, is under a different predicament.—See DRAMA.

FURTHER, fûr'THûr. a (98). Forth, Further, Furtheſt. At a great diſtance; beyond this.

☞ Dr. Johnſon has proved beyond diſpute that *farther* and *fartheſt* are not the comparative and ſuperlative of *far*, but corruptions of the comparative and ſuperlative of *forth*. However true this diſcovery may be, it does not ſeem a ſufficient reaſon for altering the beaten path which cuſtom had formed in the uſage of *farther* and *fartheſt*. It is probable indeed, that *far*, *fore*, and *forth*, ariſe from the ſame original root: *extending beyond ſome other object* ſeems to be the leading idea in all. *Far* ſeems to intimate extenſion beyond an indefinite object; *fore* only ſuch extenſion as gives priority to the extended object; and *forth*, from its form ſeems to relate to the abſtract of ſuch priority of extenſion, or the very act of extending or iſſuing out. If, therefore, *forth* and *far* have different ideas annexed to them, the ſame comparative and ſuperlative cannot poſſibly ſuit with both; and as almoſt immemorial uſage has borrowed the comparative and ſuperlative of *forth* to form the comparative and ſuperlative of *far*, their ſenſe is now fixed to the latter adverb; and *forth*, inaſmuch as it differs from *far*, ſeems entirely to have loſt its compariſon. Notwithſtanding, therefore, that *farther* and *fartheſt* are very irregular branches of *far*, they are grafted on it by uſe, and cannot be altered without diverting the plain tendency of the language. Such, however, has been the force of Dr. Johnſon's criticiſm, that, ſince his time, every writer and painter, unleſs by miſtake, has uſed *further* and *furtheſt* for *farther* and *fartheſt*; by which means we have revived the comparative and ſuperlative of an adverb which has loſt its compariſon, and have loſt the comparative and ſuperlative of an adverb, which has been compared for theſe two hundred years. But though *further* paſſes very well for *farther*, when *far* is out of ſight, we feel the utmoſt repugnance at ſaying, "Thus *far* ſhalt thou go, and no *further*."

"Some dream that they can ſilence when they will
"The ſtorm of paſſion, and ſay, *Peace, be ſtill*;
"But "*Thus far and no farther*," when addreſs'd
"To the wild wave, or wilder human breaſt,
"Implies authority that never can,
"That never ought to be the lot of man."
Cowper's Progreſs of Error.

☞ Dr. Johnſon, Mr. Sheridan, Mr. Scott, W. Johnſton, Dr. Aſh, Dr. Kenrick, Mr. Barclay, and Bailey, place the accent on the firſt ſyllable of this word; and Mr. Nares, and Entick only on the ſecond. Mr. Sheridan and Mr. Scott give the *a* the ſound it has in *glaze*, and Dr. Kenrick gives it the ſound of *a* in *glaſs*. The great majority of ſuffrages for the accent on the firſt ſyllable, which is the moſt agreeable to the analogy of our own language, are certainly ſufficient to keep a plain Engliſhman in countenance for pronouncing the word in this manner; but as it is a French word, and a military term, a military man would bluſh not to pronounce it *a la Françoiſe*; and notwithſtanding the numbers for the other manner, I cannot but think this the moſt faſhionable.

☞ It is much to be regretted that the ſecond ſound of this word is grown much more frequent than the firſt. It is not eaſy to gueſs at the cauſe of this unmeaning deviation from the general rule, but the effect is to impoveriſh the ſound of the language, and to add to its irregularities. It has not, however, like ſome other words, irrevocably loſt its true pronunciation. Rhyme ſtill claims its right to the long open *o* as in *bold*, *cold*, *fold*, &c.

" Judges and ſenates have been bought for *gold*;
" Eſteem and Love were never to be ſold.
" Now Europe's laurels on their brows behold,
" But ſtain'd with blood, or ill exchanged for *gold*." *Pope.*

And ſolemn ſpeaking, particularly the language of Scripture, indiſpenſably requires the ſame ſound. With theſe eſtabliſhed authorities in its favour, it is a diſgrace to the language to ſuffer indolence and vulgarity to corrupt it into the ſecond ſound.—See WIND.—But ſince it is generally corrupted, we ought to keep this corruption from ſpreading, by confining it as much as poſſible to familiar objects and familiar occaſions: thus *Goldbeater*, *Goldfinch*, *Goldfinder*, *Golding*, and *Goldſmith*, eſpecially when a proper name, as *Dr. Goldſmith*, may admit of the ſecond ſound of *o*, but not *Golden*, as the *Golden Age*.

GROANFUL, gróne'fûl. a. Sad, agonizing.

GROAT, gráwt. s. (295). A piece valued at four-pence; a proverbial name for a ſmall ſum; groats, oats that have the hulls taken off.

GROCER, gró'sûr. s. (98). A man who buys and ſells tea, ſugar, plums, and ſpices.

☞ Mr. Nares obſerves, that this word ought to be written *Groſſer*, as originally being one who dealt by the *groſs* or wholeſale. There is not, however, he obſerves, much chance that *Grocer* will give place to *Groſſer*; eſpecially as they no longer engroſs merchandiſe of all kinds, nor inſiſt upon dealing in the *groſs* alone. The other derivation of this word, from *groſſus*, a fig, is not worth notice.

GROCERY, gró'sûr-é. a. Grocers ware.

GROGERUM, GROGRAM, } gróg'rûm. } s. Stuff woven with a large woof and a rough pile.

GROSS, gróſe. a. (162). Thick, corpulent; ſhameful, unſeemly; intellectually coarſe; inelegant; thick, not refined; ſtupid, dull; coarſe, rough, oppoſite to delicate.

☞ This word is irregular from a vanity of imitating the French. In Scotland they pronounce this word regularly ſo as to rhyme with *moſs*. Pope alſo rhymes it with this word.

"Shall only man be taken in the groſs?
"Grant but as many ſorts of mind as moſs."

This, however, muſt be looked upon as a poetical licenſe; for the ſound ſeems now irrevocably fixed as it is marked, rhyming with *jocoſe*, *verboſe*, &c.

GROSS, gróſe. s. The main body, the main force; the bulk, the whole not divided into its ſeveral parts; the chief part, the main maſs; the number of twelve dozen.

GUILT, gĭlt. s. (341) The ſtate of a man juſtly charged with a crime; a crime, an offence.

☞ It is obſerved in Principles, No. 92, that when *g* comes before ſhort *a*, the ſound of *e* ſo neceſſarily intervenes that we cannot pronounce theſe letters without it; but that when the *a* is long, as in *regard* we may pronounce theſe two letters without the intervention of *e*, but that this pronunciation is not the moſt elegant. The ſame may be obſerved of the *g* hard, and the long and ſhort *i*. We may pronounce *guide* and *guile* nearly as if written *egg-ide* and *egg-ile*, though not ſo properly as *egg-yide* and *egg-yile*, but that *gild* and *guilt* muſt neceſſarily admit of the *e* ſound between hard *g* and *i*, or we cannot pronounce them.

To GYBE, jībe. v. n. To ſneer, to taunt.

GYMNASTICALLY, jĭm-năs'tē-kāl-ē. ad. Athletically, fitly for ſtrong exerciſe.

GYMNASTICK, jĭm-năs'tĭk. a. Relating to athletic exerciſes.

☞ In this word and its relatives we not unfrequently hear the *g* hard, as in *Gimlet*, for this learned reaſon, becauſe they are derived from the Greek. For the very ſame reaſon we ought to pronounce the *g* in *Geneſis*, *Geography*, *Geometry*, and a thouſand other words, hard, which would eſſentially alter the ſound of our language. Mr. Sheridan has very properly given the ſoft *g* to theſe words; and Mr. Nares is of the ſame opinion with reſpect to the propriety of this pronunciation, but doubts of the uſage; there can be no doubt, however, of the abſurdity of this uſage, and of the neceſſity of curbing it as much as poſſible.—See Principles, No. 350.

GYMNICK, jĭm'nĭk. a. Such as practiſe the athletick or gymnaſtick exerciſes.

GYMNOSPERMOUS, jĭm-nō-ſpĕr'mŭs. a. Having the ſeeds naked.

GYRE, jīre. s. A circle deſcribed by any thing going in an orbit.

GYVES, jīvz. s. Fetters, chains for the legs.

☞ Mr. Sheridan and Mr. Scott make the *g* in this word hard; but Mr. Elphinſton, Dr. Kenrick, and Mr. Perry, with more propriety make it ſoft as I have marked it. Mr. Nares makes the ſound doubtful: but this majority of authorities and agreeableneſs to analogy have removed my doubts, and made me alter my former opinion.

To GYVE, jīve. v. a. To fetter, to ſhackle.

HALE, hāle. a. Healthy, sound, hearty.

To HALE, hāle, or hāwl. v. a. To drag by force, to pull violently.

☞ This word, in familiar language, is corrupted beyond recovery into *haul*; but solemn speaking still requires the regular sound, rhyming with *pale*; the other sound would, in this case, be gross and vulgar.—See To HAUL.

HALER, hā'lŭr, or hāwl'ŭr. s. (98). He who pulls and hales.

To HALLOW, hăl'lō. v. a. To consecrate, to make holy; to reverence as holy, as, Hallowed be thy name!

☞ In pronouncing the Lord's Prayer, we sometimes hear the participle of this word pronounced like that of the word to *Hollow*. This arises from not attending to the distinction made by syllabication between the single and double *l*: the double *l* in the same syllable deepens the *a* to the broadest sound, as in *tall*; but when one of the liquids is carried off to the next syllable, the *a* has its short and slenderer sound, as *tallow*: the same may be observed of *hall* and *hallow*, &c.—See Principles, No. 85.

HALLUCINATION, hăl-lū-sĕ-nā'shŭn. s. Errour, blunder, mistake.

HALM, hăwm. s. Straw.

HALVES, hăvz. interject. An expression by which any one lays claim to an equal share.

HAM, hăm. s. The hip, the hinder part of the articulation of the thigh; the thigh of a hog salted.

HAMLET, hăm'lĕt. s. (99). A small village.

HAMMER, hăm'mŭr. s. (98). The instrument, consisting of a long handle and heavy head, with which any thing is forced or driven.

HAMMERCLOTH, hăm'mŭr-clŏth. s. The cloth upon the seat of the coach-box.

☞ A critic in the Gentleman's Magazine gives the following etymology of this word, which we do not find in any of our Dictionaries:

"When coaches and chariots were first introduced, "our frugal ancestors used to load the carriage with "provisions for the family when they came to London. The *hamper*, covered with a cloth, was a "convenient repository, and a seat for the coach-"man. This was afterwards converted into a box. "*Hammer-cloth* is therefore very probably a corrup-"tion of *hamper-cloth*."

If the derivation of this word were worth spending a thought upon, I should think, that as the seat of the coachman is not boarded, but slung like a *hammock*, the word is rather a corruption of *hammock-cloth*.

To HAMMER, hăm'mŭr. v. a. To beat with a hammer; to forge or form with a hammer; to work in the mind, to contrive by intellectual labour.

To HAMMER, hăm'mŭr. v. n. To work, to be busy; to be in agitation.
